SIDE LIGHTS ON TIGHT MONEY

In these days of tight money and ninety-in-the-shade, a cable message from Milan regarding one, Vittorio Mariania, is a refreshing breeze. It appears that Vittorio is a ticket clerk at the Tivoli Railway station, in the suburbs of Rome. Steeped in the philosophy of his country and apparently oblivious of the higher cost of living, the railway corporation was making five dollars a week spread over his needs. Then, according to the message, $6,400,000 dropped into the young man's pockets without warning. But here is the story:—

"Forty years ago an uncle, Signor Allesandro Corrandoini, who was Italian consul at Alexandria, was obliged to fly for his life during the anti-Christian persecution. He proceeded to Buenos Ayres, where, being of a frugal turn of mind, and eschewing matrimony, he set his uncommon wits to the amassing of a fortune of 32,000,000 lire. He continued to live upon the interest till his death. When the will was opened it was shown he had all along intended to leave his estate to his nephew, who had been kept in utter ignorance of the fortune awaiting him."

Rich uncles like Allesandro unfortunately always live a long way off, and innocent nephews like Vittorio invariably earn about five dollars a week. Vittorio will probably marry a princess, buy a Ford automobile, and invest most of his fortune in Canadian securities. While we are worrying as to when the London underwriters will be more generous to new loans, and while it stays at ninety-in-the-shade, the Romish ticket agent is toying playfully with six million, four hundred thousand dollars. At least, that is what the cable message from Milan says. And it may be a piece of luck for Vittorio or it may be a catastrophe.

GETTING CANADA'S IMPORT TRADE

Some new and interesting light is thrown upon the eternal topic of Canadian-British-States trade in a report to the Imperial Board of Trade of Mr. C. Hamilton Wickes, British Trade Commissioner in Canada. He deals with Canadian trade for the year 1912, and introduces illuminating statistics regarding the share of Canada's imports obtained by the United Kingdom and the United States, respectively. These statistics are printed on another page in this issue.

The Commissioner discusses at length the trade methods of United Kingdom firms, and gives them some excellent advice in regard to their trade with Canada. He recalls that representatives of British manufacturers in Canada, as well as Canadians, express the opinion that the starting of branch establishments in Canada will assist the importation of British goods, and that, in some cases, it is almost essential to start branch establishments of British works for the purpose of assembling and manufacturing, in order to secure a due share of the expanding trade of the Dominion. One or two British merchant firms, as distinct from manufacturers or their representatives, have opened branch offices in Montreal. The British manufacturers, so accustomed to rely on the merchant to handle his business in overseas markets, have failed to secure the share of the Canadian import trade to which they are entitled is, asserts Mr. Wickes, partly due to the fact that so few of the British merchant houses have thought it worth their while to start offices in such centres as Montreal, Toronto and Winnipeg, to handle the trade between the two countries. The United States manufacturer, on the other hand, has largely built up his trade in oversea markets by sending direct representatives from the works to study the conditions on the spot. With Canada at his door, so to speak, it is not surprising that the principal trading centres of Canada are overrun with the representatives of United States manufacturers.

The trade of the United Kingdom with Canada has features which differentiate it in a marked sense from the export trade as commonly conducted between the United Kingdom and other self-governing dominions and some foreign countries, says the Commissioner. The merchant in the latter instance occupies a predominant position and handles a very large proportion of the trade, although it is recognized that there has been for some time a growing tendancy for manufacturers to establish direct relations with importers carrying on business in most oversea countries. In Canada, on the other hand, the merchants' presence is barely noticeable; direct trading between the wholesaler or retailer and the manufacturer is a marked feature and dominates the situation. Failure to appreciate this attitude has resulted in business passing the United Kingdom and going to the United States, so determined is the Canadian importer, wholesaler and large retailer, to trade only with the manufacturer. Even the commission agent or representative, resident and carrying on business in Canada (as distinct from a branch office of a manufacturer) comes in for a share of this dislike to trading with a "go-between." This feeling of the Canadian buyer is deeply rooted, quite as deeply, in fact, as is the custom or habit of the average United Kingdom manufacturer to rely on and employ commission agents and merchants for disposing of their productions in domestic trade, and to utilize the services of the export house for oversea trade. Accepting this view as correct, it will be understood how great are the difficulties underlying the situation and hampering the expansion of British trade with a market whose import trade has trebled itself in the short term of eleven years, and which is, as far as one can foresee, only just beginning to give indications of its future value.

One of the main reasons for the success of the United States manufacturer in Canada, says Mr. Wickes, is that that manufacturer himself goes after the business and deals direct with the purchaser. He cites a typical example of the methods, not of a combine or trust, but of an individual United States manufacturer. The concern's productions are similar (from a manufacturing point of view) to the output of one of the leading British steel manufacturer's works. This United States concern employs eighty-nine direct salaried representatives, in different parts of the United States, Canada and abroad. A liberal subsistence allowance per day is given to these representatives, and so long as orders are obtained, expenses are not questioned. For Canada, large maps are kept, marking the position of the representatives daily and the distance covered, and these are compared with the weekly reports sent in by the travellers to the head office sales department. Last year this same concern built an exhibition train to show its manufactures, visiting thirty-six cities in eighteen States during a period of some three weeks. The train was composed of an engine with two tenders (carrying their own coal), two suite cars, two dining cars, and nine exhibition cars, and is estimated to have cost $1,500,000. The overhead expenses were about $3,000 per day, the total trip costing about $60,000.

The Canadian Manufacturers' Association's "Made-in-Canada" train is mentioned in the report, and the British Trade Commissioner asks: "Is there any reason why such a train should not be utilized to exhibit British manufactures right through the Dominion, visiting the principal cities on a regular and published itinerary? The organizer of such a tour should engage a small office staff to accompany the tour—to include a man thoroughly conversant with transportation rates, ocean and rail, and a financial secretary acquainted with the customary terms of payment on sales, given by manufacturers and dealers, for the various main merchandise lines sold in the Dominion. Both of these men could no doubt be provided by the transportation company."

The Monetary Times understands that the proposal of a "Made-in-Britain" train to tour Canada is being seriously considered by commercial bodies in the United Kingdom.

Mr. Wickes' report will be read with interest both in Great Britain and North America. It is an excellent exposition of Canada's trade position, but as Mr. Wickes drafted it after only six months' residence in Canada, the memorandum naturally does not represent his final conclusions.

PAYING WITH MUNICIPAL BONDS

Provided the Columbia Bitulithic Paving Company will accept and hold treasury bonds for one year at six per cent., it will be given the contract of paving certain streets in the city of Vancouver at an aggregate cost of approximately $660,000. If other firms who tendered for the work will meet the price of the Columbia Bitulithic Company and finance the work on the same conditions, the work will be divided among them. This was the proposal made by the civic board of works to the firms recently tendering for about a million dollars' worth of paving within the Vancouver city limits.

The Calgary Paving Company has offered to lay pavement in Calgary for $2.15 per yard, and to accept the city's note in place of the usual cash payment.

The Monetary Times learns also that several firms supplying machinery and materials to municipalities have been offered bonds instead of cash in payment. There are several objections to such a course, and it seems doubtful whether commercial firms have any strong desire to develop suddenly into amateur bond houses. Municipal bonds should be sold by the regular methods. If money is tight, economy must be practised and work postponed. The foisting of municipal bonds upon paving, machinery and other companies gives no relief to the general municipal bond situation. It merely shifts the strain.

SPYING THE LAND

The Duke of Sutherland, one of the largest landowners in the world, who died last week, had become considerably interested in Canadian land schemes during recent years. This recalls a remarkable meeting of notable financiers in British Columbia about a year ago. In March, 1911, Mr. A. Barton Hepburn (who, by the way, a ticker message the other day dubbed Abe Martin Hepburn) was dined in London as president of the New York Chamber of Commerce by Lord Desborough, president of the London Chamber of Commerce. In the autumn of 1912, Mr. Hepburn, who is chairman of the board of the Chase National Bank of New York, made a tour of British Columbia. About seventy-five miles north of Ashcroft, his motor car swung out from the main road to a precipice, in order to afford a view of valley and mountain.

"I found three other cars just ahead of me," Mr. Hepburn told *The Monetary Times*, "and recognized and greeted Lord Desborough as one of the party enjoying the view with Lord Beresford, whom I had met many times in New York, and the Duke of Sutherland, to whom I was introduced. Truly a remarkable coincidence, my second meeting with Lord Desborough. It is a far cry from the Savoy Hotel in London, to a log cabin roadhouse along the British Columbia express route, where we took our luncheon."

These gentlemen were en route to Fort George, looking for real estate investments. Mr. Hepburn thinks that the incident indicated not only the confidence these important gentlemen had in the future of the Dominion, but that it also showed, in the opinion of some, a disposition on the part of English landholders to reduce their holdings of real estate in England and Scotland and increase the same in Canada.

FOREST FIRES AND CAUTION

Northern Ontario has again been the scene of disastrous forest fires this week. While sympathy is extended to those who have suffered, development in the north with a greater regard to fire waste than has been shown hitherto, would conserve much time, energy, capital and labor. In the recent fires, the danger of the contiguity of thickly wooded land to new towns has again been emphasized. This is noticeable in several towns where the bush is far too near the community. With the wind in a certain direction, a forest fire near the town might easily prove a serious menace and cause disaster.

The use of lumber in construction is more or less imperative in the early stages of town building in the north, but proper fire protection should be established to counteract the fire risk thus created. The building of cement and brick structures should be encouraged. The municipal authorities may properly take the lead in this direction.

CANADIAN PROVINCIAL SECURITIES

In the autumn, Canada's provincial premiers will meet at Ottawa to discuss several important matters with the federal government. This will prove an excellent opportunity to consider joint representation to the British government with a view to the inclusion of Canadian provincial securities in the British Trustee List. *The Monetary Times* has advocated this proceeding for many years. Last week, in correspondence with the premiers, we learned it is their general desire to consider the subject at the coming conference and to urge upon the proper authorities that action should be taken.

Since the present Ontario government has been in office the question has been considered and dealt with several times. The late provincial treasurer, Honorable Colonel Matheson, on several occasions brought the subject to the notice of people interested in Great Britain. Among the objections raised by the Home authorities have been:—

(1) That it would have a tendency to lower the price of Consols.

(2) That while the Home Government has power to disallow any legislation of the Parliament of Canada, it has no power to disallow the legislation of any of the provinces.

It is unlikely that any success will be obtained in the matter until the Dominion Government throws its heart and soul into the project. Luke-warm interest at Ottawa is not sufficient to impress the Imperial government with the strength of feeling regarding the matter in this country. We do not believe that the home authorities will allow the price of Consols to act as an obstacle, and we think that the Provincial governments of Canada will be willing to take every proper legal step to make possible the inclusion of their securities in the British Trustee List.

THE UNION LIFE COLLAPSE

The winding-up of the Union Life Assurance Company is a course which is in the best interests of policyholders and shareholders. The Canadian Associated Press last week was given to understand that the movement to wind up the company will not be resisted by the English shareholders. It was necessary for the shareholders, as shown at the recent meeting, to raise £75,000 additional capital, and, despite all the endeavors of the most prominent of them, this has not been done.

Further enquiries, however, showed that £30,000 of the £75,000 required was actually subscribed. Certain shareholders are keenly disappointed at the failure, and there is talk of a still further attempt to prevent the collapse.

The Monetary Times is inclined to think that the English shareholders should keep the £75,000 in their pockets and let matters take the course advised by the Department of Insurance at Ottawa. The officials there never counsel liquidation proceedings unless they are sure that every proper effort to save an insurance company has been made. Indeed, we think in their efforts to keep a company in business, for the sake of the policyholders, shareholders and Canadian credit, they sometimes allow the company too much rope. However, Mr. White, Minister of Finance; Mr. Fitzgerald, superintendent of insurance, and their assistants are quite decided that liquidation and reinsurance is the only sane course, and with that *The Monetary Times* is in full agreement.

The company is in deep water, and for the English shareholders to put a further £75,000 into it, as they propose, would be only to throw good money after good money gone bad. The Superintendent of Insurance says that the company is insolvent, that its capital stock is impaired, and not likely to be restored within one year, that its license has expired, and has not been renewed within thirty days, and that it is, for other reasons, just and equitable, the company should be wound up.

As to the policyholders, it is, indeed, fortunate that such a strong and reputable company as the Metropolitan Life of New York has agreed to reinsure them. This corporation could scarcely have offered better treatment than they have to the Union Life policyholders. They will be reinsured on the same basis upon which their old policies were issued. The many policyholders who allowed their policies to lapse when the Union Life troubles commenced, may have their policies renewed without medical examination upon payment of the back premiums. Again, policyholders who allowed their policies to lapse are not obliged to continue with the Metropolitan Life, but may realize upon their policies on the terms under which they were issued. Not many, if any, policyholders are likely to do that. Now that they carry insurance, they should continue to do so and not let their policies lapse. They may feel confident in the reputation and stability of the Metropolitan Life, who will take over the policies.

SMALL CHANGE

Now have come days when the financial weeds wither and die.

* * * *

In the excitement of the moment, some of them called him Thorn Payne.

* * * *

There is a whole lot about "Domestic Money" that never gets printed.

* * * *

If President Wilson needs any pointers on lobbying, Toronto's city hall might help.

* * * *

If you want the British investor even to glance at the bait, it must be five per cent.

* * * *

After all, we are only learning again that he who goes a-borrowing goes a-sorrowing.

Hon. W. T. White thought of going on holiday to Kennenbunkport, Maine, but being merciful to his correspondents, changed his plans and has sailed for plain England.

* * * *

La Rose made a new record in shipping a single car of 151,658 ounces of silver last week—which, with the company's big surplus, would make La Rose by any other name smell just as sweet.

* * * *

Will the United States Steel Corporation begin the construction of its proposed Canadian plant before the Dominion government decides what it will do about the Canadian iron and steel tariff? Will the plant be built at all if the tariff remains unchanged?

SECURITY TRUST COMPANY.

The Security Trust Company, Limited's second annual report shows net profits amounting to $12,691. The sum of $3,124 was brought forward and $5,158 transferred from stock sales account, making a total of $20,973, which was appropriated as follows:—To reserve fund $15,000, written off to office equipment $2,167, carried forward $3,806. Mr. W. Georgeson is president of the company and Messrs. P. Burms and J. Lineham vice presidents. Mr. T. J. Weir is general manager.

◆

IMPERIAL TOBACCO COMPANY TO SELL SHARES

The directors of the Imperial Tobacco Company of Canada will issue in London at par £417,123 new preference shares. The company was incorporated in 1908, and acquired as going concerns, the assets and business of the American Tobacco Company of Canada, and the Empire Tobacco Company, Limited. The company also acquired $422,000, out of a total $500,000 capital stock of the B. Honde Company, Limited, and $25,000 out of a total $50,000 capital stock of the National Snuff Company, Limited. The American Tobacco Company of Canada, Limited, was incorporated in 1895, and the Empire Tobacco Company in 1898. The former was the largest manufacturer owning the modern factory in Montreal, and the latter was engaged in the manufacture of plug tobacco from Canadian grown leaf, the assets acquired from this company include the factory erected at Granby, Que. The B. Honde Company, Limited, manufacturers of tobacco and cigarettes, and its factory is located at Quebec. The National Snuff Company was incorporated in 1907, and uses part of the factory purchased by the Imperial Tobacco Company of Canada, Limited. The British American Tobacco Company, Limited, formerly owned the majority of shares of the American Tobacco Company of Canada, Limited, and the Empire Tobacco Company, Limited, and now owns the majority of the ordinary stock in the new company. The company holds the agency in Canada for the goods manufactured in the United Kingdom under the brands of the Imperial Tobacco Company of Great Britain.

The authorized capital stock of the Imperial Tobacco Company is $11,000,000, consisting of $5,000,000 six per cent. cumulative non-voting preference shares, originally in shares of $5, converted into 1,027,937 shares of £1 each at the statutory rate of $4.86 2-3 per £1, and 6,000,000 ordinary shares of $100 each, total $11,000,000.

The directors of the company are Messrs. G. G. Allen, New York, N.Y.; J. T. Farrish, Granby, Que.; Hugh Cunliffe-Owen, A. C. Churchman, Thomas Gracey, Lawrence Hignett, Joseph Hood, A. G. Jeffress, London, England; Mortimer B. Davis, H. S. Bourke, W. J. Brennan, C. S. Campbell, David C. Petterson, P. R. Walters, and Ovila S. Perrault, Montreal.

◆

The Mayor of Redcliff, Alta., Mr. E. C. Danelz, will probably visit Toronto, in order to dispose of a $70,000 issue of debentures.

SUN TO REASSURE HOME LIFE.

The Monetary Times learns that an arrangement is in progress for the reassurance of the Home Life Association of Canada by the Sun Life. There is every prospect that this deal will be consummated in the near future. The terms proposed fully secure the policyholders, and have the approval of the Department of Insurance.

WESTERN LIFE INSURANCE COMPANIES.

The statement in a recent issue of *The Monetary Times* regarding life insurance in Canada, referred only to companies doing business under the jurisdiction of the Dominion department of insurance. Figures of the Prudential Life and Western Empire Life of Winnipeg and other companies working under provincial charters, therefore, were not included. Some facts from the Manitoba insurance report appear in this week's issue.

◆

INTERCONTINENTAL MORTGAGE COMPANY.

The Intercontinental Mortgage Company is one of Saskatoon's new financial houses. This company was incorporated in the Netherlands by charter on March 2nd, 1913, and was registered under the Foreign Companies Act on June 1st. The managing director for the Netherlands is Mr. Ad Vorstman, the managing director for Canada is Mr. Willem F. Kroon. The board of directors includes several prominent bankers. The advisory board in the Netherlands are Messrs, G. L. van der Heyden, accountant, The Hague; M. F. Dikkers, banker, Kampen; A. Rynbende, insurance company manager, The Hague; and the advisory board in Canada are Messrs. A. H. Hanson, G. E. McCraney and A. D. Duncan, Saskatoon. The capital of the company is 1,000,000 guilders. The company sells debentures in the Netherlands and places first mortgages on choicest securities in Canada. It has a charter for Saskatchewan and expects to commence business also in Manitoba and Alberta.

◆

Lethbridge municipality carries insurance on $259,875 worth of buildings, according to the statement submitted to the council by Mr. C. B. Bowman, who was awarded the contract of readjusting the city's insurance. The approximate insurance is now divided as follows:—Messrs. C. B. Bowman, $64,000; Skeith and Wilson, $25,000; Alberta Loan Company, $18,000; Ripley and Company, $18,000;; McBeth Agency, $18,000; Freeman McLeod Company, $14,000; Lowes and Company, $14,000; Ives and Stephens, $10,000; R. V. Gibbons and Company, $9,000; Wilkie and Company, $9,000; Asquith and Lindsay, $5,000; C. S. Donaldson, $5,000; Peat and Company, $5,000; Mitford and Company, $5,000; Alberta Securities, $5,000.

THE SITUATION AND THE OUTLOOK

IV.

FROM FIELD AND FARM

Conditions of the Crops—Mixed Farming is Being Extended—Fruit Growing

Wheat in the western provinces is from six to twelve inches high. Varying conditions prevail. The following opinions relative to agriculture, dairying, fruit culture are of interest at this time.

Crop conditions in Southern Alberta are satisfactory. Seeding of spring wheat, barley and oats is complete. About 75 per cent. of the flax acreage has been sown. Potatoes and sugar beets are above ground. Moisture and growing conditions have never been known to be better. Alfalfa is very promising.

The grain acreage shows an increase of about 10 per cent. and alfalfa about 100 per cent. over last year. In the vicinity of Lethbridge extraordinary interest is manifested this season in mixed farming especially in the irrigated district.

The wool clip in the Lethbridge district has doubled and will exceed one million pounds.

The demand for improved farms is notable at this time. An extraordinary amount of prairie is being broken. With the successful maturing of the spring crop, prosperity is assured, is the report of Mr. J. P. Tracy, the commissioner of commerce and manufactures at Lethbridge, Alta.

Mixed Farming in Central Alberta.

In Central Alberta and the Edmonton district crop conditions appear to be quite up to the average at this time of the year, states Industrial Commissioner Hall, of Edmonton. The winter was mild, spring was fairly early and seeding conditions have been generally good. The Hon. Duncan Marshall, Minister of Agriculture for Alberta, returning from a trip which covered most of the province, said:—

"The crops everywhere are coming along in fine shape and there is no lack of moisture anywhere. The spring wheat is doing exceedingly well and will to all appearances give a good yield."

Alberta is strong on mixed farming, particularly, perhaps in the central and northern parts. Garden crops in and about Edmonton are well to the fore for growth.

Dairying is growing in favor as a means of producing a steady and reliable revenue. Mr. A. A. Metcalfe, who has a herd of 30 cows near Edmonton, sold $5,460 worth of milk to the Edmonton City Dairy in 1912 and used $312 worth for his family and for feeding calves. Mr. Metcalfe's herd yielded him $192.41 per head. Pasture feed is excellent this year and the June flow of milk is quite up to the average for quantity and quality. Milk retails for 10 cents a quart and the dairies pay $2.40 a hundredweight, delivered at the dairy. This branch of farming is on the increase and new dairy farms are being started. New Zealand butter is sold in Edmonton and all of the cheese sold in this market is produced elsewhere; milk is too costly to be made into cheese.

From Other Districts.

The spring opened up nicely, and with fine weather after the frost had gone, to allow farmers to get their seeding done in good shape, then came a good warm rain followed by the fine warm weather, so that conditions in the vicinity of High River, Alta, so far, have been all that could be desired, suggests Mr. J. S. Jones, secretary of the board of trade, and at present grain and all vegetation is healthy and advancing, and slightly earlier than last year. A small percentage of fall wheat was killed in some locations. Those farmers who have hogs, cattle, chickens, turkeys, etc., are not worrying. What they grow can be readily disposed of at a profit, and in many cases takes its own weight to market.

All things considered, the prospects never looked brighter since the country was opened up. The indications too for more moisture are good and the farmers are pleased inasmuch as one or two more good showers should be sufficient to develop the hard wheat and in fact all the grain. It is evident even to the uninitiated that the 1913 crop around McLeod, Alta, will be one of the best that has been gathered in many years, states Industrial Commissioner Moffatt. There has been expressed the fear that much damage would result from cutworm, and a few isolated cases have been reported.

Conditions for seeding this year have been of the best. With the land in excellent shape after the winter snows and frost, work was rushed ahead rapidly as soon as the ground was tillable, and practically the whole of the wheat was in before the first rain of the season, is the report from Weyburn, Sask.

Secretary Patton, of Moose Jaw, Saskatchewan Board of Trade, remarks:—"The seeding in the Moose Jaw district commenced a little later this season than last. The farmers report, however, that the wheat crop is doing well. The general opinion is that the crop this year will be as good or better than that of last year.

"There is about twenty per cent. more land under wheat this year than last. The acreage under flax will not be quite so large. The farmers state that it does not pay to raise flax at prevailing prices. Agriculturists generally, are optimistic and say there is enough moisture in the soil at present to protect the seed through a long spell of dry weather."

So far as concerns crop conditions at Saskatoon and its surroundings, they are exceedingly favorable, is the comment of the city's commissioner, Mr. F. Maclure Sclanders. The germination has been remarkably even, and owing to the recent cool spell a splendid root system has formed. Further, the wheat this year appears to have got a good start of the weeds so that our fields will be very clean. This means clean grain and low dockage.

There is more water in the country to-day than has been seen for over twenty-five years. Creeks and sloughs which have long been dry are this year filled to the brim. Such being the case, it is safe to say that even with barely normal weather conditions a large and good crop is practically assured. I consider conditions encouraging.

Movement for Local Market.

Mixed farming in the Kamloops district is still in its infancy as also is fruit raising. However the past two years have shown marked improvement. The district on the uplands south of the city has been rapidly settling up and grain crops are being raised chiefly as yet. The advisability of raising more cattle, hogs, sheep, etc., however, is being forced upon the settlers' attention, and prospects for an improvement along this line, are good.

A movement to secure local market in Kamloops has greatly encouraged the farmers who have had difficulty in disposing of their produce. Besides getting cash for their stuff no difficulty will occur in disposing of any surplus above city's requirements. Thousands of new fruit trees are being set out each year, so that in a very few years there will be a large amount of fruit shipped out from this city.

Ontario Items.

The season so far may be said to have been favorable, thinks Mr. H. W. Baker, commissioner at Ottawa. The weather during seeding was dry and there has since been sufficient moisture to promote growth, although this has not been rapid owing to lack of warmth.

Apples promise to be a medium crop. Plums were injured by frost and will be light, as will also be small fruits from the same cause. The season, although it promised to be earlier, is now rather later than usual. Some market gardeners have suffered considerable loss through setting out plants too early.

In the Ottawa district there has been some injury to fruit trees from caterpillars. On the Central Farm they have been kept under control, thus demonstrating that it is quite practicable to keep them from doing much damage in orchards.

The vegetable growers of Kingston, Ont. district have a strong organization, with Mr. Robert Bushell, as president of the association. The vegetable crop is in very excellent condition, and the prospect of a very large production is favorable.

The Manitoba crop is reported to be coming along quickly, and is said by competent judges to be the best the west has seen for years. If the present conditions hold for a few weeks, a large crop is assured, is the favorable reply of Mr. C. F. Roland, Winnipeg's industrial commissioner.

In the Maritime Provinces.

Since January, 1912, when a large slag fertilizer manufactory started operations in Sydney, N.S., a revival of interest in farming began. Again, as the owners of this fertilizer business have established an experimental farm, the outlook is sure to improve.

The chief possibilities and attainments in connection with farming in the district immediately surrounding Sydney and the South Cape Breton coal fields are the raising of garden truck and maintaining dairies. The farms are of me-

(Continued on page 127).

ANALYSIS OF CANADA'S IMPORT TRADE

United Kingdom Had 65 Per Cent. of Dry Goods Business But Only 14 Per Cent. of Metals and Machinery—United States is a Strong Competitor

In a report to the Imperial Board of Trade of Canada for 1912, Mr. C. Hamilton Wickes, the British Trade Commissioner in the Dominion prints figures showing that imports from the United Kingdom in the year ended March 31st, 1912, showed an increase of 150 per cent. as compared with the imports in the year ended June 30th, 1900, but that great as the increase was the total imports into the Dominion from all countries have expanded in an even greater ratio.

It has been the practice of the Statistical Department of the Dominion, he says, to deal separately in their official publications with goods entering Canada free of duty and goods which are dutiable, so that it is possible to compare the relative importance of United Kingdom trade with Canada in free and dutiable goods. Of the imports from the United Kingdom 20 per cent. were free goods and 80 per cent. dutiable, whereas of the total imports from all countries 33 1-3 per cent. were free and 66 2-3 per cent. dutiable. Inasmuch as the preferential tariff in favor of goods imported from the United Kingdom affects the vast bulk of dutiable goods and these again form two-thirds of the total imports into the Dominion, it may be realized what a great opportunity the preference affords to United Kingdom manufacturers and merchants for developing trade between the two countries.

Sixty-Five Per Cent. of Dry Goods.

Dry goods (under which heading are included articles of apparel and attire, piece goods, articles for household use, minor articles of apparel, sewing threads and yarns, and noils) accounted for nearly 50 per cent. of the total imports into Canada from the United Kingdom; the share of the United Kingdom in the total imports of dry goods into Canada from all countries exceeds 65 per cent. But so far as total imports into Canada are concerned, manufacturers of metals, machines and machinery come easily first in importance with a value for the fiscal year 1911-1912 amounting to $140,000,000; the dry goods trade is a poor second with a value of $79,000,000 from all countries. While the percentage share of the United Kingdom in the dry goods trade exceeds 65 per cent., for machinery and metals, it is only some 14 per cent. The proportion of British trade in respect of imports of machines, machinery and metal manufactures admitted "free" was 23.8 per cent., or double the British proportion of the total trade in these lines entered as "dutiable" (11.8 per cent.). To this fact can be traced (in great part) the falling off (3 per cent.) in proportion of imports from the United Kingdom to the total of dutiable imports into Canada, comparing 1912 with 1900. How great is the effect of the dutiable metal figures on the total United Kingdom trade with Canada is demonstrated directly we deduct from the total imports of dutiable goods into Canada, the figures relating to dutiable metal manufactures, machines and machinery. The United Kingdom's proportion of dutiable imports in 1911-1912 at once jumps to 32.8 per cent. If we now turn to the dry goods trade (nearly the whole of the items composing it being dutiable) to see what the effect would be of eliminating the dry goods figures from the total dutiable imports from all countries into the Dominion, we find the British percentage shrinks to 14 per cent. No other class of United Kingdom trade with the Dominion has such far-reaching effect as the two above mentioned.

The imports into Canada from the United States in the year ended March 31, 1912, amounted to about $330,400,000, or 63.4 per cent. of the total imports into the Dominion. In order to determine as closely as possible the class of trade in which the United States is particularly successful on the Canadian market, lists have been prepared showing in detail the items contained in the official trade and navigation returns, in which the United States share of the imports is shown to exceed 75 per cent. of the total, and it has been ascertained by means of these lists that the total of such items represents imports to the value of $274,750,000 or nearly 53 per cent. of the total imports of all goods from all countries.

The first appended table summarizes the total values of these items divided according to imports in which the United Kingdom can compete and imports which from the point of view of United Kingdom trade are practically non-competitive, the latter include such articles as Indian corn, wheat, coal, fruits, raw cotton, certain manufactures of wood and vehicles such as farm wagons, drays, etc.

The second statement below sub-divides the above into imports under items in which the United States share of the trade is between 97 per cent. and 100 per cent., 89 per cent. and 96 per cent., and 75 per cent. and 88 per cent. of the total respectively.

The imports from the United States under these items, viz., $258,623,031, represent 80 per cent. of the total imports into Canada from that country; also, that of this 80 per cent., 46.5 per cent. may be taken to be non-competitive so far as the United Kingdom is concerned. The balance is dealt with as competitive, yet the United States percentage amounts to 90.9 per cent., the United Kingdom securing only 6.4 per cent., and all other countries under 3 per cent. Copies of the complete lists may be seen at the Commercial Intelligence Branch of the Board of Trade, 73 Basinghall Street, London, E.C. By consulting these lists the items which go to make up the total may be scrutinized, the tariff preference (where a duty is imposed) may be observed, and the shares of the United Kingdom and the United States in each item may be compared.

The following statement shows the imports from the United States and the United Kingdom under the remaining headings, in which the United States does not secure as much as 75 per cent. of the total trade; these items represent 47 per cent of the total imports into the Dominion:—

Country of shipment.	Imports. Dollars.	Proportion of imports to total imports. Per cent.
United Kingdom	101,425,921	43.1
United States	66,460,917	28.2
Other Countries	67,170,639	28.7
Total	235,057,477	—

It will be noted with satisfaction, but not with surprise, says Mr. Wickes, that the United Kingdom occupies the premier place, securing 43 per cent. of the trade compared with the United States' 28 per cent., the percentage of all other countries amounting to 28.7 per cent. An inspection of the items which go to make up this last table will show that the major portion of the United Kingdom trade is in respect of the following articles: Dry goods, groceries (such items as whiskey, tea, biscuits, pickles, sugar, sugar candy, provisions, etc.), netting, fishing lines, cordage and twine, raw wool, diamonds, explosives, oil paintings, bristles, etc.

	Total Imports into Canada. Dollars.	Imports from United States of America. Dollars.	Proportion of Imports from United States of America to Total Imports. Per Cent.	Imports from United Kingdom. Dollars.	Proportion of Imports from United Kingdom to Total Imports. Per Cent.
Competitive goods	152,107,918	138,263,530	90.9	9,878,041	6.4
Non-Competitive Goods	122,646,162	120,359,501	98.1	1,002,380	.8
Total	274,754,080	258,623,031	94.16	10,880,421	3.9

	Total Imports into Canada.		Imports from United States of America.		Imports from United Kingdom.	
	Non-competitive.	Competitive.	Non-competitive.	Competitive.	Non-competitive.	Competitive.
Imports under items in which United States of America share is between:—

NO DOUBT ABOUT TIGHT MONEY

Crisis Averted in London by Bank of England—Critics of Canadian Financing

It transpires that only by the intervention of the Bank of England in handling $45,000,000 that a financial crisis of grave consequence has just been averted.

Eight well-known financial houses were involved, some of whom deal very largely in Canadian, Mexican and Brazil stocks. Their position became acute when their banks intimated that they must withdraw the usual support, firstly, because of the continued general stringency, and, secondly, because of the necessity to make the best possible showing in the banks accounts for the half year now closing.

Curtailment of Bank Credits

This compelled the curtailment of ordinary bank credits, and these eight houses represented that an enforced realization of stocks at the present depressed prices would ruin them and many others. Thereupon the Bank of England came forward in the support of the other banks to the extent of £9,000,000.

The immediate anxiety is thus relieved, but the authorities, who are not generally regarded as pessimistic, say they see no sign of cheap money this year, nor any likelihood that the supply of money will be anywhere near equal to the demand. Some idea of the situation in the immediate future is obtainable from the fact that instalments due upon new issues before the end of June amount to $100,000,000, while short-term loans which have to be met between now and the autumn amount to $500,000,000. These include heavy Canadian civic and other commitments.

Winnipeg Loan Hangs Fire

Winnipeg civic authorities now in London find it impossible to make the intended civic issue at the present moment, and it is assumed that the city will postpone as far as possible projects involving heavy expenditures. No one doubts the excellence of the credit of Winnipeg and other leading cities of Canada, but, seeing the general conditions, fresh issues are practically impossible.

In the words of a well-known banker, "Canada is as sound as a bell, but she must mark time for a bit until the marked heavy fit of indigestion passes. It will all come right, but it needs patience and prudence."

Lake Superior Iron and Chemical Company

The London Financial Times grows sarcastic over the reorganization scheme of the Lake Superior Iron and Chemical Company, of which $3,000,000 first mortgage sixes were placed in London in October, 1910.

The bondholders are now asked to surrender their mortgage rights and to accept an equal amount of cumulative preference sixes.

The journal says: "We admit creditors are often a nuisance; Micawber was not the only person who found them so. Getting rid of awkward creditors by confiscating their security is a plan delightfully simple, but in the Old World, at any rate, it is still regarded as somewhat unorthodox. Bondholders will resist the scheme tooth and nail."

The public subscribed for $500,000, or over 66 per cent., of the new Dominion Canners sixes, issued in London. The price is now ½ per cent. premium.

◆

CITY'S BONDS IN PAYMENT OF LAND.

(Special correspondence.)

Calgary, July 1st.

The auditor's report on Calgary's civic book-keeping and finances was presented to the city council. Such strictures as the auditors thought proper to give utterance to are for the most part easily explained, so the city officials express themselves as pleased with the outcome. A committee of the council will deal with the report and pass upon the recommendations, some of which have already become a part of the accounting system at the city hall.

A by-law is being prepared for the purchase of 50 acres on the Bow River just west of Calgary for $155,000. This is the result of an understanding between the parks committee and the present owners of the property.

The vendors are agreeing to accept four and a half per cent. 50-year bonds in payment for the land, and are undertaking not to place the bonds on the market for at least five years without the consent of the city. This was deemed advisable in view of the fact that the city has a large accumulation of bonds which it is trying to dispose of on the money market.

Out-door work has been held back owing to wet weather; heavy rains were reported north and south. Retail trade suffered to some extent, but the fact that this week precludes any probable chance of dry weather injuring the grain crop, has made it comparatively easy to countenance delay.

AGRICULTURAL DEVELOPMENT IN QUEBEC

Increases in Farm Holdings—Orchards and Nurseries—Financial Returns

Agricultural Quebec shows marked developments and increases. The rural population, as given in the recent census returns, increased from 992,667, in 1901, to 1,032,618 in 1911. The area of land occupied in 1911 was 15,576,809 acres, as against 14,444,175 acres in 1901. Taking the land area of the province at the date of the last census, there was only 7.12 per cent. occupied as farm land.

The number of farm holdings in 1911 was 159,554, as against 150,999 in 1901. The average size per holding in 1911 was 97.63, as against 95.90 acres in 1901.

The area of improved lands increased by about 9½ per cent. in the decade, being 8,147,633 in 1911, as against 7,439,941 acres in 1901. At the last census 52.30 per cent. of the land occupied was improved, as against 51.51 per cent. in 1901.

Land in field crops was 5,399,223 acres in 1911, being an average of 33.8 acres per holding, as against 4,704,396 acres in 1901, or an average of 31.2 acres per holding; the land in orchard and nursery shows a slight decrease in area between 1901 and 1911; the land in vegetables increased from 28,809 to 63,216 acres in the decade; land in vineyards increased from 119 acres in 1901 to 709 acres in 1911. The record of land in small fruits was not taken in 1901, but in 1911 it is given as 1,961 acres.

Horticulture and Live Stock

The area of land under spring wheat for 1911 shows an increase over 1910, but is only one-half of that reported in 1900. There are increases in the land under oats, hay, buckwheat, and forage crops. There is an increase for 1910 of 3,433 acres in tobacco over that of 1900. The statistics of horticulture indicate that the number of fruit trees and the production of fruit is less in 1910 than it was in 1900. The production of small fruit shows a good increase.

Horses increased from 320,673 to 369,237, swine from 404,163 to 793,348. There are also large increases in all kinds of poultry. The number of milch cows decreased from 767,825 in 1901 to 753,134 in 1911; for the same period the number of other horned cattle increased from 598,004 to 697,860. Notwithstanding the increased price of mutton and lamb, the number of sheep shows a decrease from 1901 to 1911. There are increases in the numbers of all pure-bred stock, the greatest improvement being made in cattle and the smallest in sheep. The production of wool has fallen off by 31.42 per cent in the ten years.

The average value of horses in 1911 was $127.98; of milch cows, $37.51; of other horned cattle, $12.48; of sheep, $4.26; of swine, $7.61; in 1901, the average value of horses was $75.35; of milch cows, $27.03; of other horned cattle, $11.08; of sheep, $3.63; of swine, $7.78. The average value of all live stock per farm holding was $600 in 1911, as against $387 in 1901, and of field crops, vegetables and fruits was $448 in 1910, as against $315 in 1900.

Monetary Results Were Larger

The value of live stock sold in 1910 is given as $20,406,385, as against $6,650,436 in 1900. The value of animals slaughtered on the farm increased by $621,650; the value of wool, eggs, honey and wax increased by $2,342,746; eggs alone made up for $2,085,375 of this increase. The value of maple sugar and syrup increased from $1,356,481 in 1901 to $1,680,393 in 1911.

The number of weeks of hired labor on farms in 1910 was 686,114, and the value $5,077,987, being an average wage of $7.40 per week, as against 894,534 weeks in 1900, with a value of $451,512,674, and an average of $5.04. This is an increase over 4 per cent. in farm wages per week in ten years.

CAPITAL INTERESTED IN REGINA.

The visit of Messrs. A. deVeer and D. H. Andreas to Regina, is likely to result in the investment of much money in Regina and district. These gentlemen represent a large mortgage company in Holland, which may locate its Saskatchewan headquarters at Regina, and Manitoba headquarters at Winnipeg.

Messrs. McCallum and Hill, Regina, have made arrangements with a Norwegian company to loan money on Regina property at the rate of seven per cent.

Regina bond houses have recently purchased several bond offerings of municipalities and towns.

WANT AN AGENCY

In *The Monetary Times* this week, a prominent Winnipeg financial company is advertising for a fire insurance agency.

VALUE OF LIFE INSURANCE

XIX.

Death Duties and Assurance

BY C. A. HASTINGS.

In Great Britain, these duties are a tax upon capital; in Canada, at the present time, I believe I am correct in saying, that they vary a good deal. However that may be, man cannot evade them satisfactorily, unless he bequeaths his estate during his life-time. Here again life assurance steps in.

It may not be out of place to recall here a case which occurred recently in Great Britain. It was an assurance for two and a half million dollars. Few men can afford to carry so much, but it is significant that so wealthy a man should think it wise to place one-tenth of his estate into life assurance.

Excuse is Common One.

Wealth is such a very common excuse for not taking out a life policy, on the grounds that he can do so much better with his money. It is, however, a well-known fact that those who are doing exceptionally well with their money are the very men who not only do take out large policies, but which are also large in proportion to their wealth.

However, the policy I am going to describe is more useful to small estates than to large, because the savings left to his successors are, as a rule, solely, existence versus starvation, whereas the worst that can happen to wealthy persons is that less luxury is enjoyed. I will assume, for example, that a man is in his fortieth year, and that his estate will have to, some day or other, pay duty on $20,000. To provide 5 per cent., assuming that is the amount of duties payable, he would have to put aside an annual premium of a little less than 3½ per cent. on a whole of life with profits policy.

Capital Does not Depreciate.

Any person can figure out for himself how much protection should be bought at 3½ per cent. per annum to produce the required amount payable twenty-five years hence on the life of a man aged forty. On the death of the assured, whenever it happens, this policy will provide the wherewithal, without having to resort to a forced sale of any of the assets. To compare this method with that of any other, the assured will soon discover that, not only has he to live at least twenty-five years to produce the amount required—which assurance will do after he has made the first payment—but will also have to be lucky all these years if his capital does not depreciate—in assurance it is an impossibility.

The following articles in this series have already appeared:—

(1) March 1st—How to become one's own master.
(2) March 8th—How depreciation of assets can be met.
(3) March 15th—How to borrow at a profit.

◆

At the recent auction sale of Consumers' Gas Company's stock 10,310 shares were offered, and 6,810 were sold at and over the reserve price of 166. The sale realized over $570,000, thus the investors are getting their money on the basis of 6 per cent.

At the annual meeting of the St. Lawrence Sugar Refinery, Limited, the president, Mr. I. Baumgarten, presented the yearly statement showing a prosperous twelve months for the company. This was the first annual meeting since the reorganization, which took place about a year ago. The directors were re-elected for the ensuing year, the board being composed of Messrs. B. Baumgarten, president; O. W. Donner, vice-president; J. W. McConnell and E. A. Reincke, of New York.

PANAMA CANAL

Effect on Freight Rates—Traffic on the Suez and Panama (Expected) Waterways Compared

The Panama Canal is always thought of, first of all, with reference to the commerce between the two seaboards of the United States; yet it is probable that only one-tenth of the ships that pass through the canal in 1915 will be employed in the inter-coastal trade, says Professor Emory R. Johnson, in an interesting article on the famous waterway.

Whatever may be the effect of the Panama Canal on the rates charged by coastwise carriers upon inter-coastal traffic shipped from seaboard and inland points, he continues, it is certain that the costs of transportation will be reduced fully one-third. The American-Wawaiian Steamship Company pays one-third of the through rate, or on the average about $3.50 per ton of 2,000 pounds, to the Mexican National Railway across the Isthmus of Tehuantepec, for transferring cargo from the ship in one ocean to the vessel in the other. Through shipments via Panama are likewise billed at through rates, the Panama Railroad Company taking an agreed share of the total rate. The average cost of transferring cargo across Panama, from one steamer to another, is fully $3.00 per ton.

Saving Per Ton

This saving of $3.00 to $3.50 per cargo-ton will be only partially offset by the tolls of $1.20 per net vessel-ton charged for transit through the canal. A vessel-ton is 100 cubic feet of space, while a cargo-ton may be either 2,000 pounds of weight (more often 2,240 pounds on the ocean), or 40 cubic feet of space. Freight-vessels can transport between two and three tons of cargo for each net ton, and in actual service they average nearly two freight-tons per vessel-ton. Thus the tolls that have been fixed by the president will amount to about 60 cents per ton of freight, or, roughly, one-fifth the present average cost of transferring goods across the isthmuses of Tehuantepec and Panama.

What the New Canal Will Do

The canal will do much more than to provide a cheaper route for existing traffic. By making possible the through shipment of freight without transfer it will permit the movement of a heavy tonnage of lumber, ore, coal, and other commodities, which can seldom bear the expense of a double handling en route. The canal will bring into the channels of commerce the basic materials produced in large quantities by the extractive industries of the southern and western sections of the United States. The expenses of trade will be reduced and its volume expanded.

The simplest and most concrete measure of the service rendered by the Panama Canal will be the tonnage of the ships that use the waterway. This can be forecast with a fair degree of certainty, because it is possible to ascertain how much traffic now moves by routes that would be abandoned in favor of the canal route, and it is easy to find out how fast this available canal traffic is increasing.

The history of the Suez Canal, the great inter-oceanic highway with which the Panama Canal is closely comparable, is an open book. Last year, 5,373 ships, having a net tonnage of 20,275,000 tons, passed through the Suez waterway. The growth of tonnage in ten years had been more than 70 per cent.

The shipping using the Panama Canal annually during the first year or two of its operation, that is in 1915 and 1916, will amount to about 10,500,000 net tons. At the end of ten years the tonnage will doubtless have reached 17,000,000 net tons. The prospect thus is that the Panama Canal will start with less than half the tonnage which will then be making use of the Suez Canal.

Panama and Suez

Moreover, it will be a long time before the Panama Canal catches up with the Suez waterway in volume of traffic. Should the Suez tonnage continue to increase at the present rate, the volume of shipping served by the Suez Canal in 1925 will be double that passing through the Panama waterway. It is hardly probable that the Suez tonnage will continue to increase at its present high rate; while it may well happen that the stimulating effect of the Panama Canal upon industry and trade has been underestimated. Eventually, at the end of two or three decades, let us say, the traffic at Panama may equal or exceed that at Suez.

◆

Mr. Frank Sanderson, consulting actuary, left Toronto a few days ago for a two months' trip to England and Scotland. He is accompanied by his son.

Superintendent J. A. Zimmer, after being in charge of the Fort Wayne district for the Prudential of Newark, N.J., for the last three years is being transferred to Winnipeg district, Canadian division. His twenty years' service began as an agent at Milwaukee, April 26, 1893.

CANADA'S POPULATION

Percentages of Native and Foreign-born—Britain's Contribution—Movement From East to West

Of the total increase of 1,835,328 in Canada's population in the decade 1901-1911, the Canadian-born contributed 947,867 or 52 per cent. nearly, natives of the British Islands 394,507 or 21.50 per cent., other parts of the Empire 13,324 or 0.72 per cent., making a total increase of British-born, including British unknown, of 1,360,577 or more than 74 per cent. of the total increase from 1901 to 1911. The increase of 474,283 in the number of foreign-born comprised 279,392 European-born, 17,366 Asiatic-born exclusive of Hindus, and 175,781 persons born in the United States.

The net increase in the native population in the ten years 1901-1911 was 20.29 per cent. Prince Edward Island is the only province that shows for the period 1901-1911 a decrease in the number born in the province and living in Canada. The greatest increase per province for native-born is shown in the western provinces, being 183.84 per cent. for Alberta and Saskatchewan combined; 88.89 per cent. for Manitoba and 44.69 per cent. for British Columbia. The large Indian and Oriental population in the latter province has a tendency to keep down the ratio of the native population. Of the four original provinces of the Dominion the greatest increase per cent. in the native population for the decade was made by Quebec with 19.59 per cent., followed by Ontario with 16.58 per cent.

Born in British Isles.

The net increase of immigrants from the British Islands in Canada for 1911 over 1901 was 101.15 per cent. The English-born increased by 153.71 per cent., the Scottish-born by 102.55 per cent. The number of persons born in Ireland and living in Canada by the census of 1901 was 101,629, as against 92,874 in 1911, being a decrease in the decade of 8.61 per cent. This was the smallest decrease for any decennial census since confederation. The census of 1901 showed a decrease of 31.87 per cent., that of 1891 a decrease of 19.59 per cent., and the census of 1881 showed a decrease of 17.33 per cent. in the number of Irish imigrants living in Canada as compared with the census figures of 1871.

The number of persons born in the British Islands and resident in Canada at each census period is shown in the following table:—

Census Year.	Birthplace,		
	England and Wales.	Ireland.	Scotland.
1871[1]	144,999	224,422	121,074
1881	169,492	185,522	115,010
1891	219,688	149,184	107,594
1901	203,803	101,629	83,631
1911	519,401	92,874	169,391

---

[1] Ontario, Quebec and the Maritime Provinces only.

Table Showing Per Cent. Ratio.

The foreign-born numbered 752,732 in 1911 as against 278,449 in 1901, being a net gain of 170.33 per cent. in ten years. The population of European birthplace resident in Canada increased by 279,392 or 222.54 per cent., while those of American nativity increased by 175,781 or 137.44 per cent. in the decade. The Oriental born, exclusive of Hindus, who are classed as born in British possessions, increased by 17,366 or 73.65 per cent.

The per cent. ratio of the population resident in Canada by country of birth is shown in this table:—

Birthplace.	Proportion of population born in specified birthplace.		
	1911.	1901.	Increase + Decrease —
Total	100.00	100.00	....
Canada	77.98	86.98	— 9.00
British Islands ...	10.89	7.26	+ 3.63
British Possessions[1]	.34	.28	+ 0.6
Europe	5.62	2.34	+ 3.28
Asia[2]	.63	.46	+ .17
United States	4.21	2.38	+ 1.83
All other countries .	.33	.30	+ .03

---

[1] Exclusive of Hindus. [2] Including Hindus

From East to West.

The movement of population from Eastern Canada to the western provinces is given in the next table.

Province of birth.	Migrants.	
	Total.	Living in the West.
Total	482,059	352.735
Prince Edward Island	13,966	6,810
Nova Scotia	32,311	19,755
New Brunswick	25,961	12,507
Quebec	113,077	41,332
Ontario	296,744	272,331

Of the total population of Canada, 78 per cent. were born within the Dominion and 22 per cent. were immigrants, of the latter 11.6 per cent. were of British nativity and 10.4 per cent. were of alien birth. The per cent. of Canadian-born by provinces was 43.3 per cent. in British Columbia, 43.1 per cent. in Alberta, 50.5 per cent. in Saskatchewan, and 58.1 per cent. in Manitoba. In Eastern Canada the proportion of natives war larger, being over 90 per cent. in Quebec and the Maritime Provinces, and 79 per cent. in Ontario.

◆

JUNE FIRES.

Cedar Brook, Victoria County, N.B.—June 29.—5,000 acres crown timber lands. Lumber camp of Mr. J. D. McLaughlin, of Red Rapids. Loss, $3,000. Cause forest fires.

Clarendon, N.B.—June 29.—Inglewood Pulp and Paper Company's limits. Loss unknown. Cause, forest fires.

Earlton, Ont.—June 29.—Forest fires. Loss of $25,000. Damage was wrought at Elk Lake, Charlton, Englehart and many other points at Northern Ontario. Temiskaming and Northern Ontario loss at Englehart, $20,000.

Marmora, Ont.—June 23.—Hotel Royal. Loss, $25,000. No insurance. Dr. Jones' drug store. Loss, $2,200. Insurance, $1,200. Miss William's millinery store. Loss, $1,500. Insurance, $900. Mr. F. N. Morett's residence. Loss, $2,900 insured. Cause, supposed incendiary.

Montreal, Que.—June 22.—204-6-8-10-12, St. Lawrence Boulevard, ten firms involved. Loss, $100,000. Cause unknown.

June 28.—Dominion Park. Loss, $40,000. Cause, probably upset gasoline torch.

June 29.—Block, bounded by Latour and St. Genevieve Streets. Loss, $75,000. Cause, probably children playing with matches.

Nutana, Sask.—June 15.—Loss, $2,000. Cause unknown.

Winnipeg, Man.—June 28.—Mr. G. A. Foster's three cottages, Queen Street and Peter Avenue. Loss, $4,500. Insurance, $3,000, with Messrs. Allan, Killam and Mackay. Cause supposed incendiary.

FIRST WITH THE NEWS.

The Monetary Times during the past few weeks has again given its readers first news of important financial and business matters. These include:—

Establishment of the Armstrong-Whitworth plant at Montreal.

Sir Thomas Shaughnessy's statement regarding the distribution of Canadian Pacific Railway stock.

Purchase of the Madison Williams plant, at Lindsay, by the Boving & Company, of Canada, Limited.

Summary of the British Trade Commissioner's special report on Canada's trade to the Imperial Government.

Mr. J. K. MacDonald, president of the Confederation Life Company, on his visit to Winnipeg, presided at a dinner given by him to a number of the officials of the company in western Canada. Sir W. Whyte occupied the vice chair.

Mr. J. H. Brock, managing director of the Great-West Life Assurance Company of Winnipeg, has arrived at New York after a year's absence in Europe, where he has taken medical treatment. He returns greatly benefitted in health.

Mr. W. Robins, who has been inspector for the Hartford Fire Insurance Company in the province of Ontario, goes with the German-American Insurance Company as superintendent of agencies for Eastern Canada, succeeding Mr. Thomas C. Moore, who has become vice-president of the Potomac.

Some 25,000 acres, comprising fruit lands of Norfolk county for "prepared farms," including the entire southern portion, have been secured at a cost of over one million dollars on behalf of British investors. Mr. R. Home Smith is interested in the scheme which includes highway improvements and railway facilities.

CASUALTY AND MISCELLANEOUS INSURANCE

Employers' Liability and Guarantee Underwriting—Hail Insurance

The total personal accident premiums in Canada in 1912 of the twenty-three companies doing this class of insurance were $2,023,057, while the losses incurred were $999,582 and the claims paid were $984,168. The unsettled claims totalled $167,885.

The total automobile insurance premiums in 1912 of the seventeen companies licensed to do this class of business were $440,307, the losses incurred, $166,962, and the losses paid, $161,244. The unsettled losses were $30,706.

The burglary insurance premiums for the year of the seven companies transacting this form of insurance amounted to $66,042, the losses incurred to $15,740 and the losses paid to $10,535. The outstanding insurance in force totalled $7,612,514, under 4,203 policies.

Liability and Guarantee Insurance.

The total employers liability premiums for 1912 of the twenty companies doing this class of business were $2,846,073, while the losses incurred during the year were $1,482,745, and the claims paid were $1,248,329. The unsettled claims totalled $789,904.

The total guarantee premiums for 1912 of the sixteen companies doing guarantee business were $564,144, while the losses incurred were $129,876, the claims paid, $99,747, and the unsettled claims, $125,015. The total amount of guarantee insurance in force was $140,134,237.

Hail insurance was transacted by one company only under Dominion license, and the premiums were $249,261, while the losses incurred were $117,449, which amount was paid, so there were no unsettled claims at the close of the year. The amount of policies new and renewed during the year was $3,888,718, but there was no insurance in force at the close of the year.

Live Stock and Plate Glass.

Inland transportation insurance was transacted by ten companies, and the total premiums for the year were $86,077, while the losses incurred were $31,701, and the claims paid $28,487, with $3,346 of unsettled claims.

Two companies transacted live stock insurance, and the total premiums for the year were $127,533, under 4,901 policies for $3,291,643 of insurance. The losses incurred were $73,598, and the claims paid $70,739. The unsettled claims amounted to $13,506.

The total premiums of the fifteen companies transacting plate glass insurance were $189,827, while the losses incurred amounted to $85,990, and the losses paid to $81,579, the unsettled losses amounting to $14,017.

Twenty-nine companies and fraternal orders transacted sickness insurance, and the total premiums for the year were $1,012,966, while the losses incurred totalled $707,603. The claims paid amounted to $628,282 and the unsettled claims totalled $95,553.

The five companies transacting sprinkler leakage insurance received premiums totalling $32,118, covering $5,293,175 insurance, while the losses incurred were $22,930. The losses paid amounted to $25,158, and the unsettled losses were $3,245.

Steam Boiler Insurance.

Eight companies transacted steam boiler insurance, and their total premiums for the year were $135,377, while their incurred losses were $158,512, and the losses paid, $4,049. The unsettled claims totalled $85,800.

Only one company transacted title insurance, and the premiums for the year were $561 covering $88,661 of insurance. There were no losses incurred.

Tornado insurance was carried on by nine companies and their premiums for the year totalled $22,007, covering $4,861,264 of insurance. The losses incurred were $810, the losses paid, $790, and the unsettled losses, $20.

The one company transacting weather insurance received $30,959 in premiums, for $1,174,463 of insurance, while the losses incurred were $20,112 and the losses paid, $20,112, leaving no unsettled claims.

◆

FORT WILLIAM'S BOARD OF TRADE.

Fort William board of trade's annual report is an artistic production and contains many evidences of the city's progress. The officers of the board for the ensuing year are president, Mr. A. A. Wilson; vice-president, Mr. F. W. Fraser; secretary treasurer, Mr. J. W. Quinn; council, Messrs. S. J. McQueen, A. H. Knutson, J. T. Horne, J. Murphy, C. H. Jackson, Jos Enzer, F. G. Depew, J. A. Fife, R. S. Piper, S. C. Young, J. K. Ockley and E. H. Baumgarten.

POLICYHOLDERS AND LOANS

Assets Which Should be Held Inviolate—Small Percentage Redeemed in Cash

Policy loans are of much interest to insurance companies and to policyholders. The president of one insurance company, Mr. John M. Taylor, of the Connecticut Mutual Life Insurance Company, has dealt with the policy loan question in his annual message to the members as follows. He states:—

(1) It is the surrender or hazard of what often proves to be the last reliable asset or fund, for the support, education and welfare of the family in the time of its direst need, and which should be held inviolate.

(2) It is a mortgage of what may prove to be the only sure protection of an estate against its insolvency when the policy matures.

(3) The chances are many to one that it will never be repaid. Experience clearly proves that but a very small percentage of these obligations is ever redeemed in cash.

(4) If not paid in cash it must be taken from the amount of the policy and only a margin is left for the beneficiaries.

Pay Loans and Redeem Policies.

(5) In many instances it is not used to pay the premiums on insurance to keep it in force; to meet the cost of living; or to lift a mortgage on the home or for other necessities. It often goes in various speculations—sometimes on margins, in the hazards of other ventures, and in paying or making loans elsewhere bearing higher interest rates. It puts the chances of business loss against the security of a man's household.

To a man who has become uninsurable from age or disability, no appeal is necessary to him to hold fast to the sure protection he has, which once lost he can never restore. To a man who takes the known and open risk and pledges his policies for any purpose, there comes a clear, instant and imperative duty. It is this: to pay his loan at the earliest possible moment and redeem his policies.

What is Involved.

Business credit, the solvency of an estate, the protection of wives and children, the honor of a true manhood, demand and inspire such action; and behind them all stands the naked truth that an asset, a property, an absolute security has gone—conditionally, to be sure—but with the chances largely against its recovery.

Failure to perform this duty involves another of next importance and value, and that is, to forthwith replace the pledged insurance. Once this cornerstone of safety, this indemnity against the greatest of all certain losses, this safeguard of helpless and dependent ones, be removed, no man of sound business views, of conscience, or of honor, will hesitate to make good what he has put in jeopardy for one cause or another.

◆

NEW BANK ACT IN FORCE

The revised Bank Act went into force on Tuesday.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended June 27th:—Cobalt Townsite M., 83,990; McKinley-Darragh B.M., 65,200; Dominion Reduction Co., 86,355; Cobalt Lake M. Co., 64,586; O'Brien M., 83,920; La Rose Mines, 196,280; Chambers Ferland Mines, 129,152; Casey Cobalt Mines, 134,335. Total, 843,782. The total shipments since January 1st are now 19,881,519 pounds or 9,940 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

◆

In an article discussing British capital investments, the London Economist says that, despite the 4½ per cent. bank rate and the depression of the Stock Exchange, applications for new capital on the London market have reached the high figure of over £70,000,000 ($350,000,000) in the last three months. This total was exceeded in no corresponding quarter of any year in the last decade, except in the rubber boom period of 1910. For the half-year the total of new issues has exceeded £120,000,000 ($600,000,000).

HUDSON'S BAY REPORT

Profits from Land Sales—Sales Shops Are Being Modernized

The report of the Hudson's Bay Company for the year ended May 31st, 1912, states that under the authority given to the Governor and committee by resolutions passed on July 12th, 1912, the Governor and committee accepted the supplemental charter in the form submitted, and subdivided the ordinary shares of the company of the denomination of £10 each into ten shares of the denomination of £1 each, and issued 200,000 five per cent. cumulative preference shares of £5 each, which were offered at par to the holders of the then existing ordinary shares in the proportion of two new shares for one ordinary share of the nominal value of £10. The issue was favorably received, only a few shareholders failing to take advantage of the opportunity afforded them to increase their interest in the company. The shares not taken up by the shareholders were disposed of at a premium of £4,635 13s., and after deducting brokerage and stamps and the expense of the issue, amounting to £1,549, the balance of £3,086 has been carried to the credit of profit and loss account.

Modernizing Sales Shops

Good progress has been made during the period under review towards bringing the sale shops up to modern requirements, says the report, and the improvement in the results achieved by this department is gratifying to the Governor and committee. Owing to the pressure of business in the various trades in Canada, the contractors for the construction of the new Calgary store were unable to obtain punctual delivery of certain machinery and fixtures, and consequently the completion of the building has been delayed, but it is expected to be ready for business in the early autumn. A warehouse with railway track facilities has been built at Calgary by the company's construction department, and will prove of value in dealing with the large quantities of goods it will be necessary to handle at this point. The Yorkton store was completed and opened for business on May 2nd. A wholesale depot has been erected at Edmonton, and considerable additions and alterations made to the retail store there to equip it for the requirements of the growing trade. At Vancouver building operations have been commenced on the recently acquired site adjoining the store, and when this is completed the old store is to be rebuilt to make a homogeneous whole. At Victoria a retail store (on Douglas, Fishguard and Herald streets) is about to be erected, and plans are being prepared for the new departmental store on Portage avenue, Winnipeg.

Price of Farm Lands

During 1912-13, the Hudson's Bay Company obtained for their farm lands an average price of $21 per acre. At this price they sold 53,581 acres, as compared with 42,554 acres in 1911-12 at $19 per acre. The year 1910-11 was the last year of big sales of farm lands, when 267,038 acres were sold at $14 per acre. In spite of the smaller land sales, the profit noted in the latest report is the largest of recent times, and the source of the high profits was the sale of town lots at Edmonton in May, 1912. That sale offered town lots in Edmonton, and for the first time it advertised them in London, and offered land direct to English investors. The sale seems to have been a financial success, as the sale of town lots in Edmonton appear in the accounts as having provided £372,786 towards the revenue of the year. The trading profits have again expanded.

How Profits Compare

The profits of the past year are compared with those of previous years in the following table:—

Year Ending March 31.	Net Land Receipts.	Fur and Trading Profits.	Total Net Profits.
1903	£177,857	£142,001	£319,858
1904	201,189	98,933	300,122
1905	207,364	102,969	310,333
1906	262,035	190,207	452,242
1907	283,879	197,688	481,567
1908	180,428	141,594	327,022
1909	175,476	80,391	255,867
1910	240,045	166,156	406,201
1911	548,512	159,966	708,478
1912	273,268	196,070	469,338
1913	589,926	228,324	818,250

THREE COMPANIES CHANGE THEIR NAMES.

The J. H. Hanson Tilley Company, Limited, has changed its name to the J. H. Hanson Company, Limited.

The Commercial Basis Tyre Company, Limited, has changed its name to the Progressive Tire Company, Limited.

McArthur-Richey-Trimble, Limited, has changed its name to Richey-Trimble, Limited.

STEADY PROGRESS FOR CANADA

Sir Thomas Shaughnessy Gives to Wall Street Interesting Views of Canadian Conditions

Canada has to thank Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, for a comprehensive statement issued in New York regarding Canadian conditions. There has been a decided tendency in Wall Street to exaggerate considerably the period of financial rest and adjustment now occurring, without any disaster, in the Dominion. Sir Thomas finds nothing in the Canadian situation to cause anxiety. So long as immigration continues at the present rate, the highest ever known, Canada's progress cannot be retarded. In fact, he forecasts that in two years from now there will be even more accelerated expansion. In an interview with a representative of the Wall Street Journal, Sir Thomas said:—

"There has been no over-expansion in Canada. Building trades returns show no recession in operations, and bank clearings in the west continue high. So long as we continue to receive immigrants at the record rate now prevailing, Canada's business must continue to expand. Two years from now I expect to see expansion in an even more accelerated volume.

That Trade Balance Again

"Our so-called adverse trade balance is the result of our rapid growth and goes to show that Canadian manufacturers are unable to supply the demand. We bought 250,000 tons of rails in Canada this year, but had to buy additional tonnage in the United States because Canadian makers could not supply our full demands. It is the same in other industries. That adverse trade balance is a measure of our business activity."

That there had been serious and excessive speculation in real estate, President Shaughnessy was inclined to regard as a myth. While admitting that some purchasers of lands may have to wait a while for their holdings to show a profit, as a phase of over-expansion he brushed it aside. "The value in the land is there," he asserted.

Canadian Pacific Railway Prospects

"Crop promise this year is for good yield, and if that promise is maintained to harvest time, Canadian Pacific should show gross earnings in the coming year of $150,000,000 and net of $50,000,000. For the fiscal year closing with this month, gross will exceed $138,000,000 and net $47,000,000.

"The company is comfortably off in the way of cash, being placed so especially by the recent $105,000,000 common stock issue which will be full paid in four months. Our construction contracts, of course, are exceptionally heavy. Our new construction in the last two years has aggregated over $50,000,000, and we have some 1,800 miles of work under way at the present time. Then, too, our equipment orders amounted to some $75,000,000.

"Our assets outside the railway are exceptionally large and growing in value. Canadian Pacific's land holdings, while gradually being disposed of, are still large. In the city of Vancouver alone we still own property worth $10,000,000, and at that our holdings have been much decreased.

"But Canadian Pacific has embarked in many enterprises which will be valuable as sources of revenue in the way of freight. For example, we stepped into the breach in the case of the mines (gold) in Rossland, B.C., and have been instrumental in shipping $40,000,000 out of that territory. Our entrance into the coal mining business is another instance. In entering such enterprises we are building for the future, intent on the traffic to come from these developed territories."

Question of Freight Rates

President Shaughnessy declined to discuss the western Canada rate situation because arguments are now being had before the Canadian Railway Commission on application by western shippers for lower rates.

"All we ask," he said, "is a fair hearing of our side of the case. Many commodities used in our business have to be imported from the United States, and we have to pay duty thereon, increasing our expenses above those of the roads beyond the border. Coal, for illustration, we import from the United States, and our fuel cost is necessarily above that of American roads on account of the added burden of the duty. This year we bought 45,000 tons of rails from American makers, and had to pay the import tariff. These added costs, we think, are worthy of consideration.

"There has been some misunderstanding regarding the position of Canadian Pacific in respect to its liability to rate regulation by the railway commission. This misunderstanding is particularly current among German holders of the stock. Under the original agreement by which the Canadian Pacific Railway proper was constructed from Calgary to Port Moody, there was to be no supervision of rates so long as not exceeding 10 per cent. was shown as earned on the original investment. Of course that agreement did not cover any part of the road, but that one line. Our earnings having exceeded the point fixed we attempted no subterfuge, but admitted our liability to rate regulation. Canadian Pacific policy is against subterfuge. In other words, we believe that if we are fair to the people, they will be fair to us."

JUNE FIRE LOSSES

Exceed Three Millions and Total for Six Months is More Than Two-thirds of Last Year's Waste

The Monetary Times' estimate of Canada's fire loss during June amounted to $3,069,446, compared with May loss of $2,123,868 and $4,229,412 for the corresponding period of last year. There were 39 fires at which the loss exceeded $10,000. The following is the estimate for June losses, and does not include losses caused by forest fires in Northern Ontario and in New Brunswick:—

Fires exceeding $10,000	$2,503,850
Small fires	165,234
Estimates for unreported fires	400,362
	$3,069,446

The following are the monthly totals of the losses by fire during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 1,275,246	$ 2,250,550	$ 3,002,650	$ 3,913,385
February	750,625	941,045	1,640,153	2,037,386
March	1,076,253	852,380	2,261,414	1,710,756
April	1,717,237	1,317,900	1,355,055	1,470,622
May	2,735,536	2,564,500	2,251,815	2,123,868
June	1,500,000	1,151,150	4,229,412	3,069,446
July	6,386,674	5,384,300	1,741,371	....
August	1,667,270	920,000	1,164,760	....
September	894,125	1,123,550	883,949	....
October	2,195,781	580,750	1,416,218	....
November	1,943,708	1,506,500	1,184,010	....
December	1,444,860	2,866,950	1,769,905	....
	$23,593,315	$21,459,575	$22,900,712	$14,325,463

Conflagrations Were Numerous.

The fires at which loss was estimated at $10,000 and over, were as follows:—

Nelson, B.C.	Mine plant	$50,000
Burdette, Alta.	Business section	30,000
Crowland, Ont.	Six houses	10,000
Regina, Sask.	Exhibition buildings	60,000
Sydney, N.S.	Church, etc.	125,000
Vancouver, B.C.	Business block	11,000
Sutton, Que.	Veneer plant	75,000
Montreal, Que.	School	50,000
Winnipeg, Man.	Residences	13,850
Earlton, Ont.	Business section	25,000
Englehart, Ont.	Railway property	20,000
Marmora, Ont.	Business section	25,000
Montreal, Que.	Business block	100,000
Montreal, Que.	Pleasure park	40,000
Montreal, Que.	Business block	75,000
Amherst, N.S.	Electric station	25,000
Peribonka, Que.	Pulp mills	50,000
Port Colborne, Ont.	Cork works	10,000
Wingham, Ont.	Saw mills	15,000
Quebec, Que.	Factory	25,000
Fasset, Que.	Lumber mills	125,000
Alvinston, Ont.	Elevator	10,000
St. John, N.B.	Stores	50,000
Ottawa, Ont.	Business block	19,000
Montreal, Que.	Sash factory	125,000
Welland, Ont.	County buildings	40,000
Sydney, N.S.	Hospital	12,000
Three Rivers, Que.	Hardware store	10,000
Lake Annis, N.S.	Store	10,000
Biscoe, Ont.	Village	400,000
Moose Jaw, Sask.	Barn, etc.	11,000
Toronto, Ont.	Tannery	100,000
Northern Ontario	Lumber mills	15,000
Lemberg, Sask.	Flour mills	15,000
North Transcona, Man.	Chemical works	160,000
Prince Albert, Sask.	Lumber mill	500,000
Montreal, Que.	Business block	10,000
Winnipeg, Man.	Business block	32,000
Point Aux Trembles, Que.	Residences	25,000

Structures Destroyed and Causes.

The structures damaged and destroyed were: 58 residences, 20 barns and stables, 18 stores, 5 lumber mills, 5 warehouses, 5 boat houses, 5 hotels, 5 business blocks, 3 churches, 3 business sections, 2 restaurants, 2 schools, 4 sheds, 1 each, colliery, pulp mill, saw mill, foundry, packing house, hospital, icehouse, apartment house, fish plant, county building, lighthouse, newspaper plant, exhibition building, garage, mine plant.

There were destroyed 45 horses, 11 cows, 46 pigs, 3 calves, 1,060 chickens, 300 eggs.

Sets of harness, 15; buggies, 5; wagons, 3; automobiles, 5; motor boats, 13; rowboats, 12.

Feet of lumber, 36,000,000; logs, 100,000.

Wheat, 8,000 bushels; oats, 1,240 bushels.

Tons of hay, 25; barrels salted fish, 192; cheese, 183; gallons creosote, 450,000; pounds of confectionery, 26,000.

Of the presumed causes 7 were attributed to electrical defects, 7 forest fires, 7 lightning, 6 sparks, 5 defective chimneys, 5 gasoline, 5 children and matches, 5 incendiary, matches, 3 dropped cigars and cigarettes, 3 engine backfiring, 3 bonfires, 2 friction oily rags, 1 explosion and in many fires the cause was not ascertainable.

Eighteen Deaths.

During June, 18 lost their lives through fire.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	22
April	18	37	20	15	11
May	21	15	28	18	33
June	16	52	13	6	18
July	4	15	110	9	..
August	17	11	22	16	..
September	10	10	13	6	..
October	26	16	17	21	..
November	34	19	20	22	..
December	33	19	17	28	..
Totals	219	256	317	203	119

The fires at which fatalities occurred were:—

Toronto, Ont.	Burning building	1
Hamilton, Ont.	Set clothing alight	1
Lake Annis, N.S.	Coal oil exploded	1
Montreal, Que.	Coal oil exploded	1
St. John, N.B.	Fell on stove	1
Montreal, Que.	Playing with matches	2
Cobourg, Ont.	Set clothing alight	1
Glace Bay, N.S.	Burning building	1
Montreal, Que.	Set clothing alight	1
North Bay, Ont.	Playing with matches	1
Hamilton, Ont.	Burning building	1
Montreal, Que.	Burning building	4
Toronto, Ont.	Playing with matches	1
Montreal, Que.	Burning building	1
		18

Provincial Fire Losses.

The fire waste in each province for first six months of this year has been estimated by *The Monetary Times*, as follows:—

Ontario	$3,620,260
Alberta	2,684,853
Quebec	1,932,666
Manitoba	1,790,679
Saskatchewan	1,405,225
Nova Scotia	1,141,209
New Brunswick	809,936
British Columbia	565,518
Prince Edward Island	375,117
	$14,325,463

PERSONAL NOTES

Hon. W. T. White has left for England.

Sir Richard McBride will visit England in August on public business.

Mr. J. A. Tory, of the Sun Life Assurance Company, Toronto, is in Nova Scotia on vacation.

Mr. F. C. T. O'Hara, deputy minister of trade and commerce has left on a vacation trip to England.

Mr. W. Moore, B.A., has been appointed district manager for the Imperial Life Assurance Company at Brantford.

Professor H. E. T. Haultain has returned to Toronto after a four week's trip in the mining regions of Northern Ontario.

Mr. Thomas C. Moore, for several years past superintendent of agencies in Canada for the German-American, has been elected vice-president and manager of the Potomac Fire of Washington, D.C.

Mr. F. G. Carthew, who has been inspector in Ontario for the Pacific Coast Fire Insurance Company, has resigned to take up the agency work with the well-known office of C. A. Boehm, Waterloo.

REVIEW OF THE MONTH

Canadian Flotations in London—Investment Offerings—Dividend Changes

NEW LISTINGS

The Standard Bank listed 10,000 additional shares on the Montreal Exchange.

The Richelieu and Ontario Navigation Company, Limited, listed 100,250 additional common shares on the Montreal Exchange.

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were among those made in Canada during June:—

Granby Consolidated Company.—$1,500,000 six per cent. fifteen year convertible bonds at par and accrued interest.

Ontario Saskatchewan Properties, Limited.—$25,000 8 per cent. cumulative preference stock at par, with 50 per cent. bonus of common stock.

Maritime Nail Company, Limited.—J. C. McIntosh and and Company offered a block of 7 per cent. preferred stock with 50 per cent. bonus of common stock.

CANADIAN FLOTATIONS IN LONDON

The following flotations of interest to Canadians were made in London during June:—

National Drug and Chemical Company.—$2,000,000 divided into 200,000 six per cent. cumulative preference shares of £1 each at 105.

Brazilian Traction, Light and Power Company, Limited.—£2,000,000 6 per cent. cumulative preference shares at par.

Dominion Glass Company.—$1,437,500 7 per cent. cumulative preference shares at 97 1-3.

Dominion Canners, Limited.—£154,320 6 per cent. 1st mortgage sinking fund bonds at 99½.

DIVIDEND CHANGES

The Montreal Light, Heat and Power Company declared a quarterly dividend of 2½ per cent. payable on August 15th to shareholders of record of July 31st. This was an increase of 1 per cent. per annum.

The Duluth Superior Traction Company declared a quarterly dividend of 1 per cent. on the common stock payable on July 2nd, to shareholders of record of June 21st. This was a reduction of 1 per cent. per annum.

The Montreal Light, Heat and Power Company increased their dividend from 9 to 10 per cent.

◆

MAY RAILWAY EARNINGS.

The May statement of the Canadian Pacific Railway shows a decrease in net, although there was an increase of gross earnings, while for eleven months of its fiscal year the company is still upwards of $3,000,000 to the good in the matter of net earnings.

The May statement follows:—

	May, 1913	July 1st to May 31, 1913
Gross earnings	$11,904,979.02	$127,721,269.56
Working expenses	8,400,949.16	85,103,140.99
Net profits	$3,504,029.86	$42,618,119.57

The Grand Trunk Railway's May statement shows net profit as follows:—Grand Trunk proper increase, £39,400; Canada Atlantic decrease. £1,450; Grand Trunk western decrease, £16,000: Grand Haven decrease, £11,000; whole system increase, £10,950.

The Canadian Northern Railway's May statement of earnings and operating expenses is as follows:—

	1913.	1912.	Increase.
Gross earnings	$2,218,400	$1,822,100	$396,300
Expenses	1,638,200	1,364,000	274,200
Net earnings	580,200	458.100	122,100
Mileage in operation	4,297	3,981	316

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows at closing:—

	Between Banks.		
	Buyers.	Sellers.	Counter.
N.Y. funds	3-64 pm.	1-16 pm.	⅛ to ¼

The directors of the Russell Motor Car Company declared the usual quarterly dividend of 1¾ per cent., being at the rate of 7 per cent. per annum on the preferred capital: dividend being payable on August 1st to shareholders of record July 16th.

CANADA'S CREDIT ON SOLID BASIS

Liquidating Two Large Loans in One Year—Growth, Development and Revenues

The events of the past few weeks have illustrated the uncomfortable position of the big international borrowers who have maturing obligations to meet in the immediate future and little or no ready cash for the purpose. Even when security offerings are made by nations in high credit, the flotations have not attained must success. Under such conditions the financial representatives who go to London to arrange for renewals or new loans meet with some discouraging experiences. Hon. Mr. White, in his recent budget speech, drew attention to the fact that the Dominion government had not been obliged to plead its case with the European bankers while conditions are so unfavorable. When the last Dominion loan fell due on 1st October, 1912—£1,235,000—the London market was in somewhat better position than at present, and doubtless Canada could have arranged for renewal if that had been necessary. But the cash was available and the loan was paid in full. Then there is a loan of £1,700,000 falling due on 1st October, 1913. The minister explained that provision will be duly made for payment of that loan also.

Help to Keep Credit Good

The liquidation of two such loans within a year—amounting to over $14,000,000—taken with the fact that the Dominion government has abstained from negotiating any new loans in this period, should help to keep Canada's credit good at the Imperial capital. In this connection the action of the Canadian Pacific Railway in tendering payment on 1st July, 1913, of about $35,000,000 bonds maturing two years later, must also prove decidedly beneficial for Canadian credit in England. These transactions show conclusively that Canada can put up a considerable amount of real money to pay off liabilities when the European money markets are practically dead-locked. Undoubtedly it will be considered in the United Kingdom and in Europe generally that any country that can reduce its national obligations, held outside, while at the same time promoting and encouraging a tremendous growth and development at home, is entitled to respect, states Mr. H. M. P. Eckardt, in a recent interesting article. Probably it would be safe to assume that if another colony of the empire, or a youthful foreign state, were developing at the same pace, its government would be an enormous borrower. Not only the corporations, cities and towns, but also the government itself, would likely be continually seeking loans at the European centres. It has also happened in the case of foreign countries undergoing rapid expansion, that liberties have been taken with the currency as well.

Adhered to Sound Principles

In addition to borrowing every dollar that Europe would lend, they have proceeded in some cases to inflate the currency through putting out a vast amount of government notes not covered by gold. During our prosperous period the Canadian government had been urged to take this path. Unwise advisers urged it to take and spend a part of the gold which it had bound itself to hold against its outstanding notes. The unwisdom of this advice is now much more easily perceived. Anybody who has a clear understanding of financial conditions as they exist can see that Canada's adherence to sound conservative principles during a period of considerable excitement, has helped materially to establish her credit in the great world markets on a solid and enduring basis.

It is very interesting to note the slow but steady reduction in the amount of the Dominion government's obligations outside Canada during the past two and a half years. On September 30, 1910, the amount of the funded debt payable in England, according to the Canada Gazette, was $282,364,723. Next month—October, 1910—it fell to $275,836,577. It held at that figure until April, 1911, in which month it fell to $271,050,677. In May, 1911, a further reduction—to $263,089,499—occurred. Then in October, 1912, it came down to $258,669,833. And if there are no new loans meantime, presumably the amount will stand at about $250,000,000 three months hence when the £1,700,000 loan is taken up.

In the same time the funded debt payable in Canada has been reduced from $4,892,910 to $2,264,436.

No Sign of Decreasing Revenue

Of course, this satisfactory record has been possible largely because of the abounding revenues—customs collections principally. And if our corporations generally are unable to float new securities in volume, one would naturally expect that imports into Canada would show a falling tendency and that the customs revenue might not show such large increases. However, up to the end of May there was no sign of decreasing revenue. The total revenue for April and May, 1913, was about 25 per cent. ahead of the revenue for the same two months in 1912, notwithstanding that the 1912 figures represented an increase of about 33 per cent. over April and May, 1911.

The Intercolonial Railway ordered 500 freight cars, and the Grand Trunk 25 locomotives during June.

UNION LIFE AGREEMENT SIGNED

Metropolitan Life Will Take Over Policies and Assets—Not Much Hope for Shareholders, Though.

The agreement reinsuring the policyholders of the Union Life Assurance Company has been signed. By its terms the policies and assets of the defunct company have been assumed by the Metropolitan Life Assurance Company of New York. Certain obstacles in the insurance laws of Canada and the United States, which threatened to stop the reinsurance negotiations, were overcome, and an arrangement was made which proved satisfactory to the official representatives of the departments of insurance in Canada and New York.

Terms of the Agreement

By the terms of the reinsurance agreement, the holders of the lapsed policies must be notified of their position. If they so desire they may have their policies renewed without medical examination upon payment of the back premiums. To insure the proper fulfilment of this provision the Metropolitan Life Company have agreed to supply the Department of Insurance at Ottawa with full particulars of each case and make a return as to its disposition. The policyholders who allowed their policies to lapse are not, however, compelled to continue with the Metropolitan. Under a further arrangement they may realize upon their policies in compliance with the terms under which they were originally issued by the Union Life.

The agreement comes into force immediately. The Metropolitan Life will take over the head offices of the defunct company at Toronto.

As to the Investments

Mr. G. B. Woodward, vice-president of the Metropolitan Life, says his company is assuming assets which the directors of the Union Life had valued at $1,400,000, but which the liquidator valued at about $600,000. These contain some doubtful investments, but he thinks with careful treatment and good judgment the company will realize between $500,000 and $600,000 from them.

The Union Life investments were analyzed in the Monetary Times early this year, and the article was later read in the House at Ottawa when the company's affairs were being discussed. "We are rather struck with the character of the company's loans and investments," the Monetary Times said of the 1911 report. "The loans on collateral securities amount to $374,000, and this is made up almost entirely by one loan to the Canada Provident Insurance and Investment Company on the security of $485,000 of the Imperial Loan and Investment Company stock. It would be interesting to know the whole story of this transaction, and to be more assured of the wisdom of placing so many eggs in one basket—and that made of common stock.

"Turning to the investments, we are not a little surprised to see so much money invested in the stock of building societies, as the following indicates:—

Canadian Birkbeck Loan and Savings Company	$ 6,900
Colonial Investment and Loan Company	86,238
Peoples Building and Loan Company	1,800
Reliance Loan and Savings Company	13,790
Standard Loan Company	15,165
Sun and Hastings Loan and Savings Company	21,700
Total	$145,593

"When so many excellent bonds and debentures can be now secured at good rates of interest and when it is to loan money at high rates of interest on safe mortgages, it seems somewhat perplexing to discover the reason why the management of the Union Life should have departed so far from the beaten track of approved life insurance investing."

Little Hope for Shareholders

Mr. C. A. Masten, K.C., representing the Minister of Justice, says that, with the policyholders fully protected, the liquidator would begin to realize on other assets, but he feared that after the creditors and solicitors had been considered it was not likely that there would be anything for the shareholders.

CALGARY HAS MANY BONDS TO SELL.

The Bank of Montreal, which is acting as fiscal agents to the city of Calgary, has been asked to arrange for the sale of $1,500,000 worth of bonds as soon as possible. The city has for sale $3,500,000 local improvement and general bonds. Money market conditions make it difficult to sell these securities at present.

Messrs. G. A. Stimson and Company, Toronto, have been given an option on $1,338,000 worth of 30-year general debentures.

The proceeds of the recent sale to Messrs. Brent, Noxon and Company of $263,000 is due, as well as the proceeds of the partial sale of $103,000 to Messrs. Stimson and Company, Toronto.

CANADIAN FORESTRY STATISTICS

Total Forest Area of the Dominion is Placed at 535,000,000 Acres

BY F. W. H. JACOMBE, M.A., M.F., OTTAWA.

The area of the forest-bearing land in the Dominion of Canada has been variously estimated, and even now it is not exactly known. A few years ago Mr. R. H. Campbell, Dominion Director of Forestry, after careful study and correspondence with authorities, placed the total forest area at 535,000,000 acres. The present uncertainty as to the actual extent of the forest areas of Canada bids fair, however, soon to be dispelled. Already the Government of Nova Scotia has made a rapid survey of its timber-lands, and the returns, which may be regarded as approximately correct, show that the area in that province at present actually forested is about 6,600,000 acres. The amount of coniferous (or softwood) saw-timber is in the neighborhood of 10,000,000,000 feet, board measure, and that of pulpwood is about 24,000,000 cords. Every summer for some years past the Dominion Department of the Interior, through its forestry branch, has had several parties in the field investigating the resources of areas reported to be forested. During the summer of 1912, and again in the present summer, the forestry branch of the British Columbia Government has energetically investigated the vast forest wealth of that province. Quebec, too, has an efficient and active forest service working along similar lines.

Mostly of Coniferous Species.

The forests of Canada consist mostly of coniferous species: pine and spruce, with hemlock, balsam fir and tamarack in the east and Douglas fir, western hemlock and western larch in the west. In the east the hardwoods comprise poplar, birch, beech and maple with some elm, ash and a few other minor species. Only in southern Ontario is there anything like the variety of hardwoods that is to be found in the Appalachian region of the United States.

In the report for 1911 of the Dominion Director of Forestry, Mr. H. R. MacMillan, now chief forester for the province of British Columbia, estimated from statistics collected by the forestry branch that the quantity of wood actually taken from the forests of Canada in 1909 was 2,896,000,000 cubic feet, with a total value of $166,000,000. Of this quantity about one-half (estimated at 1,430,000,000 cubic feet) was used for firewood, and of the remainder, owing to the great waste of material in the woods, only about one-half was likely to be actually used.

Canada's Wood Manufactures.

The forestry branch of the Department of the Interior has established a system for the collection of statistics relating to the different wood-manufactures of the Dominion. Returns published for the year 1911 show the following as the quantities and values of wood used:—

Description.	Quantity.	Value.
Lumber, bd. ft.	4,918,202,000	$75,830,954
Square timber for export, tons	34,847	766,406
Lath, pieces	965,235,000	2,212,226
Shingles, pieces	1,838,474,000	3,512,078
Pulpwood manufactured in Canada, cords	672,288	4,338,024
Pulpwood exported (unmanufactured), cords	847,939	5,340,592
Cooperage (slack), pieces	147,374,000	1,465,702
Cooperage (tight), pieces	5,762,000	—
Railway ties, pieces	13,683,770	5,237,424
Poles, pieces	585,703	1,056,277

Scarcity of Valuable Species.

The statistics collected by the forestry branch since 1908 reveal an increasing scarcity of the more valuable species, and show that species once practically ignored are now being adopted for lumbering purposes. Even in 1908 white pine (once practically the only kind of wood used) still led in lumber manufacture; but for some years the quantity of spruce used has exceeded that of pine; and it is now the most largely used species in the Dominion. The Douglas fir of the western provinces has made rapid progress and now stands third on the list of lumber woods. Hemlock, once entirely passed by the log-maker, stands fourth in point of quantity sawn for lumber. Similarly while spruce still easily leads among woods used for pulp, balsam fir (or "balsam")—which once had to bear the blame for nearly every poor "run" of paper manufactured—is more and more being used for pulp, though the consumption is still only one-fourth that of spruce. For railway ties jack pine has replaced cedar, and it is first on the list, though for poles the cedar is still easily first.

PACIFIC COAST PROGRESS WILL CONTINUE

Says Sir Richard McBride at Vancouver—Preparations for Future Development

(Staff correspondence.)

Vancouver, June 30th.

Sir Richard McBride, when he spoke before the Vancouver Progress Club, commented on the financial stringency, and remarked that public works in many municipalities were held back because of the lack of funds, but he said there was no reason why any resident of British Columbia should lose heart. Conditions were such that progress was bound to continue. The premier spoke at some length on the railway policy of the Government, declaring that all the lines now under construction in the province would be completed in two years. This increase in transportation facilities would materially assist in expansion in this province. He said that officials of the Northern Pacific were negotiating with the Government for right of way over the Fraser River bridge, and that the Chicago, Milwaukee and Puget Sound line would also come in. This railway was mentioned in a general way, but coming as it did from the first minister, coupled with rumors which have been prevalent, considerable importance is attached to it.

A further instance of activity was that the Western Canada Power Company would soon enter the field as a competitor with the British Columbia Electric.

North Pacific Shipping Route.

There have been indications of late that big shipping interests are watching the Northern Pacific routes. More than one new service of freight boats to and from this coast has been started since the first of this year. Perhaps the principal has been the inauguration of a service between Canada and the Orient by the big new Empress steamers of the Canadian Pacific Railway. That there will be greater commercial possibilities as far as this route is concerned is evident from the fact that the Blue Funnel liner Ajax has arrived from Yokohama, being the first of the Holt steamers to be placed in this service to augment the sailings of the regular European fleet. She will trade between American and Canadian Pacific coasts points and the Orient.

Mr. Griffith R. Hughes, of Victoria, who has returned from a tour of the world, has expressed the opinion that the apparent reluctance of the British small investor to risk his capital in Canada and the other colonies, is due to the fact that several dubious propositions have been offered them. Some years ago it was mining, and recently it has been real estate. Mr. Hughes says the result has been to make the people who might be glad to find a legitimate investment in these growing countries, and more especially its western sections of Canada, very timid. He believes that this feeling will not continue for long, when the character of many of the investments are realized.

Light and Power Developments.

The British Columbia Electric's big gas plant investment is coming to the front again. It is proposed to spend about three million dollars. This company operates in Vancouver now under the old franchise of the Vancouver Gas Company. Since the new site is out of the city limits, it is proposed to operate under the charter of the British Columbia Gas Company. As soon as necessary preliminaries can be carried out, No. 1 unit, costing $750,000, will be started. There are three units in the whole, and the site has an area of seven acres.

That capitalists are looking ahead is indicated by the project to develop a water power on Bridge River, by the Bridge River Company, composed of Vancouver interests. The location is on the route of the Pacific Great Eastern Railway. If plans are carried out, the expenditure will be about $8,000,000. The scheme has been favorably reported upon by engineers. The proposed power house will be within forty miles of the Canadian Northern Railway and Canadian Pacific Railway lines at Lytton and it is hoped by the promoters that both these railways will take power. If the market for power is favorable, the high tension wires may be run even into Vancouver. The project involves the construction of a large dam on Bridge River and a tunnel, a mile and three-quarters long.

◆

PUBLIC TOOK NINETY PER CENT. OF THIS.

Officials of the National Drug and Chemical state that over 90 per cent. of their £200,000 preference issue was taken by the British public.

◆

A roads and bridges by-law involving $40,000, was defeated in the municipality of Stewart, Alta.

MINING COMPANIES ARE PROMINENT

Number and Capitalization of This Week's New Incorporations

Mining companies are a prominent feature in this week's incorporations. Numerous fox farming companies are also noticeable. The total capitalization of all the new incorporations was $12,689,000, the number of companies being sixty-two. The largest being:—

Tough-Oakes Gold Mines, Haileybury, Ont.	$3,000,000
Sylvanite Gold Mines, Haileybury, Ont.	2,000,000
Amalgamated Nickel-Copper Mining Company, Ottawa	1,000,000
Kipawa Power Company, Toronto	1,000,000
St. Germain-des-Pres, Montreal	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Prince Edward Island	8	$ 830,000
New Brunswick	8	250,000
Quebec	10	2,132,000
Ontario	18	7,695,000
British Columbia	18	1,782,000
	62	$12,689,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Wilmer, B.C.—Wilmer Hotel, $12,000.

Vernon, B.C.—Vernon Golf Club, $10,000.

Hanceville, B.C.—Chilcotin Trading Company, $10,000.

County of Yale, B.C.—South Okanagan Estates, $500,000.

Hull, Que.—Clarke's Dairy, $500,000. J. I. McCracken, J. Lumsden, C. J. Booth.

Sunderland, Ont.—Brock House, $10,000. R. A. Purvis, A. D. McLean, G. C. Beall.

St. Catharines, Ont.—Armstrong Cork Company, $100,000. W. A. J. Case, J. B. Taylor, G. C. Loveys.

Murray River, P.E.I.—Murray River Black Fox Company, $150,000. M. J. McLeod, W. Kearney, T. L. Cook.

Salisbury, N.B.—New Brunswick Black Foxes, Limited, $60,000. A. E. Trites, R. A. Brown, V. E. Gowand.

Sault Ste. Marie, Ont.—Sault Flour, Feed and Seed Company, $50,000. M. Smith, W. A. Smith, W. Rossiter.

Moncton, N.B.—New Brunswick Land and Building Company, $20,000. J. A. L. Reid, T. Wilson, A. E. Peters.

St. Stephen, N.B.—Polley and Company, $49,000 (confectioners). J. R. Polley, Mrs. G. Polley, Miss H. P. Polley.

Quebec, Que.—Compagnie de Publication du Bulletin de la Ferme, $5,000. E. Julien, D. A. Gauvreau, J. O. Lagueux.

Ottawa, Ont.—Amalgamated Nickel-Copper Mining Company, $1,000,000. W. C. Perkins, H. F. Meech, A. W. Fraser.

Guelph, Ont.—Standard Oiled Clothing Company, $10,000. A. W. Holmstead, A. B. Mortimer, E. M. Carruthers.

Montague, P.E.I.—Taylor's Silver Black Fox Company, $180,000. R. A. Taylor, A. F. McKay, A. C. Jardine, St. John.

Cayuga, Ont.—Cayuga Fruit, Vegetable and Milk Conserving Company, $40,000. J. A. Murphy, R. S. Colter, W. F. Haygarth.

Black's Harbor, N.B.—The Sturgeon Cove Lumber and Land Company,, $49,000. L. Connors, H. R. Lawrence, St. George; J. A. Thompson, Beaver Harbor.

Victoria, B.C.—Canadian Panama Timber and Logging Company, $100,000. Lakelse Nurseries, $25,000. Lin Hing Company, (real estate), $100,000. Moran Ayur-Vedic-Medico, $100,000.

London, Ont.—London Asbestos and Supply Company, $25,000. T. L. Partridge, J. Putherbough, E. J. Allen. Manness and Bingham, $40,000. S. R. Manness, G. E. Bingham, W. E. Manness.

Haileybury, Ont.—Tough-Oakes Gold Mines, Limited, $3,000,000. T. H. Connor, E. W. Kearney, A. E. Cranstoun. Sylvanite Gold Mines, $2,000,000. T. H. Connor, E. W. Kearney, A. E. Cranstoun.

Three Rivers, Que.—N. E. Clement and Company, $49,500, (groceries. N. E. Clement, J. Trudel, F. X. Lacoursiere. Le Marche Populaire, $20,000, (farm produce). A. Perusse, Adolphe Perusse, C. Dufresne.

Hamilton, Ont.—The Young Men's Hebrew Association, (no share capital). H. D. Sherrin, H. Goldstein, S. Freedman. Roberts and Chilman, $40,000, (chemists). L. Roberts, H. A. Chilman, D. H. McLaren.

Summerside, P.E.I.—Black Silver Fox Company, $160,000. D. R. Morrison, P. G. Clark, A. Cameron, Charlottetown. Mac Black and Silver Fox Company, $110,000. F. McEwan, T. Johnston, William Buchanan.

St. John, N.B.—R. D. McLean and Sons, $16,000, (dairy produce). Mrs. S. J. McLean, R. A. McLean, W. J. McLean. Consumers Coal Company, $49,000. H. N. Stetson, G. McA. Blizzard, A. P. Barnhill. St. John Theatre Operating Company, $2,000. P. Keith, E. F. Albee, M. Goodman, all of New York. St. John Amusement Company, $5,000. A. P. Keith, E. F. Albee, M. Goodman, all of New York.

Vancouver, B.C.—B. C. K. Logging Company, $10,000. Canadian Shultz Belting Company, $10,000. Coast Properties Syndicate, $25,000. Colonial Financial Corporation, $500,000. Cypress Park Land Company, $60,000. Electric Supply Company, $25,000. Mackenzie Johnson, $25,000, (general agency). Pioneer Steam Laundry, $250,000. Reid, Todd Construction Company, $10,000. Specialties and Supplies, $10,000.

Charlottetown, P.E.I.—Eclipse Blue Fox Company, $15,000. C. D. Bell, P. Brodie, York; P. Stewart, Marshfield. McNutt Malpeque Oyster Company, $60,000. T. McNutt, L. D. McNutt, both of Malpeque; H. R. Hillson, Charlottetown. Fur Farmers Bureau and Exchange, $150,000. J. R. Dinnis, J. W. Jones, W. S. Grant. Maritime Fox Exchange and Investment Company, $5,000. B. R. Holman, S. A. McDonald, G. C. Acorn.

Toronto, Ont.—Knox Waist Company, $40,000. F. A. Reid, J. H. A. Hird, W. J. Taylor. White Oak Farm Dairy Company, $40,000. R. G. Agnew, A. Gilmour, E. McL. Rowand. Canadian Rotogravure Company, $250,000. R. W. Hart, G. M. Miller, P. Stokes. Resilent Spring Wheel Company, $40,000. G. H. Sedgwick, A. G. Ross, J. Aitchison. Transcontinental Power Corporation, $10,000. R. W. Hart, G. M. Miller, P. Stokes. Kipawa Power Company, $1,000,000. W. A. J. Case, J. B. Taylor, D. D. Fish.

Montreal, Que.—Dupuis and Poirier, $99,000, (saw and planing mills). L. Dupuis, J. M. G. Poirier, J. Philippe. La Compagnie Generale d'Immeubles, $99,000. N. Dupuis, J. H. Armitage, A. Allard. Agence Generale d'Assurance, $15,000. N. Turcot, O. Hogue, E. Lalonde. Rigaud Edwater Syndicate, $50,000. G. L. Alexander, R. Hughes, A T. Paul. St. Germain-des-Pres, $1,000,000, (real estate). E. D. Marceau, J. Marceau, C. Beauchamp. Elswick Townsite, Limited, $250,000. J. R. Law, L. Choquette, M. B. Flanagan.

CANADIAN PACIFIC RAILWAY MORTGAGE BONDS ARE PAID.

The Canadian Pacific Railway paid off the $33,000,000 outstanding first mortgage 5 per cent. bonds which did not mature until July 1, 1915, and now the company's outstanding capitalization is made up of common and preferred stock and debenture bonds which do not carry foreclosure rights.

The Canadian Pacific Railway is now the only railroad of any importance that has no mortgage indebtedness. In the United States there is scarcely a road that has not added greatly to its fixed charges during the past decade, whereas the Canadian Pacific Railway has gradually wiped out its bonded debt by using the proceeds of its land sales.

IMPORTANT MORTGAGE COMPANY COMING.

A notable corporation, the British North-Western Mortgage Company, will be formed shortly. At a recent meeting of the provisional directors it was decided, in view of the prevailing financial conditions, not to go forward with the organization until about October 15. Should the present crop be harvested successfully, no doubt those interested, will then proceed actively.

The following is the directorate of the new company:—Edward Brown, financial agent; Sir William Whyte, director, Canadian Pacific Railway; Kenneth Mackenzie, wholesale merchant; George F. Stephens, manufacturer; Arthur Wickson, capitalist; C. W. N. Kennedy, financial agent; D. E. Williams, wholesale merchant; George Munro, western superintendent, Merchants Bank of Canada, all of Winnipeg; E. F. Hebden, general manager, Merchants Bank of Canada, Montreal; George R. Gregg, wholesale merchant, Toronto; A. C. Flummerfelt, capitalist, Victoria, Hon. Carter-Cotton, capitalist, Vancouver; T. J. S. Skinner, capitalist, Calgary; James Balfour, K.C., barrister, Regina; C. D. McPherson, M.P.P., publisher, Portage la Prairie; M. J. Tobin, barrister and J. W. Hayward, wholesale merchant, Vinton, Iowa.

CANADA INTERLAKE LINE.

Regarding the proposed navigation merger, Messrs. A. E. Ames and Company have issued a circular to the shareholders of the Canada Interlake Line, one of the companies involved, which says in part:

"The purchase price for preferred shares, carrying with them the bonus of 15 per cent. of common shares, shall be $107.50 for each preferred share together with accrued dividends thereon to date of payment. Such shareholders as so desire shall have the privilege, instead of taking cash, of exchanging their holdings for the same number of cumulative 7 per cent. preferred shares as they now hold, and 25 per cent. thereof in common shares of Canada Transportation Lines, Limited, (the new company recently formed to take over the Richelieu and Ontario Navigation Company, Canada Interlake Line, Limited, and several other navigation companies).

"The purchase price for preferred shares, in respect of which the bonus of common shares cannot be delivered or in the purchase of which no bonus of common shares was received, shall be $100 for each preferred share, together with accrued dividends thereon to date of payment. Such shareholders as so desire shall have the privilege, instead of taking cash, of exchanging their holdings for the same number of cumulative 7 per cent. preferred shares as they now hold and 10 per cent. thereof in common shares of Canada Transportation Lines, Limited."

INSURANCE COMPANIES IN MANITOBA.

Mr. A. E. Ham, Manitoba's inspector of insurance, shows in his excellent report for 1912, the following changes in the insurance companies transacting business in the province.

The following new companies were admitted by provincial license in 1912:—

Fire.—British Dominion General Insurance Company, Limited, Midland Fire and Accident Insurance Company, Saskatchewan Insurance Company.

Life.—Western Empire Life Assurance Company.

Hail.—Canadian Indemnity Company.

Accident and Sickness.—Merchants Life and Casualty Company.

Fraternal Societies.—Independent Order of Odd Fellows (Manchester Unity), The Royal Order of Lions, Loyal Brotherhood of Canadian Citizens of Manitoba, Mid-West Sick and Accident Association of Winnipeg, Manitoba, La Societe des Artisans Canadiens-Francais.

These companies were transferred from a provincial to a Dominion license:—

American Central Insurance Company, British Northwestern Fire Insurance Company, Firemen's Insurance Company, Germania Fire Insurance Company, Insurance Company of the State of Pennsylvania, North West Fire Insurance Company, Northwestern National Insurance Company, Niagara Fire Insurance Company.

The Retail Merchants Fire Insurance Company changed its name to Security National Insurance Company of Canada, and the companies herewith appended withdrew their deposits:—

British Northwestern Fire Insurance Company, $5,000; Canada Provident Assurance and Investment Company, $6,100; Delaware Insurance Company, $10,000; Firemen's Insurance Company, $10,000; Germania Fire Insurance Company, $10,000; Insurance Company of the State of Pennsylvania, $10,000; Jefferson Fire Insurance Company, $10,000; North West Fire Insurance Company, $8,000; Northwestern National Insurance Company, $10,219; Niagara Fire Insurance Company, $10,000; Ohio Millers Mutual Fire Insurance Company, $10,000.

Four companies holding a provincial license ceased doing business during 1912:—They were Columbia Fire Insurance Company, Delaware Insurance Company, Jefferson Fire Insurance Company, Middlewest Fire Insurance Company, while those new companies which were admitted by Dominion license in 1912 are as follows:—

Fire.—American Central Insurance Company, American Insurance Company, British Northwestern Fire Insurance Company, British Colonial Fire Insurance Company, Germania Fire Insurance Company, General Fire Assurance Company of Paris, Insurance Company of the State of Pennsylvania, North West Fire Insurance Company, Northwestern National Insurance Company, Niagara Fire Insurance Company, Providence-Washington Insurance Company, Palatine Insurance Company, Limited, Union Assurance Society, Limited, Westchester Fire Insurance Company.

Life.—Gresham Life Assurance Society, Limited.

Guarantee and Accident.—Guardian Accident and Guarantee Insurance Company, Travelers' Indemnity Company of Hartford, Conn., United States of America.

CANADIAN PACIFIC WILL SPEND HUNDRED MILLIONS.

Sir Thomas Shaughnessy says that the Canadian Pacific Railway's appropriations this year will be for the construction of additional railway mileage for cars and locomotives, terminal facilities at St. John, Montreal, Toronto, Fort William, Winnipeg, Calgary, Vancouver, and elsewhere, for ocean steamships and hotels, extensions of the telegraph system, shops, sidings and improvements generally in Canada, and will approximate no less a sum than $100,000,000.

SHORT TERM NOTES.

An interesting feature of the preliminary statement of new demands for capital made during the month of June in the United States is the fact that by far the largest amount of new financing has been completed by means of notes. Thus of the total railroad issues amounting to $126,692,200, the short term notes contributed $97,029,500, the bonds contributing only $5,513,000 of the total and stocks $24,149,700. A similar condition is represented by the applications for capital for the industries, note issues representing $14,500,000 out of the total of $20,408,800. There were no issues of industrial bonds, while the total of stocks was only $5,908,800. These figures are illuminative of the compulsory short term financing that has become a feature at the present time. Taking all issues of securities thus far reported for the month in the United States, the total is $147,101,000, which is $152,211,700 below the complete total of June of last year.

WESTERN FREIGHT RATES.

The following questions have been put to counsel in the western freight rate hearing, which was adjourned last week, by Mr. Drayton, chairman of the Dominion Railway Commission:—

1. Whether or not stations should be placed on the same rate basis in so far as general merchandise rates are concerned, irrespective of density of traffic in a given district.
2. Whether or not distributing points, irrespective of population or business should be entitled to similar commodity rates—i.e., in respect of distance or rate basis, irrespective of density of traffic.
3. Whether or not all stations at common distances from distributing centres from which freight moves at commodity should be on the same basis in respect of distance and rates.
4. Whether rates should now be fixed in the western provinces on the assumption of a sufficient existing railway mileage to enable the grain crop to be properly carried, and affording lands settled or fit for settlement with railway facilities within a reasonable distance; or whether rates should be fixed on such a basis as will encourage further development.
5. Whether or not rates should be based on the traffic and returns of the Canadian Pacific Railway, irrespective of any density or diversity of traffic and returns of the Canadian Northern and the Grand Trunk Pacific Railway Companies.
6. Generally on what principle do you desire the freight rates to be considered?

Sir William Whyte has returned from a three months' trip to Britain. Until the Balkan tangle definitely disappears he sees little hope of relaxation in the money markets. If the great powers remained in accord, they should be able to bring sufficient pressure to bear upon the smaller states to avoid an outbreak. These states had really not sufficient money to enable them to carry on war any length of time, and if the powers pursued their present policy, war would become well-nigh impossible.

The following is a list of the candidates who were successful at the examinations of the Institute of Chartered Accountants of Ontario: Final—A. A. Crawley, H. P. Edwards, J. A. Howell, S. A. Morrison, M. C. McConnell, H. C. Nasmith, I. A. Rumble. Intermediate—J. T. Anglin, F. W. Campbell, H. E. Care, J. J. Clarke, A. J. Doggerell, L. J. Haywood, F. C. Hurst, E. J. Leishman, N. B. McLeod, G. T. Pillow, J. Turner, C. E. White. Primary—L. A. Allan, F. C. Ball, E. S. Bradbury, H. T. Burpee, W. C. Caulton, R. T. Coady, Jr., W. F. Dawe, G. N. Dechert, R. S. Dunlop, F. W. Edwards, A. G. Edwards, J. M. Edwards, O. N. Edwards, H. H. Gawthorp, M. Hilborn; R. D. Hill, F. E. Houston, W. F. Houston, E. C. Jewell, F. L. Kerr, R. C. Lee, A. G. Lester, N. C. Litt, P. L. Louks, W. A. Lorimer, J. A. McNicoll, R. C. Pratt, V. R. Smith, F. A. Smyth, S. H. Sorley, T. Swale, J. D. Wallace, P. H. Wilkes, G. S. Winnifrith. The Past President's Scholarships were awarded as follows: Final, J. A. Howell; Intermediate, F. C. Hurst; Primary, J. D. Wallace.

IN THE NEW WESTMINSTER DISTRICT

Fraser Valley Farmers May Co-operate—Harbor Plans —Interest in Local Products

(Special correspondence.)
New Westminster, July 1st.

The deputation of representatives from the farming communities throughout the Fraser Valley and the New Westminster board of trade met with a very favorable reception at the hands of Sir Richard McBride when presenting a memorial on behalf of the interests involved in which was set forth a request that government action be taken for the purpose of organizing the farmers along co-operative lines, both for the purpose of regulating production and facilitating the marketing of agricultural products.

The premier in reply stated that he could see no reason why a movement similar to that in the Okanagan could not be made in the Fraser Valley and the plans will be laid before the agricultural department without delay. It is anticipated that the agricultural commission which have been holding sessions throughout the lower mainland will bring in a recommendation along somewhat similar lines.

Harbor Plans Have Been Adopted.

Mayor A. W. Gray and Captain A. O. Powell, harbor engineer, have returned to New Westminster gratified with the results of their work at Ottawa. Captain A. O. Powell states that the harbor plans of the city have been adopted by the Dominion government without change and the approval of the chief engineer obtained for the city dock on Front Street for which half a million dollars is lying in the bank awaiting the necessary authority to commence work. It is anticipated that July will see active construction under way.

Arrangements have been made whereby the Hon. Robert Rogers will visit the Pacific Coast shortly and personally inspect the harbor extension work at New Westminster and the channel improvement along the Fraser River and the Sandheads.

Home Products Display.

The efforts of the New Westminster progressive association and the New Westminster business men's association resulted in a successful three days' window display of home products. Over fifty retail merchants participated and a number of the windows furnished instructive displays of the various manufactured and agricultural products of the city and district.

A recent trial run of the new fisheries cruiser "Fipsa" demonstrated that the craft would fulfil the requirements of the fisheries department. The "Fipsa" is the creation of Mr. R. B. Schock, naval architect, and was built by the Marine Railway Company, Lulu Island.—W.L.D.

BRIGHT CROP OUTLOOK IN ALBERTA.

Rains have been particularly heavy in the Medicine Hat district, as well as in many other parts of Southern Alberta, and the ground received a welcome and repeated drenching.

Reports from Magrath, Cardston, Spring Coulee and other points in that section state that while the rain was not particularly heavy at first, the crops were not suffering, but more rain, which has fallen this week, has done much good. The spring wheat and beets at Raymond were benefitted.

At Coaldale, New Dayton, Chin, Sterling and Wilson's Siding, the grain looks excellent, and the report is that but little more rain is needed to make the crop outlook the best in several years. Around Taber in many localities the crop outlook is good, though to the south of that place more moisture in places would still be welcome. While in the immediate McLeod section the farmers needed moisture, the precipitation did a large amount of benefit.

Heavy yields of grain are assured at Carmangay, Monarch, Diamond City, and neighbourhood, and the outlook so far is excellent.

Good crop prospects are reported in the Okotoks section, there having been some moisture, which has been of great benefit to the growing grain. Satisfactory crops are also reported from the Strathcona section, though more rain would be welcomed by the farmers generally.

Rain has been general in the Calgary district.

Around Red Deer the crops all look well and the grain growers generally are justified in anticipating an extra large crop, and are making preparations accordingly.

There is no suffering for moisture as yet in the Lacombe section, as rain fell there much as elsewhere in Alberta. Around Castor and many other parts of grain growing Alberta similar conditions prevail.

The outlook for heavy crops all through Alberta could hardly be better to date.

WESTERN CANADA

Crop Conditions are Good in Prairie Provinces—Canadian Pacific's Large Construction Work

Monetary Times Office,
Winnipeg, July 1st.

The crop outlook in the west is bright. During the past week splendid rains have fallen in nearly all parts of the three provinces, which have materially benefited the growing grain.

Reports received from the various sections indicate that the wheat crop is well advanced.

Vice-President D. B. Hanna, of the Canadian Northern Railway, says that the company's reports regarding the crops in the west are satisfactory. In Alberta, along their lines, conditions could not be better. The same applies to Northern Saskatchewan. In the southern parts of that province and in Manitoba the crop needs rain but at the present time it is not suffering. Since these remarks were made there has been rain in the districts to which he referred.

After visiting the southern portions of Alberta early in the month, Hon. Duncan Marshall, the minister of agriculture for that province, stated the crops everywhere were in excellent condition. Mr. Marshall visited the demonstration farms and at these points the crop outlook was exceptionally promising.

In Alberta generally the crops are in advance, as to condition, as compared with 1912. Rain at the close of last week and since that time has placed the crop in a fairly safe position.

Canadian Pacific Railway Awards Large Contract.

"The construction of the tunnel under the Selkirk mountains is one of the most important enterprises that the company has ever undertaken in the west," is the statement of Mr. George Bury, vice-president of the Canadian Pacific Railway, who returned from Montreal Saturday accompanied by Mr. J. G. Sullivan, chief engineer.

Mr. Bury stated the object of the trip to Montreal was to consult with the president in regard to letting the contract for the tunnel the company proposes to build under the Selkirks. The tunnel is to be five miles in length and built for a double track. The contract has been let to Messrs. Foley Bros., Welch and Stewart, and is to be completed in forty-two months.

With the new line and tunnel built no snow slides will be able to reach the line. The construction of this work will involve an expenditure of several million dollars.

With the construction of the tunnel there will not be more than six miles all told of two-point grade through the mountains.

Use of Electricity.

The changes which are now under way in British Columbia will give the Canadian Pacific a water grade from a point a few miles west of Kamloops right through to Vancouver.

At the conference in Montreal the president authorized the electrification of the line between Castlegar and Rossland. That line hitherto operated by steam, as are all other railways in Canada, is to be operated by electric locomotives. The contract for the necessary electrical machinery has been let to the Canadian General Electric Company, of Toronto. It is the intention to use 2,400 volts direct current trolly system on this part of the line. If the results obtained from the present electrification are satisfactory extensions will probably be made to other mountain lines.

CONSUMERS' GAS COMPANY SALE OF STOCK.

The auction sale of Consumers' Gas Company's stock last week resulted in the disposal of a little more than half of the block placed on the market. Of the 10,310 shares offered, 5,670 were bought. Most of the purchases were of small blocks, there being 681 separate transactions. The amount realized from the sale will be in the neighborhood of $475,000.

The Lake-McKinney Company, Limited, will change its name to the McKinney-Haggerty Company.

The Canadian Pacific Railway is not making any low rates in anticipation of the opening of the Panama Canal leading to a great movement of grain westward across Canada to Vancouver, was the evidence of Mr. W. B. Lanigan, assistant freight traffic manager of the Canadian Pacific Railway at the western freight rates inquiry before the railway commission.

BRITISH COLUMBIA

Transportation and Telephone Extensions—Companies Effecting Economies—Lumber Prices

(Staff correspondence.)

Vancouver, July 1st.

Tram service that should be a factor in the development of the district has been started in the Saanich Peninsula, a line 21 miles in length having been opened there by the British Columbia Electric Railway Company. This line runs north from Victoria to Saanich Inlet, through what is one of the best agricultural sections of British Columbia. Saanich Inlet is fairly well settled, but with expansion in and about Victoria during the past few years it is imperative that access be easy to this large district which affords such encouragement to the settler.

On the mainland, the British Columbia Electric has its line from Vancouver to Chilliwack and this has done much to help people to get out of the city on to the small holding. This line out of Victoria will do as much for the people there.

Producers and Development.

Development of the land is what is required in the province and easy transportation such as this will enable the bona fide settler to get his produce to the city without difficulty or delay.

This year, for the first time at the summer season, butter has gone up five cents a pound in price, which is at the rate of nearly fifteen per cent. It is higher now than at any time during the winter, and at a time when it should be going down a point or two if anything. Although living is higher than ever, money is scarcer. With producers living in the province, the large amount of money sent out for all kinds of farm produce would be circulated here. This question is prominent and is being discussed in many ways. The outcome will be the devising of some scheme whereby the land will be made productive instead of being kept idle.

Economies Are Being Effected.

Owing to monetary conditions the British Columbia Electric announces that it has to curtail expenditure under instructions from its London board, and its staff has been reduced. Municipalities have been putting a stop to proposed work, since bonds have to be sold at too large a discount. The lumber industry, which bid fair after the good year in 1912 to enjoy a measure of prosperity this season, is affected. Mills are buying logs only for present needs, with the consequence that logs have dropped fifty cents a thousand feet in price, and those who need the money are selling lower still. Camps will probably discontinue operations, for with logs going down it will not pay to operate, since stumpage is so high.

A North Vancouver alderman states that trust companies here cannot invest in municipal debentures unless the securities are guaranteed by the government. For that reason, municipal bonds are not sold within this province. In other parts of the Dominion, it was pointed out, trustees could invest in municipal offerings. The matter will be taken before the provincial government in an effort to have an amendment made in the provincial law.

Commercial Achievements and Conditions.

This week the British Columbia Telephone Company laid a telephone cable across the Gulf of Georgia between Point Grey and Nanaimo. Since this new connection embodies the latest developments of electrical communication, it will mean much for the middle and upper part of Vancouver Island. These districts, under conditions which have existed before, were out of touch with prompt communication with the mainland. Merchants and farmers are thus able to keep in closer touch with conditions, and development will be aided. The laying of the cable and the land work in connection, for two new copper circuits were strung between Victoria and Vancouver, will entail an expenditure of close on to $200,000.

Messrs. Merrill & Ring who, with Weyerhauser, are perhaps the richest owners of timber in British Columbia, and well able to wait, will not quote a figure lower than $5 a thousand feet for timber on crown granted lands. A few weeks ago sales were reported of crown granted holdings at $3 per thousand, and some there were who would have discredited the amount. A buyer told *The Monetary Times* that he approached Messrs. Merrill & Ring and got $5 as a quotation. Leaseholds are different, since the government has control and at any time may alter the conditions of holding them.

The O. E. Hood Company, (Retail), Limited, has changed its name to Hoods, Limited.

C. S. Windsor, Limited, has changed its name to Scottish Canadian Canning Company, Limited.

STANDING OF CANADIAN MUNICIPALITIES

Payne Criticism was Strong, but Canadian Municipalities, Especially Smaller Communities, Must Apply Brakes

Mr. R. M. Horne-Payne's criticisms of municipal finances continue to be actively discussed in London. The pretty general opinion is in agreement with the Canadian Gazette, that, while it is natural enough that Mr. Horne-Payne should prefer the securities of his own Canadian Northern-Bank of Commerce-Empire Trust group, his remarks are calculated to injure the whole field of British investments in Canada, and it is hoped he will modify them.

The Financial News thinks:—"It is amazing and somewhat shocking to hear those who have every reason to be proud of western Canada wantonly besmirching her good name and impugning her credit. The suggestion has been openly made that western municipalities should be carefully watched as if they were so many pickpockets, and unworthy hints have been thrown out of the possible default in meeting interest."

Must Go Slowly.

This is journalistic hysteria, pure and simple, as one can find no trace or suggestion of default in any responsible quarter, says the Canadian Associated Press. What is widely felt is that, though Mr. Horne-Payne went too far in recommending even a temporary boycott of Canadian municipal securities, it was necessary to warn municipal authorities, especially those of smaller communities in the west, that the capital demands of the world, have utterly outrun the available supply, they must go slowly for a time in fresh expenditures and borrowings, unless they mean to run the risk of permanent disfavor with the British investor such as now attacks American municipals.

What Sir William Mackenzie Says.

Sir William Mackenzie was shown the recent newspaper despatches concerning the speech of Mr. R. M. Horne-Payne on the subject of Canadian municipal financing in London. He said that for his own part, he had always considered, and continued to regard Canadian municipal securities as a first-class investment.

"Mr. Horne-Payne," said Sir William, "is a director of the Canadian Northern Railway and as president of the British Empire Trust Com any, has been identified with a considerable portion of the financing of the Canadian Northern Railway in London. Mr Horne-Payne, however, has many other interests in London, and his views as expressed at the annual meeting, which he addressed, were those of a London financier, not by any means an expression of opinion from the Canadian Northern Railway. My view is that Canadian municipal securities are an excellent investment."

LIFE INSURANCE PAYMENTS LAST YEAR.

Life insurance organizations of the United States and Canada distributed $626,350,000 in 1912, according to computations by the Insurance Press. The payments in the two countries for death claims, matured endowments and other benefits under the policies of level-premium companies and the certificates of various life insurance organizations—assessment and the like—amounted to $413,350,000. The estimated total of the amounts paid by regular companies as savings for policyholders, cash values on surrender, annuities, and on claims in foreign countries was $213,000,000.

All benefits under policies—death claims, endowments, savings—in the transactions of the reguler companies increased in 1912. The life insurance written and revived in the United States, by the regular companies alone, was nearly $3,233,000,000, or about $355,500,000 more than in 1911. The statistics of fraternal insurance associations continued to indicate the effects of the disruptions of organizations and decreases of memberships.

In Canada in 1912 the increase of the new insurance was about $40,600,000. The payments for death claims and other benefits were larger than in the previous year.

The disbursements for lapsed, surrendered and purchased policies by companies that had 90 per cent. of the insurance in force at the close of 1912 amounted to $84,000,000, an increase of about $8,300,000 over 1911. This is to be compared with an increase of $2,853,000 in 1911, a decrease of $187,000 in 1910, an increase of $3,059,000 in 1909, and an increase of $14,543,000 in 1908.

The Great West Manufacturing Company, Limited, will change its name to the Great West Casket Company, Limited.

PACIFIC COAST MUNICIPAL BONDS

Municipalities of British Columbia Have Borrowed for Legitimate Requirements

"It is difficult to understand the attitude or point of view of Mr. Horne Payne in regard to his alleged remarks concerning Canadian municipal debentures, or why they were necessary, or in what way they will benefit the public," stated Lieut.-Col. G. H. Dorrell, manager of the bond and European department of Canadian Financiers, Limited, to *The Monetary Times.*

"Nor is it clear from the report what province or provinces he had particularly in mind; but as he is chairman of so important an undertaking as the British Columbia Electric Railway Company, and is intimately connected with the Canadian Northern Railway, British Columbia could not have been absent from his thoughts in his recommendations.

"The reported remarks are the more surprising, as one would expect the chairman of the British Columbia Electric Railway Company, which recently made a successful issue of £750,000 in London, and which flourishes because of the prosperity of the districts it traverses, to be the last to indulge in hasty and harmful generalizations.

"Certain municipalities have undoubtedly had some difficulty in floating recent debenture issues and have had to pay high rates for money, but there would have been no imputations on the attractiveness of their securities had there been no general financial stringency.

"With all quarters of the world flocking to the money centres of Europe for money, either for industrial expansion or for warfare and war preparations, there has not been sufficient funds to go round. It is well known that those who want money for the latter will get it at any price.

Many Countries Desire Capital.

"Put aside Canadian borrowings for an instant," said Lieut.-Col. Dorrell, "and examine the terms of other large loans; the two large loans, for instance, recently issued by Messrs. Rothschild in Paris and London—a 5 per cent. Brazilian loan which was largely undersubscribed and the 5 per cent. Japanese loan, both of which scarcely produced to the borrowers more than 90 for 5 per cent. net. When we see these two important countries enjoying excellent credit and acting through the first bankers of the world, having their tempting offers met with comparative failure, it is not difficult to account for municipal issues not being sought after without suggestions of overborrowing or disparagement of the excellent security offered.

"Without multiplying instances, there is Roumania, a peaceful country which has always enjoyed excellent credit in Paris and could formerly borrow there at 4 per cent., now having difficulty in selling 7 per cent. treasury bonds at 91; Germany, whose financial difficulties are known to the world and whose financial houses have sacrificed their American and Canadian holdings to meet home obligations and to help an undersubscribed government loan; Austria-Hungary; all the Balkan States; Greece; Bulgaria; Servia, paying extravagant rates on short-term treasury notes; above all, the industrial activity of the Old Country which keeps capital profitably employed. Considering these and other causes, it is unnecessary to disparage Canadian securities in order to account for the small measure of success which has attended recent issues.

"One would prefer to think that Mr. Horne Payne had been misreported in his advice to boycott Canadian municipal securities, but that is difficult in view of the comments of the London press, remarked the Lieutenant-Colonel.

Rich Cities and Districts.

"One has only to examine the borrowings of British Columbia municipalities in comparison with their assessed values and the improvements they have effected, to be convinced that they, at any rate, should have been excepted from the ban which Mr. Horne Payne has thought fit to cast on the public securities of Canadian municipalities."

Lieut-Col. Dorrell then drew attention to Vancouver and the districts which compose Greater Vancouver, New Westminster and Victoria. "Their indebtedness," said he, "has run into big figures, but if one inspects these cities and examines their financial statistics, it will be seen how wisely on the whole the money has been expended and the valuable assets they possess. And outside the larger cities there are many prosperous districts with either no debts at all or with debts extremely small. One district, Saanich, through which Mr. Horne Payne's British Columbia Electric Railway has over twenty miles of railroad in operation, has an assessed value of $18,000,000 and a debt of $65,000, and is by no means a solitary instance of such favorable standing.

"Undoubtedly, there have been difficulties in disposing of municipal debentures. These have kept municipalities prudent; and it certainly serves no good purpose to cast reflections on municipal securities at a time when investors, owing to the causes mentioned, are far from disposed to take them freely.

"Is there a remedy? A partial one may be found in home investors supporting home securities. The resources of the province have never been fully utilized in this direction. Vancouver should be the municipal bond market for the province. There are many who are continually seeking profitable reinvestment of funds but hitherto with the rapid rise of real estate values, have preferred to look in that direction, but who are now looking for other income-producing outlets."

Mr. C. C. Dickinson, chairman of the finance committee of North Vancouver, has also correctly drawn attention to the embargo placed on the investment of trust funds in municipal debentures which do not carry a government guarantee. The withdrawal of this in the case of municipalities above a certain population and assessment, would help the home market.

Insurance companies operating in British Columbia would also do well for themselves and the province by including in the securities which they have by law to deposit with the government as large a proportion as possible of municipal bonds.

Many unquestionable municipal debentures can be bought to yield 6 per cent. and upwards with an ultimate increase of capital value. In marketability, in convenience of transfer and of collection of interest, they far surpass private mortgages, always a favorite security for the conservative investor, while in safety it should not be forgotten that they are in effect a first mortgage on the whole property within the municipality, and that the borrowings of any municipality are rigidly restricted proportionately with the assessed value, which every individual taxpayer endeavors to keep at the lowest point.

CANADIAN FIRMS SHOULD SEND REPRESENTATIVES

Now that the British preferential tariff has come into effect in the West Indies, and an efficient steamship service is to be put on by Messrs. Pickford and Black in July, with these advantages in favor of our trade, it is devoutly to be wished that Canadian firms would send down their representatives to take advantage of the market thus made available. Says Mr. E. H. S. Flood, Canadian Trade Commissioner at Barbados, catalogues and correspondence may do something to advertise a trade, but it requires the systematic efforts of the commercial representative to place the goods and to create the business. Nothing short of this will give the merchants in Canada the full value of the West Indian market.

ABOUT OUR LONDON ISSUES

The issue in London of the Dominion Glass Company, Limited, was one of $1,437,500 in seven per cent. cumulative preferred shares of $100 each, at the price of £20 per $100 share, or approximately 97 1-3 per cent. This company which is a consolidation of the principal glass-manufacturing companies in Canada, representing over 95 per cent. of the glass-manufacturing trade in the Dominion. The business of the company is conducted in six factories, situated between Montreal and Winnipeg, and consists of the manufacture of glass bottles, jars, and other staple glass products. On the basis of the profits made for the past two years and nine months, an average of $613,609 is shown, and as the company is erecting further glass bottle and jar making machinery, the president estimates that the additional plant now being installed will result in a further net profit of no less than $200,000 per annum. On the basis of the estimated profits for the twelve months to June 30th instant, the preference dividend is covered more than three times over.

Commenting on the issue, the London Economist says:—"Provided no set-back occurs in the prosperity at present enjoyed by the Dominion, the company should have little difficulty in securing the estimated profits, but should a less prosperous time occur, it is evident that the margin behind the dividend might be largely reduced. The profit, however, would have to fall away very considerably before the dividend was endangered, but in view of the fact that it is necessary to place the shares on a basis giving over 7 per cent., it will be seen that the shares are of a speculative character."

The British, Foreign and Colonial Corporation, Limited, offered for sale in London last month $750,000 six per cent. first mortgage sinking fund bonds to bearer of the Dominion Canners, Limited, at 99½, as previously noted in *The Monetary Times.* The bonds form part of a total issue of $2,500,000, of which $502,500 have been redeemed and cancelled. The bonds form a first charge on all the company's property and mature April 1st, 1940, or earlier by means of a sinking fund of 1½ per cent. on all the bonds outstanding to be employed in redeeming bonds at a price not exceeding 110 per cent.

CANADA'S MINERAL EXPORTS

United States is the Chief Destination— Room for Development of Resources

A large portion of the mineral production of Canada is exported for consumption or refining outside of Canada. On the other hand, considerable quantities of mine products, chiefly those which have been refined or subjected to partial treatment or in the form of manufactured goods ready for consumption, are imported.

The total value of the exports of products of the mine, including direct mine products and manufactures thereof in 1911, was $52,546,593, as compared with $51,856,862 in 1910. This value includes for 1911 mine products to the value of $41,121,688 and manufactures valued at $11,424,905. Practically the whole of the Canadian production of copper, nickel, and silver is exported, also a very large proportion of the production of gold, asbestos, and mica. There are also considerable exports of coal. These items alone contribute about 74.4 per cent. of the value of the mine products exported. Manufactures of mine products exported consist chiefly of iron and steel goods, aluminium, calcium carbide, lime, acetate of lime, and coke.

Much to the United States.

The United States is the chief destination of Canada's mine exports, about 77.4 per cent. having been exported to that country during the fiscal year 1910-1911, and about 15.7 per cent. to Great Britain.

A great variety of mineral products, chiefly in a manufactured or semi-manufactured condition, are annually imported into Canada. The total value of these imports during the calendar year 1911 was $181,839,077, as compared with imports valued at $147,305,012 in 1910. Of the total imports in 1911, nearly $48,000,000 in value consisted of the cruder forms of mineral products, such as coal, ores of metals, diamonds unset and bort, asphaltum, alumina, clays, etc., whilst iron and steel and manufactures thereof were imported to the value of over $93,000,000. Imports of the metals copper, gold, silver, lead, platinum, tin, and zinc, and manufactures thereof, reached a total value of over $18,750,000, and imports of petroleum and clay products exceeded $11,000,000 in value.

Room for Development.

The great excess of imports over exports would seem to indicate the existence of large opportunities for the development not only of Canada's mineral production but also of many manufacturing industries which utilize mine products as raw materials. The fact, however, must not be overlooked that the geographical situation of Canada and the United States, separated by an imaginary barrier 3,000 miles in length, evidently results, notwithstanding the tariffs on both sides, in a mutually advantageous interchange of trade. Then we find large exports as well as imports of coal and of agricultural implements. The continued large export of crude unrefined ores and metal products and the corresponding imports of refined and manufactured metal products still point to opportunities for the development of metallurgical industries as well as industries for the treatment, refinement, and manufacture of non-metallic products.

The following table indicates the destination of Canada's mine products in recent years:—

Destination.	1909-10 Value.	1910-11 Value.
United States	$33,488,464	$33,129,505
United Kingdom	3,820,574	6,726,015

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Rosebank, Sask.—June 23.—Northern elevator. Loss and cause unknown.

Ford City, Ont.—June 21.—Mr. C. Lassaline's barn. Loss, $2,000. Cause, lightning.

Readlyn, Sask.—June 24.—Mr. W. Derby's barn. Loss and cause unknown.

St. Vital, Man.—June 24.—Mr. J. C. Hack's residence. Loss, $4,000, insured. Cause unknown.

Leamington, Ont.—June 23.—Mr. F. McIndoo's residence. Loss, $1,000, insured. Cause unknown.

Ottawa, Ont.—June 21.—Mr. J. Woodlawn's residence. Loss, $300. Cause, probably defective wiring.

Balcarres, Sask.—June 20.—Messrs. Forbes & Ely's implement warehouse. Loss, $6,000. Cause unknown.

Lower Coverdale, N.B.—June 24.—New Brunswick Motor Car Company's auto. Loss, $1,000. Cause, gasoline leak.

Toronto, Ont.—June 30.—Mr. D. Townend's home, Ennerdale Road, Earlscourt. Loss, $2,000. Cause, lamp exploded.

Winnipeg, Man.—June 23.—Canadian Pacific Railway west yards. Four hundred telegraph poles, etc. Loss and cause unknown

Swift Current, Sask.—June 21.—Cockshutt Plow Company's warehouse. Loss, $8,000, partially insured. Cause, spark from cigarette.

ADDITIONAL INFORMATION CONCERNING FIRES

The following fires were adjusted by H. T. Hughes, Toronto:—

Chippewa, Ont.—June 11.—Mr. R. Beamish. Loss, building, $174. Insured with Royal Company. Cause unknown.

Eldon Township, Ont.—June 12.—Mr. J. Gordon's barn. Loss, barn, $500; produce, $84. Insurance, $400, Anglo-American.

Lethbridge.—May 26th—Mr. Ernest Bates' farm house and contents. Loss total. Insurance, Liverpool and London and Globe $900.

Castor, Alta.—Mr. J. N. Warnock's dwelling house. Loss building $1,100. Insurance, New York Underwriters $800. Contents totally destroyed. Insurance, New York Underwriters $400.

Lindsay, Ont.—June 8.—Mr. H. Thurston, Bond Street. Loss, building, $178. Insured with Waterloo Mutual. Cause, sparks from chimney. Mr. C. E. Weeks. Loss, furniture, $55. Insured with London Assurance, of Montreal.

Bolton Village, Ont.—June 6th.—Mr. J. Clark's. Loss, building, $71. Insured with London and Lancashire and Liverpool, London and Globe. Mr. E. Beamish. Loss, furniture, $28. Insured with London, Liverpool and Globe, and Economical. L. Hutton. Loss, wiring, $9. London, Liverpool and Globe. Cause, lightning.

Toronto, Ont.—June 8.—116 Dovercourt Road. Loss, building, $55. Insured with London and Lancashire Company. Cause, lightning.

June 9.—Mrs, Vickers, 21 Dowling Avenue. Loss, furniture, $33. Insured London and Lancashire Company. Cause, lightning.

June 16.—Mr. J. O'Connor, 194 Leslie Street. Loss, building, $237; furniture, $207. Insured with Anglo-American. Cause unknown.

June 11.—Mr. T. Barnes, Hamilton. Loss, launch "Duluth," $498. Insured with Queen Company.

June 8.—Mr. J. Minto, store, 1008 Dundas Street. Loss, $300. Insured with Royal Insurance Company. Cause unknown.

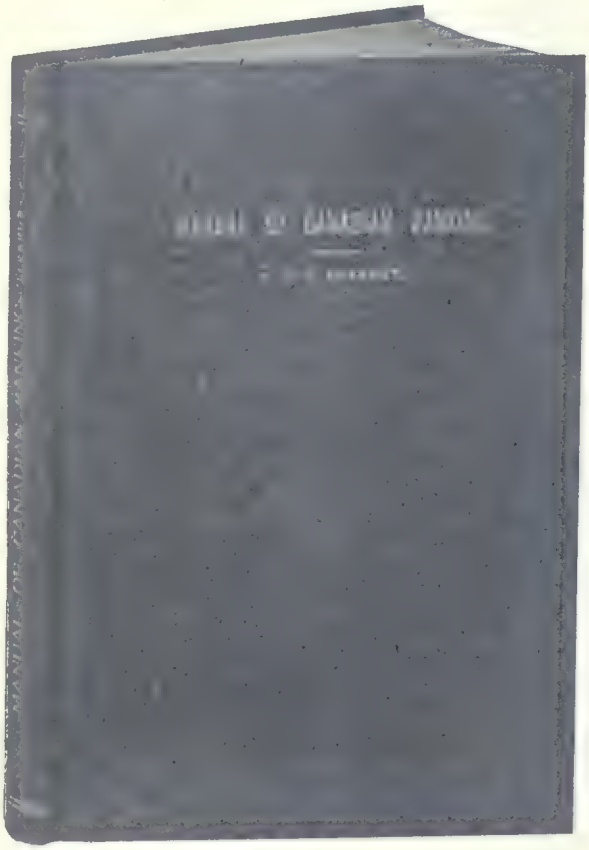
June 12.—Mr. H. Brown, residence, 6 Blake Street. Loss, building, $750; furniture, $533, and stable. Insurance, building, $300; furniture, $200; stable, $1,200, Royal Insurance Company. 4 Blake Street. Loss, building, $500. Insurance, $400, Royal.

June 13.—Sons of England Hall, Richmond and Berti Streets. Loss, $1,750 building. Insured Norwich Union and Royal Insurance Company. Loss, furniture, $224; piano, $15. Insurance, furniture, $2,000; piano, $800, Royal Insurance Company.

FOURTH EDITION. Ready in a few weeks

Manual of Canadian Banking

By H. M. P. ECKARDT



The New Edition of this important book covers thoroughly all the features of the Bank Act of 1912.

The Book is listed by the Canadian Bankers' Association as a recognized text book on banking practice. Chapters on Organization of a New Bank; Selection of the Junior; The Junior's Post; The Cash Book; The Discounts; Teller and Customer; The Bank's Business in Exchange; Receiving and Paying; The Accountant; The Statements; Manager of the Branch; Financing the Crops and the Mines; Relations with other Banks and with Head Office; Inspection of the Branch; Head Office; The General Manager's Department; The Board; Liquidation of Failed Banks.

Price $2.50 Postpaid

SPECIAL OFFER

While the regular price of Mr. Eckardt's Book is $2.50, we offer as a special inducement to send the Book and a year's subscription to The Monetary Times of Canada (including the Annual Review) for $4.00. This offer applies only to new subscribers and not to renewals.

ORDER FORM

BRITISH EMPIRE TRUST

All-Round Progress in a Variety of Undertakings

The twelfth ordinary general meeting of the shareholders of the British Empire Trust Company, Limited, was held June 18, 1913, at the Liverpool street Hotel, E.C., Mr. R. M. Horne-Payne (the chairman) presiding.

The secretary (Mr. R. W. Bartlett, A.C.A.) having read the notice convening the meeting and the report of the auditors,

The chairman said: If we are unable to meet you this year with as good a record of progress and profits as in past years, I think that we are entitled to express great satisfaction in having brought the company so well through a difficult year, and at being able to start the new financial year with our reserve fund increased to £150,000, and in a stronger position generally than that in which we started the old one. Our business—our regular commercial business—has been as lucrative as, and considerably larger than, in any previous year, and it is only owing to the low prices on the Stock Exchange, resulting from the temporary disturbance of public confidence in all classes of securities, and especially in Canadian securities, that we are unable to show as large profits as we did last year. You will have noticed from the report that this year's valuation of our investments shows a depreciation of over £20,000 compared with last year's valuation; but, personally, I do not regard this as a loss, as I feel very certain that, on their merits, our investments will command the old and better prices in time, and that this £20,000 will come back to us, and go to swell the profits of future years. I feel that we may look to the future with confidence; for our business is well established, our influence is becoming more and more extensive every year, and our investments are sound, and are now valued at almost panic prices. The present loss of confidence which the public is showing towards Canadian investments may, or may not, restrict our profits for another year or so; but we can afford to await a return of favorable conditions quietly and patiently, and feel certain that there is a time of great prosperity in store for the company in the future. With two exceptions, the enterprises with which we are associated, and in which our money is invested, have made satisfactory progress during the year, and have demonstrated that they are intrinsically sound and have a good future before them. It is with very great regret that this year I have, for the first time, to refer to exceptions to the prosperity which has hitherto attended all these enterprises. The Canadian North Pacific fisheries unfortunately last year experienced a number of adverse conditions simultaneously, which is unlikely to occur again. This company's season for 1913 opened in the latter part of April. The weather during May was again unfavorable; but working expenses are 25 per cent. lower this year than last, and the prices ruling for the company's merchandise are 25 per cent. higher than last year. I am assured by the president that there is no reason why the company should not return to a sound position. The future of the Canadian Mineral Rubber Company is more difficult to foresee. I understand an important section of their business is entirely crippled by the high price of certain raw materials which they use largely in the manufacture of their products, and that the business is, for the time being at least, practically at a standstill. The directors, however, hope that ways will be found of overcoming their difficulties, and, in any event, I do not think that there is much danger of the holders of the debenture stock which your company issued meeting with any permanent loss of capital. In order to allay the anxiety of debenture holders, we offered in January last to guarantee them against loss on certain terms. A large number of the debenture holders accepted this offer, and your company has been able to reinsure itself against this risk at a small profit, so that your company has only a very remote contingent liability in respect of its guarantee.

TRANSCONTINENTAL TRIUMPH

All the other companies with which we are associated are doing well. The Canadian Northern Railway system, after thirteen long years of construction, is about to complete its through transcontinental line, and by the end of the year, or very early in 1914, will be running trains from Atlantic tide-water to Pacific tide-water, which will automatically bring about a very large increase in the earnings. The Parliament of Canada has recently granted to the railways of the Canadian Northern system a cash subsidy of over £3,000,000 in recognition of the national character of this vast undertaking. This, added to the cash subsidy previously received and to the proceeds of the portion of the land grant bonds already sold, makes a sum of nearly £10,000,000 sterling contributed to the enterprise by the Canadian people. It is particularly satisfactory to the British Empire Trust Company, as the assets provided with this large sum of money will increase the security underlying the various issues of Canadian Northern debenture stocks which your company has been instrumental in placing in the hands of the public, for whom it is acting as trustees. As a director of the Canadian Northern Railway, I am glad to have this opportunity of assuring you that the prospects of the railway have never been so encouraging as they are at present, and that there is absolutely nothing whatever in connection with the railway itself to justify the heavy fall which has recently taken place in the prices of its securities. The British Columbia Electric Railway, the Toronto Railway, and the Winnipeg Electric Railway, with the Associated Vancouver Power and Toronto Power Companies, are so well established that no very marked developments are looked for. The traffic returns of the British Columbia Electric Railway are suffering somewhat from the dullness which is prevailing in commercial conditions in Vancouver, and which will probably continue until the opening of the Panama Canal, when the trade of the ports of Vancouver, New Westminster, and Victoria must enormously increase. The construction of the Toronto Suburban Railway is now approaching completion after meeting with much delay on account of the scarcity of labor. I regard the future of this company as absolutely assured. I think there can be no doubt that it will in time do as well as the Toronto Railway itself. The Sao Paulo Tramway, Light and Power Company is doing magnificently, and the Monterey Railway, Light and Power Company has done remarkably well considering the disturbed political conditions in Mexico. The Canadian Northern Prairie Lands Company continues to prosper, and is now selling land which it bought at $3 an acre for $16 an acre. The shares of this company at their present price are as sound and as well secured an investment as any bond or debenture quoted on the Stock Exchange. The Canadian Western Lumber Company and the Columbia River Lumber Company now form one splendidly organized and well-established enterprise, and it has been a source of great surprise to me that the price of these companies' debenture stocks did not rise after the publication of the annual reports. These stocks now offer an opportunity to invest money to very great advantage.

NATURAL GAS

Lastly, we come to that wonderful enterprise the Canadian Western Natural Gas Company. In very little over a year 17 wells have been bored, which give a daily production of 174,300,000 cubic feet, and pipe lines 200 miles in length have been built, carrying the gas from the wells to the cities of Calgary and Lethbridge and some of the larger towns of western Canada. A house to house distributing system has been constructed, and over 5,000 customers have been secured and supplied. Between August and the end of March the actual receipts amounted to over $360,000, and the expenses during that period amounted to about $90,000. The receipts will, of course, fall off during the summer months, but we have no doubt that the business will increase from 50 per cent. to 100 per cent. before the end of this year. The depression in the price of Canadian investments on the Stock Exchange, which has resulted from the loss of the confidence of the British public in them, is not altogether an unmixed evil for the British Empire Trust. We enjoy the consolation that it has enabled us to buy some very excellent stocks at exceedingly low prices during the past few weeks. I do not think that there ever has been a more favorable opportunity for investing money, and I do not think that there will ever be a more favorable opportunity in the future. The prevailing low prices are almost entirely unconnected with the intrinsic merits of the investments, and are certainly not in any way due to any failure of Canada as a country to fulfil the promises made by her friends. In the eastern provinces and in British Columbia the output of mine and forest has increased rapidly, and, in particular, the paper pulp industry is making great strides, and there is every indication that before many years have passed the vast forest regions of northern Quebec and northern Ontario will be supplying a large proportion of all the paper used throughout the world. In the central provinces there has been a gigantic production of field and farm produce, and everything points to a fine crop in 1912 being succeeded by a fine crop in 1913. It is, therefore, not Canada herself that has gone back on her friends, nor is the loss of confidence due to any general failure of Canadian enterprises. Mistakes have been made, bad mistakes—we have made them ourselves—anticipations have been expressed in prospectuses which have not been realized, but this is inevitable in connection with the development of any new country, and I think that in most instances it is only a case of hope deferred by temporary difficulties, and that comparatively little money has been permanently lost. When I think of the record of finance in London in connection with the United States, South America, South Africa, Australia, and other new countries, I feel proud of Canada's clean record in this respect. Some newspapers attribute the depression in Canadian securities to the Balkan war, to the great demand for money for manufacturing purposes in Great Britain, and to the heavy borrowing by the Canadian railways and industrial companies. These may be contributory and intensifying causes, but I think the extent of their influence is comparatively slight. The railways have raised less money than in some previous years; their earnings are keeping well up with the requirements of the increased capital, and the new regions which they have opened up are one and all justifying the expenditure. The real cause of the loss of confidence of the British investor is the recent forced and badly-regulated borrowing of Canadian cities, followed by the news of the voting of fresh expenditures aggregating many millions of pounds.

MUNICIPAL ISSUE MANIA

Many Canadian cities have spent, and we hear by every mail are still spending, huge sums before they have raised the money, and consequently have been forced to the risky and costly expedient of securing accommodation for a few months at a time; and while their finances are still in this dangerous position they are embarking on further large outlays. The British investor has had his confidence in Canadian reliability shaken by witnessing a scramble for money by responsible municipal bodies. He has witnessed, month after month, one unsuccessful municipal issue succeeding another unsuccessful municipal issue at lower and lower prices, regardless of Canada's credit and reputation—regardless of the sacrifice of power to raise money for industrial and agricultural development in order to provide municipal improvements, which, in most cases, could be postponed, regardless of the serious loss inflicted on those who had previously bought city bonds. The British investor has never favored municipal securities, and this last experience is not likely to increase his liking for them. No rate of interest, however high, will tempt more than a small section of the community to invest in city bonds. The reasons alleged for this dislike are that cities raise a constantly-increasing and practically unlimited sum on the same assets, and that the city assessment valuation is not an independent or reliable valuation. Our investors prefer a railway security, or even an industrial security, guaranteed or unguaranteed, which gives them a mortgage for a limited amount on something that they can take possession of, and in connection with which there is a statement of earnings to inform them where their interest is coming from. It may seem absurd to the uninitiated to attribute the fall in other Canadian public securities and general investments to the fall in city bonds, but this callous destruction of municipal credit thoroughly unsettled the public mind. Although the Canadian provinces are great countries, larger than Great Britain, with vast wealth and resources, the prices of provincial government securities have fallen away under the influence of the fall in the price of city bonds, and the prices of railway and industrial securities have fallen in sympathy with the prices of provincial government securities. Great harm has been done; but I think the turning point is well in sight. It is being made increasingly evident that British investors will take no more city bonds; and when this is once realized on the other side of the Atlantic there will be no more expensive attempts to force issues on this market, and other Canadian investments will gradually recover their popularity and their prices on their merits. With the exception of these difficulties in city finance, and the troubles of a few small enterprises, there is nothing to cause the least anxiety in connection with Canada. On the contrary, the prosperity of the Dominion is very great; and my advice to you is to leave municipal securities severely alone, and to take this opportunity of investing all the money you can in those sound Canadian railway and industrial investments which have recently fallen most heavily in price. I repeat that there never will be a more favorable opportunity of investing money at a high rate of interest, with the certainty of a great increase of capital in the course of a few years. (Applause.) Before moving the adoption of the report and accounts perhaps someone would like to ask some questions.

QUESTION AS TO PROFIT

Mr. John Reid: There is one point, Mr. Chairman, which I should like to raise for the purpose of elucidation. It is quite patent to me, but perhaps it may not be quite so patent to others. Before doing so, allow me to congratulate the board upon the singularly satisfactory statement which has been put before us. In view of the heavy depreciation which has taken place during the last six months in securities generally, I think we may congratulate ourselves that only £20,000 represented the amount of our depreciation at April 30 last. The point I wish to raise is this: You make it quite clear in your report, but you do not in your accounts, that the £20,000 has practically been taken off your profit for the year. I presume it is taken off the last item, profit on arranging issues or underwriting new capital, issues and sales of securities, etc. The point I would raise for elucidation is whether that is the profit after providing for the depreciation in securities. It is quite patent, of course, in your report what you mean, but there is nothing in the accounts to indicate how it has been done. I presume I am quite right in my assumption.

Mr. T. Blundell-Brown: Yes, you are quite right in your assumption.

Mr. Reid: Apart from that, I think we may consider that we have a very satisfactory position of affairs before us; and, as the chairman has stated in his most lucid and able address, now is the time for people to avail themselves of the opportunity given to them of investing, and I am quite sure that the British Empire Trust will not be behind in taking advantage of that opportunity. I have very much pleasure in supporting the motion.

Mr. Blundell-Brown: If there are no further questions, I beg to propose: "That the accounts for the year ended April 30, 1913, and the reports of the directors and auditors thereon be received and adopted."

Mr. N. Scott Russell seconded the motion, which was carried unanimously.

Mr. Blundell-Brown next moved: "That the payments of the dividend on the preferred ordinary shares and the interim dividend on the deferred ordinary shares be approved, and that a final dividend on the deferred ordinary shares for the half-year ended April 30, 1913, at the rate of 8 per cent. per annum, be, and is hereby, declared, making total dividends for the year of 6 per cent. on the preferred ordinary shares and 8 per cent. on the deferred ordinary shares."

This was seconded by Mr. Scott Russell and unanimously agreed to.

The retiring directors (Mr. N. Scott Russell and Mr. D. B. Hanna) were re-elected, on the motion of Mr. D. Northall-Laurie, seconded by Major E. F. O. Gascoigne; and Messrs. Robertson, Hill and Company were reappointed auditors, on the motion of Mr. R. Gracey, seconded by Mr. H. W. Harding.

A vote of thanks to the chairman and directors concluded the proceedings.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Fire Losses and Insurance

Manitou, Man.—The school by-law to borrow $30,000 has been carried.

Point Grey, B.C.—Seventeen by-laws, totalling $783,718, were carried by the electors.

Lloydminster, Sask.—Until July 14th for $5,000 6 per cent. debentures. H. C. Lisle, secretary-treasurer.

Grandview, Man.—Until June 12th for $17,000 6 per cent. 20-year debentures. W. Dickie, secretary-treasurer.

Halifax, N.S.—Tenders will be received up to July 28th for debentures totalling $299,750. W. L. Brown, city treasurer.

Richot R.M., Man.—A by-law for road improvements to the extent of $60,000 will be voted upon by the electors on July 21st.

Welland County, Ont.—Until July 15th for $100,000 4½ per cent. 30-year highway improvement debentures. R. Cooper, county clerk, Welland, Ont.

Collingwood, Ont.—Up to July 15th for $54,000 debentures. A. D. Knight, town treasurer, Collingwood. (Official advertisement appears on another page).

Hamilton, Ont.—Up to July 10th for $382,269 local improvement debentures. S. H. Kent, city clerk. (Official advertisement appears on another page.)

Broadview, Sask.—Until July 12th for $25,000 6 per cent. 20-year town hall debentures. A. Sinclair, secretary-treasurer. (Official advertisement appears on another page.)

Calgary S.D.—Until July 15th for $750,000 5 per cent. 40 instalments school debentures. A. T. Jewett, secretary-treasurer. (Official advertisement appears on another page.)

Hanley, Sask.—Until July 9th for $15,000 6 per cent. 20-year municipal building debentures. A. Holm, secretary-treasurer. (Official advertisement appears on another page.)

Snipe Lake Rural Municipality No. 259, Sask.—Until July 14th for $5,000 6 per cent. 20-year road construction debentures. Maitland Barkwell, secretary-treasurer, Richlea P.O.

◆

The International Harvester Company of Canada will close its plants for less than a month, reopening on August 18th. The company has on hand a very large stock of manufactured goods and there is little demand from the west just now. The working staff will not be as large next winter, as it was last winter, when the number of employees made a high record. The Oliver Chilled Plough Works has large orders from Eastern Canada and Australia, but will not run on Saturdays during the summer.

LEGAL NOTICES

FAIR CANADIAN VENTILATOR COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 16th day of June, 1913, incorporating Harry Riley, law clerk, Donald Alexander MacRae, Harold Ernest McKitrick and Thomas Wallace Lawson, barrister-at-law, and John Fraser MacGregor, accountant, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase or otherwise acquire any interest in any patents, brevets d'invention, licenses, concessions and the like conferring an exclusive or non-exclusive or limited right to use any invention or any secret or other information as to any invention in relation to the manufacture, sale and use of ventilators or other apparatus, appliance or device for ventilating buildings, vehicles or ships or generally any similar or other invention which may seem to the company capable of being profitably dealt with by the company, and in particular to acquire for the Dominion of Canada the invention of George A. Fair, of the City of Los Angeles, California, and the patent of Canada numbered 136,410 granted for a new and useful improvement in ventilators and any improvements thereon; (b) To use, exercise, develop, grant licenses in respect of and otherwise turn to account any such patents, brevets d'invention, licenses, concessions and the like, and information aforesaid; (c) To manufacture, buy, sell, install, rent and generally to deal in ventilators and all similar appliances, apparatus or devices for ventilating buildings, vehicles or ships, or any appliance or device used or capable of being used in connection therewith; (d) To manufacture, buy, sell and deal in goods, wares and merchandise, and particularly in machinery, tools, implements, material and appliances requisite or useful for the manufacturing of and dealing in ventilators or ventilating appliances; (e) To carry on the business of building contractors and generally merchants and dealers for the purposes aforesaid; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To acquire or undertake the whole or any part of the business, franchises, undertakings, properties, rights, powers, privileges, bonds and debentures, letters patent, liabilities, contracts, real estate, good will and assets and other property of any person, firm or company, carrying on any business which the company is authorized to carry on or possessed of property suitable for the purposes of the company, and to issue in payment or part payment therefor, or for any property, rights or easements which may be acquired by, or, with the approval of the shareholders, for services rendered to, or work done for the company or in or towards the payment or satisfaction of debts or liabilities of or assumed by the company, paid-up shares or bonds, debentures, debenture stock or other securities of the company; (h) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in or any business or transaction capable of being conducted so as directly or indirectly to benefit the company and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (i) To take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company, notwithstanding the provisions of section 44 of the said Act; (j) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain and carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (k) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects or for any public, general or useful objects; (l) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit the company; (m) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant or stock-in-trade; (n) To construct, improve, maintain, work, manage, carry out or control any roads, ways and tramways, branches or sidings on lands owned or controlled by the company, bridges, reservoirs, water courses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences, which may seem calculated directly or indirectly to advance the company's interests, and to contribute, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (o) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (p) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (q) To sell or dispose of the undertaking of the company, or any part thereof, for such consideration as the company may see fit to accept, and in particular for shares, bonds, debentures, debenture stock or securities of any other company or corporation; (r) To adopt such means of making known the produce of the company as may seem expedient, and in particular by advertising in the press, by circulars, by publications of books and periodicals, and by granting prizes, rewards and donations; (s) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (t) To distribute among the shareholders of the company in kind any property of the company, and in particular any shares, bonds, debentures, debenture stock or securities in any other companies belonging to the company, or which the company may have the power to dispose of; (u) To apply for and obtain from any and all legislative, governmental, municipal, and other authorities, powers and bodies, confirmation, registration and recognition of the company and its rights, powers, concessions, privileges, franchises, and objects and such additional rights, powers, concessions, privileges, franchises and objects as may be considered expedient and to do whatever may be necessary and expedient to comply from time to time with all or any by-laws, ordinances, decrees, regulations and other requirements now or in future existing; (v) To act as agents or distributors for any other business, company or concern, having objects similar or germane to those of the company; (w) To do all or any of the above things as principals, agents, contractors, trustees or otherwise, and either alone or in conjunction with others; (x) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Fair Canadian Ventilator Company, Limited," with a capital stock of one million dollars, divided into 1,000,000 shares of one dollar each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 18th day of June, 1913.

THOMAS MULVEY,

51-2. Under-Secretary of State.

BOVING & COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 7th day of June, 1913, incorporating Reginald Holland Parmenter, William Symon Morlock and Norman Baillie Wormwick, solicitors; Roy Beverley Whitehead and Bruce Victor McCrimmon, students-at-law; Ernest Pickles, draftsman, and James Victor Macfarlane, accountant, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To adopt and carry into effect with or without variation a certain agreement dated the second day of June, 1913, between the Canadian Boving Company, Limited, of the First Part; Jens Orton Boving, of the Second Part, and Arthur John Thomson, of the Third Part, and to issue as fully paid stock of the company in pursuance of such agreement; (b) To carry on the business of chemical, metallurgical, mining, electrical, mechanical and civil engineers and contractors for the construction, erection, alteration and repair of public and private works and undertakings and any business in which the application of electricity or any other power is or may be useful or convenient to carry on the business of treating, smelting and refining mineral ores or other substances, and for such purpose to instal all necessary plant, machinery and apparatus, and to purchase, sell and otherwise deal in ores of various kinds or other substances capable of being treated, and to buy, sell and deal in any products or by-products of such ores or substances; (c) To prospect for, open, explore, develop, work, improve, maintain and manage gold, silver, copper, coal, salt, iron and other mines, quarries, mineral and other deposits and properties, and to dig for, raise, crush, wash, smelt, roast, assay, analyze, reduce, amalgamate, make and otherwise treat coal, coke, ores, metals, clays and minerals, whether belonging to the company or not, and to render the same merchantable, and to sell and otherwise dispose of the same or any part thereof, or any interest therein; (d) To provide, purchase, lease or otherwise acquire, to construct, lay down, erect, establish, operate, maintain and carry on all necessary work, stations, engines, machinery, turbines or hydraulic apparatus, plant, cables, wires, works, lines, generators, accumulators, lamps, meters, transformers and apparatus connected with the generation, accumulation, distribution, transmission, supply, use and employment of electricity; to generate, accumulate and distribute electricity for the supply of electric light, heat and motor power and for industrial or other purposes; provided, however, that any sale, distribution or transmission of electric, hydraulic or other power or force beyond the limits of the lands of the company shall be subject to local and municipal regulations in that behalf; (e) To enter into, carry out, perform, sign and sub-let contracts for doing work and supplying materials in connection with the building of steam and electric railways, canals, telegraph and telephone lines to be used therewith, bridges and other public works, dry docks, dams, water powers, wharves, piers, viaducts and other works and undertakings, and to receive as consideration therefor the stocks or bonds of any other company; (f) To contract with any person, corporation, society, public body or municipality, or with the Government of Canada, or any province thereof, or with any other country or state, for the making, building, construction and operation of all private and public works and undertakings of every description and kind; (g) To manufacture, sell and deal in, and to act as agent for the sale of all kinds of machinery, machines, apparatus, fixtures, instruments, materials, engines, lamps, wires, motors, air-brakes, implements, and tools and all other goods, wares and merchandise of every description; (h) To apply for, obtain, register, purchase, lease or otherwise acquire, and to hold, use, own, operate and introduce, and to sell, assign, or otherwise dispose of any trade marks, trade names, patents, inventions, improvements and secret processes having relation to any of the businesses which this company is authorized to carry on, or used in connection with, or secured under letters patent of the Dominion of Canada or elsewhere, or otherwise, and to use, exercise, develop, grant licenses in respect of, or otherwise to turn to account any such trade marks, trade names, patents, licenses, secret processes and the like, or any such property or rights; (i) To purchase, lease or otherwise acquire, sell, equip, maintain and operate all such transportation facilities, whether by land or water, as may be necessary or convenient in the conduct of its operations, and to sell, lease or otherwise dispose of the same and to construct, purchase, charter, employ, own, maintain, manage, navigate, lease and sell steam or sailing vessels or other kinds of craft, lighters, floats, steam pumps, diving apparatus, cranes, plant, machinery and appurtenances; (j) To acquire and undertake the good-will, property, rights, franchises and assets of every kind, and the liabilities of any person, firm or association for one or more of the purposes for which this incorporation is formed; and to make, allot and issue in payment or exchange in whole or in part therefor, bonds or debentures of the company and common or preferred shares of the capital stock of the company as fully paid and non-assessable; (k) To pay all or any expenses incurred in connection with the formation, promotion and incorporation of the company or any other company which this company has power to promote, or in which the company is in any way interested or concerned, or to contract with any person, firm or company to pay the same, and to pay commissions to brokers and others for placing, selling or guaranteeing the subscription of any shares, bonds, debentures or securities of this company or of any other such company as aforesaid; (l) To sell or dispose of the undertaking and assets of the company hereby incorporated, or any part thereof, for such consideration as the company may think fit, including shares, debentures or securities of any other company having objects altogether or in part similar to those of the company hereby incorporated; (m) To distribute any of the property of the company hereby incorporated in specie or money among its shareholders; (n) To receive and accept bonds, debentures or other securities in payment in whole or in part for work done or materials supplied in connection with the business of the company, notwithstanding the provisions of section 44 of the said Act; (o) To make advances to cus-

LEGAL NOTICES

tomers and those having dealings with the company and to guarantee the performance of contracts by any such persons; (p) To do all such other things as may be deemed conducive to the attaining of the above objects or any of them. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Boving & Company of Canada, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 10th day of June, 1913.

THOMAS MULVEY,
50-2 Under-Secretary of State.

THE HERBERT MORRIS CRANE & HOIST COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 27th day of May, 1913, incorporating James Steller Lovell, accountant; William Bain, bookkeeper; Robert Gowans, Joseph Ellis and John Joseph Dashwood, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on business as iron founders, mechanical engineers, makers of and dealers in lifting machinery, agricultural implements and other machinery and motors and motor cars, tool makers, brass founders, metal workers, boilermakers, millwrights, machinists, iron and steel converters, smiths, wood workers, gun makers, builders, painters, plumbers, metallurgists, electrical, sanitary and water supply engineers, gas fitters, farmers, printers, carriers and merchants, and to buy, sell, manufacture, repair, convert, alter, let on hire and deal in machinery, implements, rolling stock and hardware of all kinds; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the above or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To carry on any business relating to the winning and working of minerals, the production and working of metals, and the production, manufacture and preparation of any other materials which may be usefully or conveniently combined with the engineering or manufacturing business of the company, or any contracts undertaken by the company, and either for the purpose only of such contracts or as an independent business; (d) To undertake and execute any contracts for works involving the supply or use of any articles manufactured or sold by the company and to carry out any ancillary or other work comprised in such contracts; (e) To apply for, purchase or otherwise acquire any patents, brevets d'invention, licenses, concessions and the like, conferring an exclusive or non-exclusive or limited right to use or any secret or other information as to any invention which may seem to the company capable of being used for any purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop, grant licenses in respect of, or otherwise turn to account the property, rights and information so acquired; (f) To purchase or otherwise acquire and undertake all or any part of the business, property and liabilities of any person or company carrying on any business which this company is authorized to carry on, or possessed of property suitable for the purposes of the company; (g) To construct, carry out, maintain, improve, manage, work, control and superintend any buildings, foundries, factories, workshops, wharves, warehouses, shops, electric works, and other works and conveniences which may seem directly or indirectly conducive to any of the company's objects; (h) To enter into partnership or into any arrangement for sharing profits, union of interests, joint adventure, reciprocal concession or co-operation with any person or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as to directly or indirectly benefit this company, and to take or otherwise acquire and hold shares or stock in or securities of any such company, and to lend money to, guarantee the contracts of, or otherwise assist any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (i) Generally to apply for, purchase, take on lease, or in exchange, hire, or otherwise acquire any real or personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, or with reference to any of these objects, or capable of being profitably dealt with in connection with any of the company's property or rights for the time being, and in particular any land, buildings, easements, licenses, designs, patents, machinery, plant and stock-in-trade; (j) To distribute any of the property of the company in specie among the members; (k) To aid in the establishment and support of associations or institutions calculated to benefit persons employed by the company, or having dealings with the company, and to subscribe money for philanthropic, charitable or benevolent purposes; (l) To sell the undertaking of the company or any part thereof or the property and assets of the company as a going concern, for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company, having objects altogether or in part similar to those of this company; (m) To promote any company or companies for the purpose of acquiring all or any of the property, rights and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit this company, and to amalgamate with any other company having objects altogether or in part similar to those of this company; (n) To raise and assist in raising money for, to lend money to and to aid by way of bonus, endorsement, guarantee or otherwise any customer or other person having dealings with the company, any corporation in the capital stock of which the company holds shares or with which it may have business relations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; and to guarantee payment of the principal of or dividends and interest on shares, bonds, debentures or other securities of any company or corporation having objects altogether or in part similar to those of the company; (o) To obtain any provisional order or Act of Parliament, for enabling the company to carry any of its objects into effect, or for effecting any modification of the company's constitution, and to oppose and resist any measures, proceedings, or applications which may seem calculated directly or indirectly to prejudice the company's interests; (p) To pay out of the funds of the company all costs, charges and expenses preliminary and incidental to the formation, incorporation and organization of the company; (q) To pay, with the approval of the shareholders, out of the funds of the company, commission to any person or company for subscribing or agreeing to subscribe for any shares of the company or for procuring or guaranteeing or agreeing to procure or guarantee the subscription of any shares in the company's capital or any debentures, debenture stock, shares, stock or securities whether issued by the company or not; (r) To purchase, take up or otherwise acquire and hold shares, stock or securities in any other company or corporation and to apply the funds of the company for the purpose. Also to invest and deal with any moneys of the company not immediately required for carrying on its business upon such securities and in such manner as may from time to time be determined by the directors; (s) To draw, make, accept, endorse, execute and issue bills of exchange, promissory notes, debentures, bills of lading and other negotiable or transferable instruments or securities; (t) To sell, improve, manage, develop, lease, exchange, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (u) To do all or any of the above things either as principals, agents, trustees, contractors or otherwise, and either alone or in conjunction with others, and either by or through agents, sub-contractors, trustees or otherwise; (v) To do all such things as, in the view of the company, are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Herbert Morris Crane & Hoist Company, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 29th day of May, 1913.

THOMAS MULVEY,
48-2 Under-Secretary of State.

Dated at Toronto this 4th day of June, 1913.

BLAKE, LASH, ANGLIN & CASSELS,

THE HERBERT MORRIS CRANE & HOIST COMPANY, LIMITED.

CANADIAN I. P. MORRIS COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 7th day of June, 1913, incorporating James Steller Lovell, accountant; Robert Gowans, William Bain, William George Flood and Joseph Ellis, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in hydro-electric apparatus of every description, steam engines, boilers, machinery, castings, and a general machine and foundry business; and to carry on the business of ship-building in all its branches; (b) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (c) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company; (d) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (e) To purchase or otherwise acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (f) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any any such corporation; to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (g) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (h) To amalgamate with any other company having objects similar to those of this company; (i) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (j) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (k) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian I. P. Morris Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada this 11th day of June, 1913.

THOMAS MULVEY,
50-2 Under-Secretary of State.

Dated at Toronto this 17th day of June, 1913.

BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for
CANADIAN I. P. MORRIS COMPANY, LIMITED.

Canada's customs revenue for June was $9,682,621, as against $8,973,246 in June, 1912, an increase of $709,375, or about 8 per cent. For the three months ended June 30, the customs revenue has been $28,873,619, as against $26,534,320 in the corresponding quarter of 1912, an increase of $2,339,299.

DIVIDENDS AND NOTICES

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED.

Notice is hereby given that a dividend of one per cent. (1 per cent.) has been declared on the ordinary shares of the capital stock of the Mexican Light and Power Company, Limited, payable on the 15th day of July, 1913, to shareholders of record at the close of business on the 5th day of July, 1913.

That the transfer books of the company for the ordinary shares will be closed from the 7th day of July, 1913, both days inclusive.

Dividend cheques for the shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, New York; Mexico City, Mexico; London, England, and its branches.

By order of the Board.

W. E. DAVIDSON,
Secretary.

Toronto, Canada, 27th June, 1913.

IN the Matter of the Companies (Consolidation) Act, 1908, and in the Matter of PEACE RIVER LANDS, LIMITED (In Voluntary Liquidation).

Notice is hereby given, that the creditors of the above named Company are required, on or before the 19th day of August, 1913, to send in their names and addresses, and particulars of their debts or claims, and the names and addresses of their Solicitors (if any) to the undersigned, William Barclay Peat, of 11 Ironmonger Lane, London, E.C., England, the Liquidator of the Company; and, if so required, by notice in writing from me, the said Liquidator, are, by their Solicitors or personally, to come in and prove their debts or claims at such time and place as shall be specified in such notice, or in default thereof they will be excluded from the benefit of any distribution made before such debts are proved.

Dated this 19th day of June, 1913.

W. B. PEAT,
Liquidator.

THE SITUATION AND THE OUTLOOK

IV.

(Continued from page 105).

dium size and chiefly situated in thickly wooded country. As the clearing of large tracts for planting in grain or hay is somewhat difficult, there is found to be a greater benefit in concentrating efforts on smaller areas and growing root crops. For these there is a tremendous home market which is only partially supplied from the farms in the district.

The farmers in New Brunswick were enabled to begin seeding operations from one to two weeks earlier than usual. One fact of interest, says Mr. H. T. Hoag, secretary of St. John board of trade, is the large number of enquiries coming in from the western States of Canada, particularly in and about Montreal, in regard to opportunities and agricultural conditions in the province, and many families are coming from the Old Country to settle on New Brunswick lands.

THE MERCHANTS BANK OF CANADA.

QUARTERLY DIVIDEND.

Notice is hereby given that a dividend of two and one-half per cent. for the current quarter, being at the rate of ten per cent. per annum, upon the paid-up capital stock of this institution, has been declared, and that the same will be payable at its banking house in this city and at its branches, on and after the 1st day of August next, to shareholders of record at the close of business on the 15th day of July.

E. F. HEBDEN,
General Manager.

Montreal, 24th June, 1913.

ANOTHER UNITED STATES COMPANY FOR CANADA.

The Massachusetts Saw Works, of Springfield, Mass., will build a branch factory at Hamilton, Ontario, which will be known as the Victor Saw Works, Limited. They will make Victor hack saws. The Hamilton plant will be operated as an entirely separate industry. A two-story building has been leased and will be thoroughly equipped as a saw works. When running at full capacity, this factory will employ about 75 hands, principally skilled mechanics. The president is Mr. J. W. McQuillan, formerly connected with the Massachusetts Saw Works in an executive capacity. The vice-president is Mr. Harold F. Strout, for some time past the sales manager for the Massachusetts Saw Works. The secretary-treasurer is Mr. E. B. Bradford, Jr.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, May 20th, 1913.

A Manager for our Sales Department wanted—An experienced and capable man who can systematically direct Salesmen so that they will get profitable results—Initial Salary $4,000 per annum or better. Telephone for appointment.

H. H. WILLIAMS
38 King Street East
TORONTO

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

ESTIMATES SHOW INCREASED ACREAGE

Wheat, Oats and Barley—Conditions are Generally Favorable Throughout Dominion

The reports relative to crop conditions, received by the census and statistics office at Ottawa, show that the month of May proved cold and dry with frequent night frosts and that these conditions, whilst favorable to seeding, retarded the growth of the crops sown and caused them to be unseasonably backward.

The total area under wheat in Canada is provisionally estimated at 9,816,300 acres, or 57,900 acres more than in 1912, the area in spring wheat being 8,990,500 acres, or 13,100 acres more. Oats occupy 9,608,500 acres compared with 9,216,900 acres in 1912, an increase of 391,600 acres; barley occupies 1,425,200 acres, an increase of 10,000 acres; and rye 126,500 acres, a decrease of 9,610 acres. For wheat, barley and oats taken together the increase represents 459,500 acres. The estimated acreage under hay and clover is 7,475,600 acres, compared with 7,633,600 acres last year.

Increases in the Northwest.

For the three northwest provinces of Manitoba, Saskatchewan and Alberta the total wheat area is estimated at 9,013,800 acres, as compared with 8,961,800 acres; that of oats at 5,207,700 acres compared with 4,913,900 acres; and that of barley at 852,600 acres compared with 809,800 acres—these differences representing increases of 52,000 acres for wheat, 293,800 acres for oats and 42,800 acres for barley, or 388,600 acres for the three crops.

Generally Favorable Throughout the Dominion.

On May 31 the condition of the crops was reported as generally favorable throughout Canada. Expressed in percentage of the usual standard of 100, taken as representing the promise of a full crop, the condition on May 31 for the Dominion was as follows:—Fall wheat 80.62, spring wheat 91.55, oats 91.72, barley 91.19, rye 87.70, peas 88.24, mixed grains 90.15, hay and clover 81.12, pasture 85.08 and alfalfa 77. At the corresponding date last year the condition of fall wheat was only 71.46. All the other crops were then above 90, excepting rye 87.24, peas 83.85 and mixed grains 87.72. The poor condition this year of alfalfa is due to the effects of the winter and cold spring.

◆

MANY COMPANIES INCREASE CAPITAL.

The Ontario Rock Company, Limited, have increased their capital stock from $40,000 to $90,000 by the creation of 50,000 shares of new stock of $1 each.

The British America Security Company, Limited, have increased their capital stock from $100,000 to $200,000 by the creation of 1,000 shares of new stock of $100 each.

The Knight Brothers Company, Limited, have increased their capital stock from $150,000 to $500,000 by the creation of 3,500 shares of new stock of $100 each, of which 2,200 shares shall be preferred shares and 1,300 shall be common shares.

The Dome Mines Company, Limited, have increased their capital stock from the sum of $3,500,000 to $5,000,000 by the creation of 150,000 shares of new stock of $10 each.

The Urban and Rural Telephone Company, Limited, have increased their capital stock from the sum of $8,000 to $16,000 by the issue of 160 shares of new stock of $50 each.

The Canadian Towing and Wrecking Company, Limited, have increased their capital stock from $100,000 to $200,000 by the issue of 1,000 shares of new stock of $100 each.

The Thunder Bay Contracting Company, has increased its capital stock from $50,000 to $250,000 by the issue of 200,000 shares of new stock of $1 each.

The United Drug Company, Limited, has increased its capital stock from $200,000 to $350,000, the increase consisting of 1,500 shares of $100 each.

Douast Realty, Limited, have increased their capital stock from $100,000 to $250,000, the increase consisting of 1,500 shares of $100 each.

The London Cold Storage and Warehousing Company, Limited, have increased their capital stock from $75,000 to $150,000, the increase consisting of 750 shares of $100 each.

The Montreal Reform Club Incorporated, has increased its capital stock to $100,000, dividing the new capital stock of $80,000 into 1,600 shares of $50 each.

◆

One hundred auto-busses are likely to be in operation on the streets of Montreal about September 1st. The Canadian Autobus Company is making final arrangements for the shipment of this number of busses for that date.

STANDING OF CANADA'S MUNICIPAL BONDS

Canadian Bankers in London Have Something to Say Anent Recent Criticism

Mr. R. M. Horne-Payne's speech in London, which has caused a stir in Canadian and British financial circles, is printed in detail on another page. According to a dispatch from "Windermere," in London, inquiries among large British insurance corporations show that they are taking careful note of Mr. Horne-Payne's advice to boycott Canadian municipal bonds. For the present they agree that Canadian corporations should moderate their expenditures.

One manager had before him when interviewed, a statement of Canada's total borrowings for the last three years, showing 595 million dollars, namely, 151, 182 and 282 million dollars respectively, in the years 1911, 1912 and 1913, ending in June each year.

Australia's three years total only 175 millions, Argentine's 275 millions, the United States, 67 million dollars.

Our Bankers in London.

The London managers of the Canadian banks join in the protests against Mr. Horne-Payne's advice.

Sir Frederick Williams Taylor, of the Bank of Montreal in London, says Mr. Horne-Payne's is one of the most uncalled for and indiscreet utterances ever made by a London business man.

Mr. Franklin Jones, of the Canadian Bank of Commerce overseas, thought is was a pity to call attention to the attack.

Mr. Botsford, of the Royal Bank's London branch, contradicts Mr. Horne-Payne and says municipal bonds generally are safer for investment than untried industrials. As one who advises many British investors, Mr. Botsford denies that Canadian values are inflated. There has been too much speculation in subdivisions and outside properties, but generally speaking, the values are justified.

Mr. Ashe, of the Union Bank's London branch, says Canadian municipal bonds are sound investments, and very attractive at present prices.

Alderman Hanson entirely disputes Mr. Horne-Payne's assertions. Mr. Greenshields, a leading broker, admits that the investor who used to buy municipal bonds is now buying industrials because there is a better yield. He thinks, however, that the dearth in the municipal market is only temporary.

Alberta's Municipal Bonds.

"So long as municipalities are restricted in the amount of their borrowings," says Hon. Charles Stewart, Minister of Municipalities for Alberta, "and so long as they are prevented from using the money for speculative purposes, I cannot see how there is any question as to the security of western municipal bonds. Both these restrictions exist in Alberta, and I do not anticipate that the day will ever come when Alberta municipalities will be found defaulting."

In the meantime, Mr. Payne has made another statement to the Canadian Associated Press:—

"I can only say my remarks have been entirely misunderstood and misrepresented in Canada," he says. "I did not state or intend to suggest the security for Canadian city bonds was not good or Canadian cities were not able to pay their interest, but referred to the dangerous financial situation created by spending money more rapidly than it can be raised and to the great injury inflicted upon British investors and Canadian municipal credit alike by the consequent continuous depreciation in prices.

Mr. Payne's Explanation.

"My life," he added, "has been devoted to raising money for the development of Canada. Every interest I have is bound up with her prosperity. It would be a contradiction in every act and word of mine for the past 25 years if I said anything against her future or against her future prosperity, which I regard as absolutely unquestionable. I was speaking as a financial man, referring exclusively to monetary conditions and speaking entirely on my own responsibility without consultation with anyone."

◆

The arrivals in the port of Montreal of ocean steamers during June constitute a record. Their number is 78, as against 54 for June, 1912; 65 for last May and 76 for ships entering the port from the beginning of navigation this year until the end of May. The combined gross register tonnage of the ocean ships which entered the harbor last month was just short of half a million tons, the actual figure being 496,776 tons, as compared with only 370,084 tons for June, 1912, an increase of 126,692 tons.

JUNE MUNICIPAL BOND SALES

They Totalled Nearly Three and Three Quarter Millions in Canada and United States

The municipal bond sales in Canada for June, as compiled by *The Monetary Times*, amounted to $2,435,726, compared with $1,880,630 for May, and $1,690,344 for the corresponding period last year, and making a total for the year of $11,422,011.

Seven provinces were in the market. The largest issues were made by London, Ont., and Kamloops, B.C.

The amount of Canadian municipal bonds sold in the United States during June was as follows:—

Edmonton Schools, Alta	$1,250,000	....	
Fort Francis, Ont.	10,000	6%	20 years

The following are the particulars by provinces:—

Ontario	$ 812,406
British Columbia	497,500
Quebec	400,000
Alberta	281,820
Saskatchewan	278,000
New Brunswick	150,000
Manitoba	16,000
	2,435,726

The following are the monthly totals during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 881,838	$ 420,337	$ 2,133,531	$ 1,337,500
February	1,272,977	1,037,287	2,596,378	1,038,806
March	1,169,730	6,271,025	1,926,716	1,035,492
April	6,805,078	3,910,288	927,160	3,693,857
May	5,964,896	3,946,047	1,928,748	1,880,630
June	2,187,588	3,983,670	1,690,344	2,435,726
July	1,536,424	1,594,566	1,967,476	....
August	1,312,953	1,493,507	1,649,547	....
September	2,841,486	1,748,778	1,998,605	....
October	2,211,461	1,730,075	1,060,597	....
November	2,292,781	2,915,765	1,396,664	....
December	566,113	1,243,596	491,590	....
Total	$29,043,325	$30,295,838	$19,767,356	$11,422,011

The following are the details:—

Ontario.

MUNICIPAL FINANCING

South Vancouver to Issue Treasury Certificates—Local Investors and Debentures—Hundred Dollar Bonds

Despite tight money, adverse circumstances and criticisms, Canadian municipalities have during the past month disposed of a goodly number of debentures, as will be seen from the record of *The Monetary Times*, printed on another page of this issue. The following are some of the latest plans of those cities and towns requiring funds.

South Vancouver has passed a resolution authorizing the issue of treasury certificates on 1913 bonds to raise 80 per cent. on $735,000.

Estevan, Sask. Council, has decided to offer its next series of bonds in sums of $100 for public subscription. The issue will be for $8,000, bearing interest at six per cent. The issue will be ready for sale during the last week of July, after the by-law has been voted on by the ratepayers.

Citizens of Kaslo, B.C., have subscribed for the whole bond issue of $17,500, which represents the city's share of the cost of the $40,000 school building, the Government paying the balance. The bonds could not be sold in the open market on account of the financial stringency.

Various Offerings to be Made.

Oakville's, Ont., treasurer has been authorized to offer for subscription $20,000 5 per cent. debentures, in multiples of $100 each. The debentures are for the extensions to electric light and waterworks.

Mayor Stedman, of McLeod, Alta, has been empowered to try and effect the sale of the town's debentures. He has had correspondence from trust companies in San Francisco, in this connection, and is now visiting cities on the Pacific coast. If a sale is not effected he will try and sell the debentures in Toronto.

"Because times were good and it was an easy matter to borrow money from the bank, not a local improvement bond had been sold since 1907, and we find ourselves in the exasperating position of having to shoulder burdens the previous councils should have borne," declared Mayor Baxter, of Vancouver, at the Court of Revision of the city council.

North Vancouver Ferry Bonds.

The financial position of the ferry board was raised at the North Vancouver city council meeting, upon a letter from Messrs. G. A. Stimson and Company, Toronto, stating that they had been offered $20,000 ferry debentures, which was part of the issue of $128,000, which the council passed a by-law to redeem at $105 being read. The company could purchase them at $90 with interest, thus saving the council $1,200 on this deal. They could also buy other debentures from time to time at a lower price than $105, and eventually get them all in. Until these bonds had been retired, the board was prohibited creating new securities, as the present issue was a lien, not only upon present, but all future assets of the ferry company.

STOCKS AND BONDS TABLE—NOTES

(u) Unlisted.

† Canadian Consolidated Rubber Bond Denominations, $100, $500 and $1000. Steel Company of Canada, $100, $500 and $1,000. Sherwin Williams, $100, $500 and $1,000. Penmans, Ltd., $100, $500 and $1,000. Canadian Cottons, $100, $500 and $1,000.

‡ Quarterly.

CROPS AND THE WEST

Crop conditions in Saskatchewan are satisfactory to date. The crops have had ample rain, and the cool weather of the early part of the season developed a strong plant. A great deal depends upon the weather conditions from this time on. The crop in Saskatchewan will probably be fully as large as that of last year.

So far as Manitoba is concerned, the recent rains have been satisfactory, but as the crop was further advanced than in Saskatchewan, Manitoba has suffered somewhat on account of the delay in getting rain. The straw will not be very heavy, but on that account the expense of harvesting the grain will be less, and experience in the prairie country has taught that an average crop is more satisfactory than a heavy one. It looks now like a 17 or 18 bushel per acre crop. Doubtless the crop in Manitoba will bring in more money than that of last year, if we have satisfactory weather from now forward. Alberta conditions generally are satisfactory.

The farmers are not buying very much, and the net profits will be more than usual. The present attitude of the banks will ultimately bring sounder conditions, as the farmers in the past have been disposed to borrow too freely. The sale of all kinds of merchandise is being curtailed this season, which is well, as in many lines the sale of goods has been pressed unduly heretofore. This is particularly applicable to farm implements.

While everyone is feeling the scarcity of money, nobody is being hurt particularly. While the banks are not making any new commitments, they are taking care of their regular business accounts. The value of inside property is not being affected in any way, and the situation is holding together fairly well under the circumstances.

If this year's western crop is harvested successfully, the proceeds of it will not affect world-wide conditions, but no doubt it will give considerable relief to the local situation.

SUPREMACY OF MONTREAL HARBOR

Heretofore, the advocates of a deeper channel for the River St. Lawrence have not considered there were difficulties other than a sufficient supply of money or credit to put the necessary dredges at work. A thirty-five feet channel all the way was considered feasible and predictions have been heard that the biggest ships would be able to dock at Montreal.

An investigation is about to begin, not with a view to increasing the safety of the channel by increasing its depth, but with a view to finding how much deeper it can be made with safety. Every additional foot the channel is deepened, diverts additional water into the channel. The question now is how much deeper it will be safe to dig the channel and yet leave the rest of the river available for navigation purposes.

Mr. Victor Forneret, of Ottawa, is one of a commission appointed by the government to carry on the investigation. He has been employed as an engineer on the St. Lawrence and is familiar with the situation. The investigation will begin immediately and Montreal will then know her fate. The point will be settled as to whether it will be possible for Montreal to continue the head of ocean navigation for the largest ships or whether she will have to resign her position in that respect to Quebec or some other port further down the St. Lawrence where the depth and width of the channel are sufficient to provide the largest ships with a safe passage.

WHEN WILL THE PANAMA BE READY?

The Canadian railroad presidents are said not to be unduly exercised as to a revision of their freight rates by reason of the advent of the Panama Canal. A cable message from London last week will not be inclined to hasten them to action. It said that experts sent to Panama by a leading German steamship line which contemplated big developments when the canal is available, have reported that in their opinion large ocean-going liners will not be able to pass through that waterway for another five years at least. They base this opinion on the frequency of landslides in the Culebra Cut, which have been on such a scale recently that the steam shovels are making little progress in that part of the work. Moreover, the engineers are said to recognize that when the water is let in there will be some erosion, and that unless proper preparations are made it will cause the slides to block the canal

Only the other day, Colonel Geothals, chief engineer of the canal, said it would be open for traffic early in 1915. Canadian interest in the waterway does not seem very strong and there appears to be here an attitude of waiting for substantial demonstration of the actual effect of the canal on the world's shipping and commerce.

ICE CREAM ON THE FARM

Down in Findlay, Ohio, H. B. Clark is trying to solve the farm labor problem. He has several hundred acres of corn dying for the want of cultivation. In order to make more radiant the dusty attractions of farm labor, Mr. Clark offers the following to any man who will take a job with him:—

1. A riding cultivator to save walking.
2. A sun umbrella to keep off the sun's rays.
3. Plenty of sterilized ice water to drink.
4. Ice cream every other day.

No mention is made of a hammock for picking berries, an electric fan attachment for the cultivator, a copy of "Capital Investments in Canada" for after the evening meal, a corn-cob pipe, or of a little something in the sterilized ice water. But Mr. Clark probably has those and still other allurements up his agricultural sleeve. The Findlay farmer, though, is working along the right lines. The farm laborer's job is not sufficiently attractive. That is partly why Ontario, Manitoba, Saskatchewan, Alberta and other provinces are calling in vain for help. Mr. W. F. Maclean, M.P., some years ago struck the keynote of the situation with his question, which duly became embedded in Canada's pastoral history, "Where shall the hired man wash his feet?" The hired man is too much of a side issue in the matter of comforts. Many farmers think only of the greatest amount of work to be squeezed in the least amount of time. Being human and masculine, the hired man naturally objects to the squeezing process. Hoeing, harvesting, picking, packing, and the thousand other duties of the farm, performed in the broiling sun, do not bear the earmarks of what the immaculate city boy calls "a soft job." There is the rub. If the farmer wants labor of value he must make the job "softer." His hired man must be classed with the family in the house, rather than with the neighers and the bleaters in the barn. Burnish the attractions of the farm, then the rural depopulation will be lessened and some of the good stock which has drifted to the cities will return to the land.

There is, we know, the problem too of the hired man who is not worth his salt. That will mostly solve itself as soon as life on the farm magnetizes the man who is worth not only his salt, but also three square meals a day, good wages, and a few trimmings. Mr. Clark, of Ohio, begins to see where the real weeds lie.

SELLING BONDS LOCALLY.

Several municipalities have been patting backs with satisfaction at moderate success in selling their debentures to the local citizens. While no fault can be found with the choice of investment, it is better to sell the bonds to outside capital, retaining the local capital for other purposes.

SMALL CHANGE

What is the fire insurance rate on the English suffragette?

* * * *

Life insurance men say there will soon be a little Sun in the Home.

* * * *

General Money Market to Trooper Town Treasurer: "Halt; dismount."

* * * *

One of the penalties of development is to be in a constant state of unfinish.

* * * *

The hot weather seems to have burnt out the fuse from our stock exchanges.

* * * *

Those who are taking part in "flag incidents" should acquire a little common sense.

* * * *

In Quebec, they are putting stones in baled hay to make weight. And the horse cannot speak!

* * * *

The Montreal and Toronto stock exchanges have as many excuses for a holiday as the office boy.

* * * *

The Montreal thermometer, taking a hint from the stock exchange, performed a forty-point drop last week.

* * * *

Little by little we learn that some of those industrial combines of yester year are not all they were cracked up to be.

* * * *

It seems as hard for Canadian provincial securities to get into the British Trustee List as for the fly to negotiate the patent window screen.

* * * *

And now a number of prospective purchasers of Canadian Pacific Railway at 200 will be disappointed if the stock does not drop that far.

* * * *

James J. Hill says the "boys" in Western Canada have had a little too much ambition—and that has proved one of James Jay's greatest assets.

* * * *

Twenty-one productions were received in an American anthem competition, but not one was good enough for the prize—probably not enough of $ note thrown in.

* * * *

A Toronto ice cream company's bonds are to be offered to the public. The office boy says investors will probably freeze on to them, keeping them in cold storage.

Even if Mackenzie and Mann did sell the Canadian Northern to the government and the Toronto railway and light plant to the city, they could get jobs as rapid money raisers.

CANADA HAS ENOUGH RAILROADS FOR EIGHT MILLION PEOPLE

That is the Opinion Expressed by James J. Hill at Montreal This Week—Some Facts, Figures and Hillisms.

While expressing every confidence in Canada's future, James J. Hill said at Montreal this week that the Dominion has about enough railroad mileage at present for eight million people to support. He calculated that the Dominion has more miles of railway per capita than the United States and advised the country to go slowly, even though it was rapidly being populated. He did not think the policy of the Federal Government in subsidizing railways was a wise one, as it causes lines to be built that will not pay for a long time to come.

Mr. Hill could not point to any American legislation that was doing the railway enterprises very great damage at present, neither was there any labor trouble in sight, although these things, Mr. Hill said, were liable to come into existence at almost any time. "One thing is certain," he added, "both Canadian and United States roads are charging a great deal less for carrying freight than those of any other country, while they pay a great deal higher wages than foreign railways."

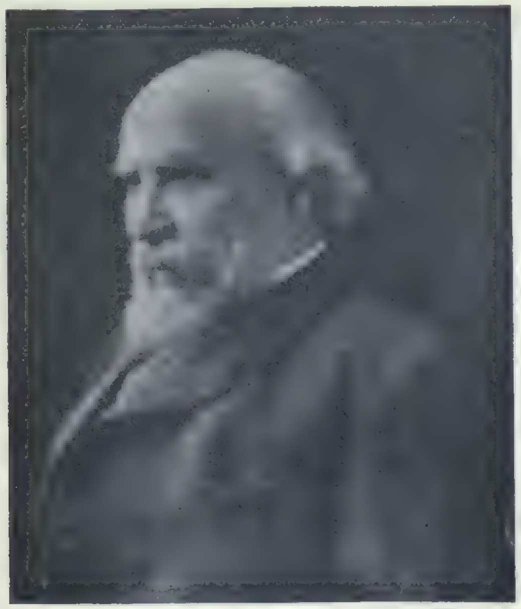
No Hurry for Further Railroads.

"Is it on your programme to build your projected road east to Winnipeg in the near future?" Mr. Hill was asked.

"The line will be built in due time," he replied, but did not specify the date. "Canada generally has a good start in railway building and is in no great hurry for any further expensive projects at present."

"I do think," said Mr. Hill, "that this country has been borrowing a little too freely. You see the boys have been a little too ambitious and the western municipalities have been going ahead somewhat rapidly. These municipalities are selling a large amount of securities, and if the buyers want to sell back here, and there are no buyers they will say, 'What have we purchased?' They might want to realize at times, and if they found no market the effect on the country generally would be unfortunate to say the least."

The Great Northern Railway, of whose board Mr. James J. Hill is chairman, owns 6,504 miles of line of which it leases 20 miles to other companies, leaving net total lines of 6,484 miles owned and operated. In addition, it owns 545 miles by the medium of controlled companies. These figures include considerable mileage in Canada, the most important of which is as follows:—



JAMES J. HILL,

Who Advises Canada to go Slowly With its Railroad Building.

Manitoba Great Northern Railway, international boundary near Gretna to Portage la Prairie, Manitoba, 76.52 miles.

JAMES J. HILL

Seventy-five years ago James J. Hill changed the vital statistics of Rockwood, six miles from Guelph, Ontario. Later at St. Paul, Minnesota, he penned away as a shipping clerk. Seeing that the railroad would outstrip the inland steamboat and change American geography he started in business as a railroad and shipping agent. Establishing a steamboat service on the Red River, then the most important trade highway to the northwest wilderness, he entered into competition with the Hudson Bay Company, which later combined forces with him. Early in 1874, Donald A. Smith, now Lord Strathcona, then living at Montreal as the chief commissioner in America of the Hudson Bay Company, conceived the idea of securing the control of the St. Paul and Pacific Railroad, a disconnected system of about five hundred miles. The road was under a receivership. Norman W. Kittson, another Hudson Bay man, and Donald Smith picked James J. Hill as the man to secure control of the road. After extraordinary energy and labor, the property was purchased by the St. Paul, Minneapolis and Manitoba Railroad Company, which had been formed by a syndicate of four for the purpose. The profits of the bond transaction amounted to $3,500,000 for each member of the syndicate. But these were on paper. Hill had to put the road upon a paying basis. In two years it was not only paying the interest on its bond issue, but commenced paying dividends on its stock. One of his assistants says that he was baggageman, conductor, engineer, trackwalker, fireman, passenger agent, freight agent, traffic manager and everything else on the road at different times. His has been an extraordinary career of success. Canada is proud to have cradled him. Interviewed on his seventy-second birthday three years ago, he referred to the recent talk of conserving water, conserving land, conserving coal and conserving iron. "It is too bad," he added, "that someone did not say a word about conserving commonsense." Which is a typical Hillism.

Brandon, Saskatchewan and Hudson Bay Railway, international boundary near Bannerman to Brandon, Manitoba, 69.45 miles.

Crow's Nest South Railway, international boundary at Gateway to Michel, B.C., 74.18 miles.

Nelson and Fort Sheppard Railway, international boundary near Waneta, B.C., to Troupe Junction, B.C., 55.42 miles.

Red Mountain Railway, international boundary near Paterson, B.C. to Rossland, B.C., 9.59 miles.

New Westminster Southern Railway, international boundary at Douglas to South Westminster, B.C., 23.73 miles.

Vancouver, Victoria and Eastern Railway and Navigation Company, 219.40 miles.

In British Columbia.

The last-named company comprises the following lines:

International boundary at Laurier to international boundary at Danville, B.C. (including line to Grand Forks, B.C.), 16.47 miles.

Grand Forks, B.C., to Pheonix, B.C., 25.82 miles.

Grand Forks, B.C., to Granby Smelter, 4.74 miles.

International boundary near Midway to international boundary near Molson, B.C., 28.89 miles.

International boundary near Chopaka to Princeton, B.C., 59.11 miles

International boundary near Blaine, Wash., to So. Westminster, B.C., 21.05 miles.

New Westminster, B.C., to Vancouver, B.C., 14.79 miles.

Vancouver, B.C., to Burrard Inlet, 1.93 miles.

Port Guichon to international boundary near Huntingdon, B.C., 46.60 miles.

The Great Northern has also trackage rights to the extent of 247.20 miles. These, too, include rights in Canada of which the chief are Northern Pacific Railway; Seattle to Vancouver; Northern Pacific and Spokane, Portland and

Seattle Railways, Vancouver to Portland at Chisholm, Manitoba; Grand Trunk Pacific at Portage la Prairie; Canadian Pacific Railway, Troupe Junction to Nelson, B.C.; and in British Columbia, bridge over Fraser River, New Westminster, B.C.

Canadian and United States Systems Compared.

The following table compares the railroad positions of Canada and the United States, the figures being for the latest years available:—

	Canada (1912)	United States (1911)
Miles of line operated	26,727	243,229
Net capitalization	$1,588,937,526	$14,434,309,000
Net capitalization per mile of line	59,451	59,345
Gross earnings from operation	219,403,753	2,818,780,000
Gross earnings per mile of line	8,209	11,589
Expenses of operation	150,726,540	1,935,511,000
Expenses per mile of line	5,639	7,958
Net earnings from operation	68,677,213	883,269,000
Net earnings per mile of line	2,570	3,631
Ratio expenses to earnings per cent	69	69
Receipts from passengers	$ 65,048,187	$ 658,772,785
Receipts from freight	149,961,140	1,929,335,456
No. of passengers carried	41,124,181	979,101,000
No. of freight tons carried	89,444,331	1,727,988,000
Miles of single track	26,727	358,313
Miles of double track	1,752	....
Miles of sidings	6,149	....
Total train mileage	100,930,271	1,209,330,000
Average receipts per train mile:		
Total traffic	$2.18	$2.33
Mileage under construction	8,826	....

Growth of Canada's Mileage.

The growth of Canadian railway mileage is indicated in the following table:—

Year.	Miles.
1836	16
1856	1,414
1866	2,278
1876	5,218
1886	11,793
1896	16,270
1906	21,353
1912	26,727

Last year Canada's railway mileage was divided by provinces as follows:—

Province.	Miles.
Ontario	8,545.56
Quebec	3,882.61
Manitoba	3,520.42
Saskatchewan	3,753.85
Alberta	1,896.64
British Columbia	1,854.53
New Brunswick	1,545.10
Nova Scotia	1,357.48
Prince Edward Island	269.33
Yukon Territory	101.71
Total	26,727.23

Railroad Stocks and Bonds.

The funded debt of Canada's railways in 1912 was $818,478,175, divided as follows:—

Bonds	$772,532,108
Miscellaneous obligations	12,608,718
Income bonds	17,119,466
Equipment trust obligations	16,217,883
Total	$818,478,175

To this sum may be added railroad stocks aggregating $770,459,351, making total capital liability of $1,588,937,526.

Excluding the government owned railways, the capital liability of Canadian railroads amounts to $50,832, relatively a low figure.

Heavy Subsidies Granted.

Mr. James J. Hill, as noted above, votes against government subsidies to railroads. The Dominion, provincial and municipal governments have granted subsidies to Canadian railroads amounting to $208,072,073. Here are the details:

By the Dominion.

Cash subsidies	$ 80,558,011.30
Loans	25,576,533.33
Cost of lines handed over to C.P.R.	37,785,319.07
Paid to Quebec Government	5,160,053.83
Implement clause, G.T.P. agreement	4,994,416.66
Total	$154,075,235.09

The Dominion Government is also constructing the eastern division of the National Transcontinental Railway, on which an expenditure of $116,533,768.53 had taken place up to March 31st, 1912.

By the Provinces.

Cash subsidies	$32,895,485.16
Loans	2,750,030.00
Subscriptions to shares	300,000.00
Total	$35,945,515.16

By the Municipalities.

Cash subsidies	$12,807,324.98
Loans	2,404,498.62
Subscriptions to shares	2,839,500.00
Total	$18,051,323.60

Land Grants and Bond Guarantees.

The following have been the land grants to railways:—

By	Acres.
Dominion	31,864,074
Quebec	13,625,949
British Columbia	8,119,221
New Brunswick	1,647,772
Nova Scotia	160,000
Ontario	635,039
Total	56,052,055

In 1911 and 1912, the Dominion and provincial governments guaranteed no less than $393,406,402 of the bonds of the Canadian railways, as follows:—

Bonds Guaranteed By—

	1911.	1912.
Dominion	$52,439,865	$91,983,553
Manitoba	20,899,660	20,899,660
Alberta	25,743,000	45,489,000
Saskatchewan	11,999,000	32,500,000
Ontario	7,860,000	7,860,000
Nova Scotia	5,022,000	5,022,000
British Columbia	23,196,832	38,946,832
New Brunswick	700,000	1,893,000
Quebec	476,000	476,000
Total	$148,336,357	$245,070,045

◆

TORONTO'S JUNE FIRE LOSS

At Toronto there were 23 false alarms compared with 21 in May, while the total number of alarms altogether were 200, compared with 225 in May. There were 41 fires from unknown causes compared with 45 of a similar nature during the previous month.

Damage—January, $42,828; February, $81,606; March, $8,180; April, $25,407; May, $25,407; June, $439,472.

Alarms—January, 154; February, 217; March, 126; April, 96; May, 225; June, 200.

The total damage for the six months of this year amounts to the sum of $626,346, of which June had the biggest share. The reason for this is the big loss at Messrs. Wickett and Craig's tannery on Cypress Street. There was a boat house fire with heavy loss. This fire caused the loss of some 11 motor boats, all of which were totally destroyed.

There was one loss of life at a fire this month when a little boy was burned to death in a stable.

◆

LIFE UNDERWRITERS' CONVENTION

The Life Underwriters' Association of Canada, that is the men whose object it is to advance the best interests of life insurance throughout the Dominion will gather at Ottawa on August 19th, 20th, and 21st, for their annual convention. Among the principal names on a crowded programme are: Right Hon. Sir Wilfrid Laurier, G.C.M.G., Hon. Justice D. B. MacTavish, Ottawa, chairman of the Royal Insurance Commission; Mr. James V. Barry, assistant secretary Metropolitan Life Insurance Company, and the president of the National Association of Life Underwriters.

On the first day of the convention twenty-five field men will deal with problems of soliciting. Prizes are to be awarded for the best essays on certain life insurance topics.

The Ottawa Association are actively engaged on preparations for the reception and entertainment of this gathering of insurance representatives. Special transportation arrangements have been made for this visit to Ottawa. Mr. F. T. Stanford, Toronto, secretary of the association, will supply any desired information relative to the convention.

CANADIAN COAL AND COKE COMPANY.

Reorganization Proposals—Preferred Shares in Exchange for Outstanding Bonds.

Terms of reorganization call for the creation of an issue of $4,000,000 seven per cent. cumulative preference stock of the holding company which will be offered par for par in exchange for bonds both of the Canadian Coal and Coke Company and of the subsidiary companies now in the hands of the public. The bonds remaining in the treasury of the holding company, both its own and those of subsidiary companies, will be cancelled. The terms will be submitted to the bondholders of the Canadian Coal and Coke Company, and of the subsidiaries companies, the Pacific Pass Coal Fields, Limited, the Lethbridge Collieries, Limited, the Western Coal and Coke Company, Limited, and the St. Albert Collieries, Limited, at a meeting to be held on July 18 and 19th.

Letter to Bondholders

The secretary's letter to those concerned is as follows:—
To the Bondholders of the Pacific Pass Coal Fields, Limited, Lethbridge Collieries, Limited, Western Coal and Coke Company, St. Albert Collieries, Limited, and Canadian Coal and Coke Company, Limited:—

Dear Sirs,—In view of the facts stated later in this letter, the respective boards of directors of the above-mentioned companies have made the recommendation for the transfer to and the reorganization and consolidation of the undertakings of these companies in the "Canadian Coal and Coke Company, Limited," on the following basis:—

1. That the holders of the six per cent. mortgage bonds of the five above-named companies should convert the bonds held by them, on the basis of par of exchange, into seven per cent. cumulative participating preference stock of Canadian Coal and Coke Company, Limited.
2. That for the purpose of effecting this conversion the Canadian Coal and Coke Company, Limited, should create $4,000,000 par value of its seven per cent. cumulative participating preference stock.
3. That all the properties and assets of the companies, other than the Canadian Coal and Coke Company, Limited, should be conveyed to and vested in the Canadian Coal and Coke Company, Limited, freed from the charges and liens created by the outstanding bonds of the respective companies.

On Basis of Par of Exchange

4. That the Canadian Coal and Coke Company, Limited, should assume, pay and perform all the debts, liabilities and obligations of each of the four companies, whose properties are so conveyed to it, other than the liabilities created by the outstanding bonds of those companies.
5. That the Canadian Coal and Coke Company, Limited, should issue to each holder, other than itself, of ordinary shares of the capital stock of the four companies operating, whose properties are so conveyed to it, fully paid ordinary shares of the capital stock of the Canadian Coal and Coke Company, Limited, on the basis of par of exchange.
6. The entire property and assets of all the four operating companies would then be vested in the Canadian Coal and Coke Company, Limited, free from any charges and liens, except such as may be created for the purpose of liquidating the current debts and liabilities of the five companies above mentioned.

The facts which, in the opinion of the directors of the respective companies above mentioned, have rendered these recommendations expedient are as follows:—

Completion of Line Delayed

The immense coal deposits of the Pacific Pass Coal Fields, Limited, are situated about forty-six miles from the main line of the Grand Trunk Pacific Railway. Connection with these deposits by railway is essential, both for the purpose of enabling the mines to be developed and equipped at a reasonable cost, and for the purpose of marketing the coal when mined. The country is without roads, and the difficulty and expense of bringing in material and machinery without railway communication was practically prohibitive. This company in 1910 entered into a contract with the Branch Lines Company of the Grand Trunk Pacific Railway for the construction of a railway, between the mines and the main line of the Grand Trunk Pacific Railway, which was to be completed in December, 1910. Owing to difficulties of construction and the scarcity of labor, the Branch Lines Company did not succeed in completing this line till this year, 1913, and a considerable portion of this line still remains to be ballasted by the Grand Trunk Pacific Railway. The Pacific Pass Company, during this period, made on the ground, a most complete demonstration of its coal bodies, completed the development of its property for the installation of its permanent plant, the engineering for this installation, and ordered the necessary materials and machinery for delivery at a time which would have insured the completion of the installation with the utmost despatch.

The reports of the company's chief engineer, Mr. Chas. Fergie, M.E., and of engineers employed by other interested parties, show that the property is one of great value, by reason of its immense available tonnage, the favorable conditions for mining, and the good quality of the coal produced. Unfortunately this long delay in securing this necessary railway connection, has rendered inadequate the provision previously made for the capital expenditures of this company, and it is now necessary in order to preserve the property and render its products available, to provide additional funds to the extent of approximately $500,000.

Lethbridge Collieries, Limited

The mine of Lethbridge Collieries, Limited, which has been developed and equipped in such a manner as to place it in the front rank of mines on this continent, is now in operation and is giving most satisfactory results. In order to accomplish this, it has been necessary to procure advances of funds in excess of those originally provided to the extent of some $400,000.

Western Coal and Coke Company

The Western Coal and Coke Company has experienced difficulties in the matter of railway construction, similar to those which confronted the Pacific Pass Company. In order to connect the mines of the Western Coal and Coke Company with the Canadian Pacific Railway, it was necessary to build a branch line, about sixteen miles, through a very difficult section of country. To accomplish this, the Western Coal and Coke Company guaranteed payment of the principal and interest of the bonds of the Kootenay and Alberta Railway; but, notwithstanding most persistent efforts, this line of railway was not completed till this year, and the cost has exceeded the estimates. This railway is now completed. The mines have been developed and equipped to a capacity of two thousand tons a day, and the output, approximately, five hundred tons per day, will be rapidly increased to the full capacity. This property and the railway will require about $220,000 additional money, to clear off floating liabilitles, to preserve the property, and to obtain the best results from these undertakings.

Shafts in Concrete

The mines at St. Albert Collieries are situated about eight miles from the city of Edmonton, the contractor, who undertook to put down the shafts, found, during the first year, that a portion of the strata rendered the sinking of shafts in the ordinary way impossible. He, therefore, abandoned the work. This company then made a contract with the New York Foundation Company to put down the shafts in concrete. This method has proved most successful. The shaft has now passed through two seams of coal fourteen feet apart; the upper seam having a thickness of five and one-half feet, and the lower seam a thickness of seven feet six inches of coal, without a parting. This coal is of excellent quality, and the proximity of the mine to a large market will ensure the success of the undertaking. The additional cost of this concrete shaft will eventually be more than saved to the company by reason of the fact that this shaft is dry and the usual charge for pumping will be entirely eliminated. The expense and delay in connection with the sinking of this shaft and the satisfactory development of this undertaking has and will necessitate a capital expenditure of approximately $250,000 in excess of the estimates.

Actual Requirements of Companies

The companies now require about $1,500,000 to pay off their existing liabilities and to carry on the works now in progress. It has been found impossible, in the prevailing financial conditions, to obtain the necessary funds by the sale of bonds ranking pari passu with the existing issues. The work in progress has recently been carried out on the personal credit of the directors; but the time has arrived when the plan above outlined is rendered absolutely necessary. This plan will, we believe, protect all existing investments in the several companies, and place the consolidated company in a position to earn and pay at an early date seven per cent. dividends on the cumulative preference stock now proposed to be created.

The co-operation of all the bondholders and shareholders of the five companies is earnestly solicited in carrying out the proposed plan of reorganization and consolidation.

A majority of the bondholders of each of the four operating companies have approved of the plan of reorganization recommended by the directors of the several companies.

The result of carrying through the proposed plan will be that the present bondholders will have a preferred claim on the earnings of the company for their investment, and the only charge ranking prior to the preferred shares will be the charge given for the new money necessary to bring the combined undertakings to complete success.

By order of the respective boards of the above companies named.

S. T. MAINS,
Secretary of each and said companies.

◆

Canada was the chief supplier of asbestos to Great Britain last year, the amount supplied being 3,700 tons; while Russia was second with 1,950 tons, and United States third with 1,050 tons.

TELLS OF EIGHTY-TWO MILLION DOLLAR FORGERY

Man Who Startled Washington Committee, Relates Story of Alleged Union Pacific Financing

A story of an $82,000,000 forgery was told in his evidence before the Lobby Committee at Washington last week by David Lamar, commonly known in Wall Street as "The Wolf." He related also his efforts to rehabilitate Edward Lauterbach, a lawyer with the Morgan group and the Union Pacific officials, during which he had impersonated half a dozen public men in telephone conversations with the financial leaders of New York.

With a dramatic introduction Lamar told the following story:—"In the summer, sometime, of 1901, somebody forged the books of the Union Pacific Railroad Company to the tune of $82,000,000. Who it was I do not know. It may have been the chairman of the board; it may have been the office boy or somebody else. Somebody did it. Whoever did it, as a consequence the men connected with the company immediately thereafter got $82,000,000 in cash as the proceeds and the consequence of that forgery. And that $82,000,000 was the fulcrum through which all these giant monopolies and conspiracies were fastened on the lines of railroads serving the territory from the Rocky Mountains to the Gúlf of Mexico and from the Pacific Ocean to the Missouri River; and more than that, it was the fulcrum through which this group of men, Harriman, to the extent of $150,000,000 or $200,000,000, Kuhn, Loeb and Company, and one or two others to the extent of $50,000,000 or $100,000,000 more, were enabled to acquire those gigantic fortunes.

How the Alleged Forgery was Committed.

"With your permission, Mr. Chairman, I will state in detail how that forgery was committed. The first consolidated balance sheet of the Union Pacific Railroad Company, as of June 30, 1900, contained, for the first time, the evidences and results of what had been going on from June 30, 1898, to June 30, 1900, and this is what had happened:

"In the reorganization the old Union Pacific had lost control of what is known as the Oregon properties. They consisted of two, the Oregon Railroad and Navigation Company and the Oregon Short Line Railroad Company. Between the dates I have mentioned the new company recovered them and paid for them, first by an issue of its own securities and secondly by an assumption of debts of these companies; and I have already said the consolidated balance sheet of June 30, 1900, showed for the first time the consolidated statement of all these companies. On the debit side there appeared the amount of securities issued and debt assumed against the acquisition of these properties.

Made a Duplicate Entry.

"On the asset side there appeared a credit equal to the entry value of all the physical properties so acquired. And then again there appeared a duplication of that. The same amount was entered over again as representing the value of the securities, which, in turn, represented the value of the physical properties acquired.

"The sum of $82,000,000 or its equivalent was entered twice on the asset side. But up to that time the transaction was only open to the objection and criticism that it represented a piece of clumsy bookkeeping; for, again, on the debit side there appeared an entry corresponding, treating the securities owned by the Union Pacific Railroad as though they were still afloat and in the hands of the public; but the following year, 1901, somebody erased that entry on the debit side, and the consequence was that we had this condition:—The entry on the debit side and the amount of securities issued and debt assumed on the assets side, amount of the value of the physical property, all of it acquired. And, again, another entry representing the securities of these companies. Do I make myself perfectly clear?"

"Do you mean the securities with which those physical properties were loaded?" asked Senator Nelson.

Result of Erasure.

"Precisely," said Mr. Lamar. "The securities that represented them. So you had the entry on the one side, the amount of securities issued by the Union Pacific Railroad Company, and the amount of debt it had assumed, representing the payment of the purchase price, that was on the debit side, and on the asset side there was represented a corresponding entry of an equal amount representing the physical value of the property. And then again the same entry over again. And that condition existed as a result of this forgery, as a result of this erasure."

"And what did that represent in the books before it was erased?" asked Senator Nelson.

"It represented a debit entry of $82,000,000 against a credit entry," said the witness, "that credit entry being the entry representing the securities of these companies which the Union Pacific Company had acquired.

"Now, here is what they did, and here is what flowed from the forgery. They took all the securities of the Oregon Short Line Railroad Company and the securities of the Oregon Railway and Navigation Company out from the treasury of the Union Pacific Railroad Company and pledged them as security for an issue of bonds and got the money for them, and they took that money and applied it to the management and the financing of this Northern Pacific stock, which thereafter became Northern Security stock and then again Northern Pacific and Great Northern, and Great Northern Ore. And that in the end was sold out at a most enormous profit. The proceeds of that were then used to buy from Kuhn, Loeb and Company in one day $200,000,000 of securities, which the testimony before the Interstate Commerce Commission has strongly tended to show they bought from themselves."

Bear Attack on Union Pacific.

Mr. Cravath was then sworn at his own request and made the following statement:—

"In view of the statement regarding the accounts of the Union Pacific Railroad Company which David Lamar has gone out of his way to make before this committee, and inasmuch as persons not familiar with David Lamar's character who may read this statement in the public press may be misled thereby, I deem it my duty to this committee and to the public and to investigators to make the following statement for the records of this committee.

"For several days persons connected with the Union Pacific Railroad Company have been informed that an effort was being made to circulate and secure publication in the newspapers of a bear attack on Union Pacific in the form of a prepared story about an alleged falsification of the accounts of the Union Pacific Railroad Company involving $70,000,000 or $80,000,000 of its surplus. We were informed in substance that this story was so palpably false and scandalous and so plainly offered for an improper purpose that the newspapers would not publish it. Information then came that the story would soon be made public in such a way that the newspapers would have to publish it. It now appears that the medium for the publication of this story was to be this man, David Lamar, who has confessed himself before this committee to be the most unconscionable of liars. I make that statement deliberately, and I have sought to make it carefully."

WORLD'S MOVEMENT OF GOLD.

The heavy export movement of gold to Europe from New York this year was resumed this week after a lull of several weeks, with the engagement of $3,000,000 for Paris. This makes a total thus far this year of $38,000,000 for Paris and of $61,385,000 for all countries. Bankers explained that the Bank of France, in making a further requisition upon this market, was carrying out the policy undertaken during the Balkan war of rehabiliting its gold reserves from New York in consignments made periodically so as not to disturb this market.

With three exceptions—the Bank of England, the Bank of Austria, and the United States national banks—every great banking institution of the world holds more gold than in 1912. The aggregate increase is £51,193,000, or $255,965,000. Here are the figures of the Statist:—

Banks of	1913.	1912.
Austria-Hungary	£ 50,412,000	£ 52,067,000
Belgium	8,883,000	7,611,000
Denmark	4,483,000	4,344,000
England	38,493,000	41,510,000
France	132,641,000	130,440,000
Germany	53,977,000	44,395,000
Italy	50,463,000	46,084,000
Netherlands	13,451,000	12,033,000

*Argentina	52,660,000	41,854,000
*Brazil	24,909,000	23,076,000
zIndia	25,664,000	21,620,000
Total	£937,444,000	£886,251,000

*Conversion offices. zCurrency and gold standard reserves.

In addition to these gold figures, note circulation, which is largely supported by gold, is $66,000,000 larger than last year at the Bank of France, $55,000,000 larger at the Bank of Germany, $82,500,000 larger at the Bank of Russia, $23,000,000 larger at the Bank of Austria, $9,300,000 larger at the Bank of Belgium, and $6,500,000 larger at the Bank of Holland. It is less than in 1912 at the Bank of England and the Bank of Italy.

VALUE OF LIFE INSURANCE

Provision for Daughters

BY C. A. HASTINGS.

It is a well known fact that there are many more women than men in the world, and social conditions go to show that the position of women in the world will change considerably. Therefore, those who undertake this responsibility, should consider it their duty, to think of his daughter's future when she is a child, and not late in life. "The real truth is, there are not enough husbands to go round, and, even if there were, no parent has a right to gamble with fortune or fate, and no parent need gamble."

Just Two Dollars Per Month.

In round figures, the sum of $25 a year will buy $2,500 assurance for the child,—trifle over $2 a month—and there are an enormous number of people who can spare this amount, and this sum is very much less than money wasted in the name of education every day; even assuming the daughter does marry, or that the parent becomes wealthy, this policy becomes a dowry.

Looking Ahead.

A good education can hurt no one, and the first aim of the parents should be to give their children the best possible in these days of competition, and in the case of daughters, man is taking great chances, if he does not provide for his daughter's education until she is old enough for it. He may then find he has not the means to provide what is wanted, but, if he sets about it the way I have indicated, the cost is a mere trifle.

BUSINESS AND FINANCE IN CALGARY

Mayor Sinnott on City's Position—Trade Conditions—Increase in Manufacturing

(Special Correspondence.)

Calgary, July 9th.

Financial conditions in Calgary for the first half of 1913 are shown by the following figures:—

Building permits are only about one half of what they were a year ago, but 1912 was exceptional. The figures are $8,540,670 and $4,483,620 for 1912 and 1913 respectively. The past month June, accounted for one third of this year's record, the month's total being $1,498,620, and it appears that there will be a greater increase during the next six months.

General business has fluctuated somewhat more this season, or probably the fluctuations were more noticed, but more business is being done on a nearer to cash basis, than in 1912. In some cases wholesalers, earlier in the year, advised a reduction in stocks and it seems probably that the outstanding indebtedness on this account is not as large proportionately as it was. Retailers generally are better off in that their liabilities are not so large, and they have kept their credits down tighter.

Mayor Sinnott's Statement.

A pessimistic expression from the city comptroller called forth the following from Mayor Sinnott:—

"The reports spread by enemies of Calgary that this city's finances are at a low ebb are absurd," said Mr. Sinnott. "When all the money that is available for city work is taken into consideration, we have about a million and a half dollars on hand. The amount may vary more or less a few thousand dollars or so from this total, but we have enough available to keep all the city work going. There will be no men laid off.

"Since I came into office last January, the city has secured in round numbers a total of $3,690,000, through the sale of bonds and treasury notes. We have had as much money this year up to date as the city had last year. At the present time we are negotiating for the sale of more bonds and expect at any time to sell another half million or so and perhaps more. I anticipate no trouble in meeting the treasury notes when they fall due.

A statement compiled shows that the corporation has cash on hand $1,500,000, money secured since January 1st by sale of bonds, treasury notes, etc., $3,690,000.

Factories and Farming.

Another feature to which attention is drawn is that manufacturing is much greater in Calgary than it was a year ago. Established plants have increased their buildings and equipment. Several new factories are turning out lines which but a year or two ago were considered impossibilities. There are in course of construction the buildings of a number of other concerns, and the organization of several more is being effected.

Though money is scarce and collections from country points have been rather slow, there is a sounder confidence among the farmers, that the future to them is assured. Cattle and dairy products, when properly marketed, have returned large profits this year and the prospect is good for a continuation of the same thing for some time.

Taken altogether the change from speculative real estate and grain mining, with their attendant diversions, to substantial trading and sane farming, is working out with less inconvenience than was expected. Given a fair quantity of marketable grain at a reasonable price this fall and unless world-wide conditions are adverse, satisfactory development in this district will continue.

◆

RICHELIEU WILL MAKE FALL ISSUE

The re-organization of the Richelieu and Ontario Navigation Company will necessitate a public issue in London, which will, in all probability, be made in London in the autumn. The market for new issues is still regarded generally as still highly unsatisfactory.

President James Carruthers says that in the event of any delay in the providing of new funds required by Richelieu it is probable that a temporary arrangement will be made to supply the actual present requirements.

◆

Construction work is nearing completion on the Canadian Northern branch line from North Battleford to Prince Albert. This will relieve the large amount of grain which has been held up in the district owing to the lack of railway facilities.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Toronto Railway Company.—The gross receipts of the Toronto Railway Company for June were $612,086.30, as compared with $444,598.30 for the same months last year. The city's share was $102,417.26, as compared with $88,919.79 for June last year, or an increase of $13,497.47.

Canadian Consolidated Rubber Company.—The Canadian Consolidated Rubber Company showed the largest half-year earnings in its history for the six months ended June 30. The company for the year ended December 31, 1912, showed net sales of approximately $8,000,000, an increase of 25 per cent.

Dominion Steel Corporation.—The Dominion Steel Corporation, Limited's June output is as follows:—Pig iron, 33,138 tons; steel ingots, 32,566 tons; blooms, 26,683 tons; rails, 19,500 tons; rods, 2,903 tons; bar and rod mill, 1,734 tons; wire and nail mills, 2,000 tons; shipments, 24,027 tons; corporation output, 394,500 tons; Springhill, 29,300 tons.

Dominion Canners Limited.—With the issue of $1,000,000, of which $750,000 was offered in London, and the balance taken in Canada, Dominion Canners issue of bonds is brought up to the authorized maximum—namely, $2,500,000, but of this amount $502,500 bonds have already been redeemed and canceled. The mortgage is now a closed mortgage, at $1,997,500 less the amount of $15,000 taken up for sinking fund on April 1st last.

La Rose and Nipissing Mining Companies.—La Rose and Nipissing Mining Companies have reached an understanding whereby each takes one-half share in the purchase of an option on Plenarum in the Porcupine district. Option is upon 150,000 shares of treasury stock and the price is said to be $2 for each $5 share. It is understood that 10,000 shares will be taken up each month, so that the cost to each to the purchasing mines will be $10,000 a month. The money will be spent on the development of the property which has been closed down for a month owing to lack of funds. It consists of 120 acres and lies immediately east of the adjoining Jupiter. Operations will be resumed immediately.

Brazilian Traction, Light and Power Company, Limited.—The May statement of combined earnings and expenses of the tramways, gas, electric lighting, power, and telephone services, operated by subsidiary companies, controlled by the Brazilian Traction, Light and Power Company, shows:

	1913	1912	Increase
Total gross earnings	$1,990,910	$1,731,156	$ 259,754
Operating expenses	931,519	784,604	146,915
Net earnings	1,059,391	946,552	112,839
Aggregate gross earnings from Jan. 1st	9,636,194	8,208,660	1,427,534
Aggregate net earnings from Jan. 1st	5,152,689	4,412,436	740,253

Shawinigan Water and Power Company.—The earnings of the Shawinigan Water and Power Company for the month of May show another of the increases which has marked the earnings for every month of the present year. The increase for the year to date is $513,169, or 30 per cent. over the corresponding period of 1912. The figures are as follows:—

	1913.	1912.	Increase.
January, ...	$131,200	$101,850	$ 29,350
February	132,025	102,026	29,999
March	133,240	102,208	31,032
April	133,785	102,397	31,388
May	133,900	102,500	31,400
	$664,150	$510,981	$153,169

Illinois Traction Company.—The May statement of Illinois Traction Company shows the large gain of $44,470, or 21.43 per cent., in net earnings for the month of May. An increase of $44,133, or 7.65 per cent., in gross earnings was accomplished with an actual lowering of operating costs, which were some four thousand dollars less than in the same month a year ago. An increase of about five thousand dollars in taxes was lessened by a decrease of about one thousand dollars in general expenses and slightly more than the gain in gross earnings was credited to net for the month.

For the first five months of the year gross earnings of the company are 5.85 per cent., and net earnings 10.35 per cent. ahead of the corresponding figures for 1912.

	May.	Five months.
Gross	$621,154	$3,105,273
Expenses	373,855	1,853,271
Net	$247,298	$1,252,001

Tooke Brothers, Limited.—The balance sheet of Tooke Brothers, Limited, as presented at the annual meeting, is as follows:——

Assets.		
Cash on hand and at bank	$ 6,818.87	
Bills receivable	28,375.15	
Accounts receivable	365,653.12	
Stock goods on hand, as per inventory	404,325.61	
Insurance unexpired	6,223.90	
		$ 811,396.65
Land, buildings machinery, good-will, etc.....		1,147,380.46
		$1,958,771.11
Liabilities.		
Bills payable	$105,667.56	
Accounts payable	63,718.36	
Dividend payable 15th June	17,237.50	
		$ 186,623.42
Capital account—		
Preferred stock issued and paid up	$1,000,000.00	
Common stock, ditto	650,000.00	
		$1,650,000.00
Contingent account for bad debts		21,128.34
Depreciation reserve		16,728.36
Profit and loss account—		
Balance at credit this date		84,296.99
		$1,958,777.11

Canadian Venezuelan Ore Company.—A meeting of the shareholders of the Canadian Venezuelan Ore Company took place recently at Montreal to authorize the issue of $500,000 additional bonds, making the total issue outstanding $1,500,000. Provision is already made for this issue in the trust deed and sanction was given by the shareholders.

The proceeds of the issue will be used to purchase a tug, building barges, to extend the tramway and purchase additional machinery, all of which are for the purpose of enabling the company to operate economically the deposits of ore.

It would appear that the company has been under considerable handicap for some time past, owing to the difficulty in obtaining a sufficient tonnage of suitable steamers to carry their ore and in this manner the work has been delayed. Two steamers are now on time charter and two more will come in on charter next month and one in September, November, December, and January. The combined deadweight capacity of these steamers is 30,650 tons and it is expected that they will be able to carry from 30,000 to 32,000 tons of ore per month. The company hopes to be able to secure other steamers for delivery this summer and fall and it is the intention to increase the fleet by next spring so as to be able to carry 50,000 to 75,000 tons per month.

While at work on the mine, carrying on development, large deposits of ore were discovered outcropping on the surface, which it is stated can be worked by open cuts and that 15,000,000 tons of ore could be taken from them. In order to get at the new ore, the tramway lines must be extended and a number of additions must be made to the plant. Hence the new bond issue.

BANK AUDITORS TO BE APPOINTED.

Under the provisions of the new bank act, passed at the last session of Parliament, Mr. D. R. Wilkie, president of the Canadian Bankers' Association, is issuing a notice to general managers of banks throughout Canada requiring them to select by ballot a list of not less than 40 persons, who shall be eligible, subject to the approval of the minister of finance, to be appointed auditors under the section of the bank act in regard to shareholders' audit. Auditors desiring to receive consideration for appointment must submit their names on or before July 21 next.

WHERE BRITISH CAPITAL WENT LAST HALF-YEAR

Canada and Australia Were Heavy Borrowers—Brake Has Been Applied

Details of Canada's borrowings in London during the past six months have already appeared in *The Monetary Times*. Some interesting information regarding the destination of British capital in that period is given by the London Economist, which says:—

In spite of the 4½ per cent. bank rate and the depression on the Stock Exchange, the applications for new capital on the London market reached the high figure of over 70 millions in the last three months—a total only exceeded in the corresponding quarter of any year in the last decade during the rubber boom of 1910. For the half-year the total of new issues has reached over 120 millions. This figure is not above the average of the last five years, but it is well over the average of the previous five years, as the following table shows:—

Year—	First half-year.	Second half-year.	Total for whole year.
1903	£77,414,000	£31,049,000	£108,463,000
1904	70,559,000	52,460,000	123,019,000
1905	104,216,700	62,970,700	167,187,400
1906	85,324,600	34,848,600	120,173,200
1907	89,733,200	33,896,800	123,630,000
1908	109,673,500	82,530,200	192,203,700
1909	121,073,600	61,283,200	182,356,800
1910	188,077,000	79,362,100	267,439,100
1911	117,483,800	74,275,600	191,759,400
1912	110,343,600	100,506,400	210,850,000
1913	120,359,600	....	....

Here we see that the average for the first half of the year was about 85 millions from 1903 to 1907, but since then the average has been over 110 millions, with 179 millions in 1910, as the result of the rubber boom. The average for the five whole years, 1903-1907, was 128 millions, and the average for the five years, 1908-1912, was 210 millions.

Underwriting Market is Not Large.

In the last few weeks the issues have fallen off very much, but the slackening is not because borrowers are the less eager, but because the capital market for the time being has run dry. For several years the rate of interest offered on new securities has been rising, but still the flood of new loans has continued, borrowers being willing apparently to pay almost any price for accommodation. In spite of the very tempting rates of interest, however, many really first-class securities have been left on the underwriters' hands to the extent of 80 or 90 per cent., and this has had its natural result. The underwriting market is not a large one, and the failure of a few big loans soon brings congestion. Underwriters committed to the meeting of calls on large blocks of securities cannot afford to run the risk of being "stuck" with more. The issuers of loans are unable to get them underwritten, and so the brake is applied. There is no obvious source from which the supply of capital may be replenished. Money is being withdrawn from trade at the present time, it is true, but this factor has more influence on the "short" loan market, with which the capital market is only connected indirectly, and the slowing down of trade has been caused largely by the pressure of money rates for the last eight months.

It is quite probable, therefore, that the second half of this year may see a falling off in the applications for new capital, but even so the total can hardly fall short of 180 millions, which, compared with the years prior to 1908, is a very high figure.

Analysis of Capital Applications.

In the next table further light is thrown on the situation by an analysis of the purposes for which the capital was required:—

	—Total first half-year—	
Description—	1912.	1913.
Colonial Government loans	£5,422,900	£14,324,300
Foreign Government loans	4,834,500	22,629,500
British municipal and county loans	323,700	Nil.
Colonial corporations	4,206,100	8,992,700
Foreign corporations	9,188,300	3,183,600
British railways	935,000	1,018,800
Indian and colonial rails	4,504,100	7.816.000
Foreign railways	20,081,700	15,782,000
Mining companies—		
Australian	162,500	730,000
South African	1,406.100	710,000
Other mines	1,285,300	390,200
Exploration and financial	4,799,900	3,820,300
Breweries and distilleries	287,000	Nil.
Merchants, importers and exporters	675,000	432,500
Manufacturing	5,753,900	7,977,100
Stores and trading	2,077,000	1,003,900
Estate and land	3,510,300	2,011,900
Rubber	1,559,700	779,900
Oil	2,938,000	1,961,600
Iron, coal, steel and engineering.	6,194,500	4,739,400
Electric lighting, power, etc. ...	7,842,500	3,710,400
Tramways and omnibus	6,753,400	2,859,000
Motor traction and manufacturing.	251,600	378,700
Gas and water	969,200	10,500
Hotels, theatres and entertainments	830,700	200,800
Patents and proprietary articles..	382,500	1,943,100
Docks, harbors and shipping....	6,329,300	2,053,000
Banks and insurance	3,168,700	2,773,400
Miscellaneous	3,574,200	8,087,100
Total	£110,343,600	£120,359,600

Here we see that, though the total applications for the half-year were £10,000,000 in excess of those of the corresponding period of last year, borrowing by colonial and foreign governments and corporations rose by £25,000,000 net, and there was a general falling off in the railway and industrial issues. These figures exclude all loans like the last Victorian loan, issued entirely for redemption purposes, or the portions of the western Australia and Brazil loans applied to redeem previous issues, so that the increase in the colonial and foreign government totals is all the more significant, because it represents, as far as possible, the amount of new borrowing.

Canada and Australia Have Been Chief Borrowers.

The colonies which have been the chief borrowers are Australia and Canada, which have taken 32 out of 43 millions for all the colonies, while Brazil, Russia and China are the largest borrowers. The details are shown in the next table:—

	—First half of Year—	
	1912.	1913.
United Kingdom, total	£24,159,400	£20,324,400
British Possessions—		
Australasia	4,201,900	11,996,400
Canadian Dominion	14,978,600	20,437,400
India and Ceylon	3,225,500	3,457,000
South Africa	2,695,100	5,439,100
Other British Possessions ...	2,831,100	1,672,700
Total	£27,932,200	£43,002,600
Foreign Countries—		
Denmark	2,425,000	....
France	626,200	....
Germany and Possessions ..	25,800	....
Norway	150,000	2,089,700
Russia	6,513,000	6,127,200
Other European countries ..	947,200	....
Dutch East Indies	114,500	26,000
Argentina	12,810,400	3,941,500
Brazil	6,846,500	15,093,400
Central America	1,016,700	414,900
Chili	1,044,700	2,520,100
Cuba	....	295,000
Mexico	2,158,200	9,093,500
Philippine Islands	....	712,500
United States	19,514,200	9,302,600
China	....	6,883,400
Egypt	828,800	250,000
Japan	3,230,800	....
Other foreign countries	....	282,800
Total	£58,252,000	£57,032,600
Total for first half-year..	£110,343,600	£120,359,600

The large total for Mexico is required chiefly for railways and oil. The United States total is much smaller than usual. None of the Pennsylvania new issue is included in our figures, although some of the stock is held over here, and the new issue was no doubt taken up by the holders of the stock. Of the capital subscribed for employment in Great Britain during the last quarter, £3,100,000 was for armament companies, who required the money mainly for the purpose of erecting works abroad, so that it ought not strictly to be classed as capital for employment at home.

* * *

The amount of Canadian gold being submitted to the refining process at the Ottawa branch of the Royal Mint is increasing year by year, and the government is taking steps to double the capacity of the building and plant. The value of gold refined last year was $1,688,823.

EIGHTY MILLIONS STERLING DECLINE

Representative Securities Values on the London Stock Exchange Shrunk Considerably

While Montreal and Toronto stockbrokers were bemoaning the decline in securities on their exchanges, London brokers witnessed a shrinkage in the value of securities for the month of June, amounting to no less than £88,000,000, the exact figures being as follows:—

Aggregate value of 387 representative securities on May 20th, 1913	£3,485,174,000
Aggregate value of 387 representative securities on June 20th, 1913	3,393,940,000
Decrease	£88,234,000

Not only is this fall one of the heaviest which has occurred during the past seven years, but the present valuation establishes the lowest point which has been touched. The last revision of the list of representative stocks was made in January, 1907, and, curiously enough, the valuation that month of £3,843,000,000 has proved to be the highest point reached during the six and a half years. It will be seen, therefore, that as compared with this highest point the valuation for the past month shows a depreciation of no less than £447,000,000.

Canadian Rails Shared.

Canadian Rails quoted in London declined sharply, Canadian Pacific being not the least offender. A considerable speculative position was disclosed in Canadian Rails.

During the past month the influences operating have been of a general character, the strain occasioned at all centres on capital by the prolonged anxiety connected with political affairs, together with the financial congestion arising out of the epidemic of new loans, causing an all-round liquidation. As will be seen from the details which follow, scarcely a department has escaped the general malaise, though in some directions the depression has been more severe than in others.

High-class Home British securities have been affected by the influences referred to, and also by the rise in the value of money. Consols have been back to nearly the lowest point they have touched, while kindred securities have been affected, English Railway stocks in particular being sold rather heavily.

Rise in Money Value.

Notwithstanding the rise in the value of money, English Bank shares have weakened a little in sympathy with other markets, and Insurance shares are lower for the month.

In the purely speculative markets the principal feature has been the depression of mining and rubber shares. As regards the latter, the depression has been the most severe which has yet occurred in that department, our list of ten representative companies which had a market value a month ago of £7,030,000, now standing at £5,080,000, the decline for the month being as much as 27 per cent.

◆

NEW BOND ISSUE

An issue of $250,000 6 per cent., first mortgage 20-year sinking fund gold bonds of William Neilson, Limited, ice cream and candy manufacturers, Toronto, is being made by Messrs. Anderson, Robinson and Harcourt, Toronto. These bonds are being offered at 100 and interest, and carry a bonus of 25 per cent. of common stock.

This company is capitalized as follows:—

	Authorized.	Issued.
7 per cent. preferred stock	$500,000	$250,000
Common stock	500,000	500,000
6 per cent. first mortgage bonds.	300,000	300,000

The company's assets are shown as totalling $549,335, and consist of buildings, machinery, and equipment. The net profits in 1911 were $75,702, and in 1912 $84,273, while for the current year the estimate is $118,663.

The total sales were: 1910, $240,273; 1911, $358,424; 1912, $508,370; 1913, (estimated), $720,000.

The annual bond interest requirements are $18,000. These bonds are secured by a trust deed and covering debenture in favor of the National Trust Company, Limited, Toronto, as trustee, covering properties, investments, and all assets of the company, real and personal, present and future. The company's directors are: Messrs. W. Neilson, president; D. M. Sanson, vice-president; J. Firstbrook, A. Cochrane, and Mr. H. M. Neilson, who is the company's general manager.

TO SEEK BRITISH CAPITAL

Mr. Alfred A. Young and Mr. John Genge called at *The Monetary Times'* head office this week on their way to Great Britain. They propose to sell a block of stock of the Commonwealth Trust Company, of Calgary, to investors in Great Britain and the Channel Islands. Mr. Young is one of the best known stock salesmen in Western Canada, and assisted in the promotion of the Saskatchewan Mortgage Corporation, the Saskatchewan Loan and Investment Company, and the Saskatchewan Bond Corporation. Mr. Genge has just become associated with the Commonwealth Trust Company, and has a thorough acquaintance both of Western Canada, the Channel Islands and Great Britain.

The Commonwealth Trust Company has authorized capital of $2,000,000. In addition to the usual powers of a trust company, it can buy and sell agreements of sale, which at this time is a profitable business. The main objects of the company are loaning money on mortgages on improved farm and city property, and to act as trustees and executors.

The officers of the company are as follow:—President, Honorable Charles W. Fisher, Cochrane, capitalist, speaker in the Legislative Assembly of Alberta; vice-presidents, Major Duncan Stuart, Calgary, barrister, director Alberta Interurban Railway Company; J. R. Sutherland, Calgary, gentleman, late Dominion land agent; George F. Tull, Calgary, managing director of Niblock and Tull, Limited; managing director, D. J. Young, Calgary, president of Young and Kennedy, Limited; secretary and treasurer, E. W. McMullen, Calgary, manager Merchants Bank of Canada, Calgary; directors, Lieutenant-Colonel James Walker, Calgary, capitalist, chairman South East Land Corporation, Limited; Harold W. Riley, M.L.A., Calgary, president Riley's Limited; H. A. MacLean, Calgary, president of Alliance Investment Company (Canada), Limited; Louis M. Roberts, M.L.A., High River, broker, of Roberts & Hunt; Lieutenant-Colonel G. E. Sanders, Calgary, Distinguished Service Order, Police Magistrate, Calgary, and George Pirie, M.D., Calgary.

The company's stock is being sold at a premium of $15, which makes the selling price $115 per share.

◆

NORTHERN ASSURANCE COMPANY

The Northern Assurance Company is one of the old British corporations which by dint of hard work, progressiveness and love of a reputation, has built up a large business throughout the world. As with several other British companies, the Northern has a Canadian branch. The company was established in 1836, and its progress since that date is indicated in the following table:—

Year.	Net Fire Revenue.	Net Life Revenue.	Total Accumulations.
1836	£900	£700	£38,200
1840	2,900	7,000	63,800
1850	8,000	26,200	162,800
1860	121,400	66,800	515,200
1870	213,600	120,800	1,154,200
1880	444,600	168,500	2,621,700
1890	671,400	216,100	3,975,600
1900	752,300	264,800	5,698,300
1912	1,244,400	290,300	7,991,700

The following extracts from the company's accounts for 1912 gives an idea of the corporation's business during that year.

Fire Department.—Reserve for current risks, 1911, £621,487; premiums received, 1912, £1,244,464; total, £1,865,951. Losses incurred in 1912, £659,788; expenses, £468,406; reserve for liability under current risks—50 per cent. of revenue, £622,232; total, £1,750,426; profit on transactions of 1912, £115,525.

Life Department.—New assurances, after deduction of reassurances, £476,160. Income—Premiums, £290,379; interest (less income tax), £153,162; annuities sold, £56,411; total, £499,952; increase in funds during the year, £141,565.

Accident Department.—Premiums—Employers' liability section, £47,743; accident section, £6,284; general section, £20,930; total, £74,957.

The accumulated funds on December 31st, 1912, were: Capital—subscribed, £3,000,000—paid up, £300,000; fire funds, £1,722,232; life and annuity funds, £5,259,609; endowment and capital redemption fund, £102,089; employers' liability and accident funds, £60,358; investment reserve fund, £35,975; profit and loss, £353,418; staff funds, £158,072; total, £7,991,753.

The Northern commenced business in Canada in 1867. It holds Canadian bonds and debentures amounting to $438,117, and its total assets in Canada are $542,735. The gross amount of risks in Canada taken by the Northern in 1912 was $53,383,260, the premiums charged thereon being $722,793. Mr. R. W. Tyre is the energetic manager for Canada. His headquarters are Montreal, and largely to his enterprise is due the company's success in the Dominion.

MONEY WAS FOR FOUNDATION PURPOSES

Such Borrowings Will Now be Relatively Small—Lesser Municipalities Were Not Wise in Accumulating Debts

In view of recent criticisms it is significant that in the Statist, a leading English financial review, appears an article covering several columns dealing with Canada's financial standing. It is understood that the writer is Sir James Knowles, the able editor of the Statist. He points out that Canada's heavy borrowings have been mostly for what may be termed foundation purposes, such as laying main lines. Such additional capital will soon be relatively small.

"It has recently been pointed out," the writer continues, "that the weakest spot in the financial situation in Canada lies in the borrowings by small municipalities. Doubtless these borrowings will ultimately prove of great advantage, but it would certainly have been wiser for the small municipalities to have waited and, as it were, muddled along without any heavy burden of interest until they were in a position to borrow without embarrassment.

Government is Alive to Need.

"But even municipalities which may have borrowed larger sums than their rateable value in a period of depression may warrant, may succeed in getting through without serious difficulty. In gauging the strength of these smaller municipalities it should not be forgotten that the Canadian government is alive to the necessity of assisting and protecting the credit of the country wherever it may seem to need assistance"—in support of which the writer quotes the guaranteeing of the Grand Trunk Pacific and Canadian Northern mortgages.

The article concludes: "It is evident that Canada has now almost accomplished the large amount of foundation work necessary and a comparatively small expenditure of capital in the next decade in proportion to the growth of population will immensely increase the producing power and income of the country.

Canada Not Alone.

"Provided British investors have no real cause to question the safety of their capital in consequence of inability of municipalities or others to meet their interest obligations, there are good grounds for expecting that British capital will continue to flow into Canada to continue the development which has made such wonderful progress in the last few years. Doubtless the relatively high rates of interest which capital now commands throughout the world will continue the demands for capital—for a time at any rate—to really strong borrowers able to satisfy their needs at reasonable rates. However, this applies not only to Canada, but to all countries."

◆

HAIL INSURANCE IN SASKATCHEWAN.

The superintendent of insurance of Saskatchewan has issued the following bulletin with reference to hail insurance:—

"During the months of June and July a large amount of hail insurance will be written by the agents of the different companies underwriting this class of business within the province of Saskatchewan."

The attention of the insuring public is drawn to the fact that under the provisions of the act respecting hail insurance and under an order-in-council regulating the writing of hail insurance, only companies which have been duly approved by the provincial treasurer and which have made the necessary deposits for the protection of the Saskatchewan policy holders are empowered to write hail insurance in Saskatchewan.

The following is a list of companies duly licensed by the superintendent of insurance: The Hudson Bay Insurance Company, the British Crown Assurance Corporation, Limited, the St. Paul Fire and Marine Insurance Company, the Canada Weather Insurance Company, the Canadian Indemnity Company, the Northwestern National Insurance Company, the Alberta-Canadian Insurance Company, the Canada National Insurance Company, the Central Canada Insurance Company, the Saskatchewan Insurance Company, the Canada Hail Insurance Company, the Mount Royal Assurance Company, the Excess Insurance Company.

◆

The commencement of the Toronto-Hamilton line of the C.P.R. now rests on a settlement by the C.N.R. and the G.T.R., with the T.H. and B. on the Hamilton entrance question. This will probably be made at a special meeting in Hamilton of the Dominion Railway Board in about two weeks time.

LEAVING LIFE INSURANCE FOR INDUSTRIAL SPHERES

Mr. A. E. Dawson has severed his connection with the Imperial Life Assurance Company to accept an executive position in a large firm of lumber manufacturers in Ontario.

Mr. Dawson has been identified with the life insurance business for eight years, commencing in Peterborough, Ont., as local agent for the Manufacturers' Life. In 1910 he joined the Imperial Life and proceeded to Sault Ste. Marie to organize the Algoma District for that company. The following year he was sent to take charge of the company's business in Saskatchewan, and in 1912, accepted a position in the head office of the company at Toronto, from which he has just resigned.

A. E. DAWSON.

Mr. Dawson was born in London, England, 25 years ago, and came to Canada when barely 17. Marked success has attended him in his various appointments, and he should prove valuable to the corporation which has secured his services, for he has had a wide experience and a thorough business training. He has a natural bent for organization work, is a tireless thinker and worker, and possesses a shrewd knowledge of human nature.

◆

SAYS CHECK IS HEALTHY.

At the meeting in London this week of the Investment Corporation of Canada, Mr. Eric Hamber, chairman, said that their managers on the other side pointed out that there was a marked tightness of money, and that bankers were restricting credits. Old customers had had their lines reduced, and new applicants were being refused accommodation.

Undoubtedly, he said, the stringency was severe, and this position had forced commercial houses to restrict their credits. Orders from the country were not being filled notwithstanding that a brake had been placed upon business operations.

The report went on to say that bank clearings were as big as usual, and other indications of progress were in evidence.

The reason the country was not feeling the monetary stringency more severely was due probably to the fact that the grain crop of last year was not yet fully marketed and was an excellent one. Emigration was increasing and interest in Western Canada had been aroused in quarters from which hitherto money has not been drawn. Considerable money had come in from New York, Paris, Amsterdam, and as to the future all depended upon the current year's grain crop, which at present was in excellent condition and gave promise of an abundant harvest.

If the supply of English money were cut off, naturally much development must cease, more particularly on railroad construction and important municipal work.

Undoubtedly some "wild-catters" were in difficulty, but they received no sympathy from the business community, and the check on speculation was healthy and even necessary.

The Bank of Ottawa has opened a branch at Ashdale avenue and Gerrard street, Toronto.

BRITISH COLUMBIA.

Live Stock on Pacific Coast—Canadian Pacific Railway Withdraws Appeal—Trade with Australia.

(Staff Correspondence.)

Vancouver, July 5th.

Dr. C. E. Saunders, chief of the cereal section of the Dominion government's department of agriculture, was in Victoria this week, having come to the coast to look over the experimental farm at Sidney. Discussing provincial possibilities, he takes the point that live stock culture is particularly suitable to Vancouver Island, that is as long as land can be secured anywhere within reasonable distance of farming prices. Opportunities for such an industry are great, since the market is large and very close at hand. At present, the rearing of live stock is secondary to dairying. Dairying has been found to be profitable, and, since cattle are an essential, naturally there is a live stock production above its needs. Naturally, too, with by-products swine are kept, but as an industry in itself live stock has not been considered, except, perhaps, in the interior of the province. In the vicinity of Kamloops and up the Cariboo road, where older settlements exist, many cattle are reared on ranges, but on the coast attention has been given to other agricultural lines in which the profit may be more quickly apparent. On the coast, however, the climate is not severe, and since immense quantities of fodder may be grown, live stock culture should become more of a feature. If men in the position of Dr. Saunders would talk on this subject more, and if he were to discuss what breeds would do best in the moist coast climate, those people having the land area might bring in stockers.

Appeal Withdrawn

Of considerable interest to investors in timber, and there are many who have money placed in this provincial asset, is the announcement that the Canadian Pacific Railway has withdrawn its appeal to the Privy Council in the matter of the suit of the King Lumber Company. This company has limits in the Kootenay through which fire swept. It contended that the fire originated on the Canadian Pacific Railway right-of-way, crossed an intervening piece of land, and got into the timber. The case was tried at Nelson a couple of years ago, and the lumber company was awarded $150,000 damages. On appeal, the judgment was upheld, and the Canadian Pacific Railway decided to take the case to the Privy Council. By its withdrawal, it is a concession that the points of law were well taken. At the time this case was first heard, other lumber concerns were watching the outcome, since they, too, had suffered.

British Columbia is concerned to a large degree in the negotiations for more extended trade relations with Australia. The seasons in Australia are directly opposite to those of Canada, and if the products of the Antipodes could be imported more freely into this country there would be great mutual benefit, since more trade would go south. All that is wanted is the removal of the commercial barriers, since better steamers now provide adequate transportation facilities.

Financial Interests Visit Coast

Mr. John H. Ferguson and Mr. Arthur Julian, of London and Reading, England, who have taken over the foreign department of the Nicholas Foreign Estates, Limited, are making an inspection of Victoria and Vancouver with a view to placing capital in mortgages, agreements for sale and farm lands. This firm, which has been established for thirty years, has branches already on the Pacific coast, in Seattle, Los Angeles, and San Francisco. They have not as yet done business in British Columbia, but expect to make a connection here through local agents.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended June 21st:—

	1913.	1912.	Increase or decrease.
Canadian Pacific Railway	$2,530,000	$2,510,000	+ $20,000
Grand Trunk Railway	1,166,394	1,066,726	+ 99,668
Canadian Northern Railway	489,300	411,700	+ 77,600
Temiskaming and Northern Ontario	29,880	27,820	+ 2,060

For the week ended June 30th:—

	1913.	1912.	Increase or decrease.
Canadian Pacific Railway	$3,467,000	$3,293,000	+ $174,000
Grand Trunk Railway	1,623,828	1,552,647	+ 71,181
Canadian Northern Railway	700,600	579,700	+ 120,900
Temiskaming and Northern Ontario	34,681	34,449	+ 412

WESTERN CROPS IN GOOD CONDITION

Winnipeg is Busy Centre—Manitoba Has Problem in Securing Agricultural Laborers

Monetary Times Office,

Winnipeg, July 9th.

Reports are coming in which indicate that the western crops are in good condition. From all points come optimistic forecasts regarding the wheat yield and the general outlook is most promising. In some parts of the west the crop will not be a heavy one, particularly where early sowing was done, this is caused by the rains coming too late to develop the stocks and where there is usually from twenty to forty stocks on a root, this year reports have it that there are only from five to ten, however the late sown crops are much better and the recent rains have had a most beneficial effect. In many sections of the country where there was no lack of rains in the early part of June and where conditions have been good throughout the season the outlook is bright.

Exhibition and Convention.

The Canadian Annual Exhibition at Winnipeg, opened on July 8th and continues until the 16th, and promises to be one of the finest in the matter of exhibits ever held here. Extra arrangements are necessary this year to accommodate the large numbers of horses and live stock which are entered.

On July 28th, 29th and 30th, the real estate men of the continent will meet at Winnipeg. This event, the annual convention of all the real estate exchanges of the continent, annually attracts delegates and visitors from all sections of the country, and it is believed the Winnipeg convention will be no exception to the rule.

Farm Help Wanted in Manitoba.

The provincial department of immigration of Manitoba have so far been unable to cope with the demand of the farmers for help. Every man with sufficient experience or strength who makes application at this office is found work immediately, and the department have wired to the Old Country acquainting their agents there of the situation. It is ascertained that a harvesters' excursion is now being organized by the department through the British agents and special arrangements are being made with the steamship companies for the return trip. It is believed that this plan will become a great aid to immigration of the best class, affording farm workers opportunity to see the country under very favorable auspices. During the month of June there were 219 homesteads taken out at the Winnipeg district office.

WESTERN BRICK AND COAL COMPANY'S STOCK OFFERING

The British Candian Brick and Coal Company, Limited, is offering through Messrs. McLaughlin and Smith, of Winnipeg, a block of its stock to investors, as follows:—$170,000 preferred and $172,500 common. The company has purchased from the Excelsior Coal and Brick Company, Limited, their entire plant as a going concern, and the directors anticipate making such improvements on the plant that it will be one of the largest in the West. The company own 640 acres of clay and coal, situated in the tract of mineral-producing country surrounding Estevan.

The company's authorized capital is $500,000, consisting of $200,000 7 per cent. preferred at $10 per share, with a bonus of 25 per cent. common; $300,000 common at $10 per share.

The funds from the sale of the stock will be used to complete the equipment of the present brick plant, to build a proper drying room for the common brick, to build the necessary kilns, and to erect more houses for the accommodation of laborers.

The directors of the company are Messrs. J. S. Douglas, merchant; W. F. Tallman, street commissioner; A. B. Wooldridge, gentleman; D. W. McKerchar, barrister; P. A. Talbot, real estate broker, all of Winnipeg.

During the present year Nanaimo proposes to expend $50,000 on the extension of the sewerage system, to construct a steel bridge over Millstone River at an estimated cost of $28,000, to expend a sum of $50,000 on the installation of an eighteen-inch main to increase the city's water supply and to erect a three-story brick and concrete school building at an estimated cost of $60,000, plans for which are now in the hands of the architect..

MONTREAL CITY versus WATER COMPANY

Long-drawn-out Negotiations—Two Arbitrators Suggested by Company—Price and Other Considerations

Monetary Times Office,
Montreal, July 10th.

For some years negotiations have been going on between the representatives of the city and those of the Montreal Water and Power Company, to the end that the city purchase the undertaking of the latter. For various reasons these negotiations do not appear to have resulted in the contracting parties getting any closer to each other. The price was too high for the city, and at one time the company refused to permit an examination of its books such as was demanded by the city, although some sort of compromise was later said to be acceptable. Nevertheless, the deal was not consummated. The attitude of the city officials was that they were anxious to conclude the deal and a few weeks ago it was declared that the portion of the company's plant in one of the wards would be expropriated unless the officials of the company would come to terms at once. The company denied the right of the city to expropriate, and matters remained this way till about a week ago when it was announced that the city would proceed to take over the St. Henri plant. This threat followed the ultimatum to the company by which it was requested to supply certain information by June 20th, the company making the claim that they could not get the information from England, where most of their shareholders were situated, within the time mentioned.

Two Arbitrators Suggested.

The controllers have now received a communication from the company requesting that the matter be taken up in an amicable spirit and suggesting the names of arbitrators to act on the question of a just price for the plant. The names of Sir Thomas Shaughnessy and Senator Dandurand were mentioned by the company as members of a board of arbitration.

Of equal importance was the concession made by the company—namely, that the arbitrators shall not only have the right to make a complete and satisfactory examination of the books, but that they shall also have the right to call for the information necessary to show just what the physical condition of the plant may be. The company, furthermore, binds itself to accept whatever price the arbitrators may decide upon, and expects the city to act in a similar manner.

It was further represented that any attempt to expropriate the property of the company piecemeal would be regarded by the company as unfair and would be carried to the courts. This would mean expensive litigation and long delay.

City's Position Shown.

The city has taken no action in the matter other than to send the communication on to the city attorney. The mayor is not enthusiastic about accepting the decision of the board of arbitrators, and offers the view that as the city is the purchaser it would have the right of examining the books on its own part and of reaching a decision without arbitrators. The members of the board of control are desirous of getting the best bargain they can for the city.

It will be interesting to add that the company offered its property about two years ago to the city for somewhere in the vicinity of $7,000,000. Ex-controller Wanklyn held that this price was excessive and that the city would make no bargain unless the company was willing to let the city make the fullest examination in order to ascertain the value of the plant. This demand is now, in effect granted by the company, so far as the arbitrators are concerned.

HAMILTON GIVES OPTION ON ITS BONDS.

In April Hamilton, Ont., disposed of $267,000 4½ per cent. debentures to a United States bond house and two Toronto firms purchased lots of $50,000 and $118,000.

It now has for sale $382,269 4½ per cent. local improvement debentures.

Messrs. Wood, Gundy and Company, Toronto, on Thursday, were given an option on this block.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, Toronto, exchange and bond brokers, report exchange rates as follows at closing:—

The proceedings of the third annual convention of the International Association of Casualty and Surety Underwriters was opened this week at Quebec. The proceedings were presided over by Mr. Charles Holland, president of the association.

TURPENTINE IS ADULTERATED

Chief Analyst at Ottawa Finds Curious State of Affairs Regarding Sale of This Drug

According to Mr. A. McGill, chief analyst at Ottawa, turpentine sold in Canada as a drug is a prime sinner in adulteration. Taking 158 samples in various parts of the Dominion, this is how he had to classify them:—

	Samples.
Adulterated, as containing petroleum	42
Adulterated variously	4
Adulterated, as being wood turpentine	1
Doubtful	5
Apparently genuine	106
Total	158

The presence of petroleums (mineral oils) is an adulteration of turpentine whether this is sold for medicinal purposes or for uses in the arts. This is the main adulteration of turpentine at present, and is evidently the result of a desire to find a market for cheap petroleum fractions at the price of turpentine.

Difficult to Believe.

It has been asserted that the intermixture of small percentages of petroleums does not injure turpentine for painters' use. This statement is very difficult to believe when we consider the different behavior of terpenes and petroleums to oxygen; but even if it were true, thinks Mr. McGill, the purchaser should be able to buy turpentine when he asks for turpentine, and pays the price of that article. If he desires to add petroleum to it, he can easily purchase the petroleum at its market price, and mix as he may please. Or, if he is offered a mixture of turpentine with petroleums, the true character of such mixture should be made known to him at the time of sale, and it should not be offered him as turpentine.

Said He was Wasting Time.

Turpentine appears not to be made in Canada. A large importing house in Montreal wrote to Mr. McGill on March 29th:—"Turpentine is an article that it is impossible for the jobber in Canada to control, as there is no turpentine manufacturer in this country; and if it is the intention of the Government to prevent adulterated turpentine to be sold in this country, why do they not stop its importation? All the turpentine that we buy is bought for pure, and if it is not pure it is a matter that we have no control over whatever. We think, therefore, that the labor you have gone to, as far as turpentine is concerned, is wasted." This statement is echoed by several other correspondents.

If it be indeed true that Canada has no control over the quality of the article turpentine, the case is a sad one; and it should lead to renewed effort on the part of manufacturers to try still further to obtain a good wood turpentine from the extensive raw materials which are found in our country. Mr. McGill has seen very good turpentine of Canadian manufacture, produced in experimental plants, and is not without hope that the production of turpentine may yet become a successful Canadian industry. But, even should we be compelled to rely upon the imported article, it is certain that genuine turpentine is obtainable, if sufficient care in testing samples be taken.

Will Not Prosecute this Time.

Mr. McGill is convinced that most of the importers and distributors of turpentine named in his report, and probably all of the immediate vendors, believed themselves to be supplying genuine turpentine, or, at least, the best article procurable. "If this report does nothing more than expose the facts of the case it will, I think," concludes the chief analyst, "be justified, and if it leads Canadian importers of turpentine to take necessary precautions to procure a genuine article, and to refuse to buy adulterated goods, it will have performed a valuable service to the community. If we have not home-produced turpentine in Canada, we have at least home-produced petroleum and can make such additions of that article as we may think desirable. As this is the first inspection of turpentine since its legal definition by Order in Council, I think it not unreasonable, in view of this fact, and of the above considerations, to suggest that no legal action be taken by the Department; but that the information furnished be regarded as advisory."

◆

Following the announcement of the extension of the lead bounties for five years the Consolidated Mining and Smelting Company directors have placed the stock upon a regular eight per cent. basis. The first quarterly payment of two per cent. will be made on July 2nd to holders of record June 25.

PUBLIC UTILITY AND HYDRO-ELECTRIC BONDS

Their Investment Advantages—Many Reasons Given—Steady Growth of Earnings

The following are several reasons for investing in the bonds of public utility and hydro-electric companies:—

Because a higher interest yield can be obtained with better opportunities for appreciation in capital than can be secured from any other undertaking offering equal security.

Because the services provided by them being largely of an indispensable nature, their revenues are necessarily more secure than those of any undertaking liable to competition.

Because the demand for their services increases concurrently with the increase in population, and electricity, being a staple commodity, is becoming more and more the basis of all industrial activity.

Because, unless under exceptional conditions, it is impossible to generate electricity by coal or in any other manner to successfully compete in price with that generated by water power. This is especially true in those districts where the cost of fuel is high.

Because the natural but remarkable growth of wealth and population in Canada practically insures for many years to come a steady and progressive increase in earnings.

Contracts and Competition.

Because most of these companies hold long term contracts which insure regular profits under all circumstances, however adverse general conditions in the country may be. This was strikingly shown during the period of industrial depression and financial troubles in 1907 and 1908, in which period regular increasing net earnings were shown by practically all well managed hydro-electric and public utility companies, state Messrs. Nesbitt, Thomson and Company, Limited, Montreal, in a recent circular.

Because there are only a limited number of sites in any district suitable for the purpose of generating a large amount of electricity by water power. When these have been secured, together with the water rights, competition from other sources is practically eliminated.

Because these securities are almost entirely held by genuine investors, who hold for permanent investment. This is a great source of strength in times of panic, or monetary stringency.

Because these securities advance in price on merit and are little influenced either by market conditions or stock exchange movements.

Because the working capital required is comparatively small, a fact which simplifies the management and lessens the danger that always overhangs an industrial in times of financial stress.

Costs of Operating.

Because the operating costs are small in proportion to the total gross earnings in comparison with other companies, whether industrial, railroad, or shipping. This means a higher return on the capital invested.

Because the working of the plants being almost automatic very little labor is necessary, which reduces to a minimum losses through labor troubles.

Because there is no risk of loss from depreciation of stock on hand, and very slight depreciation of plant, or machinery, as compared with steam plants or machinery of other industrial concerns which are liable to become obsolete at short notice. This allows a larger distribution of profits than would otherwise be the case.

Because in times of monetary stringency, public utility and hydro-electric bonds of successful companies can be sold or borrowed upon more readily than those of industrial companies.

◆

Of the ten large factories secured by Fort William during 1912, practically the first to have their plant in full running order was the McKellar Bedding factory. One of the first carload of mattresses manufactured by the Fort William plant has been shipped to Eastern Canada for sale; this probably marks a new era in the tread of manufacturing and marketing of Western Canadian manufactured articles.

In the will of the late Mr. Widner Hawke, vice-president of the O'Keefe Brewery Company, Limited, Toronto, filed for probate, the estate totals $1,164,547. The various items are: Stock in O'Keefe's Brewery, $900,000; bonds in O'Keefe's Brewery, $200,000; 48 Oriole Road, $30,000; equity in Gould and Victoria Streets property, $17,412; life insurance, $29,306; less loans, $25,500, $3,806; Home Bank stock, $2,000; garage, Marlboro Crescent, $2,500; household furniture and personal effects, $5,000; cash on hand and in bank, $3,879.

SEVENTY-FOUR INCORPORATIONS

Eight Large Companies—Variety of Manufactures Included in List—Nickel, Gold and Coal Mines

Attention was drawn last week to the several mining companies included in the new incorporations; additional ones have been granted charters as will be seen in the following list. Fruit growers' associations, new hotel companies and sports clubs, incorporations, are evidences of Canada's summer activities. The largest companies this week with their capital are:—

British America Nickel Corporation, Toronto ..	$20,000,000
Winnipeg Gold Mining Company, Winnipeg	2,000,000
Consolidated Asphalt Corporation, Winnipeg ...	1,500,000
Commonwealth Gold Mines, Toronto	1,000,000
Kildare Mines, Ottawa	1,000,000
Dominion Foods, St. Catharines	1,000,000
D. E. Brown, Hope and Macaulay, Vancouver....	1,000,000
Vancouver Navigation and Towing Co., Victoria	1,000,000

The total number of companies was seventy four and the capitalization amounted to $35,741,000. Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
New Brunswick	1	$ 49,000
Quebec	15	1,313,000
Ontario	30	26,705,000
Manitoba	16	4,204,000
British Columbia	12	3,470,000
	74	$35,741,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Prince Rupert, B.C.—B.C. Salt Works, $125,000.

Nelson, B.C.—Kootenay Explosives Company, $200,000.

St. Guillaume, Que.—Le Pret Agricole, $20,000. L. D. Frigault, W. Parent, C. Lafleur.

Cobalt, Ont.—Adam N. Davis Coal Company, $40,000. W. Rodd, C. Hair, E. Armstrong.

Leamington, Ont.—Leamington General Hospital, $40,000. L. Wiggle, S. French, H. Lendon.

Moncton, N.B.—Reade Fur Farms, $49,000. B. F. Reade, S. O. Humphrey, W. E. Sherrard.

St. Catharines, Ont.—Dominion Foods, $1,000,000. W. J. Brigger, C. H. Brigger, J. C. Brigger.

Brandon, Man.—Willows Company, $20,000 (building contractors). E. Willows, D. S. McNicoll, H. A. Short.

Lachine, Que.—Lake View Hotel of Lachine, $200,000. A. Hudon, J. A. Christin, both of Montreal, and I. C. McRae.

Dundas, Ont.—Canadian Abrasive Wheels, $500,000. H. E. Sherk, G. R. Harvey, both of Hamilton, M. T. Brown.

Ridgetown, Ont.—Greenwood Cemetary Corporation (no share capital). J. W. Spence, G. Leatherdale, V. Springstein.

Oakville, Ont.—Oakville Fruit Growers' Association (no share capital). R. A. Carey, Hamilton, P. A. Bath, W. A. Deame.

Hanover, Ont.—Tamarac Island Fishing and Shooting Club (no share capital). C. H. Witthun, H. Gruetzner, R. E. Young.

Bridgeburg, Ont.—International Color and Chemical Company of Ontario, $300,000. F. R. Humpage, A. S. Ramage, S. L. Callahan.

Dauphin, Man.—Reck-Clary Grader Company, $15,000 (metal merchants). R. J. Reck, F. H. Clary, both of Gilbert Plains, J. R. Kagle, Dauphin.

Victoria, B.C.—Vancouver Navigation and Towing Company, $1,000,000. Bazett Bell Company, $50,000 (brokers). North Arm Sand and Gravel Company, $100,000.

Hamilton, Ont.—Burris Park, $40,000. W. Lees, T. Hobson, H. S. Lees. Stanley Mills and Company, $500,000 (stores). S. Mills, E. Mills, E. H. Ambrose. Regal Shirt Company, $300,000. A. C. Christie, J. R. Marshall, P. J. Knox.

Vancouver, B.C.—Brooks-Corning Company, $10.000 (furniture dealers). D. E. Brown, Hope and Macaulay, $1,000,000 (real estate). Hatzig Shingle and Lumber Company, $100,000. M. R. Heck and Company, $10,000 (office supplies). Railway Utility Company of Canada, $50,000. Vancouver Island Coal Mines, $800,000. Vancouver Log Company, $25,000.

Ottawa, Ont.—Journal Realty Company, $250,000. P. D. Ross, R. F. Parkinson, W. A. Perry. Willis College, $50,000. R. B. Harrison, H. B. Johnson, P. White. United Syrian Society of Canada (no share capital). A. N. Anber, G. Kalil, H. J. Selloum. Kildare Mines, $1,000,000. W. G. Bronson, J. W. Woods, E. Linton. O'Reilly and Belanger, $100,000 (coal merchants). F. M. O'Reilly, A. J. O'Reilly, N. Belanger.

Montreal, Que.—Club Raquetteurs Le Montagnard, $20,000. H. Pinet, J. S. A. Bourbonnierre, J. E. LaRamee. Montreal Theatre and Realty Co., $5,000. H. W. Conover, C. A. Harwood, J. E. Lemire. Montreal Operating Company, $1,000. H. W. Conover, C. A. Hardwood, J. E. Lemire. Theresian Sand and Gravel Company, $20,000. J. C. Poissant, E. H. Lanthier, G. Vandelac. University Magazine, $10,000. W. F. Chipman, W. R. L. Shanks, G. F. Macnaughton. Montreal Moose Club, $2,000. J. Taylor, J. Melbourn, R. Deyo. Parc Lafleche, $80,000. R. T. Leclerc, J. E. Pelletier, R. Faribault. Rigaud Edgewater Syndicate, $50,000 (real estate). G. L. Alexander, H. Hughes, A. T. Paul. Baie d'Urfe Heights, $100,000. L. A. David, L. J. M. Dugas, S. H. R. Bush. Telegraph Publishing Company of Montreal, $500,000. F. H. Markey, W. W. Skinner, G. G. Hyde. D. Donnelly, $125,000 (ice merchants). W. R. L. Shanks, F. G. Bush, G. R. Drennan. Canadian Metal Manufacturing Company, $30,000. F. W. Montgomery, J. K. Wells, both of Boston, U.S.A., L. E. Urquhart. Eastern Cafeterias, $150,000. H. A. Fleming, S. A. Marvin, H. Marklem.

Toronto, Ont.—Canadian Foote Company, $40,000 (concrete machinery). F. B. Neeve, J. A. Simpson, A. A. Ridley. Amalgamated Moving Picture Shows, $500,000. A. G. Robertson, A. Lawrie, M. Powers. Southport Orange and Produce Company, $250,000. E. Smith, D. E. Smith, E. Gillis. Danforth Glebe Estates, $250,000. F. Oxford, F. W. Hill, J. P. White. Ontario Commonwealth Gold Mines, $1,000,000. G. H. Sedgewick, A. G. Ross, A. G. McMillan. Lakeview Apartments, $100,000. J. Mitchell, H. Chapman, P. Witt. All Canada Exposition Company, $50,000 (advertising). J. T. Wood, W. J. Cawood, F. L. Griffin. Consolidated Brick and Tile Company, $40,000. F. J. Foley, T. A. Silverthorn, J. H. Flett. F. Smith and Company, $40,000 (feeding stuffs). F. Smith, W. P. White, G. N. Parrington. Essex County Seed Farms, $200,000. R. H. Cuthbert, C. J. Saunders, W. H. Lodge. General Power Corporation, $5,000. R. W. Hart, G. M. Miller, P. Stokes. Balsam Lake Quarries, $60,000. Mrs. E. Kirvan, M. Grahame, J. F. Verner. Crookston Stone Company, $50,000. J. A. Jelly, Shelburne, L. E. Allen, Belleville, R. Cooke, Harold. Canadian British America Nickel Corporation, $20,000,000. J. S. Lovell, C. D. Magee, W. Bain.

Winnipeg, Man.—Benson-Newhouse-Stabeck Company, $100,000 (commission agents). E. R. Anderson, Duluth, F. O. Gold, H. N. Stabeck, both of Minneapolis. Dunmore Investment Company, $9,000. L. Freedman, A. L. McIntyre, W. Uren. Marchand Developments, $100,000. F. H. Story, G. D. MacVicar, S. R. Flanders. City Lighting Company, $20,000. Mrs. P. Scott, F. W. Scott, V. Winkler. Monarch Finance Company, $5,000. R. T. Pickard, R. A. Crowell, R. Mann. Aberdeen Investment Company, $60,000. R. H. Cottingham, W. D. Shaw, W. R. Cottingham. Consolidated Asphalt Corporation of Canada, $1,500,000. C. W. Field, J. B. Shaw, both of Edmonton, P. Ney. Winnipeg Windsor Land and Mortgage Corporation, Limited, $200,000. J. A. Grandy, W. Frank, A. Wilson. North Winnipeg Investments, Limited, $25,000. W. Mannahan, J. R. Higgins, M. Gourlay. St. Vital Bridge Association, $5,000. R. Wilson, W. H. Walker, R. O. Taylor. Westmoreland Apartments, $40,000. A. S. Knight, F. G. Pompelly, G. H. Yule. Canadian Midlands, $100,000. C. A. Crawley, G. F. de C O'Grady, H. Dunk. Winnipeg Gold Mining Company, $2,000,000. J. Thoms, P. C. Young, W. Wray. Adanac Publishing Company, $5,000. H. M. Tibbals, A. G. Bitterman, F. M. Hetherington.

◆

The Standard Garage, Limited, has changed its name to the Industrial Garage of Canada, Limited.

The name of Tisdale and Scott, Limited, has been changed to the May Manufacturing Company, Limited.

The Canada Lumber Company has increased its capital stock from $100,000 to $200,000 by the creation of 1,000 shares of new stock of $100 each.

The Toronto Brick Company, Limited, has increased its capital stock from $600,000 to $1,000,000, by the creation of 4,000 shares of new stock of $100 each.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Herbert, Sask.—July 1—Royal Elevator. Loss $5,000. Cause unknown.

Wallaceburg, Ont.—July 6—Hawken Milling Company. Loss and cause unknown.

Three Rivers, Que.—July 4—Courthouse. Loss $30,000. Cause, supposed defective wire.

Alvinston, Ont.—July 3—Mr. G. A. Hadden's garage and auto. Loss $1,000. Cause unknown.

Embro, Ont.—July 4—Mr. H. Munro's barn and contents. Loss unknown. Cause, lightning.

Beckwith, Ont.—June 24—Mr. W. Duff's residence. Loss $2,500. Cause, supposed defective chimney.

Woodstock, Ont.—July 4—Mr. J. McDonald's barn and contents. Loss unknown. Cause, lightning.

Niverville, Man.—June 27—Mr. P. Nuefeld's residence. Loss $4,000. No insurance. Cause unknown.

Kingston, Ont.—July 2—Mr. J. Angrove's motor boat. Loss $600. Insurance $350. Cause unknown.

Chaudiere Cove, Que.—July 1—Chaudiere Lumber and Pulp Company's office. Loss and cause unknown.

Ottawa, Ont.—July 6—Nickel Moving Picture Theatre, etc., Albert Street. Loss $115,000. Cause unknown.

Point Edward, Ont.—July 7—Elevator of Point Edward Elevator Company. Loss $300,000. Cause unknown.

Nelson, B.C.—July 2—Mr. A. S. Horswill's residence, Fairview. Loss $6,000. Insurance $2,500. Cause, chimney.

Scott's Junction, Que.—July 8—Messrs. R. H. Goodday and Company lumber mills. Loss $60,000. Fully insured. Cause unknown.

McGivney Junction, N.B.—June 23—Mrs. C. Bell's residence and Mr. H. J. Morgan's two buildings. Loss $5,000. Cause unknown.

Quebec, Que.—June 30—Mr. J. Lafrancois' lumber yard. Loss $1,000. Residence, Prince Edward Street. Loss $4,000. Cause unknown.

Cornwall, Ont.—July 1—Residence on Pitt Street occupied by Messrs. J. Suave and W. Bero. Loss and cause unknown. Two deaths.

Stratford, Ont.—July 4—Mr. B. F. Kostner's boathouse. Loss $50. Cause unknown. Mr. G. Edward's residence, roof damage. Cause, sparks.

Milverton, Ont.—July 4—The J. G. Grosch Felt Shoe Company. Loss $60,000. Insurance $17,000. Messrs. Kerr and Miller's residences damaged and other losses $10,000.

Hamilton, Ont.—July 4—Mr. J. Markham's barn. Loss $4,000. Cause, lightning.

July 7—Radial Terminal freight sheds, Main and Catherine Streets. Loss $75,000. Cause unknown.

Saskatoon, Sask.—June 15—Messrs. Gordon and Sparling's stable 317-4th Ave. S. Cause, children with matches.

June 16—Messrs. Luke Brothers, 117-4th Ave. Cause, rubbish in rear. Messrs. Carter and Hall Company, 2nd Ave. Cause, slacked lime. Losses in above fires were slight

Montreal, Que.—June 26—Mr. L. Woolf's residence, 1960 St. Arbun Street. Loss $600. Cause, children.

July 5—Marine Laundry Company, G. Roberts and Company, contractors and Messrs. C. E. Frost and Company, manufacturing chemists. Loss $50,000. Cause unknown.

July 7—St. Charles Church, Centre Street. Loss $200,000. Cause, suppose gasoline lamp exploded.

July 8—Mr. C. Grothe's stables, etc., 1639 Notre Dame Street East. Loss $2,000. Cause unknown.

Toronto, Ont.—July 1—Mr. R. J. Fleming's stable. Loss $500. Controller Foster's stables, rear 282 Queen East. Loss three horses burned. Loss $1,000. Stables rear 157, 159, 161, Croft Street. Loss $820. Cause, supposed incendiary.

July 2—154 Parliament Street. Mr. Aylesworth's. Loss $400. Ross and Wright, adjustors for the Assured Toronto, 152 Parliament Street. Loss $700. Cause unknown.

July 7—Steamer Pontiac. Loss $6,000. Partly insured. Cause, supposed incendiary.

July 8—Messrs. Clatworthy and Son's premises, King Street East. Loss building $1,500, contents $8,000. Insured with Queen City Economical Gore Atlas Employers' Liability, National and others for $30,000. Ross and Wright adjusters for the assured Toronto; 11 Somerset Ave. Loss $15. Cause, upset lamp.

Rosthern, Sask.—June 30—Messrs. Kuth and Watts' garage, etc. The losses are:—Garage stock, Kuth and Watts, $2,500, no insurance; H. A. McEwen, owner of garage building, loss $2,500, insurance $1,500; J. E. Lussier, law office contents destroyed; Henry Boettger, tinshop and contents $1,700, insurance $1,000; R. L. Horton, building, $4,000, insurance $2,500; R. L. Horton, furniture stock, $10,000, insurance $5,000; Fritz Kroll, pool room building, $4,500, insurance $2,200, pool tables, $1,200, insurance $1,000; Max Mahnke, barber shop supplies and cigars, $1,150, insurance $500. Six automobiles were destroyed in the garage. Three of these were from Saskatoon, one from Laird and one from Hague. Total loss about $33,000.

St. John, N.B.—June 23—Six buildings on Exmouth Street and Waterloo Street. Losses, Mr. G. W. Colwell, loss $3,500, insurance $2,000; Mrs. L. Crockett, loss $2,850, insurance $1,800; Mr. L. J. Murray, loss $500, no insurance. Mr. George Vinvine, loss $500, no insurance; Mrs. J. E. Ratcliffe, loss $450, covered; Mr. Charles W. Anderson, loss $150, no insurance; Mr. Allan Agar, loss $500, no insurance; Mrs. Mary Kennedy, loss $200, no insurance; Mr. Samuel L. Scribner, loss $300, covered; St. Vincent de Paul Society, loss $300, covered; Mr. B. J. Barnes, loss $200, covered; Mr. Jarvis Purdy, loss $2,000, insurance $1,000; Miss Murphy, loss $1,000, covered; Mr. C. S. Philps, loss $400, covered; Messrs. Norton Griffiths Company, Limited, loss $400, covered; Miss Murphy's barn, Clarendon Street, loss $1,000. Loss by Mr. J. Purdy auto, carriage, poultry, etc., $2,000. Mr. Philps $5,000. Cause, supposed incendiary.

July 5—Mr. J. Harvey Brown's grist mills. Loss $20,000. Cause, supposed incendiary.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

The following fires were adjusted by J. S. Rankin, Vancouver, B.C. :—

Vancouver, B.C.—June 4—James Zouboules' restaurant. Loss on building, $500; on contents, $265. Cause of fire, cigarette stub. Insurance, Phoenix of London, contents, $1,300.

Vancouver, B.C.—June 4.—Hoare and Waite's second-hand store. Loss on building, $1,000; on contents, $2,500. Cause, cigarette stub thrown on roof from adjoining window. Insurance, Intercolonial Fire Underwriters, contents, $1,000.

Vancouver, B.C.—May 1—British Canadian Securities, Limited, offices. Loss on building, $215. Cause of fire, oily rags. Insurance on building, State of Pennsylvania, $75,000; Alliance of London, $100,000; Quebec, $125,000.

Vancouver, B.C.—April 22—Royal Trust Company, dwelling, J. E. Ritchie. Loss on building, $575; on contents, nil. Cause of fire, sparks from burning stumps. Insurance, building, Commercial Union of London, $8,000.

Telkwa, B.C.—June 6—F. L. Charleson's general store, owned by North Coast Land Company. Loss on building, $3,600; on contents, $9,850; on fixtures, saved. Cause of fire, supposed cigarette stub. Insurance, Phoenix of London, building, $2,000; contents, $5,000; Liverpool and London and Globe, contents, $6,000.

Chicken Lake, B.C.—May 19—Broughton and McNeil's store and hotel, and warehouse. Loss on building, store and hotel, $4,000; warehouse, $450. On contents, store, $3,500; warehouse, $2,600. Cause, kitchen range. Insurance, Delaware Insurance Company, schedule on buildings and contents, $5,000; Phoenix of London, schedule on buildings and contents, $5,000; total, $10,000.

Revelstoke, B.C.—June 5—H. J. McSorley's "King Edward Hotel." Loss on building, $725; on contents, $135. Cause, spark from chimney falling on roof. Insurance, British and Canadian Underwriters, building $1,000, contents $1,000; British America, building $3,000; Caledonian, building $7,000; Commercial Union, contents $1,000; Insurance Company of North America, building $2,000, contents $2,000; Liverpool and London and Globe, building $2,000; London Assurance Corporation, building $5,000, contents $2,000; North Empire, building $3,000; Nova Scotia, building $2,000; Phoenix of London, contents $1,000; Western, building $2,000; Western Union, building $2,000.

Coquitlam Dam, B.C.—February—Vancouver Power Company's general store. Loss on building, $200; on contents, $6,000. Cause of fire, overheated stove. Insurance, Home Insurance, schedule, $5,000; British and Canadian schedule, $5,000; Union schedule, $10,000; Guardian schedule, $10,000; Union schedule, $10,000; Employers' Liability schedule, $10,000; Western schedule, $10,000; London and Lancashire schedule, $54,000; General schedule, $15,000; Yorkshire schedule, $20,000; Royal schedule, $44,000; Northern schedule, $57,000; Phoenix of London schedule, $25,000; German Alliance schedule, $15,000; total, $290,000. These policies cover general schedule on various properties.

SUN LIFE COMPANY TO REASSURE HOME LIFE ASSOCIATION

Arrangements Are in Progress—Terms Have Approval of the Insurance Department

As announced exclusively in The Monetary Times last week, an arrangement is in progress for the re-assurance of the Home Life Association by the Sun Life Assurance Company. Mr. T. B. Macaulay, managing director of the latter, informs The Monetary Times there is every prospect of this transaction being consummated in the near future. The terms proposed will fully secure the policyholders and have the approval of the department of insurance at Ottawa.

In September, 1911, the control of this company was secured by Mr. H. Pollman Evans and his associates, of the Union Life. It was said originally to have been the intention to amalgamate the two companies, but troubles came rapidly to the Union Life, and these largely prevented any such action.

T. B. MACAULAY,

Managing director Sun Life Assurance Company of Canada, Which Will Reassure the Home Life.

Negotiations have been proceeding for some time with a view to the absorption of the Home Life by the Sun Life Assurance Company of Canada. Some delay has occurred owing to the Union Life liquidation proceedings. An offer was also made by a well-known Toronto life underwriter to purchase the control of the Home Life, but this was declined and the negotiations with the Sun Life, which not long ago absorbed the Royal Victoria Life, of Montreal, began to take more definite shape.

Sun is a Strong Company.

The Sun is one of the strongest companies in Canada, and the policyholders will not be losers by the further change of control. At the end of 1911 the Sun Life had $1,000,000 capital subscribed and $250,000 paid up.

The personnel of the directorate of the Home Life changed considerably in 1911. On February 28th in that year the directors were reported as follows, together with the amount of stock subscribed and paid by them:—

Name.	Amount Subscribed.	Amount Paid.
Karn, D. W.	$5,000.00	$1,000.00
McCutcheon, J. K.	5,800.00	1,160.00
McCutcheon, J. K. (in trust)	2,400.00	480.00
Rolph, T. P.	2,500.00	500.00
Rolfe and Burns Trustees	5,000.00	1,000.00
Burns, D. A.	....	....
Lyon, J. W.	....	....
Turnbull, C.	....	....
Broadfoot, D. D.	....	....

The three last named were policyholders' directors, the others being shareholders' directors. The amount of capital subscribed at that date was $1,000,000, of which $219,300 was paid. Other large shareholders prior to the change of control were as follows:—

Name.	Amount Subscribed.	Amount Paid.
Warren, J. J.	$344,000.00	$83,940.00
Tufts, Professor	10,000.00	2,000.00
Spencer, J. H.	10,000.00	2,000.00
Maynard, J.	10,000.00	2,000.00
Hose, J. (estate)	10,000.00	2,000.00
Ellis, W. S.	10,000.00	2,000.00
Boddy, T. W.	20,000.00	4,000.00

Change of Control.

When Mr. Pollman Evans obtained control in September, 1911, there was considerable change in the directorate, as the following table shows:—

Name.	Amount Subscribed.	Amount Paid.
Evans, H. P.	$ 2,500.00	$ 500.00
Evans, H. P., and Symons, H. (trustees)	578,800.00	131,830.00
Millichamp, G. E.	2,500.00	500.00
Symons, H.	2,500.00	500.00
Carrie, W. H.	2,500.00	500.00
McCutcheon, J. K.	2,500.00	500.00
Jones, G. E. A.	2,500.00	500.00
Turnbull, C.	....	....
Lyon, J. W.	....	....
Broadfoot, D. D.	....	....

The amounts of capital subscribed and paid remained the same as in 1911. On February 26th, 1912, there was only one holding of $10,000 or over, besides that of Messrs. Evans and Symons as trustees. This holding was that of Mr. J. H. Spencer, of Medicine Hat, $10,000.

When the change of control occurred in September, 1911, at a meeting of the Home Life, Hon. J. R. Stratton, president, and Messrs. Karn, Rolfe and Burns resigned. Their positions were filled by Messrs. H. Pollman Evans, of the Union Life, who became the new president of the Home Life; W. H. Carrie, H. Symons, K.C., and Dr. G. E. Millichamp, the two latter acting as vice-presidents.

H. POLLMAN EVANS,

President of the Home Life Association (which the Sun will take over), and also president of the Ill-fated Union Life.

Contract with McCutcheon.

Mr. J. K. McCutcheon continued as managing director. In this connection it is interesting to note that the Home Life have a contract with Mr. McCutcheon, under which he receives as general manager a salary of $5,000 per annum and a percentage of 3½ per cent. of the gross actual premiums collected by the association in each year, the percentage, however, not to exceed $7,100 in any one year. This contract terminates on October 13th, 1920.

The Home Life also have a contract with the People's Life Assurance Company, under which the People's Life receive a renewal commission of 7½ per cent. of the premium actually collected in respect of People's Life policies reinsured by the Home Life, or in respect of Home Life policies issued in substitution of People's Life policies. This contract expires on August 31st, 1915.

Business of the Two Companies.

The following table, compiled by The Monetary Times, shows the business transacted by the two companies during 1912:—

1912.	Sun Life.	Home Life.
Premiums for year	$3,283,639	$ 203,830
Number of policies new and taken	7,985	149
Amount of policies new and taken	14,601,354	210,080
Number of policies in force	64,142	4,319
Net amount in force	90,802,040	5,427,621
Number of policies become claims	904	43
Net amount of policies become claims	1,345,016	54,433
Claims paid	1,293,380	49,712

The Sun Life, in addition to its large Canadian business, also does considerable business abroad. Last year it took in other countries no less than $6,468,707 in premiums. It has in force abroad life insurance policies aggregating $91,930,380, as compared with the Canadian business of $90,802,040. The Home Life does not do any business outside of Canada.

Assets and Liabilities.

According to the returns sent to the department of insurance at Ottawa, the following were the assets held by the two companies last year and tabulated by The Monetary Times:—

1912.	Sun Life.	Home Life.
Real estate	$1,240,488	$166,618
Loans on real estate	2,141,721	491,694
Loans on collaterals	1,967,013	20,000
Cash loans, etc., on policies	5,655,721	185,781
Bonds and debentures	29,572,084	295,161
Stocks	6,696,462	22,000
Cash	949,687	142,969
Interest and rents	400,404	45,304
Outstanding premiums	884,700	28,156
Other assets	97,333	1,659
Total assets	$49,605,616	$1,399,346

Similarly, the liabilities of the two companies in 1912 are tabulated below:—

1912.	Sun Life.	Home Life.
Unsettled claims	$ 483,246.07	$ 11,500.00
Net reinsurance reserve	42,916,614.94	1,247,129.00
Sundry	624,673.66	8,222.31
Total liabilities, including reserve, but not capital stock	44,024,534.67	1,266,851.31
Surplus of assets over liabilities, excluding capital	5,581,081.82	132,495.08
Capital stock paid up	250,000.00	219,200.00

Cash Expenditure and Loans.

The following figures, tabulated by The Monetary Times, show the cash expenditure of the two companies during 1912:—

1912.	Sun Life.	Home Life.
Paid for taxes	$ 88,231	$ 2,682
Investment expenses	17,813	......
General expenses	2,011,102	63,319
Total expenses	2,117,147	66,002
Payments to policyholders	4,732,463	79,359
Dividends to shareholders	37,500	......
Total expenditure	$6,887,110	$145,361

The following statement shows the balance of the two companies' mortgage loans and policy loans accounts on December 31st, 1912:—

1912.	Sun Life.	Home Life.
Mortgage loans	$2,141,721	$512,663
Policy loans	4,472,370	175,781

Mr. T. B. Macaulay, managing director of the Sun Life, is an underwriter of international reputation.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of ore in pounds from Cobalt station for the week ended July 4th: Casey Cobalt Mines, 73,800; Cobalt Townsite Mines, 56,500; Cobalt Lake Mine, 60,900; Dominion Reduction, 86,900; Coniagas, 156,460; Peterson Lake, 59,650; Cobalt Comet, 63,700; Tretheway, 40,000. Total, 597,910. The total shipments since January 1st are now 20,479,429 pounds, or 10,239 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

DEVELOPMENTS IN CANADIAN CITIES.

Industrial Undertakings Are Numerous—Hamilton is Busy—Alberta's Progress.

Development is progressing rapidly in New Brunswick, writes Mr. H. T. Hoag, secretary of St. John board of trade. The Valley Railway now under construction is opening up about six million acres of new territory. A new company capitalized at five million dollars is applying for incorporation to operate the oil shales of Albert County, and it is expected that these will be made the basis of very extensive industries in the near future. The company which is developing the iron deposits in Gloucester County has resumed shipments of ore, and a company is making tests of the iron deposits in Queens County. A company of which Sir William Van Horne is the head will develop enormous power at Grand Falls, involving the expenditure of several millions of dollars, and it is understood to be the intention of this company to erect large pulp and paper mills at Grand Falls.

As to general conditions, the situation shows the following facts regarding Sydney:—

Special advantages for market gardening are offered.

Development of the water front is lacking.

Trade conditions are well supported by large industrial pay rolls.

Outside capital is needed to finance building operations.

Population increasing substantially and bright general prospects exist.

Hamilton's Progress is Prominent.

Conditions at Kenora are promising. The lumbering industry is in full blast, all mills working day and night shifts. A pulp mill of 100 tons capacity will likely be started within town limits before the end of the year, and that will mean the harnessing of the big Winnipeg River power (30,000 horsepower), suggests the board of trade's secretary.

During the last three years over thirty factories with an invested capital of over six million dollars have located at Hamilton. Twelve new factories with an invested capital of over two million dollars located in 1912. When these plants are completed they will employ over 2,600 hands, is Mr. H. M. Marsh's, Hamilton's industrial commissioner, estimate.

There are 400 varied industries in Hamilton, employing 30,000 wage earners, who are annually paid $17,000,000. The annual value of their output is over $60,000,000. This makes Hamilton one of the foremost industrial centres in Canada.

Macleod's, Alberta, industrial commissioner, reports that inquiries from prospective manufacturers are numerous, and that with the entry of the Canadian Northern Railway, Macleod, which is already an important divisional point on the Canadian Pacific Railway through the Crow's Nest Pass, will evolve into an important distributing and manufacturing centre.

In Southern Alberta.

Stimulated by the favorable power rates now offered by Lethbridge to manufacturers, the Ellison Milling Company intends doubling the capacity of its mills. It is understood that new capital in Salt Lake City has become interested in this enterprise.

The Canadian Pacific Railway has large construction gangs working on both ends of the new line through Southern Alberta from Weyburn to Lethbridge. This line of four hundred miles will serve a developed grain area and will add about sixty grain buying elevator stations to the Lethbridge district.

The International Harvester Company are building at Lethbridge a four-story brick warehouse to cost one hundred and fifty thousand dollars.

Interest has been awakened by the announcement that the coal mining properties in the vicinity of Lethbridge and the Crow's Nest would be put upon a full capacity basis of operation. As the mining pay roll amounts to over $300,000 per month, this announcement means much to the neighborhood.

Lethbridge has established a bureau of commerce and manufacture and has appointed as commissioner Mr. Joseph P. Tracy, lately secretary of the Saginaw board of trade, Michigan, U.S.A. The city enters into direct negotiations with those desiring to establish manufacturing establishments and offers inducements such as cheap power, light, water, fuel, free sites and exemption from taxation.

◆

CANADA MUST PAY MORE.

Canada will have to pay in England a better rate of interest than in the past, says Hon. Lionel Guest, Montreal, who has just returned from England. The future of the money supply will depend upon the world's demands. As for the municipalities in the West, which are alleged to have overborrowed, Mr. Guest stated that the banks in the West were no doubt well informed as to the condition of affairs both in eastern and western Canada and would control the situation as they had done in the past. He then referred to the confidence entertained by British bankers and business men as to the excellence of the Canadian banking system and in the whole financial fabric of the Dominion.

FOOD SUPPLIES IN WESTERN CANADA.

What Winnipeg Imports—Mixed Farming at Saskatchewan and Alberta Points.

The early opening of the new Central Market, which has been completed and equipped by the Winnipeg industrial bureau, brings up the question of the great demand in Winnipeg for the produce of market garden and farm. Winnipeg annually imports from the United States, and ships from eastern points, thousands of dollars' worth of these articles, which might with advantage be produced on the spot. The following figures of the imports of live stock and dairy and market garden produce, for the fiscal year ending March, 1912, compiled by the department of customs at Ottawa, throw interesting light on the subject:—

	Quantity.	Value.
Sheep (number)	15,661	$ 61,262
Cattle (number)	239	10,877
Horses (number)	3,526	309,151
Mutton and lamb, fresh (pounds)	192,939	12,689
Bacon and ham, shoulders and sides (pounds)	4,988,859	573,569
Pork, barreled in brine (pounds)	2,850	269
Dried or smoked meats and meats preserved in any other way than salted or pickled (pounds)	18,604	3,216
Other meats, fresh (pounds)	696,788	68,661
Other meats, salted (pounds)	92,709	9,601
Eggs (dozen)	1,596,482	314,141
Cheese (pounds)	14,565	1,996
Potatoes (bushels)	18,722	28,092
Vegetables	......	76,232

From Other Sources.

The following facts have been obtained from reliable sources:—

	Quantity.	Value.
Butter receipts at Winnipeg from Eastern Canada and United States for calendar year 1912: 68 cars (pounds)	2,000,000	$560,000
Dressed poultry receipts at Winnipeg from Eastern Canada and United States for calendar year 1912: 54 cars (pounds)	1,620,000	243,000
In 1912 Winnipeg creamery companies imported milk and cream from St. Paul and Minneapolis alone, worth	......	102,000

An important event in Winnipeg this year, the Canada Land and Apple Show, takes place on October 10-18. The land show, which will provide opportunity for complete displays of the produce of the land, orchards, forests, mines and waters of the Dominion, is being held with the object of directing attention to Canada, and providing the prospective settler, fruitgrower, home-seeker, business man, and investor, with complete and authentic information regarding all sections of the west.

Proof Furnished by Results.

This country has now been demonstrated as suitable for all branches of mixed farming, writes Mr. F. Maclure Sclanders, board of trade commissioner at Saskatoon, and those western points which have already taken it up are the most prosperous to-day. The mere grain grower is now recognizing the foregoing fact. He begins to realize that, like all other business men, he also must work twelve months of the year, instead of six or seven. Mixed farmers all over this West have done splendidly. They owe nothing, or practically nothing—a fact which banks and merchants at mixed farming points will duly confirm.

Experience has shown conclusively that Macleod, Alberta, farmers can raise sheep, hogs, poultry, potatoes, onions, cabbage, celery, asparagus, turnips, carrots, beets, parsnips and other products. They can also raise the best cattle and produce eggs and butter in enormous quantities. The market is here, and now that the settlers have commenced to realize that there is money in mixed farming and that it is one of the best insurances that can be taken out to guard against loss, there is no doubt that before long the Macleod district will be noted more for its mixed farming than anything else. In former years large amounts of money was sent outside for dairy and poultry products, but in future much of this will be kept at home, as the men who before were inclined to be dilatory realize that there are as profitable crops as wheat, is Mr. N. C. Moffat's, industrial commissioner at Macleod, Alberta, statement.

◆

CANADIAN NORTHERN TO COAST SOON.

The new Canadian Northern line from Quebec, via Montreal and Ottawa, to Port Arthur, will be ready for traffic by the time navigation closes this year. This will take the completed road through to the summit of the Rockies in British Columbia. The railway thence to Vancouver will probably be completed two or three months later.

WHAT ONE CENT MEANS TO COBALT.

Fluctuations of Silver Prices Are Closely Watched in Northern Ontario.

The rise of one cent in the yearly average price of silver means an additional income to the shipping mines of Cobalt of about $300,000. The average price of silver during 1912 was 7.5 cents above the average of 1911. That raised the income of Cobalt last year by $2,250,000. If we assume that the cost of production last year was the same as for the preceeding year, Mr. A. A. Cole, mining engineer of the Ontario Government railway, is generous enough to think that the large increase in income as a result of higher prices will become directly available for increased dividends early in 1913.

When the final returns for Cobalt are received, they will probably show a decline of 1,000,000 ounces in production for 1912 compared with the previous year. Here again the increased value of silver acts as an important factor, as the total value of the 1912 production will likely show an increase of about $2,000,000.

World's Third Silver Producer

Canada has good reason to evince a lively interest in the silver market, as it continues to occupy third place in the list of world's silver producers, Mexico and the United States coming first and second, respectively, as the following table shows:—

	1911. Fine ounces.	1912. Fine ounces.
Mexico	79,032,440	76,500,000
United States	60,399,400	62,369,903
Canada	32,740,748	35,250,000
Australasia	16,578,421	17,950,000
Other countries	36,621,835	37,500,000
	225,372,844	229,569,903

London is the chief silver market of the world and is the base of prices. Much of the silver bullion shipped from Cobalt now goes direct to London. Recently there has been a decided reaction in the price of bar silver in London. One of the chief causes of this is said to be the fact that the Indian Government is not likely again to be an early buyer of silver for coinage into rupees. An opinion to this effect is expressed by Messrs. Samuel Montagu and Company, the brokers who were employed by the Indian Government last year to make large purchases of the metal for the mint. The firm appears to base its opinion upon the state of the Indian currency reserve, which has recently been reflecting an increase in silver holdings.

Silver Prices Low.

The firm refers to the recent sales of silver at prices which were the lowest since April 5 last and adds:—

"The cause of this must be deep-set, for on some days business has been almost microscopic, and neither China nor any other quarter has been oppressing the market. Although June is described as a marriage month, the Indian bazaars have been but poor buyers; in the last day or so they have offered for sale substantial amounts of silver for forward delivery. The fact is that Indian speculators, who trade almost exclusively with borrowed money, have not found it very easy to carry forward their commitments in India, and have, therefore, put more pressure upon this market than it has been willing to bear.

"American and Mexican sales have been less than usual, partially accounted for by a demand from the Mexican Government for coinage, doubtless to replace coin exported to this country last year. It is, therefore, the more remarkable that pronounced weakness has been felt, and suggests that the action of speculators has, as it were, undermined public confidence."

Market Wants Support.

Messrs. Pixley and Abell, of London, also think that it will require some substantial support and a material reduction in London stocks to make a healthy market. They estimate the silver stocks in London at not less than £4,000,000. The total stocks of London, Bombay and Shanghai are placed at around £9,400,000. Messrs. Mocatta and Goldsmid say: "In view of the cheapness of money in Bombay, as compared to London, the inactivity of the bazaars is very disappointing, but the heavy stocks held by speculators, the not altogether satisfactory monsoon reports, and the currency returns, showing an increased stock of rupees, are all factors which may have helped to keep buyers out of the market."

How the Price Has Changed.

The silver market throughout 1912 was strong, and advancing, with occasional slight reactions only. The average monthly prices in New York are shown below:—

Month.	1910.	1911.	1912.
January	52,375	53,795	56,260
February	51,534	52,222	59,043
March	51,454	52,745	58,375
April	53,221	53,325	59,207

Month	1910.	1911.	1912.
May	53,870	53,308	60,880
June	53,462	53,043	61,290
July	54,150	52,630	60,654
August	52,912	52,171	61,606
September	53,295	52,440	63,078
October	55,490	53,340	63,471
November	55,635	55,719	62,792
December	54,428	54,905	63,365
Year	53,486	53,304	60,835

Silver Production This Year.

The production of silver in Ontario for the first three months of 1913 was nearly equal to that of the corresponding period of 1912, being only 174,485 ounces less, the total was 7,264,559 ounces valued at $4,040,450. Of that total, the mines of Cobalt proper furnished 7,253,595 ounces; South Lorrain is credited with 198,381 ounces; Gowganda with 54,350 ounces, and from gold bullion there were extracted 10,964 ounces. Shipments amounted to 7,053 tons ore, 2,130 tons concentrates, and 1,926,160 ounces of bullion. There were recovered by silver refineries in Ontario 2,754,292 ounces.

◆

ESSAYS ON TAXATION.

This book, first published in 1895, was so well received that several new editions have been prepared at almost regular intervals since that year. The present edition, however, has added so extensively to the previous work that it may be regarded as a substantially new work.

Professor Seligman, eminent authority on taxation that he is, treats thoroughly and comprehensively with his subject, in such a way that the book should appeal to both student and layman. The course of taxation is fully dealt with from its initial development to its recent reforms and present tend. And still further, considerable space is well taken up with the recent literature and American reports on taxation. A well arranged index gives ready reference to both subject matter and source of quotation. This publication promises to take one of the foremost places on the shelves of economical and taxational writings. Essays in Taxation, by Edwin R. A. Seligman, McVickar Professor of Political Economy at Columbia University, eighth edition, completely revised and enlarged by The MacMillan Company of Canada, publishers, Toronto.

◆

STEEL COMPANY TO BUILD AT FORT WILLIAM.

The Steel Company of Canada will build a branch plant at Fort William, Ontario, at an estimated cost of $250,000 to $300,000. This factory, which will be modern in every particular and of the best possible construction will at first consist of buildings for the production of wire and wire nails. Messrs. Prack and Perrine, architects, of Pittsburg, Pennsylvania, and Hamilton, Ontario, have the contract for the construction of the plant.

The Steel Company of Canada is making good progress. As is generally known, it absorbed not many years ago the Canada Bolt and Nut Company, the Canada Screw Company, the Dominion Wire Manufacturing Company, the Hamilton Steel and Iron Company, and the Montreal Rolling Mills. Its capital is as follows:—

	Authorized.	Issued.
Common stock	$15,000,000	$11,500,000
Preferred stock	10,000,000	6,496,300
Bonds	10,000,000	8,000,000

Mr. C. S. Wilcox is the president of the company; Mr. C. A. Birge, vice-president; Mr. R. Hobson, general manager; and Mr. H. H. Champ, secretary-treasurer.

◆

IMPROVING THE INTERCOLONIAL.

Mr. F. P. Gutelius, general manager of the Dominion Government railway systems, who has returned from a trip over the Intercolonial in company with the minister of railways and canals, says that engineers are examining the road with a view of reducing grades to 6-10 of 1 per cent. maximum. This will involve some reconstruction as well as relocation. For example, some 20 miles from Point Tupper to Sydney, N.S., will have to be rebuilt. Then there will have to be a big change between Truro and Amherst, Nova Scotia, that section including the Foleigh mountain division.

"The 6-10ths maximum grade both ways will be adhered to," says Mr. Gutelius, "and completed at the rate of 100 miles each season on the government railway between this city and St. John and Halifax."

Double tracking of the Intercolonial will be done as the requirements of the system demand. A new terminal is to be built at Halifax, contract will shortly be let for construction of a new line five miles long around the city to the new terminal site where a great sea wall and five shipping piers will be built.

HOW TIGHT MONEY HAS AFFECTED SOME CITIES.

Normal Conditions in the East—Real Estate Sales and Building Are Less.

Money conditions at St. John, New Brunswick, are about the same as in any other part of Eastern Canada, is the statement of Mr. H. T. Hoag, secretary St. John board of trade. The banks are loaning sufficient to carry on legitimate business enterprises, and with but few exceptions have not made any calls upon their customers. There has been no borrowing of money for stock promotions of any kind, or for real estate speculating, so for that reason tight money means very little change in the situation here. It is true it is difficult to get new advances from the bank, but there is nothing to indicate that this condition is in any way interfering with general business. Wholesalers and manufacturers report the volume of business good, and the commercial paper is well met.

Sydney naturally feels the present financial depression in connection with any matters involving the interesting of outside capital. On the other hand, local conditions are regarded as average for this season of the year, writes the secretary of Sydney board of trade.

Generally speaking, collections are free and in some quarters very favorable comparisons with previous years are made. For such conditions Sydney is largely dependent on several large industrial concerns, such as the Dominion Iron and Steel Company, Limited; the Dominion Coal Company, and the Nova Scotia Steel and Coal Company. These leaders in the field of activity are employing more men each year and together with the small industries are paying out yearly approximately $18,000,000 in wages among 80,000, within a 15-mile radius.

Buildings and Bank Clearings.

Brandon's industrial commissioner says the money stringency is not severely felt there. Its chief effect is to restrict building operations and slightly reduce bank clearings.

The much-talked-of money tightness does not seem to be affecting Moose Jaw to any extent. The city is carrying out its programme of civic improvement and building is fairly active, and there are new buildings under consideration, states Mr. R. Patton, secretary of Moose Jaw board of trade.

In comparison with some of the other towns and cities surrounding it, Macleod has no real reason to complain. The money market has been tight, but at the same time the tightness has not been felt to any great extent, is Industrial Commissioner Moffat's statement.

Cash Basis of Trading.

Trade conditions are buoyant in the city of Ottawa, says Mr. H. W. Baker, industrial commissioner. Manufacturers and wholesalers are generally behind in orders and a big demand continues for all classes of labor.

Money is somewhat easier, though still tight, but available for strictly legitimate business.

Money is said to be tight, and many farmers are inclined to find fault with the banks for this, writes Secretary Jones of the High River board of trade. From what can be seen, it is not that it is tight at present, but that it was too "loose" before. In approaching his banker now for money a farmer has to show what particular purpose it is for, how long it will be required, and exactly how he will pay it back. If he can satisfy the bank on these points and has a clean record, he has not much trouble to get accommodation.

Owing to the system of taxation being changed suddenly, the municipality has had and is having difficulty in financing. They propose making a business tax this year based on the rent of buildings, to help out the assessment. Some public works have also been undertaken, and up to the present the council have been unable to sell the bonds, making things that much more difficult. It is a fact that if one-half or less of the amount of money that has gone out of the town in a year for investment in real estate in the cities, was kept here and invested in the bonds of the town, it would be enough to take up the $125,000 issue.

At High River the retail stores have gone on to a cash basis, as it has not been profitable for them to allow farmers credit on the supposition that they will pay after harvest, and although for the first five months the volume of their trade has been less than other years, their paper to wholesalers is being well looked after.

General business is good in Edmonton district. The financial stringency has been felt chiefly in the way of tightening up of money for real estate operations, states Industrial Commissioner Hall. In spite of an obvious falling off in real estate transactions, Edmonton bank clearings show a general increase. There is much building going forward in Edmonton. Two thousand four hundred dwelling houses were built in 1912 and permits for 769 of this type of building have been taken out for 1913 to June.

CANADIAN PACIFIC STOCK

Further Decline in Price—Sir Thomas Shaughnessy Says No New Issue

Canadian Pacific stock made another effort this week to get down to the 200 level predicted for it by Sir Rodolphe Forget. On Wednesday it broke over 4 points on the Toronto Exchange, while at Montreal it showed an abrupt drop of 2¼ in the initial trading on the same day, following the early weakness of the stock in London, and declined steadily with the New York market to 208¾, rallying only ½ before the close of the morning session. On the New York rally in the afternoon, the slight recovery of the late morning was resumed to 210½, and the loss, which at one time had extended to 5¼, was reduced to 3¾. The selling was heavy in London, which marketed about 10,000 shares.

No Stock Issue.

General market conditions are ascribed as the reason for the break, together with the revived rumor of a new stock issue of Canadian Pacific Railway. Sir Thomas Shaughnessy, president of the road, squelched this with the issue of the following statement:—

"The Canadian Pacific Railway is comfortably off for cash, being placed so especially by the recent $105,000,000 common stock issue. No additional issue of common stock is imminent."

The government has before it an application from the company for power to increase its authorized capital stock, which had all been issued, by $60,000,000. This application was put in by the company last August, and has not been considered by the government, as the company found at its annual meeting this year it could secure the money it needed by an issue of common stock in lieu of debenture stock. It issued $60,000,000 which brought it the $105,000,000 referred to in Sir Thomas' statement above.

Would Not Be Attractive.

Aside from this statement, the opinion is expressed in Montreal circles that a new issue of Canadian Pacific Railway stock at the present time would be very inopportune, and that Sir Thomas Shaughnessy and the directors of the Canadian Pacific are far too keen financiers to make any attempt to put out an issue under present circumstances. It will be recalled that not long since Sir Thomas stated that the company was fully financed for some time to come. Why the Canadian Pacific Railway should give money away, on the one hand, in this manner, and then appeal to its shareholders for new subscriptions under the present unfavorable money conditions, would be difficult to say.

When the last stock issue was made, the shares were selling on the open market at around 260 or 270, or possibly, even, 280, so that it was a comparatively easy matter to make an issue at 175 a share. The situation has entirely altered. The stock is now selling below 210. The premium over $175—which was the price at which the last issue was made, and, below which this, presumably, would not be made—would not be specially attractive. Even such a strong organization as the Canadian Pacific Railway would in all probability have their work cut out to prevent the offering falling flat on the world's markets.

Stock Issues and Price Record.

The capital stock position of the company is as follows:—

Total outstanding June 30th, 1911......	$180,000,000
Allotted January 2nd, 1912	18,000,000
Allotted January 2nd, 1913	60,000,000
	$258,000,000

The 1912 stock was issued at 150, and this year's at 175.

The following is a record of the high and low price of the stock on the Toronto Exchange since 1903:—

Year.	High.	Low.
1903	138⅛	116
1904	135⅛	110
1905	176⅜	131
1906	199¼	156
1907	193	140
1908	180	141¼
1909	188¼	166
1910	201¼	178
1911	244⅞	196¾
1912	281½	227½

Speculators and Canada.

A New York despatch says:—"Apparently Canadian Pacific has assumed the position of the leading speculative and investment stock of the whole world. At least it probably now has the widest and most active market. Immense amounts of it are held in Europe, and especially in England and Germany. The latest figures show that holdings in this country and in Canada have increased. Since American speculators burnt their fingers in Canadian Pacific when it rose from 195 because they refused to believe that the Britishers would not sell out, it has been left rather severely alone, and has been held to be exclusively a foreign specialty. But if this opinion is still adhered to the tremendous market in it in Wall Street during the past few weeks becomes a good deal of a mystery.

"Since the beginning of June over half a million shares of Canadian Pacific have been traded in, representing a turnover of $100,000,000 worth of the stock. Of this total 450,000 shares were dealt in, roughly speaking, within a range of ten points, or between 220 and 210. At the moment, therefore, it would seem as if the big active speculators on both sides of the Atlantic were centring their attention upon Canada."

◆

PERSONAL NOTES

Mr. C. A. Kirk, of Fredericton, N.B., has been transferred to Regina as manager of the Bank of British North America at Regina, Mr. G. A. C. Weir, now at Regina, being transferred to Winnipeg.

Mr. Herbert C. Cox, president of the Imperial Life Assurance Company; Mr. J. F. Weston, managing director, and Dr. J. Davidson, chief medical examiner, and a director, are inspecting the company's agencies in Western Canada.

Mr. C. R. Burt, of Rockford, Ill., has been appointed factory manager of the Russell Motor Car Company in succession to Mr. MacDonall who recently resigned. Mr. Burt brings to the company a complete experience in machine shop practice. He was for nine years with Messrs. Brown and Sharpe, machine tool manufacturers of Providence, R.I. He was with them as foreman of their tool room; then of their gear department, and their general assembling. He visited Europe on their behalf to investigate comparative methods of manufacture in Europe and America. For the past eight years he has been general superintendent of the Barber-Coleman Company plant at Rockford, Ill., manufacturing textile machinery; automobile machinery and parts. Mr. Burt will move to Toronto to take up his new duties in August.

Mr. George B. Gerrard, first agent of the Bank of Montreal in San Francisco, has been appointed manager at Montreal in succession to the late Arthur P. Hazen. Mr. Gerrard, who was for four years in the North of Scotland Bank, entered the service of the Bank of British North America in 1882, and after a short term in the general manager's office, at Montreal, was stationed at the Quebec and St. John branches and at the New York agency. Between the years 1897 and 1910 he was manager successively at Kaslo, B.C., Winnipeg and London, Ontario. In December, 1910, he was appointed first agent of the bank in San Francisco. Mr. Gerrard will likely take up his new duties early in August, and in the meantime, the Montreal branch will continue under the charge of Mr. O. R. Rowley, chief inspector of the bank.

◆

FIRST JULY CANADIAN ISSUE ABROAD

The British North American Tobacco Company issued fifty thousand additional five-dollar shares in London this week at twenty-one shillings.

◆

THETFORD MINES BONDS UNSOLD.

Thetford Mines, Quebec, still has on its hands $12,000 5 per cent. market place debentures maturing in 1933. The city gave an option on this block to Messrs. Russell E. Popham and Company, Montreal, which they did not exercise. The population of the city is 7,000. The assessed value of taxable property is $2,327,000, assessed value of exempt property $9,000,000, total debenture debt $312,000, value of waterworks $229,000, and the annual revenue from same $43,000.

◆

KOOTENAY CENTRAL LINE.

A section of the Kootenay Central line between Golden and Similkameen, one of the subsidiary lines of the C.P.R., has been completed, and a train service inaugurated, a tri-weekly schedule being operated. There remains a gap of about a hundred miles between the two completed sections of the Kootenay Central. A section from Colville, the junction point on the Crow's Nest branch, of 23 miles, has been in operation some time. When the intervening section is finished the C.P.R. will have a new north and south route between Crow's Nest to the main line.

LONDON AND LANCASHIRE LIFE

AND GENERAL ASSURANCE ASSOCIATION, LIMITED

OF LONDON, ENGLAND

Head Office for Canada: COMPANY'S BUILDING, MONTREAL

The Fiftieth Annual Meeting was held on the 20th May, 1913.

Progress of Life Department

2014 NEW POLICIES were issued during the year 1912 being a large increase over previous years.
THE TOTAL INCOME amounted to $2,866,750.00
AMOUNT PAID for Death Claims during the year, including Bonus additions was $969,280.00.
AMOUNT PAID for Endowment Policies maturing in the year, including Bonus additions was $514,220.00.
After payment of all outgoings the **LIFE AND ANNUITY FUND** showed an increase of $654,960.00 and stood at $18,347,625.00 as at 31st December, 1912.

Life Premium Income for 20 Years

1892	$ 877,425.00
1897	$1,158,755.00
1902	$1,373,930.00
1907	$1,600,250.00
*1912	$2,081,895.00

*including figures of the Scottish Metropolitan

LIFE ASSURANCE OF EVERY DESCRIPTION

Low Rates **Simple Conditions** **World-Wide Policies**

The Right Honorable Lord Strathcona and Mount Royal, Chairman Canadian Board

W. ÆNEAS MACKAY,
General Manager, London, England

ALEX BISSETT,
Manager for Canada, Montreal

LONDON AND LANCASHIRE LIFE AND GENERAL ASSURANCE ASSOCIATION.

To-day, seven British companies are transacting life insurance in Canada, and with one exception, the London and Lancashire Life last year took a greater amount in Canadian premiums than any of the other British companies. During 1912, this corporation enjoyed a successful year's business. New life insurance amounted to $5,477,545, of which a goodly proportion came from the Canadian field. The figures quoted show an increase of practically 1½ millions over the total of new business recorded in 1911. The new annual premium income was $182,865 against $156,833 in 1911. The total net life premium income was $2,081,895, an increase over that for 1911 of over $400,000. Claims by death, with bonus additions, amounted to $969,280, and were well within the expectancy; while matured endowments with bonus additions represented $514,220. After payment of all outgoings, the life and annuity fund showed an increase of $654,960, thus raising it to an aggregate of $18,347,625. The total assets of the company now exceed $20,000,000. The London and Lancashire Life have acquired the business of the Scottish Metropolitan Assurance Company, Limited, through the purchase of the share capital, so that in comparison with 1911 an addition of some $5,500,000 has been made to the assets.

The Canadian business of the company is managed by Mr. Alex. Bissett, who has been associated with the corporation for thirty years. He is a well-known and progressive underwriter. The company's Canadian business last year may be summarized as follows:—

Premiums for year	$ 454,495
Number of policies new and taken up	854
Amount of policies new and taken up	2,291,353
Number of policies in force at date	7,408
Net amount in force	14,005,127
Number of policies become claims	130
Net amount of policies become claims	229,252
Claims paid (including matured endowments)	210,010

The total assets in Canada of the London and Lancashire Life are $5,316,498, of which loans on real estate account for $1,663,042, and bonds and debentures, $2,824,991.

GATHER TO GUARD MUNICIPAL CREDIT.

The following statement was handed to the Canadian Associated Press by a high financial authority in London having intimate connections with Canada.

"It is now obvious, to those in a position to judge, that the recent attack by Horne-Payne (British fiscal agent for the Canadian Northern Railway) on Canadian municipal credit in London has been mischievous to a degree. Each day is affording fresh evidence of the evil results of his wanton warning. There is nothing more sensitive than credit, and it was surely as unjustifiable for Horne-Payne to issue his pronouncement as it would be to cry 'Fire!' amid a church congregation because the chimney was smoking.

"Friends of Canada in London think that meetings might be called at central points in the provinces of Canada to discuss the question and see what action, if any, should be taken to protect themselves against the possible results of this uncalled-for attack."

◆

TRADE OF THE BRITISH EMPIRE.

In his first paper on the trade of the British Empire, read to the Royal Statistical Society last week, Mr. S. Rosenbaum submitted the following interesting figures:—

1. The aggregate external trade (imports and exports) of all the constituents parts of the Empire amounted in 1910 to £1,802 millions; of this, £688 millions, or 38 per cent., represented inter-Imperial trade.

2. The total imports into the Empire amounted to £956 millions, of which £612 millions, or 64 per cent., came from foreign countries.

3. The total exports from all parts of the Empire amounted to £846 millions; of this £502 millions, or 59 per cent., went to foreign countries.

4. Inter-Imperial imports are growing more rapidly than imports from foreign countries. Between 1905 and 1910 the former increased by 32 per cent., and the latter by 22 per cent.

5. On the other hand, exports to foreign countries are growing more rapidly than inter-Imperial exports. The former showed an increase of 35⅝ per cent. in the years 1905 to 1910, against 32 per cent. in the latter.

THE BRITISH CANADIAN BRICK & COAL COMPANY,

LIMITED

Incorporated under the Manitoba Joint Stock Companies Act
NO PERSONAL LIABILITY

AUTHORIZED CAPITAL - $500,000

Consisting of $200,000 7% Preferred at $10.00 Per Share with a Bonus of 25% Common; $300,000 Common at $10.00 Per Share

DIRECTORS:

J. S. DOUGLAS, Merchant, Winnipeg.
W. F. TALLMAN, Street Commissioner, Winnipeg.
A. B. WOOLDRIDGE, Gentleman, Winnipeg.
D. W. McKERCHAR, Barrister, Winnipeg.
V. A. TALBOT, Real Estate Broker, Winnipeg.

The above Company has purchased from the Excelsior Coal and Brick Company, Limited, their whole plant as a going concern, the purchase price to be taken in shares of the new Company, and it is the intention of the Directors to equip the plant to make it one of the largest in the West.

The plant is situate in that rich tract of mineral-producing country surrounding Estevan, and is near the town. It comprises 640 acres of the best clay and coal to be found anywhere.

The shaft of the coal mine has been sunk to a depth of seventy feet to reach a seam of the best lignite coal, and there are enough entries and passages to enable an output, at slight expense, of 200 tons of coal per day. Other mines in the district are producing less and making considerable profit. A conservative estimate of the profit on each ton is $1.00, but from Government borings near the property it has been shown that there is a seam of coal 650 feet from the surface which is similar to the Lethbridge coal, and which could be sold f.o.b. the mine for at least $5.00 per ton, netting the Company $3.50 per ton. It is to reach this seam and further equip the brick plant that the issue of stock has been made.

There is a constant and ever-increasing demand for brick. At the present moment the price for common brick all over the West is from $12.50—$13.00 per thousand. The clay on our property is of the finest, and makes a brick second to none. We can make bricks for about $4.00 per thousand, so that the profit on the product is considerable. It is the intention of the Company to increase the present brick plant to allow of an output of from 75,000—100,000 common bricks per day, and at least 25,000 pressed bricks, which retail at $25.00 per thousand and cost about $7.00 to produce.

Under the coal there is a strata of fireclay, which is extremely scarce in Canada, and commands a high price. It is intended to install a machine for the making of fire brick, which is being almost entirely brought from the States and Scotland; also to manufacture sewer pipes and hollow tiles. Firebrick and hollow tiles command the high price of $40.00 per thousand, and we can make them for less than $8.00.

Coal and brick run in conjunction is probably the finest profit-making combination known. It has been proven over and over again that with competent management such a proposition is a success from the first.

The directors have insured the success of the new Company by engaging the services of one of the most expert brick men in the West, who will supervise the laying out and working of the new plant.

It is with unbounded faith in the future of this western country that the directors have decided on offering to the public a share in its development and wealth. The man who invests in this proposition makes a twofold investment. He invests and aids in the development of his country and at the same time puts his capital to profitable use.

For further information, write for a prospectus to the Sales Agents.

Life and Annuity Funds	26,298,045
Endowment and Capital Redemption Fund	510,445
Employers' Liability and Accident Funds	301,790
Staff Funds	790,360
Investment Reserve Fund	179,875
Profit and Loss Balance	913,965
	$39,605,640

$5 taken as equivalent of £1 sterling.

HEAD OFFICE FOR CANADA .... MONTREAL
ROBERT W. TYRE, Manager

CANADIAN FORESTRY ASSOCIATION.

Conservation Receiving Publicity—Manitoba's Natural Wealth—Work That Must be Done in Ontario.

At the Canadian Forestry Association convention, held in Winnipeg, the president, Hon. W. A. Charlton, reviewed the developments of forestry from the earliest times in America, and gave an outline of Canada's existing forest resources. "About thirty years ago a few men began to look into the future," remarked Mr. Charlton, "and could foresee great changes which were coming, and that preservation of the forests would soon become a necessity."

In the year 1900 came the Canadian Forestry Association, and in tracing its growth Mr. Charlton paid a high tribute to the members of the forestry branch, who had been instrumental in assisting the work of the association, and to all other far-seeing men who have advanced its interests.

A little over thirteen years ago the then minister of the interior, Hon. Clifford Sifton, asked for a vote of $15,000 to start a forestry branch to look after the forests owned by the Dominion. The proposal was met by opposition, but finally passed.

This year the appropriation for that purpose by the Dominion Government is $541,000. Last year there was expended in Canada a total of $1,500,000 for the protection of timber. Scarcely anything regarding conservation appeared in the press in 1900; now nearly every newspaper or magazine contains something on the subject.

Mr. R. H. Campbell, director of forestry, in a paper on "Manitoba: A Forest Province," said in part:—"The wealth of a nation may be in the character, the ability, the energy, the resource of its people, but the material basis of wealth is found in the natural resources of the country. Without such a material basis the ability of the people has but little on which to exercise itself, and indeed the character of the people is demonstrated to a large degree by their use or misuse of the natural resources. An inquiry into the extent and condition of the natural resources of the province of Manitoba is therefore one of great interest.

"On the line of the Hudson Bay Railway there is a large area of clay land which should be valuable for agricultural purposes. The area of such land has not been closely determined, as the examinations made were of a general nature, but the clay is of sufficient depth and the vegetation is of the same character as in more southern parts of the province, indicating that the possibilities of agricultural development are good. The more northern latitude gives longer hours of daylight in the summer, and this makes a shorter growing season necessary and quicker maturity of crops. In 1910, when the inspection was made by this department, there was no frost between June 8 and September 11. The chief difficulty in present conditions is excess of moisture in the soil."

Reforesting Southern Ontario

Mr. E. J. Zavitz, forester for Ontario, warned against the destruction of trees, especially in southern Ontario. He said in part: "The reclamation and reforesting of the larger waste areas in southern Ontario will have to be undertaken by such large corporations as the state or municipality. It cannot be left to the initiative of the private individual. We hope that the Norfolk Forest Station will prove the value and necessity of undertaking this work.

"Southern Ontario has over 200 square miles of this unproductive light sand formation which originally produced valuable pine and hardwood.

"This land must some day be made productive, and a policy of reforesting has many arguments in its favor. It will pay as a financial investment, assist in insuring a wood supply, protect the headwaters of streams, provide breeding ground for wild game, furnish object lessons in forestry, and prevent citizens from developing under conditions which can end only in failure."

Mr. E. A. Stirling, forest engineer, of Philadelphia, director of the American Forestry Association, addressed the convention on the American Forestry Association and forestry progress in the United States.

W. WEDD, JR., Secretary. V. B. WADSWORTH, Manager

EDMONTON'S TRADE IS GROWING

Comparative Figures Show Increases—Stringency Affects Building Returns—Customs Collections

(Special Correspondence.)

Edmonton, Alta, July 7th.

While Edmonton is certainly feeling the effects of the world-wide financial conditions, and the difficulty in obtaining capital has checked development to some extent, particularly in regard to building operations, the general business situation, as indicated bv available statistics for June, would appear to be thoroughly sound, and practically all lines of commercial and industrial activity are showing marked expansion as compared with last year. The following comparative statistics for the month of June and for the six months ending June 30th, are of interest:—

	For the month	
	June 1912	June 1913
Bank clearings	$17,135,856	$18,859,991
Customs returns	131,398	179,405
Building permits	2,567,235	1,428,650
Street Railway passengers .	965,515	1,328,843
Street Railway revenue	$39,380	$54,488

	For half-year ending June 30th	
	1912	1913
Bank clearings	$ 100,227,845	$105,806,286
Customs returns	698,230	1,032,123
Building permits	7,555,012	6,345,405
Street Railway passengers	4,638,084	7,224,085
Street Railway revenue ..	$189,864	$293,474

Increase in Trade Returns.

Notwithstanding last year's bank clearings were undoubtedly swelled by a considerable amount of speculative investment in real estate, which has now been practically eliminated, it will be noticed that bank clearings show an increase over last year. This is evidence that there has been an increase in the volume of commercial business, the expansion of which has more than replaced the shrinkage in real estate speculation. This view is corroborated by statements made by the heads of the larger commercial enterprises. One of Edmonton's largest and oldest wholesale concerns recently stated that his business for June not only showed the largest volume of trade, but also showed the heaviest collections of any month since the business was established.

Building Homes for Citizens.

It will be noticed that customs collections for the half year indicate that the business of importing houses has increased approximately 50 per cent. as compared with last year.

Building permits for the six months show a falling off, owing to the fact that several large projects have been deferred, owing to financial conditions. In the building figures for June are 140 residences, aggregating $374,050 in estimated cost.

◆

Saskatoon had no fires during the last week of June. There was one false alarm.

The Merchants' Bank has recently opened branches at Donalda, Alberta; Huntingdon, Quebec; Victoria (north end), British Columbia; and sub-agencies at Pelee Island, Ontario; Czar, Saskatchewan; Forres, Saskatchewan; that at Parksville, British Columbia, has been closed.

BRISTOL INTERNATIONAL EXHIBITION NEXT YEAR

It is proposed to hold an exhibition in Bristol from May to October next year. Copies of the prospectus and descriptive pamphlets have been forwarded by the Canadian trade commissioner of Bristol to the department of trade and commerce at Ottawa, where they may be seen by any persons who may desire to become exhibitors.

BALKAN WAR AND EDMONTON BONDS

A cable message is understood to have been received from Messrs. Kleinworths, London, who took up a ten million dollar issue of Edmonton this year, and who have already paid $5,500,000 proceeds of the debentures. They draw attention to the fact that war has been declared and the city should take proper heed. Reason for the cable is that there is a war clause in the agreement regarding sale of debentures. Under this clause the firm might seek relief from responsibility of carrying out the contract. If the company should do this it may be necessary to issue treasury notes to raise money.

BOUGHT CANADIAN PACIFIC STOCK AT FORTY

Mr. L. Zuckermandel, a member of the Berlin financial firm of Schlesinger-Tricer and Company, with his son, Walter, and F. Warschauer, of the National Bank fur Deutschland, Berlin, two institutions chiefly responsible for the participation of German investors in Canadian Pacific and other stocks, are taking a trip through western Canada, which neither has visited before.

Mr. Zuckermandel says his firm first introduced the C.P.R. stock to Berlin investors nearly 25 years ago, with profitable results since they bought in the region of 40 and 45.

AGRICULTURAL POSSIBILITIES OF THE CLAY BELT

Messrs. J. H. Grinsdale, director of experimental farms, and George H. Clark, seeds commissioner, recently arrived in Winnipeg after a long journey along the line of the National Transcontinental Railway between Abitibi and Winnipeg, studying the agricultural possibilities of the new territory that is being made available for settlement by the Grand Trunk Pacific.

The "clay belt" along the railway line commences about 150 miles west of Cochrane and extends westward as far as English River, near Grant, a divisional point on the G.T.P., a distance of over four hundred miles. The general character of the land throughout this belt is fairly uniform. The country is drained by deeply cut river beds at intervals of from twenty to twenty-five miles. Between the rivers which flow northward, the surface in general is slightly undulating, the highest points seldom rising to more than ten feet above and the lowest stretches ten feet below the level of the railway grade. West of the clay belt, between Grant and Superior Junction, the country is characterized by rocky and gravelly hills, interspersed with sandy intervals, occasional outcrops of clay and an abundance of small lakes and streams. A very small percentage of this country is suitable for agriculture.

For the purpose of record convenient for reference, each inter-river section as viewed along the Transcontinental right-of-way from a point ten miles west of Abitibi River, two hundred and seventy-five miles west to Grant, was classified as to the percentage that might be considered excellent, good, fair and inferior, from the viewpoint of the settler, the percentage being roughly determined by the relative mileage of each that was traversed along the railway line.

◆

The ratepayers of Gananoque have passed a by-law to give the electric light company a ten-year contract and a thirty-year franchise, and also carried by a large majority a by-law regarding the Gananoque and Arnprior Railway.

LEGAL NOTICE

BOVING & COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 7th day of June, 1913, incorporating Reginald Holland Parmenter, William Symon Morlock and Norman Baillie Wormwick, solicitors; Roy Beverley Whitehead and Bruce Victor McCrimmon, students-at-law; Ernest Pickles, draftsman, and James Victor Macfarlane, accountant, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To adopt and carry into effect with or without variation a certain agreement dated the second day of June, 1913, between the Canadian Boving Company, Limited, of the First Part; Jens Orton Boving, of the Second Part, and Arthur John Thomson, of the Third Part, and to issue as fully paid stock of the company in pursuance of such agreement; (b) To carry on the business of chemical, metallurgical, mining, electrical, mechanical and civil engineers and contractors for the construction, erection, alteration and repair of public and private works and undertakings and any business in which the application of electricity or any other power is or may be useful or convenient to carry on the business of treating, smelting and refining mineral ores or other substances, and for such purpose to instal all necessary plant, machinery and apparatus, and to purchase, sell and otherwise deal in ores of various kinds or other substances capable of being treated, and to buy, sell and deal in any products or by-products of such ores or substances; (c) To prospect for, open, explore, develop, work, improve, maintain and manage gold, silver, copper, coal, salt, iron and other mines, quarries, mineral and other deposits and properties, and to dig for, raise, crush, wash, smelt, roast, assay, analyze, reduce, amalgamate, make and otherwise treat coal, coke, ores, metals, clays and minerals, whether belonging to the company or not, and to render the same merchantable, and to sell and otherwise dispose of the same or any part thereof, or any interest therein; (d) To provide, purchase, lease or otherwise acquire, to construct, lay down, erect, establish, operate, maintain and carry on all necessary work, stations, engines, machinery, turbines or hydraulic apparatus, plant, cables, wires, works, lines, generators, accumulators, lamps, meters, transformers and apparatus connected with the generation, accumulation, distribution, transmission, supply, use and employment of electricity; to generate, accumulate and distribute electricity for the supply of electric light, heat and motor power and for industrial or other purposes; provided, however, that any sale, distribution or transmission of electric, hydraulic or other power or force beyond the limits of the lands of the company shall be subject to local and municipal regulations in that behalf; (e) To enter into, carry out, perform, sign and sub-let contracts for doing work and supplying materials in connection with the building of steam and electric railways, canals, telegraph and telephone lines to be used therewith, bridges and other public works, dry docks, dams, water powers, wharves, piers, viaducts and other works and undertakings, and to receive as consideration therefor the stocks or bonds of any other company; (f) To contract with any person, corporation, society, public body or municipality, or with the Government of Canada, or any province thereof, or with any other country or state, for the making, building, construction and operation of all private and public works and undertakings of every description and kind; (g) To manufacture, sell and deal in, and to act as agent for the sale of all kinds of machinery, machines, apparatus, fixtures, instruments, materials, engines, lamps, wires, motors, air-brakes, implements, and tools and all other goods, wares and merchandise of every description; (h) To apply for, obtain, register, purchase, lease or otherwise acquire, and to hold, use, own, operate and introduce, and to sell, assign, or otherwise dispose of any trade marks, trade names, patents, inventions, improvements and secret processes having relation to any of the businesses which this company is authorized to carry on, or used in connection with, or secured under letters patent of the Dominion of Canada or elsewhere, or otherwise, and to use, exercise, develop, grant licenses in respect of, or otherwise to turn to account any such trade marks, trade names, patents, licenses, secret processes and the like, or any such property or rights; (i) To purchase, lease or otherwise acquire, sell, equip, maintain and operate all such transportation facilities, whether by land or water, as may be necessary or convenient in the conduct of its operations, and to sell, lease or otherwise dispose of the same and to construct, purchase, charter, employ, own, maintain, manage, navigate, lease and sell steam or sailing vessels or other kinds of craft, lighters, floats, steam pumps, diving apparatus, cranes, plant, machinery and appurtenances; (j) To acquire and undertake the good-will, property, rights, franchises and assets of every kind, and the liabilities of any person, firm or association for one or more of the purposes for which this incorporation is formed; and to make, allot and issue in payment or exchange in whole or in part therefor, bonds or debentures of the company and common or preferred shares of the capital stock of the company as fully paid and non-assessable; (k) To pay all or any expenses incurred in connection with the formation, promotion and incorporation of the company or any other company which this company has power to promote, or in which the company is in any way interested or concerned, or to contract with any person, firm or company to pay the same, and to pay commissions to brokers and others for placing, selling or guaranteeing the subscription of any shares, bonds, debentures or securities of this company or of any other such company as aforesaid; (l) To sell or dispose of the undertaking and assets of the company hereby incorporated, or any part thereof, for such consideration as the company may think fit, including shares, debentures or securities of any other company having objects altogether or in part similar to those of the company hereby incorporated; (m) To distribute any of the property of the company hereby incorporated in specie or money among its shareholders; (n) To receive and accept bonds, debentures or other securities in payment in whole or in part for work done or materials supplied in connection with the business of the company, notwithstanding the provisions of section 44 of the said Act; (o) To make advances to customers and those having dealings with the company and to guarantee the performance of contracts by any such persons; (p) To do all such other things as may be deemed conducive to the attaining of the above objects or any of them. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Boving & Company of Canada, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 10th day of June, 1913.

THOMAS MULVEY,
Under-Secretary of State.

DIVIDENDS AND NOTICES

NOTICE RE SELECTION OF AUDITORS

Under Section 56 of the Bank Act

Notice is hereby given that the General Managers of the Chartered Banks in Canada intend to proceed at an early date to select by ballot a panel of not less than forty persons who shall be eligible, subject to the approval of the Honorable the Minister of Finance, to be appointed auditors under Section 56 of the Bank Act.

Formal applications to receive consideration will require to be made to the General Managers of the Chartered Banks of Canada, in care of the President of the Canadian Bankers' Association, Toronto, on or before the 21st day of July, 1913.

D. R. WILKIE,
President, Canadian Bankers' Association.
Toronto, July 2, 1913.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED.

Notice is hereby given that a dividend of one per cent. (1 per cent.) has been declared on the ordinary shares of the capital stock of the Mexican Light and Power Company, Limited, payable on the 15th day of July, 1913, to shareholders of record at the close of business on the 5th day of July, 1913.

That the transfer books of the company for the ordinary shares will be closed from the 7th day of July, 1913, both days inclusive.

Dividend cheques for the shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, New York; Mexico City, Mexico; London, England, and its branches.

By order of the Board.
W. E. DAVIDSON,
Secretary.
Toronto, Canada, 27th June, 1913.

RELIEVING THE TIGHT MONEY PINCH

Nearly $300,000,000 has come into Canada in the last few months through sales of municipal securities, through exports of grain, and through immigration, and despite the talk of continued stringency, the Canadian situation has been relieved to that extent since the pinch began to be felt.

This $300,000,000 estimate of the Montreal Gazette does not include sales of Canadian securities other than those by municipalities. Canadian Pacific Railway, through its new stock issue, is bringing in close to $100,000,000 of outside money, and despite the tight money market good-sized blocks of railway and industrial securities have been disposed of abroad in the first-half of the year.

Bankers estimate that close to $150,000,000 must have been realized in recent months in the sale of municipal securities alone. It is further estimated that exports of grain held at the head of the Great Lakes through the winter has loosened up funds for the Canadian banks to the extent of $100,000,000.

The tide of immigration has been flowing strongly, and it is held to be a conservative estimate that the incoming settlers have brought with them at least $50,000,000.

MEXICO TRAMWAYS COMPANY.

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾%) has been declared on the Capital Stock of the Mexico Tramways Company, payable on the 1st day of August, 1913, to shareholders of record at the close of business on the 12th day of July, 1913;

That the stock transfer books of the company will be closed from the 14th day of July to the 31st day of July, 1913, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, New York; Mexico City, Mexico; London, England, and its Branches.

The holders of Bearer Share Warrants on detaching from their Share Warrants coupon No. 17, and lodging such coupon or coupons at the Canadian Bank of Commerce, in Toronto, Montreal, New York City, or London, England, on and after the 1st day of August, 1913, will receive in exchange for each coupon the sum of $1.75, representing the amount of the dividend.

By Order of the Board,
W. E. DAVIDSON,
Secretary.
Toronto, Canada, 27th June, 1913.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.
Toronto, Ontario, May 20th, 1913.

A Manager for our Sales Department wanted – An experienced and capable man who can systematically direct Salesmen so that they will get profitable results—Initial Salary $4,000 per annum or better. Telephone for appointment.

H. H. WILLIAMS
38 King Street East
TORONTO

M. W. FLANNERY,
Treasurer.

North Bay, July 8th, 1913.

TOWN OF COLLINGWOOD DEBENTURES

Tenders are invited for the purchase of the following debentures:—

No. 1.—$30,000 Hydro-Electric Power, interest at 5% payable in 20 equal consecutive annual payments of $2,407.28 each, comprising principal and interest on December first each year. First payment December 1st, 1913, computed from December 1st, 1912.

No. 2.—$7,000 Collingwood Debenture Act, 1899, interest at 5% payable in 30 equal consecutive annual payments of $455.36, each comprising principal and interest on December first each year. First payment December 1st, 1914, and computed from December 1st, 1913.

No. 3.—$17,000 Consolidated Floating Debt, interest at 5% payable in 20 equal consecutive annual payments of $1,364.12 each, comprising principal and interest on December first each year. First payment December 1st, 1914, and computed from December 1st, 1913.

All the above guaranteed by the County of Simcoe. Tenders must be given for each parcel and successful tenderer to pay at par in Collingwood and cost of forwarding debentures.

Debenture Debt as at December 31st, 1912, exclusive of Local Improvements is $397,727.44. Tenders must be sent to undersigned not later than Tuesday, July 15th, 1913.

A. D. KNIGHT,
Town Treasurer,
Collingwood, Ont.

$1,164,706.40.

CITY OF OTTAWA, ONTARIO.

DEBENTURES FOR SALE.

Tenders addressed to "The Chairman, Board of Control," and marked "Tenders for Debentures," will be received by the City of Ottawa until 3 p.m., on Thursday the 28th August, 1913, for the purchase of $51,000 40-year debentures, $596,500 30-year debentures and $517,206.40 20-years.

They are all a liability of the city at large, and bear 4½ per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $236,000 30-year debentures, and the other for the remainder of the debentures $928,706.40.

All tenders must be on the official form. The tender for the $236,000 debentures must be accompanied with an accepted cheque for $1,000 and the tender for the $928,706 40 year debentures with an accepted cheque for $5,000.

Accrued interest from 1st July, 1913, must be paid in addition to price tendered.

The $236,000 debentures are in $1,000 denominations, principal and interest payable at Ottawa.

The remainder of the debentures will be made payable in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $236,000 debentures can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions, and official forms of tenders, can be obtained on application to the City Treasurer, Ottawa.

Sgd. J. A. ELLIS,
Mayor.

Ottawa, 4th July, 1913.

STERLING MINES SOLD

The Sterling Mines, which are situated near Arsenic Lake, Ontario, were sold by Master-in-Ordinary Alcorn at Osgoode Hall to Mr. M. B. Sullivan, of Boston, for $300,000. The mine was owned by Mr. William Marshall, who purchased it from Major R. G. Leckie.

At Galt, Ontario, a by-law to raise $15,000 for a school gymnasium was defeated.

The Canadian Pacific Railway have awarded a contract to Messrs. John S. Metcalf Company, Limited, Montreal and Chicago, constructing engineers, for work in connection with the steel river house at Elevator "D," Fort William, Ont., at an estimated cost of $45,000.

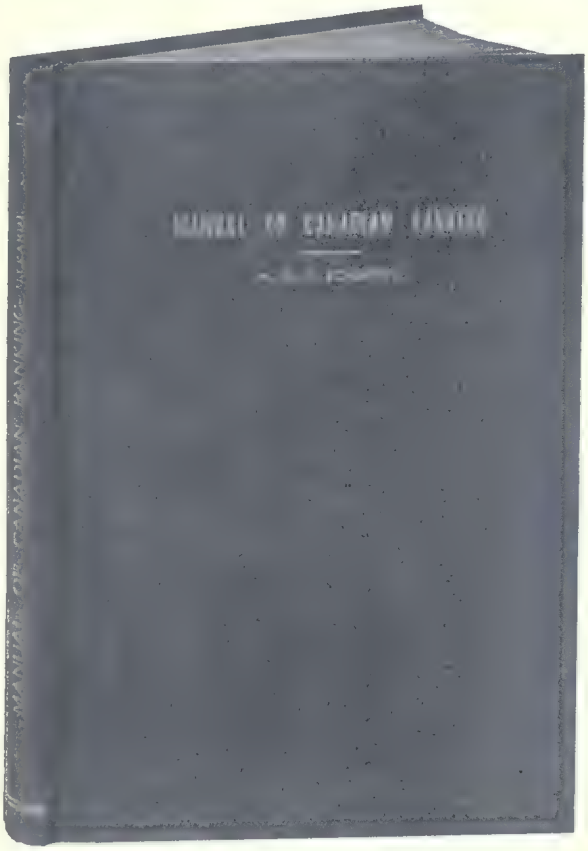
The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate.]The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

FOURTH EDITION. Ready in a few weeks

Manual of Canadian Banking

By H. M. P. ECKARDT



The New Edition of this important book covers thoroughly all the features of the Bank Act of 1912.

The Book is listed by the Canadian Bankers' Association as a recognized text book on banking practice. Chapters on Organization of a New Bank; Selection of the Junior; The Junior's Post; The Cash Book; The Discounts; Teller and Customer; The Bank's Business in Exchange; Receiving and Paying; The Accountant; The Statements; Manager of the Branch; Financing the Crops and the Mines; Relations with other Banks and with Head Office; Inspection of the Branch; Head Office; The General Manager's Department; The Board; Liquidation of Failed Banks.

Price $2.50 Postpaid

SPECIAL OFFER

While the regular price of Mr. Eckardt's Book is $2.50, we offer as a special inducement to send the Book and a year's subscription to The Monetary Times of Canada (including the Annual Review) for $4.00. This offer applies only to new subscribers and not to renewals.

ORDER FORM

To The Monetary Times,
62 Church Street, Toronto
I hereby subscribe to Special Subscription Offer, for which I enclose {Check / M.O.} for **$4.00**

BIG UNITED STATES BANK FAILS.

Differences with the Treasury Department concerning the character and value of certain assets of the former First National Bank of Pittsburg, which was merged with the Second National Bank last March, under the title of the First-Second National Bank of Pittsburg, culminated on Monday in the closing of the institution by order of the Deputy Comptroller of the Currency. The Pittsburg Clearing House Association took charge of the situation.

Preliminary reports on the condition of the bank seem to indicate that the financing of a new office building, in which the bank has its home, is connected with the difficulty. The bank's capital is $3,400,000.

The officers of the First-Second National Bank of Pittsburg are:—Messrs. W. S. Kuhn, president, and J. M. Young, William McConway and Oscar L. Telling, vice-presidents. Mr. Young is also cashier.

Mr. W. S. Kuhn is also vice-president of the American Water Works and Guarantee Company, of which Mr. J. S. Kuhn is president. The company controls water works' plants in about eighty cities and towns in the United States. The capital stock of the various controlled companies is about $73,000,000.

The First National Bank of McKeesport, Pa., also closed its doors. Mr. James S. Kuhn, a brother of W. S. Kuhn, president of the closed First-Second National Bank of Pittsburg, is also president of the McKeesport bank, whose capital was $300,000 and surplus $500,000, according to last reports of the Comptroller of the Currency.

◆

The Columbia Phonograph Company (General) has changed its name to the Columbia Gramaphone Company.

MUNICIPAL FINANCING

Saskatoon Has United States Offer—School Boards Experience Difficulty

At a special meeting of the Saskatoon city council this morning Mayor Harrison stated that he had tentatively sold $500,000 of city bonds to a prominent firm of Chicago bankers. He also had an option on $400,000 more.

City Clerk Kent, of Hamilton, states that it is time a halt was called on the issuing of debentures for any civic works but those absolutely necessary. He says that it is proposed to float a large issue in January, and thinks some of the work is not pressing, and that Hamilton's credit is likely to become affected if this sort of thing continues. Mayor Allan agrees.

Mayor Frink stated at a council meeting that the city of St. John, N.B., had authorized bond issues to the amount of $130,207 this year, and in addition had to provide for $65,000 carried over on a certificate of indebtedness from last year. Some deductions, he added, would be made. Bond issues had been authorized as follows:—Water service, $32,200; sewers, $21,300; ferry and harbors, $7,288; new street plant, $12,500; motor truck, $5,500; street paving, $51,419; and in spite of the condition of the money market an issue of $200,000 worth of bonds will have to be made.

Local Investors Have Opportunity.

Guelph's finance committee are endeavoring to dispose of the debentures they have for sale to local investors. The debentures will be issued in lots from $100 up to $1,000, so that the small savers may have an opportunity to acquire them. If the citizens appreciate the idea the whole issue of about $60,000 will be disposed of.

Transcona, Man., have not as yet disposed of its issue of $51,000 debentures. Mr. Sandford Evans, of the Royal Canadian Agencies, has been appointed financial agent for the town.

The following table shows the amount of debentures and stock of Vancouver outstanding at the different rates of interest:—

At %	General.	Local Improvement.	Total.
6	$ 320,000	....	$ 320,000
5	315,000	$ 187,100	502,100
4	18,869,851	1,897,301	20,767,152
3½	921,500	....	921,500
Total ..	$20,426,351	$2,084,401	$22,510,752

School Boards Meet Difficulties.

Moose Jaw school board will sell their debenture issue of $140,000 for the Public schools and $10,000 for the collegiate in Western Canada. Owing to the stringency in the money market in Eastern Canada, the board has decided to adopt this course and the debentures will be advertised locally. The school board debentures bear 5 per cent., and will be sold in $1,000 lots at par. In all probability the life of the debentures will be made according to the desire of the investing public.

The sale of the debentures recently issued by the Protestant board of school commissioners of Montreal has not yet been completed.

A purchase of Bredenbury, Sask., school bonds was made by the Western School Supply Company of Regina.

In European Markets.

That Holland offers a splendid market for Canadian municipals is the statement of Mr. Van Wyck, special correspondent of several Dutch newspapers and a son of the president of the Utrecht Bank. He is touring Canada. "I am sure," he said, "that Toronto, Montreal and other Canadian cities, issuing large loans, could find plenty of money in Amsterdam, Rotterdam, and The Hague. These offer a better market, I should say, than does London, on account of the large number of thrifty small investors. The cities of the Netherlands have no difficulty in financing, with bonds bearing only 3 and 3½ per cent."

The following are cable quotations from London on Canadian bonds:—

British Columbia (Province), 1917, 4½ per cent., 99 to 101.

Dominion of Canada Loan, 1938, 3 per cent., 82 to 84.

Newfoundland Sterling bonds, 1941, 3⅞, and 1951, 3½ per cent., 83 to 85.

Newfoundland Sterling bonds, 1947, 3 per cent., 73 to 75.

Nova Scotia, debentures, 3½ per cent., 83 to 85.

Quebec (Province), (Issued in Paris), 1919, 4½ per cent., 99 to 101.

Quebec (Province), Sterling bonds, 1928, 4 per cent., 95 to 97.

Saskatchewan bonds, 4 per cent., 93 to 95.

Ontario registered stock, 1946, 3½ per cent., 78 to 80.

Calgary debentures, 1930-42, 4 per cent., 91 to 93.

Quebec City, 1923, 4 per cent., 95 to 97.

Ottawa, 1926-46, 4 per cent., 91 to 93.

Quebec City, 1914-18, 4½ per cent., 99 to 101.

Saskatoon, 1938, 5 per cent., 99 to 101.

Toronto, 1919-20, 5 per cent., 100 to 102.

Toronto, 1921-28, 4 per cent., 93 to 95.

Toronto local bonds, 1913, 94 to 96.

Toronto, 1929, 3½ per cent., 85 to 87.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Galt, Ont.—A waterworks by-law to raise $70,000, and one for storm drainage was carried.

Lloydminster, Sask.—Until July 14th for $5,000 6 per cent. debentures. H. C. Lisle, secretary-treasurer.

Halifax, N.S.—Tenders will be received up to July 28th for debentures totalling $299,750. W. L. Brown, city treasurer.

Milestone, Sask.—Tenders are desired for $5,000 6 per cent. 20 instalment debentures. A. W. Garnet, secretary-treasurer.

Rivers, Man.—Up to July 15th for $20,000 6 per cent. twenty instalment public work debentures. C. Howard, secretary-treasurer, Rivers.

Welland County, Ont.—Until July 15th for $100,000 4½ per cent. 30-year highway improvement debentures. R. Cooper, county clerk, Welland, Ont.

Lumsden, R.M., No. 189.—Up to July 21st for $12,000 6 per cent. 20-year local improvement debentures. (Official advertisement appears on another page).

Collingwood, Ont.—Up to July 15th for $54,000 debentures. A. D. Knight, town treasurer, Collingwood. (Official advertisement appears on another page).

North Bay, Ont.—Up to August 4th, 1913, for $321,500 debentures. M. W. Flannery, treasurer, North Bay. (Official advertisement appears on another page).

Ottawa, Ont.—Up to August 28th for $1,164,706 debentures. Tenders to be addressed Chairman, Board of Control. (Official advertisement appears on another page).

Calgary S.D.—Until July 15th for $750,000 5 per cent. 40 instalments school debentures. A. T. Jewett, secretary-treasurer. (Official advertisement appears on another page.)

Snipe Lake Rural Municipality No. 259, Sask.—Until July 14th for $5,000 6 per cent. 20-year road construction debentures. Maitland Barkwell, secretary-treasurer, Richlea P.O.

Parry Sound, Ont.—Up to July 15th for $25,000 5 per cent. 20 instalments, $25,000 5 per cent. 30 instalments. E. E. Armstrong, clerk. (Official advertisement appears on another page).

Goose Lake, (Roblin), S.D., No. 1283, Man.—Up to July 20th for $5,500 6 per cent. 20 instalment debentures. C. Bryden, secretary-treasurer, Roblin. (Official advertisement appears on another page).

DEBENTURES AWARDED

Brandon, Man.—$214,926, to Imperial Bank.

Windsor, Ont.—$123,000 5 per cent., to Mr. E. I. Scully, Windsor.

Pense, R.M., Sask.—$5,000, to Messrs. Nay and James, Regina.

St. Agnes R.C., S.D.—$20,000 to Messrs. Nay and James, Regina.

Graton, R.C., S.D.—$30,000, to Messrs. Nay and James, Regina.

Grey S.D., Man.—$7,000 6 per cent. 14 years, to Messrs. H. O'Hara and Company, Winnipeg.

Rudy R.M., Sask.—$10,000 6 per cent. 20 years, to Messrs. H. O'Hara and Company, Winnipeg.

Whitemouth S.D., Man.—$5,000 6 per 20 years, to Messrs. H. O'Hara and Company, Winnipeg.

Amherst, N.S.—$75,000 5 per cent. 30 years, to Messrs. J. C. Mackintosh Company, and F. B. McCurdy and Company, Halifax.

BANK ACT MACHINERY

The new bank act has been in operation nineteen days, but its machinery is not yet perfect. The first monthly statement of the banks to the government, on the revised form, will be made for the month of July, and published about mid-August. Mr. Wilkie, president of the Canadian Bankers' Association, has given notice that the association will meet next month to elect a panel of qualified auditors from amongst whom shareholders may elect an auditor for the examination of the affairs of the bank in which they are interested. This is according to the new bank act, and is, as is known, to meet the public demand for external bank examination.

Another feature of the bank act for which machinery is being provided is the establishment of the central gold reserve, a fund intended to create a greater elasticity of currency. Four trustees are to be named to have charge of the central gold reserves. Three of them will be selected by the Canadian Bankers' Association, with the approval of the Minister of Finance, and the fourth by the Minister himself. With these trustees a bank may deposit current gold and Dominion notes, or either, and obtain an equivalent count in currency. As long as the sum of the bank's notes in circulation in excess of its unimpaired capital is not greater than the amount of the deposit, the difference between the two amounts will belong to the bank and may be withdrawn. Banks will thus be able to issue their own notes to the amount of their unimpaired paid-up capital plus the sum which they have on deposit in the central reserves. The banks will still retain the power to issue during the crop-moving season, from September 1st to the close of February, emergency currency to the amount of 15 per cent. of their unimpaired capital. The remuneration of the four trustees and the cost of establishing and maintaining the central reserves will be paid by the Canadian Bankers' Association, who will make rules and regulations regarding the custody and management of the fund. The central reserve will probably be established at Montreal.

BOARD OF CONTROL vs. CITY COUNCIL

After carrying on the government of the city of Montreal for three or four years by means of a city council and a board of control, it begins to look as though another change will shortly have to be made. A number of aldermen apparently think that the citizens have a greater regard for them than for the board of control. One of them proposes to put the matter to the test by having a vote taken on the subject. There have been many clashes between the two governing bodies, notwithstanding the fact that some time ago an effort was made to have the duties of both defined. The result was that to the council was given the duty of legislation and to the board of control the duty of an executive.

The Citizens' League has begun again to show activity and conferences are being held to decide upon the most advisable course. Among other things, it is proposed to divide the city into five wards, each to be represented by four aldermen, and each ward to poll about 22,000 votes. Mayor Lavalee has expressed the view that there should be only one governing body in the city. There is a suggestion that the board of control should be increased to seven and that it should take over the entire work of governing the city. Against this, is mentioned the fear that undesirables might be appointed to the board, in which case, it is argued that it would be desirable to have a dual government. There is a strong probability that if the electors had to decide which governing body to retain, it would be the board of control rather than the city council.

BANK CLEARINGS.

On other pages are printed tables compiled by *The Monetary Times* showing the course of Canada's bank clearings during recent years and during the past six months. The clearings of May and June last showed considerable decreases from the totals of the corresponding months of 1912. Trade depressions and tight money conditions are usually reflected at an early period in the bank clearings, which indicate broadly the volume and tendency of business. The decline in bank clearings has scarcely informed us of coming troubles. It has rather proved assertions that quiet times have arrived and shown generally how quiet they actually are. As the figures on other pages reveal, the drop cannot be considered as serious. Indeed, in view of the size of Canada's trade, its business, its borrowings, and the recent speculative tendency, the decrease in clearings may be considered comparatively light. We may have seen the end of the drop and, on the other hand, we may yet witness further declines. This will depend upon the tendency of world-wide conditions. If the money markets become more kindly inclined to new loans and tight money generally is loosened, there is hope for the bank clearings in 1913 equalling the record of 1912.

The following table, compiled by *The Monetary Times*, shows the bank clearings for 1912 and for the first half of 1913, divided according to eastern and western Canada:—

Bank clearings.	1912.	1913 (six months).
Ontario	$2,728,432,820	$1,353,048,158
Quebec	3,003,128,011	1,474,334,037
New Brunswick	88,969,218	40,700,798
Nova Scotia	100,467,762	49,540,252
	$5,920,997,811	$2,917,623,245
Manitoba	$1,571,114,599	$ 734,902,021
Alberta	529,704,867	244,739,029
Saskatchewan	294,716,462	144,379,445
British Columbia	827,663,115	416,242,371
	$3,223,199,043	$1,540,262,866

In each case, the western clearings are about half those of the eastern, which have the large Montreal and Toronto clearing houses. Eastern Canada needs clearings of approximately $2,000,000,000 during the next half year in order to equal the record of 1912, and similarly western Canada requires about $1,883,000,000. Unless business activity improves considerably during the coming autumn, some difficulty will be experienced in achieving those results.

WASTING BREATH

When the London underwriters decide, every now and again, to shut the vault doors, light a black cigar, and put their feet up on the desk, Canada invariably puts hands in pockets, whistles an old love tune and tells funny stories. In severe language, the demand far exceeds the supply of capital and development is checked. Were it not for the fact that there is a storehouse of natural resources and a legitimate confidence in its future, Canada would have wended weeping long ago, during one of these tight money spells, to our friend across the border, pleading to be annexed. Instead, we have to figure when the underwriters will finish their cigar, and whether the Western crop will be fair or excellent.

These times of peace and quietude would act as a national tonic were it not for the rude jolts administered by those who live on a diet of constant excitement. For instance, just as Canadian Pacific stock was making a brave show against Sir Rodolphe Forget's "down-to-200" thumbscrew, someone said that the company would issue $60,000,000 new stock. No one credited it, yet the old stock began to droop and fade in approved fashion. As the British investor just now will not even look at the froth on an investment charlotte russe, there was not the slightest likelihood of Sir Thomas Shaughnessy and his directors giving an overfed money market a meal of $60,000,000 high-class stock. Obvious though the fact was, Sir Thomas had to explain matters to the loungers around the international tight money rotunda.

Then, again, as if the crop reports were not sufficient occupation in the dog days, someone in the empty recesses at Ottawa sent out a story, saying that the federal government were about to purchase the Canadian Northern Railway. The government already has a handful of railways, enough for patronage purposes and a surplus for practical operation. The premier and his cohorts would not willingly put Sir William Mackenzie and Sir Donald Mann under the "Situations Wanted" column, neither would they likely give those gentlemen $16,000,000 in subsidies had they any idea of government ownership of the road. Besides which, the government might have to take over Mr. Horne-Payne, too, and the Hon. Robert Rogers would object to that just as long as he could talk. Despite all this obviousness, Sir William Mackenzie had to mount the platform and tell the breathless populace that the story was untrue. Tight money brings a breathing spell, but we waste a lot of breath just the same.

SMALL CHANGE

Economize!

* * * *

The "small" investor is not so much so, after all.

* * * *

And usually, those "baby bonds" are well behaved.

* * * *

After all, the outlook is about as bright as elbow grease makes it.

* * * *

The economic cycle we are now in could scarcely be called a motor cycle.

* * * *

Hamilton city council fought over natural gas this week. Toronto fights with it.

* * * *

Sir Thomas Shaughnessy, watching the ticker: "Lest we Forget; lest we Forget."

* * * *

Do the Grey Nuns control Toronto Railway? Maybe, but they were never called that before.

* * * *

Canadian grocers at Quebec this week conferred in camera—probably taking a photo of the cost of living.

* * * *

Fire Chief Thompson, Toronto, we are told, "blazes with indignation." That is the worst of being in the business.

* * * *

The fire waste in Canada for six months was $14,000,000; municipal borrowings in the same period were $11,000,000.

* * * *

They are talking of an airship line from Edmonton to Athabasca. It might look for the Alberta and Great Waterways Railway.

* * * *

Mayor Hocken, Toronto, and Sir William Mackenzie have "nearly" agreed on that street railway deal. Presently someone will give them a shove.

WHAT THE BANK CLEARINGS SHOW IN RECENT YEARS

First Decreases Since 1908 Were Recorded in May and June Last—Effect of Commodity Prices upon the Volume of Clearings.

	1908	1909	1910	1911	1912	1913
January	$335,934,122	$381,119,715	$488,285,937	$533,959,071	$684,955,507	$804,364,150
February	271,052,288	330,852,488	408,048,038	476,421,473	614,811,814	674,902,683
March	297,754,089	376,292,874	474,210,419	577,152,882	655,408,800	674,454,081
April	308,020,547	383,871,156	490,102,778	555,686,075	714,719,250	756,678,736
May	320,988,539	402,674,637	476,244,141	543,285,907	819,529,634	800,535,942
June	323,508,501	433,864,458	499,153,006	604,918,420	769,519,212	740,903,486
	$1,857,258,086	$2,308,674,328	$2,836,044,319	$3,293,426,428	$4,258,944,217	$4,451,839,078

The bank clearings of Canada since 1908 have shown a steady increase. The first decline in the volume of clearings was noted in May and June last. Compared with the same months of 1912, the May clearings decreased $19,000,000, and the June clearings about $29,000,000. *The Monetary Times* has compiled some interesting tables of the Clearing House statistics for several years back. These figures undoubtedly are one of our chief business barometers and the fluctuations since 1908 are of interest. Here are the total clearings for each year and the first six months of 1913:—

Year.	Total Clearings.
1908	$4,142,233,370
1909	5,203,269,249
1910	6,114,039,804
1911	7,391,368,207
1912	9,143,196,764
1913 (½ year)	4,451,839,078

Rapid Growth of Clearings.

The remarkable growth of business in the past five years is vividly indicated in the one fact that the current half year's bank clearings are greater than the entire year's clearings in 1908 by no less than $300,000,000. The total clearings of 1912 were more than double those of 1908.

The table at the head of this page shows the bank clearings for the first six months of the past six years. Gradually the volume of business has increased. In 1908, the monthly totals were in the two hundred million class. The following year they had graduated to the three hundred million, then to the four and so on until in 1912, a monthly total (May) had reached $800,000,000. The figures in the table at the head of the page may be summarized as follows:—

Half-year.	Total Bank Clearings.
1908	$1,857,258,086
1909	2,308,674,328
1910	2,836,044,319
1911	3,293,426,428
1912	4,258,944,217
1913	4,451,839,078

The showing for the half year just past, therefore, is about $200,000,000 better than for the first six months of 1911.

Figures of Separate Localities.

As has been pointed out by Professor Conway, of the University of Pennsylvania, in the study of bank clearings as an index of business and financial conditions, two important things must constantly be kept in mind. The first is that the real benefit from a study of clearings is to be derived not from the use of the figures for the country as a whole, but from the figures from separate localities. The second is that due allowance must always be made for the level of commodity prices—a high level of commodity prices tending to increase the volume of bank clearings and to make the volume of business being transacted appear larger than it actually is.

A record of bank clearings that did not divide the country into sections is of little use as an index of conditions. Not infrequently it happens that extraordinary activity in one part of the country operates to swell the total and give an entirely wrong appearance to the figures as a whole.

What is necessary, therefore, in the study of clearings, is to examine the figures by groups, making due allowance for any particular activity or dullness which may be known to prevail in any section of the country. Thus in gauging the amount and commercial business being done, exclusion of the figures of the main speculative centers is advisable.

With this fact in mind, we may examine briefly the clearing house records by provinces. A table on the following page gives this every year since 1908 and for the past half year.

If Ontario's bank clearings during the second half of 1913 make as good a record as during the first half, the total for the year will be about as large as that of 1912. The prospects are, that the clearings both of Ontario and Quebec provinces for 1913, will equal and probably exceed slightly the total for 1912. Manitoba's clearings for the past six months were about half the former year's aggregate. The same applies to British Columbia. The clearings of Saskatchewan and Alberta may show a slight decrease from those of 1912 when the figures of 1913 are complete, although they have made a good showing to June.

Montreal, Toronto, Winnipeg and Vancouver.

The records of the four largest clearing houses are also of interest. For each half year since 1908, they are as follows:—

First half year.	Montreal. $	Toronto. $	Winnipeg. $	Vancouver. $
1908	669,532,021	520,635,652	252,098,645	82,468,596
1909	834,881,724	678,848,157	302,414,200	116,821,265
1910	994,879,543	759,292,096	393,265,047	204,565,566
1911	1,121,622,726	886,099,768	483,911,652	252.987,096
1912	1,308,341,481	1,050,259,046	691,535,231	305.710,244
1913	1,395,741,933	1,081,151,975	720,336,257	308,825,438

These four clearing houses show a consistent increase in total clearings for the first half year. Montreal and Toronto clearings have doubled since 1908, Winnipeg's have nearly trebled and Vancouver's have almost quadrupled. All these important points show greater clearings for the past half year as compared with 1912.

Effect of Commodity Prices.

As stated above the second important thing to be borne in mind in connection with bank clearings, is that the level of commodity prices has a strong influence on the volume of bank clearings. The great bulk of commodities are carried on bank-money and when the price-level of these commodities is high, a greater amount of money is needed to "carry" them than when the price is low. Payment for a hundred bales of cotton at fourteen cents per pound, for example, would require the drawing of a larger cheque than if the price were twelve cents per pound, and would result in a corresponding increase in clearings. Yet, not any greater volume of business would have been done. It is most important, therefore, in the study of bank clearings, to note what is the course of commodity prices. Not infrequently it happens that a very high levels of prices results in such an increase in clearings as to make it appear that business is extraordinarily active when such is not the case.

High as was the general level reached in 1911 by wholesale prices in Canada—the highest probably within the present generation—a still further and pronounced advance took place during 1912. Taking the 287 representative articles included in the record of the Department of Labor, the rise in 1912 over 1911 amounted to 6.5 per cent. In the terms of the department's index number, which is based on weekly or monthly quotations for 272 commodities selected over the entire field of production and consumption, a level indicated by 127.4 in 1911 had risen to 134.4 in 1912, a gain of seven points—the numbers being percentages of the average prices prevailing during the decade 1890-1899, the period adopted by the department as the standard of comparison throughout its investigation. These figures probably minimize to a degree the practical bearing of the increase on cost of living, inasmuch as they are reached by averaging all the commodities on an equal basis whereas some of the most notable advances of the past year were in foods, fuel and other articles of great importance in domestic consumption.

Advance of Retail Prices.

A calculation which assigns to the various groups their approximate relative weight from this standpoint shows the rise in 1912 to have been well over 9 per cent. In retail prices the advance was approximately 5.8 per cent. For the years prior to 1890, no comparable data have been assembled; in 1882-84 prices were high in Canada, but it would be necessary probably to go back to the first quarter of the decade 1870-79, when the level was very high both in Europe and America, to find conditions to parallel those of 1912. Within the period for which definite information has been collected (1890-1912) it may be repeated that at no time have prices approached the level of 1911-12, save perhaps in 1907, when, however, the highest point was considerably below that of 1911-12. From 1890 to 1897, the movement was consistently downward, since when, as has been many times pointed out, the tendency has been very rapidly upward, and with interruption of a serious nature only in 1907-8—the whole constituting the movement which has been the subject of such incessant and general discussion in recent years as the "high cost of living." The past year accordingly appears, speaking broadly, as a further and still longer step in the upward progress. Just how high is the point now reached may be gathered from the statement that a simple average of the prices of the articles covered in the department's investigation shows the general level to be approximately 40 per cent. higher in 1912 than in 1897, while if allowance be made for the greater importance of certain groups of articles in trade the rise approaches 60 per cent.

Prices Still Rising.

The latest monthly index number of the Department is for May, 1913. The index number for wholesale prices in Canada for that month compares as follows:—

May, 1913	137.0
April, 1913	136.3
May, 1912	136.3

The numbers, it will be understood, are percentages in each case of the average price level prevailing during the decade 1890-99, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Some 272 articles, carefully selected to represent Canadian production and consumption, are included in the calculation.

The chief increases during May, 1913, occurred in animals and meats, fish, fruits and vegetables, with a considerable decrease in dairy products and fuel. Compared with the same month of last year the chief increases appear in the following groups:—Animals and meats, fish, textiles, hides, leathers, boots and shoes, metals and implements, fuel and lighting, building materials, furnishings, furs and sundries. Important decreases appear in grains and fodder, dairy products, fruits and vegetables, liquors and tobacco.

Although, as we have seen, commodity prices have for several years shown a tendency to increase in no indefinite way, that tendency does not by any means account for the remarkable gain in the volume of bank clearings since 1908. Other statistics prove that the gain is chiefly due to an increase in actual business.

Canada's Clearing Houses.

Three bank clearing houses were established in 1910, one each at Brandon, Lethbridge and Saskatoon. Three, Moose Jaw, Brantford and Fort William, were established in 1911, and two, New Westminster and Medicine Hat, have been opened this year. There are now twenty-two clearing houses in Canada, twelve of which are in western Canada and ten in the east.

The following is a list of the clearing houses:—

Clearing House.	Commenced Business.
Halifax	1886, 1 July.
Montreal	1889, 7 January.

As the tabulations of *The Monetary Times* show the bank clearings for the first half of 1913 are nearly $200,000,000 ahead of the corresponding period of 1912. It will be unusually interesting to watch the course of the bank clearings for the remainder of the year and also during 1914.

Bank clearings	1908	1909	1910	1911	1912	1913 (six months)
Ontario	$1,450,474,915	$1,757,779,723	$1,956,049,935	§$2,298,228,008	$2,728,432,820	$1,353,048,158

†Regina started 1st October, 1909. *Moose Jaw started February, 1911 and the total clearings for the 11 months were $39,988,342. §Fort William started October, 1911 and the total clearings for three months were $7,865,923. Medicine Hat started in May, 1913.

GUARANTEE COMPANY OF NORTH AMERICA

The Guarantee Company of North America's eighty-first semi-annual statement, for the six months ending June 30th, 1913, shows assets of $1,793,539.25, which include $1,488,059.00 of bonds and stocks at their present market value, and a surplus to policyholders of $1,615,462.00, which, notwithstanding the writing down of the value of its securities, is over $27,500 in excess of its surplus at December 31st, 1912, and an increase of more than $115,000 over that of a year ago.

The business of the Guarantee Company is that of issuing bonds of suretyship, which it was the pioneer company in introducing on this continent in 1872.

◆

"We have reached our agreement with the exception of one thing," announced Mayor Hocken, referring to his conference with Sir William Mackenzie regarding the requisition for the purchase of the Toronto Railway and Toronto Electric Light Companies.

THESE COMPANIES ENTER ONTARIO

The following companies have received a license to do business in Ontario: McKinnon Dash Company, New Jersey, U.S.A., to use in Ontario $115,000 capital; McKinnon Chain Company, New York, U.S.A., $100,000; Dominion Chain Company, Limited (Dominion charter), $40,000; Molassine Company of Canada, Limited (Dominion charter), $40,000; the A. Macdonald Company, Limited (Dominion charter), $250,000; the National Cash Register Compnay, Ohio, U.S.A., $500,000; the Kendal & Naylor Company, Michigan, U.S.A., $10,000; the Acme Grain Company, Limited, Manitoba, $50,000; the Bayer Company, Inc., New York, U.S.A., $40,000.

◆

Fiji has imported flour chiefly hitherto from New South Wales, Victoria and New Zealand, but is now importing it in increasing quantities from Canada. Biscuits, which are imported principally for use as food for laborers and for consumption by the Fijian population, are manufactured in, and imported almost exclusively from Victoria and New South Wales. Meats consist almost exclusively of tinned beef for the use of laborers and Fijians, and are imported from New Zealand, New South Wales and Victoria.

The Canadian section of the Paris British Chamber of Commerce notifies proprietors of Canadian canning factories that a law has been passed in France prohibiting the import of canned salmon and other fish, unless stamped on the top or bottom of the tin with the name of the country of origin in characters of four millimetres. The law will probably come into force in twelve months. As it will apply to salmon imported and in stock after that date, it is advisable to have the necessary dies made at once.

PULP AND PAPER MERGER

Spanish River to Acquire Lake Superior Paper Company—Capital to be Twenty Millions

	Authorized.	Issued.
Common Stock	$10,000,000	$8,000,000
Preferred Stock	10,000,000	6,700,000
Bonds:—Spanish River	2,500,000	2,425,000
Ontario Pulp	1,500,000	1,500,000
Lake Superior	5,000,000	5,000,000

The above is the proposed capitalization and bonding powers of the coming pulp and paper merger. If the shareholders approve, and of that there is little doubt, the absorption of the Lake Superior Paper Company by the Spanish River Pulp and Paper Company will create the largest pulp and paper concern in Canada and make it one of the three biggest industrial corporations of the country. The directors of the Spanish River Company have approved a plan authorizing the acquisition of the total issued capital stock of the Lake Superior Paper Company, Limited, consisting of $3,000,000 in preference shares and $5,000,000 in common shares.

Shareholders to Meet.

Spanish River shareholders will meet on July 28th to consider a by-law authorizing the directors to effect an agreement between the company and a syndicate, whereby the syndicate agree to deliver to the company 30,000 preference shares of the Lake Superior Paper Company of the par value of $3,000,000 and 50,000 common shares of the par value of $5,000,000 and to pay in cash to the company the sum of $900,000 in certain fixed instalments in consideration of the issue to the syndicate of 37,000 fully-paid preference shares of the company of the par value of $3,700,000 and 50,000 fully-paid common shares of the par value of $5,000,000, and the guarantee by the company of the payment of the principal and the interest and sinking fund upon the present issue of first mortgage bonds of the Lake Superior Paper Company, amounting to $5,000,000.

To Increase Capital.

It is proposed also to increase the capital stock of the Spanish River Company to $20,000,000 by the creation of 70,000 additional preference shares and 60,000 additional common shares. The number of directors will be increased from nine to eleven.

Under the proposed arrangement $900,000 cash will be added to the working capital of the Spanish River Company and the consolidation includes some of the largest financial interests in London.

The Lake Superior Paper Company's properties are located at Sault Ste. Marie, Ont., within 100 miles of the Spanish River Company's plant at Espanola, Ont., and embody an entirely new installation for the production of ground wood pulp and newsprint paper as well as a sulphite plant. They have four new paper machines of latest design with a capacity of 230 tons per day, which is practically the same capacity as the present plant of the Spanish Company, and the combined output of these plants will make the company the largest producer of newsprint paper in Canada.

Should Effect Economies.

The Lake Superior Paper Company have acquired rights to cut pine, spruce and other woods, over the land grants of the Algoma Central Railway comprising 1,637,250 acres.

The joint operation of these large plants should result in economy both as to cost of management and distribution of products, and should materially reduce cost of production by the increased efficiency in operation of all machines at maximum capacity.

Both companies' mills are advantageously situated to care for western territory and to-day have booked contracts for about ninety per cent. of their output.

The present capitalization of the Spanish River Company is as follows:—

	Authorized.	Issued.
Bonds, 6 %	$2,500,000	$2,125,000
Ontario Pulp	1,500,000	1,500,000
Preferred Stock, 7 %	3,000,000	3,000,000
Common Stock	4,000,000	3,000,000

In 1912, the Spanish River Company absorbed the Ontario Pulp and Paper Company, Limited.

◆

VERDUN CANNOT RAISE LOAN

Verdun's (Que.) inability to sell its debentures, and likewise the impossibility of negotiating even a small loan of $25,000, has compelled the city to reduce its staff and to curtail expenditure; the only work that is being carried forward is the trunk sewer for the Woodland section of the city.

CANADIAN PACIFIC STOCK OUT OF LINE

With Other Roads, Says New York—Response to Redemption Offer.

Canadian Pacific stock continues to hold attention. Wall Street especially appears to be interested in the position. "The stock," says a New York dispatch, "is considered to be taboo with speculators for the decline here, because Wall Street has been rather badly man-handled when it has sold the stock short on several previous occasions. If there is evidence of any operations of the kind in the stock nowadays, they are ascribed to foreigners. London advices have described the creation over there of a bear account of considerable proportions, and London buying to-day was supposed to have much to do with the opening bulge in this market, Canadian Pacific's opening advance amounting to 2 5-8 points. During the day London was reported to have purchased something like 10,000 shares of this stock alone.

Says It is Out of Line

"But whether or not recent selling of Canadian has been for shorts, London or otherwise, there are features about the position of Canadian Pacific which might conceivably be used as bear arguments. The stock sells far out of line with other railroad stocks paying the same rate of interest. It is largely held abroad, and continued unsettlement in European financial affairs might be expected to be reflected first and forcibly in that stock.

"Present earnings are large, but they do not make the same appeal to the eye as formerly, because they are beginning to compare with tremendous earnings a year ago. There is a large surplus over the current dividend, but in the next year or so there will be two other great coast-to-coast systems in the Dominion, namely, the Grand Trunk Pacific and the Canadian Northern. Furthermore, there is the ever-recurring rumor of new stock issue to provide for a complete double tracking of the whole line, which it is believed the company contemplates."

Question of Stock Issue

Mr. A. R. Creelman, K.C., retiring general counsel of the Canadian Pacific Railway, has made the following statement:—

"The Canadian Pacific Railway applied for permission to make a $75,000,000 issue of stock to the governor-in-council last August, but the government's consent has not yet been given, and the application of a year ago is still before the government. When the governor-in-council gives consent to the issue of $75,000,000, it may or may not be issued by the directors. That is a matter entirely for future consideration."

With regard to the $60,000,000 now being taken up in lieu of the consolidated debenture stock which was issued by the authority of the last shareholders meeting, Mr. Creelman stated that three-fifths was already paid. The consent of the governor-in-council was not required for this issue.

Response to Redemption Offer

Many investors apparently are not inclined to accept the Canadian Pacific Railway Company's redemption offer, investing the proceeds in other securities selling at low prices. Only £4,000,000 bonds have been paid off, holders of the remaining £3,000,000 not accepting the offer in anticipation of maturity in 1915.

ALBERTA-SASKATCHEWAN LIFE INSURANCE COMPANY

The Alberta-Saskatchewan Life Insurance Company will probably commence to write business in the near future. The company recently held its annual general meeting at Edmonton, where its head office is. After the directors' report and the auditor's statement of the financial condition of the company were read, the president, Colonel B. J. Saunders, moved the adoption of the report and addressed the shareholders, reviewing the company's history since the date of its organization.

The following directors were elected for the ensuing year: Hon. P. E. Lessard, M.L.A., Col. B. J. Saunders, Arthur Davies, James A. Powell, William Cannell, Robert Shaw, M.L.A., J. H. Morris, F. C. Jamieson and A. Williamson Taylor.

At a later meeting, the incoming board of directors held their first meeting, and elected the following officers for the coming year: Colonel B. J. Saunders, president; Hon. P. E. Lessard, first vice-president; Messrs. R. L. Shaw, second vice-president; Lon L. Moody, secretary-treasurer; Hon. A. C. Rutherford, solicitor; J. A. Hislop, medical referee.

The company has appointed Mr. J. S. Wallace, of Winnipeg, as general manager. Mr. Wallace is an old insurance man, with about twenty years' experience with the Canada Life, and Imperial Life Insurance companies in Winnipeg and Vancouver, and is well acquainted with western conditions.

CANADA INCREASES PULPWOOD OUTPUT.

Manufacture in Dominion Augmented by Three Per Cent.—Legislation and Its Effects.

The total production of pulpwood for the Dominion and by provinces for manufacture in Canada and for export, with its value and comparison with the results of the previous year, follow:—

	——1912——		——1911——	
Canada.	Quantity, Cords.	Value.	Quantity, Cords.	Value.
Product	1,846,910	$11,911,415	1,520,227	$9,678,616
Manuf.	866,042	5,215,582	672,228	4,338,024
Export	980,868	6,695,833	847,939	5,340,592
Quebec—				
Product	1,026,562	6,475,106	1,330,670	8,371,923
Manuf.	390,426	2,516,683	578,855	3,386,705
Export	636,136	3,958,423	751,815	4,985,218
Ontario—				
Product	302,717	2,028,214	246,282	1,692,567
Manuf.	216,267	1,457,224	173,903	1,235,343
Export	89,050	570,990	72,319	457,319
From Coastal Provinces.				
New Brunswick—				
Product	168,522	1,062,817	202,942	1,492,567
Manuf.	45,824	251,858	52,041	287,060
Export	122,698	810,959	150,901	1,205,507
British Columbia (all manufactured in the province):				
Product	150	$1,140	35,067	$193,265
Nova Scotia—				
Product	22,276	$111,339	31,949	$169,998
Manuf.	22,221	111,119	26,176	113,209
Export	55	220	5,773	47,789

In 1911 Canada manufactured only 44.2 per cent. of the output of pulpwood. Last year this was increased to 46.9 per cent.

Legislation and Export.

The effect of legislation restricting the export of manufactured pulpwood is quite noticeable in Quebec. Laws prohibiting the export of pulpwood from crown lands in that province came into effect September, 1910. In 1912 the increased cut on both crown and private lands somewhat obscured the effect of these laws. However, in 1911 Quebec exported 62 per cent. of the total cut, while in 1912 only 56.5 per cent. was sold out of the country.

A similar law was brought into force in New Brunswick October 1, 1911, but so far this does not seem to have had the desired effect, although the percentage of raw pulpwood exported from that province has increased but little since 1911. In Ontario only pulpwood cut on private lands can be exported unmanufactured. The only enforcement of this regulation has resulted in checking the export of raw material. The percentage of unmanufactured pulpwood exported has remained constant in the last two years.

LAND SETTLEMENT AND INDUSTRIES

Practical questions dealing with the development of British Columbia and of Vancouver, were dealt with at the Vancouver Progress Club's meeting. Among them was a resolution which was carried by the members, and which will be sent to the British Columbia provincial government as follows:—

"That the time is ripe for the government to take steps to solve the land question of British Columbia along similar lines to the settlement of the Australian and New Zealand land problems, and that a list of official plots of land open for pre-emption and homesteading within the province be filed at the headquarters of the Progress Club; and that furthermore, the government make provision for intending settlers to be able to view the lands if they wish to purchase."

And also a report replete with suggestions as to the encouragement of provincial industries was presented by the industries committee of the club. Detailed statements as to the causes why Vancouver does not progress as rapidly as it should as a manufacturing centre were given.

Seventy-five per cent. of the manufacturers who answered the question: "What in your opinion is the greatest detriment to the development of manufacturing in Vancouver?" as contained in the list of questions sent out by this committee, stated that the price of manufacturing sites is too high. Several other reasons were given, the majority of which centred around this reason. In this industrial survey 243 question papers were sent out and it was reported that over fifty answers have been received to date.

UNITED STATES COMPANY FOR CANADA.

Sturtevant Company Will Locate at Galt, Ontario, Because of Tariff Laws, Says Foss.

Because he does not like the Democratic tariff legislation, one of the companies in which Governor Eugene Foss, of Massachusetts, is interested—the B. F. Sturtevant Company—will move to Canada. In a statement, the governor says:—"For more than twelve years one of the principal Massachusetts corporations which I represent has had under consideration a plan of transferring to Canada a large portion of its work. I have personally opposed this plan and endeavored to maintain this industrial enterprise in full here in Massachusetts, but am now convinced that it is no longer possible to defer action on this matter. Accordingly I make the announcement, although I do so with sincere regret, that the B. F. Sturtevant Company has just completed the purchase of a manufacturing plant in Galt, Ontario, and that a large part of the work which has hitherto been done at Hyde Park will now be transferred to Canada, the refuge.

Principal Manufacturers Coming to Canada

"All over the United States the tendency among the principal manufacturing interests is toward the establishment of plants in Canada. This movement has been going on for many years, and it is estimated that from three to five hundred million dollars of United States capital is now invested in these Canadian plants. The Sturtevant Company must join the procession in order to meet the conditions of the industry, for the movement has now proceeded to a point where corporations which fail to follow are faced with serious embarrassment. American manufacturers have completely filled the American market, and their production is now greatly in excess of the domestic demand. Under these conditions the expansion of their domestic plants is impossible, and it is becoming necessary for them to curtail production. This movement of American manufacturers to Canada could be stopped and they could remain intact in this country if it were not for the absurd conditions created by our tariff legislation.

What Mr. Foss Wants

"We should have with Canada and other countries such trade agreements as would enable us to manufacture our goods in the United States, giving employment to American workingmen and utilizing American capital. But such agreements would imply a recognition of the principle of reciprocity. If we were to ship the products of American factories to Canada and Europe without the present handicaps, we should require certain trade concessions from the governments of our customer nations, and in return for these concessions we should be expected to grant similar ones to the products of those countries."

Governor Foss concludes by saying that "it is suicidal for the United States to ignore its opportunities of removing the handicaps which hinder trade with foreign nations." He also points to the rapid growth of Canada as a result of her industrial laws.

Strength of the Company

The B. F. Sturtevant Company, of which Governor Foss is treasurer, was incorporated in July, 1890, in Massachusetts. The company manufactures mechanical draft fans, blowers, engines, heating and ventilating apparatus, fuel economizers, etc. Its works are at Hyde Park, Massachusetts, and it has branches at Chicago, Cleveland, Philadelphia, Pittsburg, New York, San Francisco, Washington, Seattle, Rochester, Hartford, Cincinnati, St. Louis, Minneapolis, Boston and Atlanta.

The company's capital stock is: Authorized and outstanding, $1,250,000 6% cumulative preferred and $1,250,000 common; par $100. The preferred stock is subject to call at 105.

The company's balance sheet June 30th, 1912, gave the following result:—

Assets—Real estate and machinery, $626,865; material and stock in process, $735,806; cash and debts receivable, $1,429,208; patent rights, $11,750; securities, $196,911; good-will and trademarks, $40,000; total, $3,040,540.

Liabilities—Capital stock, $2,500,000; accounts payable, $288,087; guarantee fund against depreciation of accounts and notes receivable, $200,000; surplus, $52,453; total, $3,040,540.

The officers of the company are: Messrs. John Carr, president; Eugene N. Foss, treasurer; B. S. Foss, secretary, and E. B. Freeman, assistant treasurer and general manager, Hyde Park; directors are the foregoing and Messrs. J. R. Dunbar and E. P. Howe.

◆

The new government elevator at Fort William, with a storage capacity of 3,000,000 bushels, and the Fort William cleaning elevator, 1,000,000 capacity, are nearing completion. The walls are now well up, and in a short time will be finished. As soon as the concrete work is done the machinery that will be used to operate them, will be installed. Both are to be ready in time to help store part of this fall's western wheat crop.

GROWTH OF AUTOMOBILE INSURANCE IN CANADA

The statistics of automobile insurance in Canada for the year 1912 are not yet complete. An abstract of the figures, however, gives the interesting results tabulated below. The figures refer only to companies transacting the business under the jurisdiction of the Dominion Insurance Department. The premiums for the year amounted to $440,307. The losses incurred in the twelve months were $166,962. Claims of $61,244 were paid. Nine companies have more than $1,000,000 of automobile insurance in force. The number of policies in force and held by twelve of the companies doing this business in the Dominion is 4,466.

Discussing the rapid growth of automobile insurance Mr. G. A. McNamee, secretary of the Automobile Club of Canada, says that practically every owner of a valuable car or motor truck has it insured. The usual practice of the companies is to cover the whole legal liability of the owner, his paid servant, or any resident member of his household. Some associations have lately gone so far as to include in their "comprehensive" policies the liability of any relation or friend personally driving with the owner's consent. It may be argued, though, that the companies, from their point of view, are thus giving a rather wide cover, and that it would be more in their interest if such persons were left to insure against their third-party risks themselves, which they can now do cheaply enough. Another new feature, which applies particularly to professional men, is that the owner is covered against third-party claims and law costs if driving another car while his own is not in use. The common plan in granting this cover is to stipulate that the car in use shall not exceed 40-horse-power.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Twin City Rapid Transit Company.—The earnings of the Twin City Rapid Transit Company for the last nine days of June were $222,054, an increase over the corresponding period last year of $14,559, or 7.02 per cent.

Wayagamack Pulp and Paper Company, Limited.—The company's first annual meeting of the Wayagamack Pulp and Paper Company, Limited, is to be held on July 24th. Arrangements have been completed for a special train leaving Place Viger station at 8.25 a.m., for Three Rivers on that date.

Granby Mines, Limited.—During the period from January 1st to June 14th of this year the Granby has smelted a total of 570,000 tons of ore, of which amount 564,594 tons were from Granby mines and 5,456 tons from other properties. In the same period Granby has made and shipped a total of 9,920,697 pounds of blister copper.

Hollinger Gold Mines, Limited.—The regular monthly report of the Hollinger Gold Mines, Limited, shows profits for the period ending June 17th, amounting to $124,015, leaving a surplus over the dividend requirements of $34,000. The company's cash balance is $534,000. In the four weeks ended June 17th the expenses of the strike are given as $2,905, which amounts to .245 per ton of ore milled.

Hudson's Bay Company.—The sales of farm lands by the Hudson's Bay Company for the quarter ended June 30th amounted approximately to 10,800 acres for £49,500, as compared with 18,400 acres for £76,900, and the sales of town lots to £11,800, as compared with £949,000 for the corresponding period of 1912. The receipts are £144,500, as against £354,100 in 1912. The comparison is with an exceptionally fortunate period.

La Rose Consolidated Mines, Limited.—La Rose Consolidated Mines figures for the half year ended for July 30th show gross earnings amounting to $811,588.

Total marketing, concentration and operating expenses were $334,920, leaving net earnings of $476,968. After payment of dividends the sum of $80,958 was added to surplus as a result of the six months' operations.

The June statement shows a net profit of $82,442, while total surplus now stands at $1,831,298, of which $1,507,562 is in cash.

Barcelona Traction, Light and Power Company.—Mr. Miller Lash presided at the meeting of the Barcelona Traction, Light and Power Company when the capital of the company controlling this Spanish enterprise was increased from $30,000,000 to $42,500,000. The Barcelona Company is a Pearson undertaking, the Toronto directors of which include Messrs. E. R. Wood, R. C. Brown, Miller Lash and Walter Gow. Since the company began business its scope has increased considerably, which accounts for the change in the capital. The additional issue is represented by $12,500,000 of preferred stock.

Imperial Tobacco Company.—The following circular has been issued to the shareholders of the Imperial Tobacco Company:—

"The progress of the company has necessitated the laying out of considerable sums of money for the purpose of enabling the company to supply its increasing trade. A new factory has been erected in Montreal, depots have been opened in Calgary, Vancouver, Halifax and St. John, and the opening of others is in progress. In addition, it has become necessary in the opinion of the directors to carry very much larger stocks of leaf tobacco.

"Soon after it started last year the company was compelled to borrow money to cope with its constantly increasing trade, and the directors have come to the conclusion that the time has now arrived when further capital should be provided.

"It has been decided to do so by offering at par to the preference shareholders out of the present authorized and unissued preference share capital 417,123 preference shares, which shall rank pari passu with the issued preference shares. The present issue will bring up the total issued preference shares to 1,650,000. There are no debentures or bonds of the company.

"The following statement shows the profits made by the company and its predecessors (the old company of the same name) for the last three years:—Year ended 30th September, 1910, £275,205; 1911, £347,410; 1912, £414,408. It will be seen that in the past year the profits of the company were sufficient to cover the preference dividend, including the present issue, between four and five times."

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Ottawa, Ont.—Up to August 28th for $1,164,706 debentures. Tenders to be addressed Chairman, Board of Control.

Halifax, N.S.—Tenders will be received up to July 28th for debentures totalling $299,750. W. L. Brown, city treasurer.

Vanguard, Sask.—The council has been authorized to borrow $8,000. Hugh F. Cooke, secretary-treasurer, Vanguard.

Preeceville Village, Sask.—The council has been authorized to borrow $1,600. J. Fraser, secretary-treasurer, Preeceville.

Tompkins Village, Sask.—The village has been authorized to borrow $2,000. H. Chapman, secretary-treasurer, Tompkins.

Milestone, Sask.—Tenders are desired for $5,000 6 per cent. 20 instalment debentures. A. W. Garnet, secretary-treasurer.

Pense, R.M., No. 160, Sask.—The council has been authorized to borrow $15,000. P. F. Weiss, secretary-treasurer, Pense.

Grayson, R.M., No. 184, Sask.—The council has been authorized to borrow $4,000. S. Johnston, secretary-treasurer, Grayson.

Chester, R.M., No. 125, Sask.—The council has been authorized to borrow $4,000. J.B. Lupton, secretary-treasurer, Kaiser.

Wellington, R.M., No. 97, Sask.—The council has been authorized to borrow $5,000. C. Bierma, McTaggart, secretary-treasurer.

Redburn, R.M., No. 130, Sask.—The council has been authorized to borrow $12,000. E. E. Johnston, secretary-treasurer, Rouleau.

Souris Valley, R.M., No. 7, Sask.—The council has been authorized to borrow $10,000. R. C. Beckett, secretary-treasurer, Bromhead.

Goose Lake, (Roblin), S.D., No. 1283, Man.—Up to July 20th for $5,500 6 per cent. 20 instalment debentures. C. Bryden, secretary-treasurer, Roblin.

Lumsden, R.M., No. 189.—Up to July 21st for $12,000 6 per cent. 20-year local improvement debentures. (Official advertisement appears on another page).

North Bay, Ont.—Up to August 4th, 1913, for $321,500 debentures. M. W. Flannery, treasurer, North Bay. (Official advertisement appears on another page).

North Battleford, S.D.—Up to August 5th for $60,000 6 per cent. 30-year debentures. H. Basil Thomas, secretary treasurer. (Official advertisement appears on another page).

Bowmanville, Ont.—Up to July 25th for $110,000 5 per cent. 30-year debentures. J. S. Moorcraft, treasurer, Bowmanville. (Official advertisement appears on another page).

Forest, Ont.—Up to July 31st for $20,000 5½ 30 instalment debentures. G. E. McIntosh, chairman, finance committee, Forest. (Official advertisement appears on another page).

Manitou, S.D., Man.—Tenders are invited for $30,000 6 per cent. 20 instalment debentures. R. A. McIntosh, secretary-treasurer, Manitou. (Official advertisement appears on another page).

SASKATCHEWAN'S CROP PROSPECTS.

If present prospects are fulfilled throughout the province the grain production of Saskatchewan for the season 1913 will be greatly in excess of that of any former year in the history of the west, according to Hon. W. R. Motherwell, minister of agriculture for the province. Mr. Motherwell, when seen, had just returned to the government buildings, after a tour of the province. The acreage under crop to all grains, with the single exception of flax, is greatly in excess of that of last year, which was one of the best years the province has known. The crops are well advanced and there is no reason for the entertainment of fears of a late crop.

The Home Bank has now eight offices in Toronto at the following addresses: 78 Church Street, 8-10 King Street West, corner Queen West and Bathurst, corner Bloor West and Bathurst, corner Queen East and Ontario, Dundas Street, corner High Park Avenue, West Toronto, Broadview Avenue, corner Wilton, and a new branch at 1158 Yonge Street.

ONE HUNDRED NEW COMPANIES

Several Land, Investment, and Building Companies—Coal Attracts Capital

Realty, investment, building and contracting companies are the prominent feature of the week's incorporations, though fox-farming is represented by no less than six companies, all in Prince Edward Island.

The aggregate capital of the one hundred new incorporations is $17,971,000, the largest of them being:—

Hounsfield Syndicate, Calgary	$4,000,000
Victoria Beach Company, Winnipeg	3,000,000
Consolidated Investment Company, Vancouver	1,000,000
Gainford Collieries, Edmonton	1,200,000
Western Mausoleum Company, Winnipeg	1,000,000
Boundary Investments, Toronto	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Prince Edward Island	6	$980,000
Quebec	6	680,000
Ontario	20	2,130,000
Manitoba	9	4,880,000
Saskatchewan	11	600,000
Alberta	27	6,191,000
British Columbia	21	2,510,000
Total	100	$17,971,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Swift Current, Sask.—Connaught Court, $125,000.

Coronation, Alta.—Coronation Investments, $40,000.

Calder, Sask.—Ukrainian Trading Company, $5,000.

Nelson, B.C.—Steelite Explosives, (Canada), $150,000.

Gravelbourg, Sask.—Lemoine Realty Company, $40,000.

Burton, B.C.—Arrow Lakes Cannery Company, $10,000.

St. Albert, Alta.—St. Albert Commercial Company, $10,000.

North Vancouver, B.C.—North Shore Coal Company, $25,000.

Okanagan, B.C.—Okanagan Mission Supply Company, $25,000.

Regina, Sask.—Saskatchewan Industrial Development, $100,000.

Prince Rupert, B.C.—Prince Rupert Agencies, $20,000, (real estate).

Salmon Arm, B.C.—Ruth, Warren and Carroll, $25,000, (furniture dealers).

Redcliffe, Alta.—Broadway Investment Company, $50,000. Redcliffe Wine Company, $10,000.

Berlin, Ont.—Berlin Housing Company, $50,000. E. P. Clement, E. W. Clement, W. P. Clement.

Bideford, P.E.I.—W. B. Hayes Black Silver Foxes, $90,000. J. Richards, W. B. Hayes, R. C. Hayes.

Kildare Cape, P.E.I.—Kildare Cape Fox Company, $45,000. V. T. Travers, J. McIntosh, T. W. Travers.

Charlottetown, P.E.I.—John R. Dinnis, Pedigreed Foxes, $300,000. J. R. Dinnis, J. W. Jones, W. S. Grant.

Victoria, B.C.—Maysmith and Company, $10,000, (auditors). Hall and Foyer, $100,000, (stock brokers).

Quebec, Que.—Allen and Laughlin, $250,000, (real estate). F. P. Laughlin, J. T. Poulin, R. W. Poston.

Napinka, Man.—Napinka Manufacturing Company, $60,000. W. N. Crowell, W. J. Ronoghan, S. D. Yeomans.

Summerside, P.E.I.—The Beech Grove Black Silver Fox Company, $250,000. J. F. McNeill, M. F. Schurman, G. W. Robinson.

Moose Jaw, Sask.—Moose Jaw Sand and Gravel Company, $100,000. Joseph Brothers, $10,000. Blair and Tweeney, $100,000.

Bowmanville, Ont.—Bowmanville Co-operative Fruit Growers' Association, (no share capital). J. Stanley, W. J. Bragg, F. C. Hoar.

Windsor, Ont.—Winter and Williamson, $100.000, (real estate). E. B. Winter, M. A. Winter, both of Windsor; V. Williamson, Walkerville.

Medicine Hat, Alta.—Medicine Hat Planing Mill Company, $50.000. Industrial Iron Works, $40,000. Lang Brothers Investment Company, $25,000.

Ottawa, Ont.—University Club of Ottawa, (no share capital). T. W. Dwight, A. T. Stuart, C. H. Robinson. Langford-Feldheim, $40,000. W. Y. Dennison, E. F. Holcombe, J. H. Barker.

Hamilton, Ont.—Artizan Land and Building Company, $100,000. J. W. Gage, J. W. Bonsfield, G. Boulter. New York-Canadian Realty Company, $40,000. W. M. McClemont, C. Cooper, M. C. Pritchard.

Saskatoon, Sask.—Saskatoon Confectionery Company, $10,000. Saskatoon Garment Manufacturing Company, $50,000. Anglo-Canadian Building and Construction Company, $20,000. Northern Securities Company, $40,000.

Tyne Valley, P.E.I.—R. J. McNeill Black and Silver Fox Company, $220,000. J. B. Champion; W. R. McNeill, West Devon; H. Muttart, Summerside. Tyne Valley Black and Silver Fox Company, $75,000. R. J. McNeill, P. Ellis, T. E. Williams, Poplar Grove.

Vancouver, B.C.—Christ Church of China (under Benevolent Societies Act). G. Took, D. Bune, L. W. Ping. Northern Bond, $10,000. Security Fireproof Storage and Moving Company, $125,000. United Undertakers, Limited, $25,000. White Rock Waterworks Company, $10,000.

Edmonton, Alta.—University Press, $10,000. Peace Land Company, $5,000. Opera Cafeteria, $10,000. Electric Shop, $10,000. Zenith Construction Company, $50,000. A. E. Aitken, $20,000. Dickson Steel and Bridge Company, $100,000. Gainford Collieries, $1,200,000. Western Brokers, $10,000.

Vancouver, B.C.—Canadian Hess Flume Company, $125,000. Consolidated Investment Company, $1,000,000. Dominion Iron Works, $50,000. Equal Egg Company, $50,000. Farr Brass Manufacturing Company, $50,000. Henderson's Investment Company, $200,000. MacLaren's Laurentia Milk Company of British Columbia, $400,000. Restwell Steel Bed Company, $100,000.

Calgary, Alta.—Alaska Western Bedding Company, $100,000. M. & D. Company, $10,000. Calgary Apartments, $75,000. Calgary Polar Water Company, $15,000. Yoko Valley Marble Development Company, $10,000. Woodstock Investors, $125,000. Dominion Labor Press, $50,000. Hounsfield Syndicate, $4,000,000. Alberta Gravel Company, $24,000. Moose Jaw United Land Company, $132,000. Riverside Fuel Company, $10,000.

Montreal, Que.—Sweeper-Vac, $20,000. A. E. Woodwork, A. B. Wright, G. A. Coughlin. Higgins Printing Company, $10,000. W. Higgins, L. E. Oborne, A. F. Wood. Cimon Shoe Company, $150,000. A. P. Cimon, C. L. Papineau, E. Baril. Wilson Carbon Paper Company, $200,000. E. C. Budge, A. Falconer, both of Westmount, R. Fleet, Montreal. Stowell Screw Company, $50,000. A. Decary, P. A. Decary, E. Marier.

Winnipeg, Man.—Residential Building Investment Company, $100,000. D. P. McConnell, D. A. Kay, J. E. Wilkins. Victoria Beach Company, $3,000,000, (transportation). W. Webster, C. W. N. Kennedy, C. Vokes. Canadian Contractors, $100,000. S. A. Sigurdson, F. Spaven, W. J. E. Parker. Western Mausoleum Company, $1,000,000. W. Bartholomew, V. W. Inglis, G. M. Duncombe, Ideal Cleanser Company, $20,000. F. W. Singleton, C. F. Singleton, J. E. Thomas. Manor Land and Investments, $50,000. W. A. Oliver, T. D. Jackson, G. E. Wiggins. Pioneer Investment Company, $500,000. J. Robinson, W. D. Mace, J. Riddell. W. L. Mackenzie and Company, $50,000, (provision dealers). H. Phillipps, C. S. A. Rogers, H. St. C. Scarth.

Toronto, Ont.—H. L. Walker and Company, $40,000, (brokers). A. G. Robinson, J. Hohlstein, H. L. Walker. Windsor Security Company of Canada, $200,000. W. McBain; R. H. M. Temple, S. P. Briggs. Eureka Cement Pressed Brick Company, $40,000. T. H. Cooper, J. M. Ferguson, J. M. Adam. Toronto Grain Exchange, (no share capital). F. C. Fisher, M. J. Passmore, G. W. Briggs. Toronto and District Football Association, (no share capital). T. Guthrie, T. H. Scott, W. G. Cunningham. Toria Realty and Securities Corporation, $40,000. E. C. Ironside, W. J. McLarty, C. M. Brearley. Boundary Investments, $1,000,000. G. H. Kilmer, W. H. Irving, H. H. Davis. Union Label Stores Company, $40.000. J. E. Chipchase, G. B. Silkstone, D. W. Kennedy. Windsor Home Builders' Realty Company, $100,000. J. E. Lawson, J. P. Crawford, J. J. Doran. Lake Simcoe Homes, $40,000. A. C. Thompson, G. A. Conlan, A. M. Tremain. Beverley Realty Company, $100,000. J. J. Flint, J. H. T. Nesbitt, G. D. Waters. Columbia Syndicate, $150,000, (mine prospectors). R. W. Hart, P. Stokes, J. Spracklin. British Canadian Corporation, $50.000, (immigration agents). H. C. McDonald, T. W. J. O'Connor, E. E. Wallace.

◆

The following four companies have been registered in Alberta: Townsite Realties, Limited, head office, Montreal, capital $40,000; Edward Peterson Company, head office, Omaha, capital $150,000; J. R. Watkins Medical Company, head office, Winona, Minn., capital $5,000,000; Fraser & Chalmers, Limited, head office, London, Eng., capital £450,000.

CANADIAN MUNICIPALITIES SHOULD NOT HAWK THEIR BONDS

Prevailing Practice of Paying Commercial Firms with Debentures instead of Cash is Undesirable

The financial stringency which is being felt throughout the world has caused Canadian municipalities difficulty in disposing of their bonds. The sale of a large block in the aggregate awaits better market conditions. In the meantime many cities and towns need money badly, and are resorting to various means to obtain it. Short term rates are being negotiated and bonds are being peddled to the much discussed local investor. Finally, firms doing local importing work and supplying plant materials, etc., to municipalities, are asked to accept municipal bonds, instead of cash, as payment. Is that a wise course?

Merely Shifting the Strain.

The Monetary Times, commenting upon this phase of the bond situation recently, said: "There are several objections to such a course, and it seems doubtful whether commercial firms have any strong desire to develop suddenly into amateur bond houses. Municipal bonds should be sold by the regular methods. If money is tight, economy must be practised and work postponed. The foisting of municipal bonds upon paving, machinery and other companies gives no relief to the general municipal bond situation. It merely shifts the strain."

The Monetary Times has sought the opinions of prominent bond houses on the subject. The commercial firms are naturally reticent in expressing their opinions, but it may be said generally that they have no great wish to introduce a bond department into their business.

Some Objections to Method.

Some of the objections to the course being adopted by many civic authorities are cited by the bond brokers as follows:—

Contractors accepting municipal bonds, in view of money market conditions, load their contract prices.

Bonds are indiscriminately hawked, injuring municipal credit.

Contractors or merchants holding bonds might offer them at some time at an unfair market value.

Future issues would probably be more difficult to place.

Municipalities Would Suffer.

These are a few of the reasons urged against the practice. Mr. T. S. G. Pepler, manager of the Ontario Securities Corporation, Toronto, tells The Monetary Times that in his opinion this means of disposing of debentures, if done to any extent, will have a very injurious effect, both upon the municipalities themselves and also upon the bond business generally.

"In the first place," he adds, "firms from whom the municipalities are purchasing material, etc., knowing that they are to receive debentures in payment, would unquestionably ask a higher price for the material, etc., than if it were a cash transaction; or in other words they would want to buy the debentures at a figure below their market value, as no doubt they would be anxious to dispose of these for cash at the first available opportunity.

"Secondly, bond brokers would naturally be very careful in tendering for future issues of such a municipality, knowing that any time the bonds in the hands of some contractor or merchant might be offered at a price not in keeping with the then fair market value. Therefore the municipality would have more or less difficulty in placing their next issues of bonds to advantage through the usual channels, viz., bond brokers.

"For these reasons," concludes Mr. Pepler, "I cannot see any real benefit to be derived from this mode of procedure. It is only a temporary relief to the municipalities, for which they would no doubt in my mind have to pay dearly in the future."

Messrs. Goldman and Company, Toronto, raise somewhat similar objections, and strongly disapprove of the practice indulged in by some municipalities in Canada of disposing of debenture issues to provide funds for the construction of public works, to contractors. Such transactions usually occur during a period of financial stringency, when a municipality finds it difficult to realize on its bonds. Contractors, they say, have to take current conditions into consideration and load the price of their contracts accordingly, creating entirely fictitious values, both for the work and the securities received in payment. In one case Messrs. Goldman tell The Monetary Times the municipal officials congratulated themselves on having turned in an issue of bonds on a contract for water and sewage installation, at par. The contractors subsequently sold the bonds at 90 and it is not to be assumed that they did not at that figure reap a good profit on the work.

"Another undesirable feature," adds this bond house, "is the tendency to depreciate the municipality's outstanding securities through an indiscriminate hawking of their bonds by persons not in intimate touch with the channels through which debentures are most advantageously sold. Municipalities should conserve their credit by directly controlling the sale of their bonds in the first instance and not lose sight of the fact that contractors as a class are not permanent investors in municipal debentures and must look to the sale of the securities to get their money out."

Might Create Dangerous Situation.

A less rigorous view is taken by Messrs. C. Meredith and Company, of Montreal. They do not think it is an undesirable practice if the bonds given in this way are to strong people who are willing to take them as investments. If that is not the case, it would mean a dangerous situation owing to the bonds being hawked all over the country at practically any price, in order to secure funds. This, they quite agree, would be a most undesirable state of affairs and would hurt the credit of the municipality.

The practice of contractors taking bonds in full or part payment for work done has been in vogue for a number of years, and it is only in times like these, when money is tight, that it is detrimental to the interests of the towns issuing the bonds. It appears to Messrs. Meredith, however, that the matter will probably right itself, because of the fact that contractors, knowing perfectly well that they cannot sell bonds in times like the present, will refuse to take them, or will only accept them knowing where they can be placed.

"So far the cases that have come under our notice," says a Western bond firm, "have been municipalities that had already undertaken the improvements or works and were practically tied up by their bankers refusing to grant further credits, mainly for the reason that their debentures were unsaleable except at a very great sacrifice, and this condition was more marked in the cases of towns in the 500 to 1,000 population class.

"In some instances the contractors having completed their work, would demand payment, and even went so far as to threaten suit. We think in one case a firm actually secured judgment against a town. One can therefore appreciate the municipality's position; they would practically have only one alternative, that is, to offer some of their debentures either as security or in satisfaction of the debt.

"This condition is obviously brought about by the prevailing state of the money market, and our impression is that with the return of better times this practice will altogether cease. One might consider it an undesirable practice, but as it is not being generally adopted and for the foregoing reasons we have not taken the subject very seriously."

◆

TWELTH INTERNATIONAL GEOLOGICAL CONGRESS.

The twelth International Geological Congress, which is to be held in Canada this year, gives promise of being a marked success. The governments of twenty-five different countries have signified their intention of sending official delegates, and various scientific institutions in thirty-eight countries will be represented. The membership already is seven hundred and thirty, consisting of leading geologists and mining engineers of the whole civilized world.

The session of the Congress will be held in Toronto on August 7 to 14, inclusive, during which papers of great general geological interest will be read and discussed. The most attractive feature, however, is the opportunity that will be afforded to visit the leading mining districts and points of greatest geological interest in the country. To this end a great number of excursions have been arranged for, and a series of guide books have been prepared by the Geological Survey. This set of guide books covers practically all through railway lines and steamboat routes from Sydney in Cape Breton to Dawson in Yukon. These consist in all of 1,600 pages, contain well arranged notes, are of convenient size, are accompanied by geological coloured maps and sections and make a notable contribution to the literature treating of the geology of the country. These guides are for sale by the Congress.

◆

Two Grand Trunk Pacific steamers are now on the regular run between Victoria, Vancouver and Prince Rupert, with a call at the Queen Charlotte Islands en route.

The Washburn-Crosby Company is reported as about to build a large flour mill at Port Arthur, which city has agreed to guarantee $100,000 bonds of the elevator firm of Davidson and Smith which agrees to build a $350,000 elevator and a $500,000 flour mill.

MOND NICKEL COMPANY PROGRESSES

Increased Profits and Bigger Dividend—Development in Canada.

The Mond Nickel Company which has extensive holdings in Canada, has issued a satisfactory report for the past year. At the annual general meeting, the chairman, Sir Alfred Mond, Bart., M.P., remarked that the first item on the credit side of the balance sheet showed an addition of £8,938, which had practically all been expended in the development of the company's mines in Canada. In the next item, the smelting and refining works, there was a large addition of over £168,000, which the shareholders would have anticipated from last year's report, in which the directors informed them that they were building a large new smelting plant at Coniston, Ontario. On the other side of the balance sheet they had written £35,000 off the reserve suspence account, which amount represented the greater part of the balance of the old smelting plant, which they had abandoned since the beginning of the current financial year, when the new smelter was started. He was informed that approximately £10,000 would be required next year in order to complete the writing off of that item. During the year they had taken an option on a very important property in Ontario, and they always put money which they had paid for options to suspence account pro tem, so that if they did not take up the property they could write it off.

Year's Profits and Increased Dividend.

The balance at credit of profit and loss account showed the very substantial and gratifying increase of £47,000 over that of the last financial year. He thought shareholders were to be congratulated on this very fine increase in the year's trading. With the sum carried forward from profit and loss account last year of £41,381, the total amount to the credit of profit and loss account, after deducting directors' fees, was £232,429. The directors proposed to deal with this balance as stated in the report. The dividend on the preference shares, being fixed, called for no comment. The directors had decided to make a substantial increase in the dividend on the ordinary capital. They had, he thought, a right to claim that they had acted in a conservative manner in regard to their dividend distributions. The business was a growing one, and they had every reason to anticipate a much greater development in future years to what they had seen in the past, but they had always felt it right not to pay away their profits up to the hilt. On the other hand, they thought the shareholders were entitled to a reasonable percentage of the year's earnings. The board, therefore, decided to increase the dividend to 21¼ per cent., which was an increase of 5 per cent., and would absorb the sum of £60,031. The dividend on the deferred capital moved automatically with the profits distributed on the ordinary capital. The premium on the debenture stock offered last year—namely, £3,750—had been placed to reserve, and it was proposed to place £16,250 to reserve, compared with £15,000 last year. This would bring the reserve fund up to £220,000, which he thought was a respectable figure for a company with an issued capital of £750,000. The directors had also decided to place to reserve suspense £40,000, compared with £20,000 last year. By writing off £35,000 they reduced the present reserve suspense account to £5,000, and the board felt it a wise thing to re-establish this account to a reasonably large amount. The balance to be carried forward this year was £49,525, compared with £41381 last year, so that they had a very substantial balance forward, which they could deal with at any time when they thought it desirable to do so.

New Smelting Plant in Ontario.

The progress of the operations of the company in Canada and England had been very satisfactory. Last year he mentioned that they were building a new smelting plant at Coniston, Ontario, on the most improved and up-to-date lines. The plant since it started had been running continuously, and seemed to be in every way successful. It was a very fine plant, and occupied a very fine situation, and he and some of his colleagues intended to visit it this autumn. During the year they had been continuing the erection and the extension of the company's works in South Wales, to which he referred last year. The work was progressing satisfactorily, and it was expected that during the present financial year the plant would be completed. As he had already mentioned, they had taken an option on one important property in Canada, which they were examining now, and on which it would be premature to express an opinion, but he might say, for the information of the shareholders, that since the closing of the last financial year they had acquired some further valuable mining properties in the neighbourhood of the properties they already possessed in Canada.

They had a good opinion of those properties, and the examination which had been made of them seemed to promise valuable results. The ore reserves of the company at the present time were very much larger than they had ever been in the history of the company, and on conservative data they had no reason to doubt that the mines they possessed would supply the company with raw material for many years to come. There was no doubt that the nickel business was a developing one; it was growing every year, and as they had, in his opinion, the finest and cheapest refining process which existed to-day in the industrial world, they would be foolish not to take every opportunity of extending and developing the business from what it was now to a very much larger thing in the future.

The Mond Nickel Company was incorporated in September, 1900, under the laws of Great Britain. It has lands, 3,350 acres freehold, and 1,550 acres leasehold, in the Sudbury district, Ontario, bearing copper, nickel, gold and silver. The mine and works are operated by electric power. An aerial gravity tram 11,000 feet connects the mine with roast-heaps and smelter. The smelter has two blast furnaces and two converter stands, and has direct connection with the Canadian Pacific Railway. The refining works are at Clydach, Wales.

The company's capital stock, authorized, consists of £500,000 7 per cent. preference shares of £5, £300,000, ordinary shares of £1, £50,000 deferred shares of £1. The capital issued is £400,000 preference, £300,000 ordinary, and £50,000 deferred. The stock is listed on the London and Liverpool stock exchanges. The directors are Sir Alfred Mond, chairman, Sir Andrew Noble, Carl Langer, Bernhard Mohr, Emile S. Mond, Robert L. Mond, Saxton W. A. Noble, and secretary Robert Mathias.

◆

TRADE BETWEEN ST. JOHN AND MANCHESTER

The experiment of utilizing St. John, N.B., as a winter port for the shipment of grain and other products was first made in the season of 1895-6 when thirty-six steamers sailed for Liverpool and London, and less than twenty years have elapsed since steamships, which had previously sailed from United States ports in winter began the service from St. John, N.B.

The expansion of the direct trade between Manchester and the Canadian ports is strikingly illustrated by the details of the principal imports during the past winter months from St. John, N.B., and Halifax, N.S., states Mr. F. A. C. Bickedike, Canadian trade commissioner at Manchester.

The arrivals of grain from St. John, N.B., per Manchester liners during the winter season of 1912-13, compared with the previous year, were as follows:—

	Bushels.	
	1912-13.	1911-12.
Wheat	1,441,728	768,884
Oats	386,874	113,168
Barley	34,056	16,538
Corn	26,081	......

In the winter season of 1910-11 wheat was the only item of grain carried. Taking wheat and corn at 60-lbs. to the bushel, and oats at 40 lbs., the total weight of grain carried into Manchester from Canada during the past season was over 46,000 tons.

Preparations are being made at the Manchester docks for the reception of timber which is beginning to arrive freely. More than half a million tons of timber is imported here each year by direct steamers, mostly during the summer months of June, July and August.

Three steamers have recently reached Manchester from Nova Scotian ports with about nine thousand tons of spruce deals, battens and hardwood planks and several more are due to arrive this month. The shipments from St. John, N.B., by direct steamers to Manchester during the past winter season amounted to 704.976 pieces of deals, battens and ends, which shows a considerable increase over the previous winter season.

The Manchester Ship Canal Company announces that from July 1st, 1913, the ship dues and the rates of toll and wharfage will be increased by 10 per cent. The Liverpool dock dues on both ships and cargoes were increased in 1911 by 10 per cent., whilst no corresponding increase was levied by the Manchester Ship Canal Company.

The Manchester charges will still compare favorably with those of other ports.

The timber limits of the Abitibi Pulp and Paper Company, Limited, have not been damaged by the recent fires in Northern Ontario.

IMMENSE PRODUCTIVITY WILL BE RESULT OF CANADA'S BORROWINGS

Analysis of Position by Prominent British Authority—Suggestions for Strengthening the Dominion's Credit

The present economic position of Canada is ably reviewed in an article which is understood to be by Sir James Knowles which appears in The Statist of London. An advance proof of this has been received by *The Monetary Times*. The article is as follows:—

It has been well said that the greatness of England is realized only by persons at the ends of the earth. We have, however, no doubt about the verdict of the future historian who with knowledge appraises the contribution of England to the welfare of the race. No one, we think, will deny the great part played by the British people in assisting to build up the prosperity of the United States, through the provision of an immense amount of capital for railway and for other purposes without which it would have been impossible for that great nation to have developed in the wonderful manner which has marked its progress since railways were introduced.

Again, no one acquainted with the facts will deny that the immense sums of capital provided by Great Britain for railway construction and for general development throughout South America, Australia, the greater part of Africa, India, and elsewhere have wonderfully contributed to the progress of the many countries in which the capital has been placed.

Developing Canada's Resources.

No work undertaken by the British people appeals to their imagination and to their pride as that of developing the natural resources of Canada, and enabling so vast a country to support an immense population of prosperous inhabitants through all the centuries to come.

The work undertaken by the British people in Canada is indeed one of the greatest and most beneficent they have ever been privileged to perform. Month by month and year by year hundreds of thousands of the relatively poor of these islands and of continental countries are attracted to a land where opportunities for advancement are unlimited, and by the aid of capital supplied by the investors of Great Britain are able to develop the great natural wealth of a virgin state. In the older lands the growth of population entails a comparatively small amount of extra expenditure, as roads and railways are already constructed and towns are laid out, but in a young country the situation is entirely different.

Apart from the lands awaiting cultivation and the mines development, everything has to be built up from the bottom; roads have to be made, bridges constructed, railways built, towns planned, and houses, schools, churches, and business buildings erected, while all the machinery of modern life has to be provided. The initial cost of doing these many things is very great, especially when the country to be developed has an area of about 3,650,000 square miles, and is as great as the whole of Europe, including Russia.

The work of development has made wonderful progress, thanks to the statesmanship of Canadian governments, the great volume of capital supplied by this country, the vast numbers of immigrants and, we would add, a sound system of banking. The quantity of capital which Great Britain has already supplied to Canada has exceeded the sums which the statesmen of that country expected to obtain in a great many years.

Money been Well Spent.

On the whole the money provided has been well spent, and will bring about an expansion in the productivity of the country which may be correctly described as immense without any very great burden of interest charge upon the Canadian people. The Canadian railways have raised the new capital required for great extensions at very low rates of interest, and although the capital supplied has attained large figures, the interest charge is still comparatively small.

Moreover, the Canadian government itself has provided a large part of the capital expended upon the National Transcontinental line out of its surplus revenues. In 1905 the railway system of the country in operation was no more than 20,487 miles. In the middle of 1912 the length of railway completed had risen to 30,000 miles, and by 1915, the railway mileage will probably exceed 35,000 miles, an expansion in a single decade of 15,000 miles, or nearly 75 per cent. When one remembers the vastness of the country and the attractions it offers to newcomers, one realizes that a railway system of even 35,000 miles is very small, and that it must be greatly extended as population expands. It is not improbable that the railway mileage of Canada will again double in the next fifteen years.

The greater part of the increased mileage constructed in recent years has been built in the North-West provinces, and has already resulted in the cultivation of large areas and an expansion of several-fold in production.

Wheat, Oats and Barley.

The area planted to wheat, oats and barley alone in the three North-West provinces has grown since 1905 from six to nearly fifteen million acres, while the production of these three cereals has increased in seven years from 162,000,000 bushels to 432,000,000 bushels. Throughout Canada the area sown to field crops last year was 32,449,000 acres, and the value of the harvest, calculated at the average local market prices, was no less than $511,000,000. With a population of about 8,000,000 this represented an average production from foodstuffs alone of $64, or nearly £13, per head. And beyond this the western farmers are paying increased attention to raising stock. The growth in the acreage in the coming years will be quite as rapid as it has been in the immediate past; indeed, we venture to think it will be even more rapid, and that before long the acreage planted and the value of the crops will be nearly twice as great as at present. The rapidity of the growth in production in the last few years, in comparison with former periods, will be evident from the following contrast:—

Total Production of Wheat, Barley, Oats and Rye in Canada.

Census Years.	Production Qrs.	Increase each Ten Years Qrs.
1911	76,000,000	+48,000,000
1901	28,000,000	+ 7,000,000
1891	21,000,000	+ 6,000,000
1881	15,000,000	+ 6,000,000
1871	9,000,000	—

In 1912 the yield per acre, owing to weather conditions, was rather less than in the previous year, while the crop of cereals was about the same. Of course, crops fluctuate from year to year according to the weather conditions; nevertheless it is apparent that, on the average, a very great increase in the agricultural output is taking place.

In Borrowings of Small Municipalities.

In considering the credit of Canada, investors should not fail to take into account the important fact that the large amounts of capital recently borrowed in this country have been for what may be termed foundation purposes, and that the amount of capital required in future in proportion to production will not be nearly as great as hitherto. For instance, a main line of railway is a relatively expensive piece of machinery, while a branch line is comparatively inexpensive.

Canada will soon have provided herself with all the main lines of railway she will need for a number of years to come, and the additional sum of capital needed for the construction of branch lines will be relatively small in proportion to the increased production they render possible. If Canada succeeds, as we believe she will do, in meeting all the obligations she has incurred in constructing the foundations, her ability to meet her obligations in subsequent years, when the burden of interest in proportion to production and income will be much smaller, will not be in question. It has recently been pointed out that the weakest spot in the financial situation of Canada lies in the borrowings by small municipalities. Doubtless these borrowings will ultimately prove of great advantage, but it would certainly have been wiser for the small municipalities to have waited, and, as it were, muddled along without any heavy burden of interest until they were in a position to borrow without embarrassment. But even the municipalities which may have borrowed larger sums than their rateable value in a period of depression may warrant, may succeed in getting through without serious difficulty.

Credit is Protected.

In gauging the strength of these smaller municipalities, it should not be forgotten that the Canadian government is alive to the necessity of assisting and protecting the credit of the country wherever it may seem to need assistance. Its action in guaranteeing the first mortgage bonds of the Grand Trunk Pacific and Canadian Northern railways rendered valuable assistance to these two companies in raising the great sums of capital required for their construction.

Moreover, its recent action in giving fresh help to the Grand Trunk Pacific and the Canadian Northern railways in completing the construction of their systems is further evidence of wisdom and of benevolence. The Canadian government has recently arranged for a loan of $15,000,000 of cash at 4 per cent. for 10 years to the Grand Trunk Pacific Railway to enable the company to complete its lines and to provide equipment. It has also agreed to grant an extra subsidy of $10,920,000 to the Canadian Northern to enable it to complete its transcontinental railway from Ottawa to Port Arthur, and of $3,120,000 in connection with a line of 260 miles from Edmonton to the British Columbia boundary, as well as a normal subsidy of $1,600,000 in connection with a line of 250 miles from Toronto to Ottawa.

Revenue from Customs Duties.

In recent years the Canadian government has derived a great revenue from its customs duties, and is consequently in a position not only to assist the railways to complete their transcontinental lines, but to take any other action essential for the credit of Canada. Should it be found that some of the smaller municipalities have borrowed rather more money than they can well take care of under existing circumstances, it is not improbable that the Canadian government will assist them by some means or other, directly or indirectly, to balance their accounts until their populations and their incomes permit them to take care of their obligations without unduly burdening their citizens.

It is obvious that the effect upon Canadian credit of any inability on the part of municipalities to meet their obligations would be out of all proportion to the amount of money involved, and inasmuch as the Canadian government has shown so much wisdom in managing the finances of the country and bringing about a great development at small cost to the people of Canada, we have no doubt that it will, if absolutely necessary, be prepared to grant assistance to the municipalities.

Doubtless the government will not do this without taking precautions against any subsequent over-borrowing, and will exercise a certain measure of supervision over the finances of all Canadian municipalities in future. This would be in line with the policy of this country in placing a limit on the borrowing powers of municipalities and in rendering assistance to the smaller municipalities by lending them money at a low rate of interest by issuing local loans stock with a government guarantee.

Remove Source of Danger.

By exercising general supervision over the borrowings of municipalities, and by creating what may be termed a local loans fund for the assistance of the smaller municipalities, the government of Canada would undoubtedly remove an unexpected source of danger, while enabling the municipalities to borrow on much easier conditions than they can raise money at present. The municipalities are, of course, directly responsible to the state authorities, but, if necessity demands, some arrangement can doubtless be made to employ jointly the credit both of the Dominion and of the provincial governments for the purpose of assisting the smaller towns.

Some misapprehension recently arose as to the offer of the Canadian Pacific Railway to redeem in cash £7,191,000 of five per cent. bonds which do not mature until July, 1915. It was anticipated that holders of these bonds to the extent of only about £1,500,000 would accept repayment in cash at once, whereas the applicants for cash reached about £4,200,000. This caused a scarcely anticipated demand upon the company's bankers—the Bank of Montreal—for about £2,500,000 of money more than anticipated. The bonds will, of course, be paid off out of the £21,000,000 of new capital issued by the Canadian Pacific Railway at the beginning of January, and upon which the remaining two instalments of 20 per cent. each are payable in August and October. An offer has now been made to redeem the balance of the bonds —£3,000,000—on January 1st next.

Bank of Montreal.

Canada is indeed fortunate in possessing among its many banks an institution as strong as that of the Bank of Montreal, which, while supplying a large part of the banking facilities of Canada, does not forget the importance of taking care of the country's foreign obligations. A borrowing country can, of course, never be certain that the influx of capital will continue without a halt, or that some accident to its crops may not temporarily affect its ability to pay for its imports and meet the interest upon its debt to an outside country. In consequence of the knowledge that has been gained, not without experience of an unpleasant character, all the borrowing countries have built up large balances with which to meet any adverse condition of the foreign exchange.

The Indian government possesses not only a large stock of gold, but a great quantity of securities which it can at any time sell should a failure of the monsoon create difficulties in meeting its obligations for interest and services by exports of produce. Argentina possesses a stock of gold in Buenos Ayres amounting to £52,000,000, a stock which would become largely available for export should the trade balance of the country with other nations render an export of gold essential. Brazil has now built up a stock of £25,000,000 of gold, and this is also a fund which in case of necessity would be available for export.

Dominion and International Exchange.

The United States possess an immense amount of gold both in the Treasury at Washington and in the banks which would be available for export should necessity arise. Canada also owns a large balance of cash available to meet any adverse movement of the exchange. At the end of May last the balance amounted to nearly £20,000,000, plus any sums of gold in Canada which could be made available. This balance of £20,000,000 or $96,000,000, consists of gold and short loans made by the Canadian banks in New York and in London. The greater portion of this cash balance is owned by the Bank of Montreal, which has no less than $54,365,000, or £11,000,000 sterling of money, on call in New York and London.

At a time such as this, when the world is experiencing some difficulty in obtaining supplies of new capital in consequence of the political situation in the Balkans and the indisposition of Continental and American investors to place their capital freely, the existence of these large Canadian balances in New York and in London gives a measure of confidence to the Canadian people which otherwise they could not enjoy. Furthermore the Bank of Montreal is the banker of the Canadian Pacific Railway, and receives the large sums of capital raised from time to time by that great undertaking.

Canadian Pacific Railway Cannot be Overlooked.

Indeed, in considering the financial situation of Canada in all its aspects, the ability of the Canadian Pacific Railway to raise capital under any conceivable circumstances should not be overlooked. During the past year the Canadian Pacific has earned a profit upon its stock equal to a dividend of 20 per cent., and not only is there no difficulty in maintaining the 10 per cent. dividend, but a still larger dividend could be and may be paid. One cannot imagine a condition of things, therefore, that would prevent the company from raising all the additional capital it may require; and the capital raised by the Canadian Pacific for the construction of branches is a factor of importance in considering the trade balance of the country at any given moment.

A third factor of importance is the high credit of the Dominion government, which has not added appreciably to its indebtedness for many years.

Canada is not Only Country Affected.

In 1892 the net debt of Canada was $241,000,000, and last year was still only $340,000,000, an increase of no more than $99,000,000, or £20,000,000, in 20 years; while the increase in the funded debt of the country in this period was less than $70,000,000, or £14,000,000. The total amount of funded debt is $276,000,000, or £56,000,000. It is obvious that the Canadian government would have no difficulty in raising loans for considerable sums if it needed to do so to provide for the capital expenditures of the country on railways and other public objects.

In brief, it is evident that the country has now almost accomplished the large amount of foundation work and initial capital expenditure which could not be avoided, and that comparatively small expenditures of capital in the next decade in proportion to the growth of population will immensely increase the productive power and income of the country. Provided that British investors have no real cause to question the safety of their capital in consequence of inability of municipalities or others to meet their interest obligations, there are good grounds for expecting that British capital will continue to flow into Canada in order to continue the work of development which has made such wonderful progress in the last few years. Doubtless, the relatively high rates of interest which capital now commands throughout the world will confine the demands for capital for a time, at any rate, to really strong borrowers able to satisfy their needs at reasonable rates. However, this applies not only to Canada but to all countries.

◆

The gross earnings of all Canadian railroads reported for June show a gain of 6.1 per cent., as compared with the earnings of the same roads for the corresponding period of a year ago.

PACIFIC COAST HARBORS

New Westminster Commences Improvements—Farmers and Lumbermen—Oriental Landowners

(Staff Correspondence).

Vancouver, July 12th.

The board of trade of Duncan, a prosperous town midway between Victoria and Nanaimo, on Vancouver Island, has taken up a matter, the principle of which came prominently before the world in the recent Japanese legislation passed by the State of California. The Duncan board would induce the government to pass a law to make it impossible for people other than members of the white races to hold land in British Columbia. The Pacific coast is different from the other parts of Canada in this respect, for here are to be found the Hindus, Chinese and Japanese, as well as negroes. The Hindus have made a specialty of the land business, and although it is but a few years since the first arrivals came, some are now fairly well off. The Duncan board of trade is seeking the co-operation of other public bodies in its agitation.

Cheaper power rates is a question discussed at some length by meetings of Vancouver ward organizations. It came up at a meeting of the ratepayers in the east end of the city, and a resolution was passed that the city of Vancouver be requested to acquire a power plant of its own, to control also the lighting service. An effort will be made to have adjacent municipalities take this matter up jointly.

Farmers Have Difficulties.

Difficulties that beset the tiller of the soil were mentioned at a meeting of the civic market and industries committee this week, by Mr. S. H. Ford, a Pitt Meadows rancher. He complained that owing to the actions of the commission men, who were united, the farmers got nothing of profit out of their products. Methods of the meat dealers precluded the selling of meats by the farmer at hotels and cafés. Moreover, farm lands were assessed very high, and protest to the government was of no avail. He said that the farmer was being driven to organization, and he suggested that something be done so that the producer and the consumer could get closer together. That would mean better prices for the farmer and cheaper living for the people.

Just now the government has an agricultural commission at work, and a member of it will go to the Antipodes to ascertain what is done in that country to help the man on the land. Mr. Ford, for instance, suggests that the farmer be bonused, since every other industry is helped one way or another. The commission will not report for some time, but it is very probable that it will suggest a use for some of the big surplus of the government along a line of financing the bona fide settler. All that is done now is by constructing roads, and when these are built real estate owners seize the opportunity to advance the price of the land, quoting the road as an asset. The land question is becoming very live in British Columbia, and scarcely a day passes but what it is discussed by some public body either on the mainland or on Vancouver Island.

Coast and interior lumber manufacturers are to hold a joint meeting to discuss the situation. Not much is doing in the industry just now, and conditions are as bad as any time during the last few years. There is little prospect of improvement for three months at least.

Harbor Improvements Started.

Driving the first pile in the first unit of the New Westminster harbor scheme was an occasion of celebration in the Royal City on the Fraser. The wharf will be 177 feet into the river, and will be nearly a mile and a half long. The development of a comprehensive harbor scheme in New Westminster will be of great benefit to the whole of the Fraser River valley.

This week tenders are being advertised for the $750,000 dock that the government will construct on Burrard Inlet in the east end of Vancouver. It will be 1,000 feet long and 300 feet wide, with three railway tracks in the centre.

Some time ago there was considerable discussion of preparing docks for to handle traffic that would develop when the Panama Canal was open, and indications are that the necessary facilities will be ready when required. Victoria's docks are already under construction. At the capital, a very large amount of money is to be spent on an extensive dock scheme, and when the wharves are completed they will have few equals on the Pacific coast.

Mr. Duncan McLeod, of Glasgow, Scotland, who is on a trip to the Coast, is sure if the possibilities of Western Canada were fully known and the certainty or safe investments thoroughly appreciated by depositors, an enormous amount of capital could be diverted to this part of the Dominion.

Another railway project is being brought to the attention of the public by Mr. Edward Bath, of London. The proposed route is from Bella Coola to Red Deer, Alta., and Mr. Bath says that preliminary surveys have been arranged for. He will seek the assistance of both the provincial and federal governments. Already there is a plan to have a railway run east from Bella Coola to Hudson Bay along a more northerly route. These lines would tap the country east and west between the main lines of the Grand Trunk Pacific and Canadian Pacific Railway.

◆

WANT UNION LIFE AFFAIRS PROBED.

The British shareholders of the Union Life Assurance Company want an investigation into its collapse. Mr. C. S. McInnes asked for this at a meeting at the office of Mr. Kappele, official referee, Toronto, to appoint a liquidator. He represented shareholders who had invested over $600,000 in the company.

Mr. G. T. Clarkson was appointed liquidator. Mr. Finlayson, the interim liquidator, desired to be relieved as his public duties prevented him continuing in that capacity.

Mr. Kappele pointed out that it was the duty of the liquidator to see that there was a thorough investigation into all matters. Mr. McInnes stated that his clients were anxious that there should be no delay, and if there were not sufficient funds an appeal to the Dominion Government would be necessary. The referee informed him the matter would be developed shortly. Mr. Clarkson's bond was fixed at $5,000.

Mr. Finlayson reported releases in regard to the claims of Mr. Millichamp, medical referee, and Mr. Carrie, comptroller, providing for the payment to each of $5,250, less $2,250 liability on unpaid stock. The referee approved the mutual release between the company and the National Agency.

◆

METROPOLITAN LIFE ISSUES STATEMENT

The Metropolitan Life Insurance Company, New York, has issued a special bulletin to its field force in Canada, concerning its absorption of the Union Life, which reads in part as follows:—

"We have made an agreement for taking over and are now engaged in assuming the business of the Union Life Assurance Company of Canada, head office at Toronto, Ontario. We have, also, taken into our service the former superintendents, assistant superintendents and agents of the company. Thereby there has been made in addition to our weekly debit of about $9,000, and to our account of outstanding insurance in the ordinary department of about $3,000,000.

"There may be some instances where, by the accession of business and territory from the Union Life, new and permanent districts will be created, independent of the districts in which the Metropolitan is now represented. In addition it is in contemplation to divide other districts, independently of the assumption of the Union Life's business by the Metropolitan. If and when new superintendencies be created, consideration will be given to those who have come into our service from the Union Life, without, however, discriminating against other candidates who, by long service and creditable records with the Metropolitan, merit our recognition and are eligible for promotion. The fitness of the man for the place will, in every instance, govern our choice, and in making our selection we shall do exact justice to all concerned, in the light of our best judgment, and in a spirit of entire impartiality.

"A requirement of the Metropolitan that admits of no exception, is that every man in its service shall realize that the company's most solemn duty is to its policyholders—that policyholders shall always be treated fairly, courteously and with the most patient consideration. Harshness toward them will under no circumstances be tolerated, much less deceit or misrepresentation in dealing with them.

"We demand that every application written shall be with full knowledge on the part of the applicant of the provisions of the contract to which he is invited to become a party; that the proposed insured shall undergo an actual physical examination or inspection as may be required; that when the policy is issued its owner's rights shall be respected; that while advance payments are to be commended, they are not to be had by threatening a lapse, or by compelling the policyholders to call at the Metropolitan office to pay his premiums, because, perchance, he avails himself of the right accorded him to keep his payments two or three weeks in arrears. That he is not to be persuaded to carry more insurance than he can readily pay for, thereby imperiling not only the additional insurance, but the original insurance as well."

VALUE OF LIFE INSURANCE

XXI.

Endowment Insurance versus Consols

BY C. A. HASTINGS

Most persons are acquainted with the fact that "Consols" is the premier stock on the London Stock Exchange. They also know how that stock has declined during the last ten to fifteen years. In this article consols are compared with endowment assurance, and, though I am not asserting that no one should purchase securities, I do say, however, that life assurance is a better investment for some people. Where can the ordinary person obtain special influence, inside news, or experience which will give him success on the stock exchange or the land market? It is done, and we hear of these isolated cases, but never of the cases where the investor has experienced a reverse.

Insurance and Securities.

Take, for illustration, a man aged thirty, who has purchased a $1,000 fifteen-year endowment with profits, say at $67 per annum. He has paid in fifteen years $1,005, add profits, which in the case of a first-class life office—should be $375; total value at end of fifteen years=$1,375. Now then, the average price of consols for the same period is, say, $800 for every $1,000 stock. In fifteen years price has depreciated on $1,000 stock $300; income tax in fifteen years would amount to $25; total interest on $1,000 stock, $390, net result in the way of interest, $45.

Endowment Assurance.

Paid in 15 years	$1,005
Guaranteed sum	1,000
Plus reasonable bonus	375
Total	$1,375

Consols Purchase.

$1,000 stock for		$800
Interest in 15 years		390
Total		$1,190
Less depreciation	$300	
Less income tax	25	
		325
		$865

This will show a net gain in fifteen years of $65 on the consols purchase, against a net gain of $370 on the endowment purchase in addition to the other added advantages of the endowment assurance, which are so well known.

Some Questions to be Answered.

I am aware of the fact that I have taken an example of a stock which perhaps no one in this country would dream of purchasing, but any of my readers can compare this with any $1,000 investment they have recently made, and then figure out the following questions:—

(1) Who pays the balance of instalments in the event of premature decease?

(2) If paid for in a lump sum, what percentage was allowed for cash?

(3) What guarantee has he that at the end of fifteen years he can find a free market for cash?

(4) What guarantee has he that the price will not have depreciated at the end of fifteen years?

One of the best investments any man can make is to buy assurance for cash every year, maturing at given periods, so that late in life he will have a policy maturing yearly with a substantial bonus addition. Absolute safety, and no worry as to depreciation of capital.

The following articles in this series have already appeared:—

(1) March 1st—How to become one's own master.
(2) March 8th—How depreciation of assets can be met.
(3) March 15th—How to borrow at a profit.
(4) March 22nd—The automatic production of capital.
(5) March 29th—How to redeem debentures.

◆

SOVEREIGN LIFE SASKATCHEWAN HEADQUARTERS.

The Sovereign Life Assurance Company has just established its headquarters for Saskatchewan at Moose Jaw, having appointed the Ralph Manley Agency Limited its provincial managers. Business originating in Saskatchewan will be handled through the Moose Jaw office. The Sovereign Life was organized in Toronto, but now has its headquarters at Winnipeg. Mr. William Grayson, of Moose Jaw is a director of the company.

◆

GENERAL FINANCIAL CORPORATION OF CANADA.

The first year's returns of the General Financial Corporation of Canada show a satisfactory result. This corporation has a capital of $3,000,000 and was promoted by the same group of Belgian capitalists who had already founded the Mortgage Company of Canada, the Land and Agricultural Company of Canada, the Belgo-Canadian Fruit Lands Company, and other concerns interesting Belgian capital in Canadian investments.

The General Financial Corporation of Canada has a comprehensive charter with the particular object of taking an active part in the commercial and industrial development of Canada, and also in the underwriting of municipal, provincial and Government loans. The corporation's Canadian head office is at Winnipeg, where Mr. A. Gouzee is managing director.

◆

AMES HOLDEN-McCREADY COMPANY.

The Ames Holden-McCready Company's profit and loss statement report for the year ended April 30, 1913, shows:—

		1912-13	
Balance brought forward on May 1st		$169,569	
Less expenses applicable to 1911		852	
Actual amount brought forward		$168,717	
Net earnings for year after providing for administrative, selling and other expenses			$351,390
Provisions:			
Sinking fund	$20,000		
Depreciation	15,000	35,000	
Written off:—			
Alterations	$2,008		
Organization, Company	4,124		
Organization, factory	4,686	$10,818	
Interest on bonds		60,000	105,818
Left for dividends			245,572
Dividend on preferred stock			175,000
Surplus profit for year			70,572
Brought forward as shown above			168,717
Carried forward to profit and loss on April 30, 1913			$239,289

These results were better than those of the previous year, when the net profits were reported at $281,345. From this was deducted $240,000 for bond interest and preferred dividends—which was more than during the past year—and the balance was $41,345. Evidently there had been brought forward at the beginning of that year a balance to the credit of profit and loss of $251,183, because after the sum of $122,963 had been provided for depreciation and organization expenses, the company carried forward a reduced balance, as shown above—$169,569, less the $852 shown. Depreciation and organization write-off during the past year does not appear to have been anything as large as a year ago.

◆

During the first six months of 1913 the losses by fire at Hull, Ont., were $9,120. The amount of insurance paid was $7,058 out of an insured total of $59,225. The damage without insurance was $2,062. There were 92 alarms registered and nearly all of these were fires, there being very few false alarms. For the same six months of last year the damage from fire amounted to $20,092.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Knowlton, Que.—July 4.—Mr. D'Arcey's residence. Loss and cause unknown.

Kingston, Ont.—July 9.—Saints' Rest, Maitland Street. Loss $25. Cause, sparks.

Tamworth, Ont.—July 16—Mr. H. Ripley's barn. Loss unknown. Cause, lightning.

Ottawa, Ont.—July 10.—Gibson's Hotel, Metcalfe Road. Loss $5,500. Cause, lightning.

Norton, N.B.—July 9.—Mr. W. R. Carson's blacksmith shop. Loss and cause unknown.

Aylmer, Ont.—July 7.—Two frame houses on Eardley Street. Loss $2,000. Cause unknown.

Point Perry, Ont.—July 2.—Mr. Mills' planing mill. Loss unknown. Cause, supposed sparks.

Brandon, Man.—July 16.—Canadian Northern Railway

South Branch, N.B.—July 9— Mr. J. Warren's grist mill, South Branch Kent Company. Loss and cause unknown. elevator. Loss unknown. Cause, supposed incendiary.

Brantford, Ont.—July 11.—Mr. Newman's butcher shop, Erie and Eagle Avenues. Loss $50. Cause unknown.

Leamington, Ont.—July 9.—Mr. H. Emerson's farm buildings, Talbot Road East. Loss $3,000. Cause, lightning

Montreal, Que.—July 8.—Rear 410 Gertrude Street, owned by Mr. T. B. Gareau, La Salle Road, Verdun. Loss $1,000. Cause, supposed cigar stub.

Guelph, Ont.—July 8.—Mr. Lewis' residence. Loss, building, $600. Cause, supposed gas burner.

July 11.—Mr. H. H. O. Stall's automobile. Loss $1,000. Cause unknown.

London, Ont.—July 15.—Beck's box factory. Loss $10,000; Messrs. Johnston & Murray's store. Loss, stock, $35,000, building $8,000. Cause of both fires unknown.

June 16.—London Asylum piggeries. Loss and cause unknown.

St. John, N.B.—July 12—Mr. Farrel's building, Canterbury and Church Streets, occupied by Metropolitan Shirt Waist Company, S. J. McGowan Manufacturing Company, Limited, R. Hunter, Limited and T. P. Kane. Loss $12,000. Cause, supposed stove.

Meaford, Ont.—July 9.—Georgian Bay Elevator Company, Meaford, elevator destroyed. Loss, building and machinery, $130,000; insurance, $85,000; contents, $90,000. Insurance covers loss. Ross & Wright, Toronto, adjusters for Georgian Bay Elevator Company and Georgian Bay Milling and Power Company, the latter owning $30,000 of contents. Seamans, Kent Company. Loss, lumber, $30,000. Cause unknown.

Toronto, Ont.—July 11—Mr. F. Dorst's stable, 647 Gerrard Street East. Loss $450. Cause, supposed incendiary.

July 12—Sherbourne Street bridge. Loss unknown. Cause bonfire. Store 376 College Street. Loss $150. Cause unknown.

July 14—Butwell's brickyards, Humber Bay. Loss $1,000. Cause unknown. 273 King Street W. Loss $55. Cause supposed incendiary. 70 Elm Street. Loss $100. Cause unknown.

Bridgewater, N.S.—July 11.—Business block. Loss $90,000. The block affected by the fire was occupied by the Bridgewater Dry Goods Company, owned by Messrs. Manchester, Robertson & Allison, of St. John, and carrying a large stock of dry goods, ladies' wear, carpets, millinery, etc. In the block also were Johnson's bakery, Cahoon's barber shop, two stores of DuCosse Brothers with a large stock of dry goods and gentlemen's furnishings. In the second story were the residences of Mr. Fred Carter, engineer of the Halifax and South-Western Railway, and Mr. Johnson.

Calgary, Alta.—July 10.—Pryce-Jones store, First Street West. Loss $20,000. The Pryce-Jones store is insured for the value of $617,500, all of this with H. H. Motley & Company, Limited, Grain Exchange Building. The loss will be adjusted by Messrs. H. H. Motley and E. H. Lilly. The following is the list of insurance on the store: American, New Jersey, $10,000; New York Underwriters, $10,000; Hartford, $5,000; Queen, $5,000; Alliance, $5.000; Caledonian, $10,000; Aetna, $25,000; American Central, $10,000: Yorkshire, $10,000; Union $5,000; Union, $5,000; Hartford, $10,000; Royal Ex., $30,000; Union, $10,000; Phœnix, of London, $10,000; Sovereign, $10,000; St. Paul,$5,000; Aetna,$25,000; Canadian, $10.000; N. B. and Mer., $35,000; L'Union Fire, $5,000; Northern, $20,000; Scottish Union and National, $10,000; Guardian, $15,000; National Union, $20,000; British and Canadian Underwriters, $5,000; Duquesne Underwriters, $5,000; Imperial Underwriters, $10,000; Employers' Liability, $30,000; Palatine, $15,000; Liverpool and London and Globe, $60,000; Prov. Wash., $25,000; Norwich Union, $5.000; British American, $20.000; Acadia, $15,000; Law Union, $5,000; Firemen's, $10,000; Protector Underwriters, $5.000; National, $30,000; Canadian National, $5,000; London, $7.500; Royal, $10,000; Commercial Union, $20,000; Home, New York, $10,000; Springfield, $5,000. Cause unknown.

VANCOUVER'S JUNE FIRE LOSS.

Vancouver's total loss by fire during June was $9,253, with insurance paid $7,305 leaving the loss above insurance $1,948. The value of property involved was $100,600. The fire department responded to 44 alarms during the month divided as follows:—False alarms, 1; chimney fires, 5; smoke scares, 4; building collapsed, 1; fires where damage occurred, 14; rubbish piles, bush fires and small fires where no damage occurred, 19. A complete list of fires where damage resulted follows:—

June 4th.—Verbal alarm at 11.40 p.m. Fire in two-story frame building at 257 Hastings Street East, owned by Mr. Buttimer and occupied by Orr and Wait and used as a second-hand store with rooms above. The fire, which started from a defective chimney, had a good start on arrival of the fire apparatus and owing to a defective hydrant, some delay was caused in getting the water turned on. The blaze spread to the adjoining building at 253 Hastings Street E., owned by E. Matheson and occupied by Mr. Humphreys and J. Zouboules and used as a restaurant, hat factory and furnished rooms above. Considerable damage was done to both buildings before the fire was extinguished. Damage about $2,700 partly covered by insurance.

June 10th.—Telephone alarm at 7.41 a.m. Small fire on roof at 305 Georgia Street, caused by flying sparks. Building owned by Captain McDowell and occupied by G. Cook and used as a dwelling. Damage, $3.

June 10th.—Telephone alarm at 11.17 p.m. Fire in curtain scenery in rear of the Panama Theatre, 36 Hastings Street W., caused by a spontaneous combustion. Building owned by Begg and Godson and occupied by R. Unsworth and used as a theatre. Damage $500 covered by insurance.

June 17th.—Telephone alarm at 1.07 a.m. Fire in two-story frame building at 716 Main Street, owned by Alfred Roy and occupied by Carefoot and Brady and used as a second-hand store. The blaze apparently started in the rear of the store from some cause unknown, considerable damage resulting to the stock before the fire was extinguished. Damage $3,075 covered by insurance. Alarm from Box 429 at 7.10 a.m. Small fire in taxi-cab at Fourth Avenue and Vine Street caused by back fire in carburettor. Machine owned by the Union Taxicab Company. Damage $5.

June 23rd.—Alarm from Box 52 at 8.55 a.m. Fire in furnace room in the basement at 900 Dunsmuir Street, caused by rubbish accumulating near the furnace. Building owned by G. Thomas and occupied by Mrs. Coburn and used as a rooming house. Damage $155 covered by insurance.

June 24th.—Alarm from Box 1215 at 2.55 a.m. Fire in bedroom at 255 Thirteenth Avenue E., caused by an electric light being left on the bed. Building owned by Mr. Galbraith and occupied by R. Patton and used as a dwelling. Damage $60 partly covered by insurance.

June 25th.—Telephone alarm at 8.50 a.m. Fire in chicken brooder at 3003 Seventh Avenue W., caused by lamp becoming overheated. Building owned by Mr. Copley and occupied by R. H. Taylor. Damage $55. Telephone alarm at 12.27 p.m. Small fire in bedroom in house at the rear of 1627 Fourth Avenue W., cause unknown. Building owned by W. E. Law and occupied by N. Napole. Fire out before the arrival of the fire apparatus. Damage $65 partly covered by insurance.

June 26th.—Telephone alarm at 11.28 a.m. Small fire in room at 577 Richards Street, caused by spirit lamp setting fire to window curtains. Building occupied by Miss N. Foucar and used as a rooming house with stores below. Damage $10 covered by insurance. Telephone alarm at 11 p.m. to 1175 Seventh Avenue W., where a two-story frame dwelling was destroyed. Building owned by J. Morrison and occupied by J. H. Price. The house was a mass of flames on arrival of the apparatus and with the contents were totally destroyed. Damage $2,100 partly covered by insurance.

June 27th.—Alarm from Box 2258 at 1.02 a.m. Fire in one story frame residence at 3441 Napier Street, owned and occupied by S. Carson. Both building and contents were totally destroyed before the arrival of the fire department. Fire caused by an overheated stovepipe. Damage $500 covered by insurance. Telephone alarm at 4.15 p.m. to the Paterson Lumber Company's plant, north end of Connaught Bridge; small fire on roof of dry-kiln caused by flying sparks. Damage $25 covered by insurance.

The total number of alarms was 44, false alarms 1, chimney fires 4, property involved $100,600, loss $9,253, insurance paid $7,305, loss above insurance $1,948, hose laid at fires 14,600 feet, chemical used 615 gallons.

The final accounts of the Intercolonial Railway of Canada for the fiscal year show a net surplus of $800,000. This is about $100,000 less than the estimate of the Minister of Railways, when he made his annual statement in the house.

WE OFFER AT

100 and Interest Carrying a Bonus of 25 per cent. in Common Stock, the Unsold Balance of

$300,000.00

WILLIAM NEILSON, LIMITED

(Incorporated under the laws of the Province of Ontario.)

TORONTO, CANADA

6% First Mortgage 20-Year Sinking Fund Gold Bonds

DENOMINATIONS $100, $500 and $1,000

With Sterling equivalents at $4.86 2-3 to the pound.

Bankers .... The Standard Bank of Canada

TRUSTEE AND TRANSFER AGENT: National Trust Company, Limited, Toronto.

The legal opinion of Messrs. Blake, Lash, Anglin & Cassels as to validity of the issue is furnished.

CAPITALIZATION

	Authorized	Issued
7% Preferred Stock	$500,000	$250,000
Common Stock	500,000	500,000
6% First Mortgage Bonds	300,000	300,000

ASSETS, January 2nd, 1913

(As per certificate of Price, Waterhouse & Co.)

Buildings, Machinery and Equipment (per valuation Canadian Appraisal Co.)	$425,587.93
Land (per valuation of H. H. Williams & Co.)	77,230.00
Current assets, less current liabilities	42,215.15
Automobile truck not included in appraisal	4,302.00
Total net assets	$549,335.08

The entire assets of the Company, amounting to $622,398.91, as per balance sheet furnished by Price, Waterhouse & Co., are covered by first mortgage and covering debenture as security for the bond issue. (Insurance carried as protection for the bonds, $460,000.)

EARNINGS

(As per certificate of Price, Waterhouse & Co.)

After providing for renewals and repairs, but before charging interest on indebtedness to be discharged out of the proceeds of the present issue, and before providing for depreciation, the net profits from operations for the year 1911 and 1912 were as follows;—

Year ending Dec. 31, 1911	$75,702.38
Year ending Dec. 31, 1912	84,273.12

Estimated net earnings for the current year are..$118,663.57

(Earnings for six months ending June 30, 1913, have exceeded this estimate.)

(Annual bond interest requirements, $18,000.)

SALES

1910	$240,273.89
1911	358,424.04
1912	$508,370.81
1913 (estimated)	720,000.00

Application will be made to list the bonds and stock on the Toronto Stock Exchange. Fractional shares will be adjusted at the rate of $40 per share. Payment may be made as follows:—

PLAN "A"

25% of the par value with application.
75% of the par value on allotment.

PLAN "B"

10% of par value with application.
15% of par value on allotment.
25% of par value Sept. 1, 1913.
25% of par value Oct. 1, 1913.
25% of par value Nov. 1, 1913.

OVER SIXTY THOUSAND GRAND TRUNK HOLDERS

This is Eight Thousand More Than Two Years Ago—Effort to Secure Control

According to a statement given to *The Monetary Times* by Mr. E. J. Chamberlin, president of the Grand Trunk Railway, the number of Grand Trunk shareholders on the company's register is 62,740. The number of stockholders naturally varies from day to day, and the figures mentioned are the number on the occasion of the issue of the last half-yearly report of the company. This number includes the holders of the Grand Trunk 5 per cent. debenture stock and of the 4 per cent. consolidated debenture stock but not the registered holders of the Great Western and Northern debenture stocks, who have no voting power and consequently do not receive the report. The holders of the last-mentioned stocks may be taken at approximately 3,000.

Holdings Two Years Ago.

In 1911, Grand Trunk shares were held by 54,200 persons, against 52,900 in 1910. The shares of this road are held almost exclusively in the British Isles. The late Mr. Charles M. Hays told *The Monetary Times* in 1911 that from 75 to 90 per cent. of Grand Trunk shareholders were resident in Great Britain.

It will be recollected that Sir Thomas Shaughnessy informed *The Monetary Times* recently that the total number of Canadian Pacific common stockholders at present is about 27,000. The number of Grand Trunk shareholders probably comes second only to the Pennsylvania Railroad in America, which recently reported 64,689 shareholders.

Effort to Secure Control.

While discussing Grand Trunk holdings a cable message from London this week, stating that the latest effort to secure control of the Grand Trunk and to transfer its headquarters to this side of the Atlantic has failed, is of interest. A speculative group which was working some time ago got rather out of its depth, says "Windermere's" message, and became known to many. Their options are not to be exercised, and stock bought speculatively had to be further liquidated. More options mature in October, but for the time being the group has shot its last bolt. The fiasco is said to explain partially the recent weakness in Grand Trunk issues.

◆

STRIKE OF THE LONDON UNDERWRITERS

Perhaps the most interesting point in this week's finance has been the breakdown, or the temporary suppression, of the agreement made a month ago by financial underwriting groups when they decided not to help the issuing houses with any more loans, says an Annalist letter from London. It was a very remarkable move and it has been remarkably successful, but to understand it one must remember that the old theory of underwriting has been completely discarded. Theoretically the man who has a new issue in hand takes the prospectus, goes around to a few friends and offers them a commission if they will undertake to come in for what the public does not want. The underwriter by the same theory looks at the prospectus, weighs its advantages and accepts or declines the commission. In practice the big financier has a regular list of underwriting syndicates, all more or less closely connected with the Stock Exchange, which agree to take up to a certain amount of any issue that the financier may be bringing out. He gives what in insurance circles would be known as a "cover"; he does not see the prospectus; he does not pick and choose; he is merely told that the loan is coming out and his share is so much.

Many Stock Exchange firms reckon to make quite a large amount every year by this means, and brokers with a moderate sized business may perhaps make $3,000 or $4,000 a year out of one man's underwriting. But it is a dangerous practice for the broker because his judgment is put out of action and good, bad and indifferent all have to be swallowed. Consequently when times are difficult and his clients little disposed to invest he may get enormous quantities of stock on hand, much larger than he can with safety hold.

Hence the resolute attitude of underwriters in the past month. Under their standing agreements they had been loaded with masses of securities and their capital was extended to its fullest capacity. As a matter of course they had to take their share because they had really not been underwriting at all: they had been buying under agreement bigger quantities than they wanted at a price not below the market quotation. They are not running risks, but financing certain failures. That is where the new underwriting differs from the old.

NINE MILLION ACRES UNDER SPRING WHEAT

Last Month, Canada's Crops Maintained Favorable Average of Previous Month

Reports received from correspondents at the end of June enable the Census and Statistics Office to issue finally revised estimates of the areas sown to spring crops this year and also estimates of the areas devoted to the later sown cereals and hoed crops. With regard to wheat the reports are entirely confirmatory of those issued a month ago, and the area under wheat in Canada is therefore finally placed at 9,816,300 acres or 57,900 acres more than in 1912. The area in spring wheat is 8,990,500 acres or 13,100 acres more than in 1912 and the area to be harvested of fall wheat remains at 825,800 acres. Oats are estimated to occupy 9,646,400 acres, an increase of 429,500 acres, barley 1,430,800 acres, an increase of 15,600 acres, rye 127,200 acres, a decrease of 8,910 acres, and hay and clover 7,621,600 acres, a decrease of 12,000 acres.

The acreages under the later sown cereals and hoed crops are estimated to be as follows:—Buckwheat 363,600, flaxseed 1,288,600, corn for husking 290,800, beans 58,850, potatoes 467,800, turnips, etc., 215,900, sugar beets 19,250, and corn for fodder 277,990. These are increases in the case of potatoes, turnips, etc., sugar beets and corn for fodder, but decreases in the case of the other crops.

In the Western Provinces.

For the three north-west provinces of Manitoba, Saskatchewan and Alberta the total wheat area is finally estimated at 9,013,800 acres, as compared with 8,961,800 acres last year; that of oats at 5,305,800 acres compared with 4,913,900 acres and that of barley at 857,700 acres compared with 809,900 acres—these differences representing increases of 52,000 acres for wheat, 391,900 acres for oats and 47,800 acres for barley, or 491,700 acres for the three crops.

During June the crops throughout Canada maintained generally the favorable average of a month ago. On June 30 the condition, expressed in percentage of the usual standard of 100, taken as representing the promise of a full crop, was as follows:—Fall wheat 81.46, spring wheat 87.80, oats 87.71, barley 88.39, rye 85.95, peas 87.43, mixed grains 87.12, hay and clover 71.52, alfalfa 77.23, and pasture 82.31. By provinces the condition is between 80 and 90 for the Maritime provinces, Quebec, Ontario and Manitoba. In Saskatchewan and Alberta the outlook at the end of June appeared to be especially promising, as the condition was above 90 in all cases excepting fall wheat, the condition of which in Alberta was 76.27.

Farm Live Stock.

Estimates of the numbers of farm live stock in Canada at June 30 are given as follows:—Horses 2,535,000, milch cows 3,064,900, other cattle 3,380,400, sheep 2,418,400, swine 3,254,400. These represent increases over the estimates published last year for all descriptions except "other cattle." The estimates are based upon the final figures of the census of 1911 for all the provinces except Saskatchewan, Alberta and British Columbia; so that the totals are still subject to final revision upon completion of the census results. The condition of all classes of live stock was reported as especially favorable on June 30, being 100 or above for horses, milch cows, sheep and swine and 97 for cattle other than milch cows.

◆

FINANCING WITH TREASURY BILLS

A cable message from London says that market conditions there are illustrated by two treasury bill renewals just completed, namely, $5,000,000 for the province of Saskatchewan at 6¼, and due in January, 1914, and city of Toronto $6,000,000 at 5¾ per cent. due in August, 1914. Those may be compared with $10,000,000 of Belgian Government bills renewed at 5¼ and due in July, 1914.

At the city treasurer's department, Toronto, this despatch was declared to be premature, as, while about £1,000,000 of treasury bills fall due in August next, there is money to meet these, and nothing has been mentioned in reference to a renewal. The only object in renewing the bills, it was stated, would be in case of getting a specially low rate, as funds are now available to meet the obligation. The city has just sold $1,000,000 in debentures privately to a New York brokerage house for 4⅞ per cent.

The Montreal city council decided this week to renew treasury bills for £750,000 due on August 12th.

Saskatoon's issue of treasury bills fell due a few weeks ago.

DEFENDING CANADA'S ECONOMIC POSITION

New York Criticism Brings Many Replies From the Dominion

An interesting discussion among Canadians of the economic position of their country, relating particularly to her immense consumption of imports bought on credit, followed the publication of a study of the situation there that was printed in The New York Times Annalist on May 12th. Mr. Fred R. Macaulay, in that article, said that no nation, whether in time of peace or of war, had ever so rapidly expanded its adverse trade balance.

In a general way, a somewhat strained position in credits is admitted by Canadians, but by common consent they declare that the growing imports to which attention was called are imports of capital goods to be used in further development of Canadian resources, and that these do not reflect upon Canada's business and financial soundness.

Professor James Mavor, head of the department of political science in the University of Toronto, in a long statement printed in Canadian papers says:—

"The excess of imports over exports in Canada, including specie, has been increasing during recent years by leaps and bounds. That this remarkable movement is worthy of serious attention cannot be doubted, but that in itself it affords cause for alarm cannot be admitted. Analysis of the imports shows conclusively, to my mind, that they consist of material for railway and other building construction to the largest extent and to articles for luxurious consumption to a relatively small extent. The loans which have been effected in England have entered the country chiefly in the form of goods from the United States, and if the analysis before mentioned is correct, these goods have predominantly been used for the purposes of development.

External Supplies of Capital.

"Again, if a country has had, as Canada as had, a period of very active constructional development, and has had the advantage of the importation of external capital. The utilization of this capital involves the investment of capital in numerous subsidiary enterprises, which are dependent upon the continuance of the external supplies of capital. Thus any check from whatever cause to the supply of capital from abroad must affect such enterprises almost immediately.

"It must be realized, so far as this country is concerned, that the amount of investment of English capital which it has been fortunate enough to secure within the past five years, forms actually a very large proportion—not less than 20 per cent. of the total amount of English capital applied for by the world. We are thus now thoroughly drawn into the network of international finance and we must suffer the disadvantages as well as enjoying the advantages of it. The situation in Europe has undoubtedly cleared, and with the passing of the tariff in the United States the situation there will soon be cleared also. Readjustment of the values of real estate in the urban centres in the north-west will undoubtedly have to take place before complete confidence in that region can be established."

As to the Trade Balance.

S. R. Tarr, of Winnipeg, delivering an address before a convention of credit-men a few weeks ago, said:—

"Passing from the borrowings and spendings of the west to those of Canada as a whole, we are brought face to face with the fact that last year there were over $5 worth of imports for every $3 worth of exports in the country's trade total of about one billion dollars, which means considerably more than a quarter billion dollar excess of annual buying over selling. Disparity in amount between exports and imports is inevitable to rapid upbuilding of a new country. The construction of permanent works, railways and so forth, and the opening up of new agricultural areas give rise to an increasing demand for foreign goods. Croaking critics sometimes make the mistake of counting our borrowings twice. They mention the fact that there is an import excess of over a quarter billion dollars and also that Canada's annual borrowings run to around a quarter billion. They add these items to make half a billion—forgetting that the two items are in a large measure equivalent statements of the one thing, since it is chiefly in the form of goods that borrowings abroad are brought into the country. More careful analysis of this matter than is usually given is highly desirable, if we are to know how we are heading.

"A London critic a year ago spoke of the alarming sum of $572,000,000 as being the fifteen years' excess of Canada's imports over exports. According to The Wall Street Journal, in less than half that time—in the seven years ending with 1912—675,000 newcomers from the United States have brought over $775,000,000 of tangible wealth into Canada.

"In so far as our excess imports, paid for by borrowings, are utilized in developmental work (whether for railroad building, necessary civic works, maunfacturing or business plants, housing newcomers, or for sustenance of labor engaged in developing the resources of a new land) they can legitimately be considered as capital expenditure. In such case excess imports do not constitute a real 'dipping into capital' at all, but an expenditure on capital account, calling not for lump repayment but for continuous profitable returns in time to come. Here is the crux of the whole. It is not a question of whether Canada continues to import vastly more than it exports during the next few years; it is a question of whether such excess of imports is brought about through upbuilding a solid commercial and industrial fabric, or whether it reflects business extravagance and the spending of capital as though it were income."

Omitted Essential Factors.

Referring to Mr. Tarr's address as a "reasoned and logical" reply to the critics, Mr. W. M. Ramsey, head of the New York agency of the Merchants Bank of Canada, writes in a letter:—

"Professor Macaulay draws his conclusions solely from the superficial figures afforded by the balance of Canada's trade, and takes no cognizance of the essential but invisible factors although acknowledging that there can be 'the continual favorable balance (of trade) of such a debtor nation as the United States. Mr. Tarr draws explicit attention to these other factors, which are as surely vital to the whole question as the aggregate of exports and imports."

Banks Saw It Coming.

A representative of the Canadian Bank of Commerce writes from one of the principal branch offices in Canada, in part, as follows:—

"Banks in Canada, as you know, have opportunities of seeing these things coming and have taken a decided stand in ample time to prevent financial panics and overspeculation. If one can judge from reports in the papers, it would appear that yesterday's market in New York indicated that conditions there were not too good, and it seems to us that the difficulty lies in the attitude of the Continental banks, especially in Germany, in selling a great number of American securities.

"Taking all in all, I would say that, generally, conditions are better to-day in Canada than they were three months ago, the banks are in strong positions and have their houses clean and in order."

The Monetary Times has previously dealt in detail with Mr. Macaulay's article.

THE SENTIMENT OF CAPITAL

We cannot confess to a heart wrung with anguish by the cry that the British investor will lend us no more money because the Senate killed the Naval bill. If the thrift of a borrowing country is any excuse for lending it money, then Canada must have acquired merit with the British investor for not throwing away thirty-five million dollars on three dreadnoughts which Winston Churchill said the German menace did not need.

British capital, we are told, is sentimental. Quite true. That is why it goes anywhere in the world where the security is sound and the interest sure. It probably feels sentimental toward Canada because we have always paid well and there has been no trouble collecting. That is enough to warm any creditor toward the object of solicitude. Capital, British or otherwise, will always adore with passion tender the country that returns its affection with interest. In this way alone, is British capital, or any other capital, sentimental. It dotes on us, so to speak, so long as we have the price. Its love is anywhere from four per centimental up.—Toronto Star.

◆

"I believe that 50 per cent. of the automobile claims in number and more than half in the amounts paid are due to cranking accidents. If, therefore, the users of automobiles would crank their cars with their left hands instead of their right, claims of this kind would be reduced fully two-thirds." This is the opinion of an accident underwriter of over 20 years' experience.

At 4½ per cent. the Bank of England rate remains at a level higher than any maintained at this time in July during any year since 1873. Furthermore, in 1873, the rate was at this time descending rapidly. It had been 7 per cent. in May, 6 in June, and it went down to 5 on July 10th. to 4½ on the 17th, to 4 on the 24th, to 3½ on the 31st, and to 3 in August. Not since 1875 has the Paris bank rate ruled as high as 4 per cent. in the middle of July.

PERSONAL NOTES

Mr. H. Pollman Evans, president of the Union Life and Home Life Insurance Companies, is on the way to England.

Mr. A. R. Doble, president of the Royal Securities Corporation, left Montreal on Wednesday on a trip to England.

Sir Max. Aitken is taking, under doctors' orders, two months' rest cure. He is now at a nursing home in Munich, Germany.

Mr. A. H. Walker, who has been chief inspector of the Sterling Bank for four years, has been appointed general manager by the directors. Mr. F. W. Broughall, the retiring general manager, will go to England to represent some important Canadian interests there.

Mr. Alfred Price, late general superintendent of the Canadian Pacific Railway in Calgary, has been appointed to a new position created by the company, that of assistant general manager of eastern lines, with headquarters in Montreal. Mr. Price was superintendent of Canadian Pacific Railway Toronto terminals from 1898 to 1903.

Mr. H. R. S. McCabe, who for the past six years has been connected with the London & Lancashire Life, latterly as manager of the Central Canada branch, Winnipeg, has resigned, and, it is understood, will assume an important position with a new life office now in course of formation, which will have its headquarters in one of the Western cities.

GRAND TRUNK PACIFIC DEBENTURES

A by-law was passed at a special meeting of the Grand Trunk Pacific directors this week authorizing the issue of debentures to the amount of $15,000,000 under provisions of the Grand Trunk Pacific Loan Act, passed at the last session of Parliament.

President Chamberlin reported good progress in the construction of the company's main line through British Columbia, which is the last link to be completed when the construction of the Grand Trunk Pacific will be accomplished through to the Pacific Ocean at Prince Rupert.

Remarkable Test of a ROBB SCOTCH BOILER

The Marine Boiler in Plants Ashore

This modification of the standard marine boiler was given a 12-hour test at the plant of Bush & Terry, Philadelphia. With a good grade of semi-bituminous coal, it showed a combined boiler and furnace efficiency of 73 per cent.—extremely high for a hand-fired boiler with 22 per cent. overload.

This 200 horse-power boiler with two internally-fired furnaces evaporated 11.8 pounds of water per pound of combustible. The secret of the high economy is the

RAPID, POSITIVE CIRCULATION
and internal firing.

A. C. Wood, engineer in charge of test, said, "The evaporative results obtained are excellent."

LEGAL NOTICES

BRITISH AMERICA NICKEL CORPORATION, LIMITED.

(Corrected Notice.)

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 2nd day of July, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants, William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase, lease or otherwise acquire and to prospect for, open, explore, develop, work, improve, maintain and manage nickel, gold, silver, copper, coal, salt, iron and other mines, quarries, mineral and other deposits and properties or interests therein, and to dig for, raise, crush, wash, smelt, roast, assay, analyze, reduce, amalgamate, make and otherwise treat coal, coke, ores, metals, clays and minerals, whether belonging to the company or not, and to render the same merchantable, and to sell and otherwise dispose of the same or any part thereof, or any interest therein, and generally to carry on the business of a mining, milling, reduction, quarry and development company; to carry on the business of treating, smelting and refining mineral ores, metals or other substances by means of electrolytic process or the application of electric power in any manner or form, or by means of any other process, and for such purpose to install all necessary plant, machinery and apparatus, and to purchase, sell and otherwise deal in ores of various kinds or other substances capable of being treated by electrolytic or other process, and to buy, sell and deal in any products or by-products of such ores or substances; (b) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electricity, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power, when exercised outside the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (c) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (d) To construct, alter, work, carry out or control, and to purchase, take on lease or otherwise acquire, and to sell, lease or otherwise dispose of any works, mains, lines, machinery or plant of any kind or description, or any roads, ways, bridges or other things whatsoever which may seem capable of being used or operated with any part of the company's undertaking for the time being, or calculated to benefit the company; and to acquire rights over or in connection with such works, mains, lines, machinery, plant, roads, bridges, ways or other things whatsoever, and to equip, maintain and operate by electricity, hydraulic or other mechanical power, all works belonging to the company or in which the company may be interested; and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (e) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (g) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To establish and work lines of steamers and other vessels, and to otherwise employ any vessels in the conveyance of passengers, mails, specie, goods, troops, munitions of war and other things between any ports throughout the world, and to carry on the business of shipowners, shipbuilders, shipwrights, ship repairers, charterers of ships or other vessels, warehousemen, wharfingers, shipping agents, managers of ships, ship's husband contractors, ship and insurance brokers, carriers by land or water, forwarding agents, importers and exporters, merchants and traders, commission and general financial agents, proprietors of land, jetties, piers, warehouses, stores, barge and tug owners, lightermen, marine engineers and manufacturers of and dealers in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (j) To construct, acquire, manage, maintain, alter, charter, operate, hire, lease, sell, exchange or otherwise dispose of all kinds of ships, vessels, barges and boats or shares, or interests therein, and also elevators, sheds, warehouses and buildings, wharves, docks, dry-docks, terminals, and generally to carry on the business of ship-building, ship repairing, engineering, elevator, warehousing, navigation, transportation and terminals company, or any such businesses, and to manufacture and deal in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (k) To purchase, take on lease or in exchange or otherwise acquire any docks, dry-docks, wharves, harbors, quays, jetties, ship-building yards, collieries, coal mines, meat freezing works, refrigerating stores, gas works, timber yards and other real and personal property or rights or any interests therein, and to manage, work and otherwise turn to account the same or any of them, and to enter into any working arrangements in respect of the same or any of them; (l) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (m) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (n) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (o) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (p) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable or being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (q) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (r) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (s) To assist in the promotion, organization, development or management of any corporation or company, and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (t) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (u) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (v) To amalgamate with any other company having objects similar to those of this company; (w) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company, or of which the company may have power to dispose; (x) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (y) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "British America Nickel Corporation, Limited," with a capital stock of twenty million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 11th day of July, 1913.

THOMAS MULVEY,
2-2 Under-Secretary of State.

Dated at Toronto, 14th July, 1913.

BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for British America Nickel Corporation, Limited.

FAIR CANADIAN VENTILATOR COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 16th day of June, 1913, incorporating Harry Riley, law clerk, Donald Alexander MacRae, Harold Ernest McKitrick and Thomas Wallace Lawson, barrister-at-law, and John Fraser MacGregor, accountant, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase or otherwise acquire any interest in any patents, brevets d'invention, licenses, concessions and the like conferring an exclusive or non-exclusive or limited right to use any invention or any secret or other information as to any invention in relation to the manufacture, sale and use of ventilators or other apparatus, appliance or device for ventilating buildings, vehicles or ships or generally any similar or other invention which may seem to the company capable of being profitably dealt with by the company, and in particular to acquire for the Dominion of Canada the invention of George A. Fair, of the City of Los Angeles, California, and the patent of Canada numbered 136,410 granted for a new and useful improvement in ventilators and any improvements thereon; (b) To use, exercise, develop, grant licenses in respect of and otherwise turn to account any such patents, brevets d'invention, licenses, concessions and the like, and information aforesaid; (c) To manufacture, buy, sell, install, rent and generally to deal in ventilators and all similar appliances, apparatus or devices for ventilating buildings, vehicles or ships, or any appliance or device used or capable of being used in connection therewith; (d) To manufacture, buy, sell and deal in goods, wares and merchandise, and particularly in machinery, tools, implements, material and appliances requisite or useful for the manufacturing of and dealing in ventilators or ventilating appliances; (e) To carry on the business of building contractors and generally merchants and dealers for the purposes aforesaid; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To acquire or undertake the whole or any part of the business, franchises, undertakings, properties, rights, powers, privileges, bonds and debentures, letters patent, liabilities, contracts, real estate, good will

LEGAL NOTICES

and assets and other property of any person, firm or company, carrying on any business which the company is authorized to carry on or possessed of property suitable for the purposes of the company, and to issue in payment or part payment therefor, or for any property, rights or easements which may be acquired by, or, with the approval of the shareholders, for services rendered to, or work done for the company or in or towards the payment or satisfaction of debts or liabilities of or assumed by the company, paid-up shares or bonds, debentures, debenture stock or other securities of the company; (h) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in or any business or transaction capable of being conducted so as directly or indirectly to benefit the company and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (i) To take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company, notwithstanding the provisions of section 44 of the said Act; (j) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain and carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (k) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects or for any public, general or useful objects; (l) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit the company; (m) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant or stock-in-trade; (n) To construct, improve, maintain, work, manage, carry out or control any roads, ways and tramways, branches or sidings on lands owned or controlled by the company, bridges, reservoirs, water courses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences, which may seem calculated directly or indirectly to advance the company's interests, and to contribute, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (o) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (p) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (q) To sell or dispose of the undertaking of the company, or any part thereof, for such consideration as the company may see fit to accept, and in particular for shares, bonds, debentures, debenture stock or securities of any other company or corporation; (r) To adopt such means of making known the produce of the company as may seem expedient, and in particular by advertising in the press, by circulars, by publications of books and periodicals, and by granting prizes, rewards and donations; (s) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (t) To distribute among the shareholders of the company in kind any property of the company, and in particular any shares, bonds, debentures, debenture stock or securities in any other companies belonging to the company, or which the company may have the power to dispose of; (u) To apply for and obtain from any and all legislative, governmental, municipal, and other authorities, powers and bodies, confirmation, registration and recognition of the company and its rights, powers, concessions, privileges, franchises, and objects and such additional rights, powers, concessions, privileges, franchises and objects as may be considered expedient and to do whatever may be necessary and expedient to comply from time to time with all or any by-laws, ordinances, decrees, regulations and other requirements now or in future existing; (v) To act as agents or distributors for any other business, company or concern, having objects similar or germane to those of the company; (w) To do all or any of the above things as principals, agents, contractors, trustees or otherwise, and either alone or in conjunction with others; (x) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Fair Canadian Ventilator Company, Limited," with a capital stock of one million dollars, divided into 1,000,000 shares of one dollar each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 18th day of June, 1913.

THOMAS MULVEY,
Under-Secretary of State.

51-2.

BOVING & COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 7th day of June, 1913, incorporating Reginald Holland Parmenter, William Symon Morlock and Norman Baillie Worwick, solicitors; Roy Beverley Whitehead and Bruce Victor McCrimmon, students-at-law; Ernest Pickles, draftsman, and James Victor Macfarlane, accountant, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To adopt and carry into effect with or without variation a certain agreement dated the second day of June, 1913, between the Canadian Boving Company, Limited, of the First Part; Jens Orton Boving, of the Second Part, and Arthur John Thomson, of the Third Part, and to issue as fully paid stock of the company in pursuance of such agreement; (b) To carry on the business of chemical, metallurgical, mining, electrical, mechanical and civil engineers and contractors for the construction, erection, alteration and repair of public and private works and undertakings and any business in which the application of electricity or any other power is or may be useful or convenient to carry on the business of treating, smelting and refining mineral ores or other substances, and for such purpose to instal all necessary plant, machinery and apparatus, and to purchase, sell and otherwise deal in ores of various kinds or other substances capable of being treated, and to buy, sell and deal in any products or by-products of such ores or substances; (c) To prospect for, open, explore, develop, work, improve, maintain and manage gold, silver, copper, coal, salt, iron and other mines, quarries, mineral and other deposits and properties, and to dig for, raise, crush, wash, smelt, roast, assay, analyze, reduce, amalgamate, make and otherwise treat coal, coke, ores, metals, clays and minerals, whether belonging to the company or not, and to render the same merchantable, and to sell and otherwise dispose of the same or any part thereof, or any interest therein; (d) To provide, purchase, lease or otherwise acquire, to construct, lay down, erect, establish, operate, maintain and carry on all necessary work, stations, engines, machinery, turbines or hydraulic apparatus, plant, cables, wires, works, lines, generators, accumulators, lamps, meters, transformers and apparatus connected with the generation, accumulation, distribution, transmission, supply, use and employment of electricity; to generate, accumulate and distribute electricity for the supply of electric light, heat and motor power and for industrial or other purposes; provided, however, that any sale, distribution or transmission of electric, hydraulic or other power or force beyond the limits of the lands of the company shall be subject to local and municipal regulations in that behalf; (e) To enter into, carry out, perform, sign and sub-let contracts for doing work and supplying materials in connection with the building of steam and electric railways, canals, telegraph and telephone lines to be used therewith, bridges and other public works, dry docks, dams, water powers, wharves, piers, viaducts and other works and undertakings, and to receive as consideration therefor the stocks or bonds of any other company; (f) To contract with any person, corporation, society, public body or municipality, or with the Government of Canada, or any province thereof, or with any other country or state, for the making, building, construction and operation of all private and public works and undertakings of every description and kind; (g) To manufacture, sell and deal in, and to act as agent for the sale of all kinds of machinery, machines, apparatus, fixtures, instruments, materials, engines, lamps, wires, motors, air-brakes, implements, and tools and all other goods, wares and merchandise of every description; (h) To apply for, obtain, register, purchase, lease or otherwise acquire, and to hold, use, own, operate and introduce, and to sell, assign, or otherwise dispose of any trade marks, trade names, patents, inventions, improvements and secret processes having relation to any of the businesses which this company is authorized to carry on, or used in connection with, or secured under letters patent of the Dominion of Canada or elsewhere, or otherwise, and to use, exercise, develop, grant licenses in respect of, or otherwise to turn to account any such trade marks, trade names, patents, licenses, secret processes and the like, or any such property or rights; (i) To purchase, lease or otherwise acquire, sell, equip, maintain and operate all such transportation facilities, whether by land or water, as may be necessary or convenient in the conduct of its operations, and to sell, lease or otherwise dispose of the same, and to construct, purchase, charter, employ, own, maintain, manage, navigate, lease and sell steam or sailing vessels or other kinds of craft, lighters, floats, steam pumps, diving apparatus, cranes, plant, machinery and appurtenances; (j) To acquire and undertake the good-will, property, rights, franchises and assets of every kind, and the liabilities of any person, firm or association for one or more of the purposes for which this incorporation is formed; and to make, allot and issue in payment or exchange in whole or in part therefor, bonds or debentures of the company and common or preferred shares of the capital stock of the company as fully paid and non-assessable; (k) To pay all or any expenses incurred in connection with the formation, promotion and incorporation of the company or any other company which this company has power to promote, or in which the company is in any way interested or concerned, or to contract with any person, firm or company to pay the same, and to pay commissions to brokers and others for placing, selling or guaranteeing the subscription of any shares, bonds, debentures or securities of this company or of any other such company as aforesaid; (l) To sell or dispose of the undertaking and assets of the company hereby incorporated, or any part thereof, for such consideration as the company may think fit, including shares, debentures or securities of any other company having objects altogether or in part similar to those of the company hereby incorporated; (m) To distribute any of the property of the company hereby incorporated in specie or money among its shareholders; (n) To receive and accept bonds, debentures or other securities in payment in whole or in part for work done or materials supplied in connection with the business of the company, notwithstanding the provisions of section 44 of the said Act; (o) To make advances to customers and those having dealings with the company and to guarantee the performance of contracts by any such persons; (p) To do all such other things as may be deemed conducive to the attaining of the above objects or any of them. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Boving & Company of Canada, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 10th day of June, 1913.

THOMAS MULVEY,
Under-Secretary of State.

50-2

CANADIAN I. P. MORRIS COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 7th day of June, 1913, incorporating James Steller Lovell, accountant; Robert Gowans, William Bain, William George Flood and Joseph Ellis, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in hydro-electric apparatus of every description, steam engines, boilers, machinery, castings, and a general machine and foundry business; and to carry on the business of ship-building in all its branches: (b) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (c) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company; (d) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar

(Continued at foot of page 199.)

DIVIDENDS AND NOTICES

NOTICE RE SELECTION OF AUDITORS

Under Section 56 of the Bank Act

Notice is hereby given that the General Managers of the Chartered Banks in Canada intend to proceed at an early date to select by ballot a panel of not less than forty persons who shall be eligible, subject to the approval of the Honorable the Minister of Finance, to be appointed auditors under Section 56 of the Bank Act.

Formal applications to receive consideration will require to be made to the General Managers of the Chartered Banks of Canada, in care of the President of the Canadian Bankers' Association, Toronto, on or before the 21st day of July, 1913.

D. R. WILKIE,
President, Canadian Bankers' Association.
Toronto, July 2, 1913.

THE MERCHANTS BANK OF CANADA.

QUARTERLY DIVIDEND.

Notice is hereby given that a dividend of two and one-half per cent. for the current quarter, being at the rate of ten per cent. per annum, upon the paid-up capital stock of this institution, has been declared, and that the same will be payable at its banking house in this city and at its branches, on and after the 1st day of August next, to shareholders of record at the close of business on the 15th day of July.

E. F. HEBDEN,
General Manager.
Montreal, 24th June, 1913.

PENMANS, LIMITED.

Dividend Notice.

A quarterly dividend of 1½ per cent. on the Preferred Shares of the capital stock of this Company has been declared payable August 1st, 1913, to shareholders of record of July 21st, 1913; also a quarterly dividend of 1 per cent. on the Common Shares of the capital stock of this Company has been declared payable August 15th, 1913, to shareholders of record of August 5th, 1913.

By order of the Board.
C. B. ROBINSON,
Secretary-Treasurer.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.
Toronto, Ontario, May 20th, 1913.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

WANTED.—By an Established Manufacturing and Fruit Industry near Toronto, a man to take charge of office and to make an investment. Box No. 225, *The Monetary Times*, Toronto.

The Dominion Government has advertised for tenders for the construction of a sea wall, ship channel, breakwater and retaining wall as the initial step in the $25,000,000 Toronto Harbor Improvement Scheme. The breakwater to be built will extend from the Eastern Gap to Woodbine Avenue, and from the Western Gap to the Humber River. The ship channel will give access to the industrial district at Ashbridge's Bay, as proposed under the plans of the Harbor Commission. The estimated cost of this work is $5,000,000.

Two New York dailies have given currency to a report that the New York Cotton Exchange is contemplating moving to Montreal in the event of the proposal for a tax of 1-10 of one per cent. per pound being levied on all transactions in cotton futures becoming law. The tax, equal to 50 cents on a bale of cotton, is held to be prohibitive to any future trading and practically to mean the legislating of the Cotton Exchange out of business. Still, the proposed removal looks like a piece of politics.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Tenders will be received by the undersigned up to 12 o'clock noon, Monday, August 4th, 1913, for the purchase of the following Debentures of the town of North Bay, Ont.

1.—$80,000.00 issue for street improvements, bearing interest at the rate of five per cent. per annum, payable in thirty equal annual instalments.

2.—$60,500.00 Local Improvement issue for permanent sidewalks, bearing interest at the rate of five per cent. per annum, payable in twenty equal annual instalments.

3.—$21,000.00 Local Improvement issue for permanent sidewalks, bearing interest at the rate of five per cent. per annum, payable in twenty equal annual instalments.

4.—$25,000.00 Local Improvement issue for sanitary sewers, bearing interest at the rate of five per cent. per annum, payable in thirty equal annual instalments.

5.—$25,000.00 Local Improvement issue for sanitary sewers, bearing interest at the rate of five per cent. per annum, payable in thirty equal instalments.

6.—$60,000.00 High School issue, bearing interest at the rate of five per cent. per annum, payable in thirty equal annual instalments.

7.—$50,000.00 Public School issue, bearing interest at the rate of five per cent. per annum, payable in thirty equal annual instalments.

Tenders will be received for the whole of the several issues, or for one or more of the different issues.

Delivery to be made at the Royal Bank of Canada, North Bay, Ont.

M. W. FLANNERY,
Treasurer.

North Bay, July 8th, 1913.

H. BASIL THOMAS,
Secretary-treasurer.

North Battleford, Sask.

CANADIAN CAR AND FOUNDRY COMPANY SELLS BONDS

The Royal Securities Corporation, Limited, has purchased jointly with Messrs. Lee, Higginson & Company, of Boston, $500,000 6 per cent. first mortgage bonds of the Canadian Car and Foundry Company. Total bonds now outstanding amount to $5,100,000, out of which $66,700 has been redeemed by the action of the sinking fund. The bonds have all been placed in London and no public issue will be made.

◆

The Porcupine Crown Mines, Limited, has been authorized to sell or otherwise alienate its shares, stock, etc., in Quebec, its chief place of business being at Montreal.

By way of a welcome-home to Mr. J. H. Brock, managing director of the Great West Life Assurance Company, who has been absent in Europe for a year for the benefit of his health the agents of the company arranged a special complimentary campaign in June and were successful in securing applications for $2,600,000, the largest month's business ever secured by the company,

It is true that Canada has borrowed freely. But it should be realized that most of the money has been thoroughly well expended, and will bring an immense output of natural wealth in a short time. Already the productive power of the country has grown in a wonderful manner. In considering the situation in Canada it should not be forgotten, first, that the Canadian banks hold large cash balances, both in London and in New York; secondly, that the Canadian Pacific Railway is in a position to raise any amount of capital it can reasonably expend; and, thirdly, that the credit of the Canadian Government is of the highest, and that the Canadian Government can rely on British investors for money if it is really needed.—London Statist.

CENTRAL GOLD RESERVE TRUSTEES

According to an Ottawa dispatch, Montreal has been selected for the establishment of the central gold reserves, and the Royal Trust Company will be the representative of the Dominion Government on the institutional board of trustees. The company will also be the custodian of the coin and legals. The other trustees selected are: the Bank of Montreal, the Canadian Bank of Commerce, and the Royal Bank. The central gold reserve is designed to augment the facilities of the banks in respect to circulation.

◆

A branch of the Bank of Nova Scotia has been opened at Elmwood, Man., under the management of Mr. D. B. Scott.

Calgary's utilities for the month of June gave returns from the street railway of $65,309; electric light and power, $45,317, and waterworks, $13,567. Only the waterworks fails to show an increase, and this is accounted for in fact that a greater amount of arrears may have been collected the previous month.

Much interest is manifest in the actions of the Saskatchewan commission investigating the cost of implements. That there was an advance in prices of agricultural implements in 1908, but that the advance was offset by reductions until 1912, when the figures prior to 1908 again prevailed, is the claim made by dealers who have submitted their price lists for the inspection of the commission. These tables will be checked off against a list gathered from the farmers of Saskatchewan, and in the near future the government expects to be able to publish comparative prices extending over a term of years. Full conclusions will be published when the various statements have been submitted to the commission on agricultural credits on its return from Europe.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

ONTARIO'S AGRICULTURE.

Increase in Occupation of Land—Labor and its Cost—Live Stock and Crops.

The hired man is part of the increased cost of living; in 1910 he got over $7 a week and board, as compared with $5 ten years earlier. This is indicated in a bulletin of the census department dealing with the agriculture of Ontario. It shows a small increase in the occupation of land and in the larger farm holdings, but a large increase in the value of crops and live stock. A marked decrease in the amount of hired labor performed and an equally marked increase in the cost of hired labor afford some explanation of decreases in cereals and milch cows.

The average value per farm holding of field crops, vegetables and fruits was $693.30 in 1910, as against $490.56 in 1900, being an increase of 41 per cent. in the decade. The average value of all live stock per farm holding in 1911 was $951.69, as against $571.99 in 1901, being an increase of 66 per cent. in the decade.

Working Capital and Earnings.

The working capital of the farmers in Ontario in 1911 totalled $1,216,864,992, being an average per holding of $5,450, as compared with $929,858,777 and an average of $4,148 in 1901. The gross earnings from this investment were $314,112,073. The number of weeks of hired labor on the farm in 1910 was 1,689,123 and the value $12,003,095, being an average wage per week of $7.16, as against 2,359,632 weeks in 1900, with a value of $12,152,915, and an average per week of $5.15, being an increase in the cost per week of farm labor from 1900 to 1910 of 39 per cent.

Live Stock and Field Crops.

Increases are shown in the values of all classes of live stock, that in the case of horses being from $76.17 in 1901 to $138.64 in 1911. Horses, swine and poultry have increased in the decade, milch cows show a decrease of 32,784, while other horned cattle have increased by 49,651.

Sheep have decreased by more than 25 per cent. The number of all pure-bred animals has increased, showing that the quality of live stock has steadily improved. The production of wool has dropped from 5,000,000 in 1901 to 2,750,000 in 1911.

In field crops the most noticeable development is an increase in hay, forage crops and feed grains, and sharp decreases in cereals, except oats. Land in field crops increased from a little over 9,200,000 acres in 1901 to not quite 9,700,000 in 1911, an increase of 5.19 per cent. There was a decrease in the number of fruit trees in the production of fruit.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Alberta.

Wadena, No. 2950, $2,300. Harold Addy, Taber.
Little Gap, No. 2883, $1,200. J. H. May, Consort.
Stuckky, No. 2950, $1,200. M. N. Johnson, Eye Hill.
Sunny Crest, No. 2633, $1,000. R. H. Gee, Lacombe.
Naples, No. 2852, $800. John B. Johnson, Mellowdale.
Benton Valley, No. 2876, $1,600. R. C. King, Benton.
Silver Leaf, No. 2959, $1,800. J. M. Pearce, Wharronton.
Frog Lake, No. 2598, $1,000. David Bristow, Frog Lake.
Sounding Valley, No. 2838, $1,500. T. F. F. Fisher, Sedalia.
Connorsville, No. 2882, $1,600. R. P. Radford, Connorsville.
Willow Range, No. 2888, $800. C. V. Larson, Landonville.
Doucet, No. 2932, $1,000. T. E. Poitias, St. Paul des Metis.
Garden Plain, No. 2941, $1,500. Hugh McRae, Garden Plain.

Saskatchewan.

Schell, No. 1022, $500. J. A. Honan, Cullen.
Laird, No. 2457, $1,400. I. I. Penner, Laird.
Meota, No. 790, $12,000. F. W. Tobey, Meota.
Shand, No. 2927, $1,500. J. G. Peterson, Shand.

Cabri, No. 1326, $5,000. Fred Abraham, Cabri.
Alsask, No. 2761, $1,500. J. F. Spicer, Alsask.
Harmonia, No. 2905, $800. N. G. Fast, Petrofka.
Iola, No. 2947, $1,600. L. D. Holaday, Swanson.
Johnson, No. 611, $1,600. Chas. Orford, Kelliher.
Bounty, No. 204, $5,500. Geo. A. Heron, Bounty.
Bulyea, No. 1215, $2,000. B. S. McElroy, Bulyea.
Forres, No. 594, $3,500 Jas. P. Mitchell, Forres.
Jagoe, No. 2912, $2,200. E. J. Jump, Hawarden.
Freeman, No. 634, $2,000. A. P. Simpson, Rhein.
Ravinside, No. 1336, $2,000. J. Clark, Edenkillie.
Wolia, No. 2970, $1,600. S. A. Warne, Stony Lake.
Carlsburg, No. 2935, $1,700. C. M. Bredt, Francis.
Prouse, No. 2890, $1,800. C. W. Vaughan, Penkill.
Beaudale, No. 2635, $4,000. F. B. Reusch, Sturgis.
Vergland, No. 2909, $1,600. Old. H. Rud, Pennant.
Codette, No. 2966, $1,000. Frank Inskter, Nipawin.
Rosenthal, No. 2869, $1,200. Ben Scherger, Krupp.
Kandiyoki, No. 2881, $1,800. A. E. Norrin, Willows.
Abbott, No. 1315, $1,500. A. F. Axford, Trossachs.
Pinkham, No. 416, $2,000. Jas. A. Paton, Pinkham.
Fairville, No. 270, $3,000. T. J. Ross, Stony Beach.
Westwood, No. 2844, $2,000. R. J. Day, Sunnyview.
Lydden, No. 1397, $2,000. Wilfrid Stempel, Biggar.
Nixon, No. 2900, $2,000. Newton Young, Gull Lake.
Redfield, No. 2861, $1,600. J. L. Goodburn, Redfield.
Ogema, No. 2760, $2,000. F. W. Saunders, Ogema.
Robbinsdale, No. 754, $1,400. E. W. Loucks, Wadena.
Yorkton, No. 159, $1,500. C. J. Macfarline, Yorkton.
Kensmith, No. 2877, $2,000. E. L. Cowell, Kensmith.
Humboldt, No. 1529, $50,000. W. H. Stiles, Humboldt.
Omand, No. 933, $1,500. Francois Baulieu, Kinistino.
Zamok, No. 784, $900. John McMillan, Prince Albert
Kamsack, No. 1251, $1,500. A. A. Crawford, Kamsack.
Crescent Hill, No. 2897, $2,500. F. D. Morton, Kinistino.
Shell Lake, No. 2903, $1,000. H. G. Burrell, Shell Lake.
Four Corners, No. 2969, $2,000. Jacob I. Erb, Rodgers.
Prairie Mound, No. 870, $1,800. Wm. Inglebright, Scott.
Pig Lake, No. 2941, $1,000. I. Greensides, Greensides.
Wiwa Hills, No. 1207, $2,000. Sam Doering, Wiwa Hills.
Bull Creek, No. 2901, $1,800. John A. Palm, Blairville.
Hainstock, No. 2891, $1,600. O. H. Hainstock, Harptree.
Fishing Lake, No. 326, $300. Wm. Miller, Quill Plain.
Zephyr, No. 1293, $1,600. E. M. Shuttleworth, Diebolt.
Springville, No. 1081, $1,800. H. M. Hughson, Ridpath.
Spruce Glen, No. 2911, $1,200. Edward Marshall, Parkside.
Cedar View, No. 968, $1,150. Clarence Simpson, Bone Creek.
Diamond Stone, No. 1363, $2,000. C. Sanderson, Little Woody.
McNaughton, No. 2625, $1,800. J. C. Cooke, Bonnie View.
Maple Creek, No. 80, $2,500. C. Ambrose King, Maple Creek.
Blaine Lake, No. 2571, $10,000. M. Drabiniasty, Blaine Lake.
Coronation, No. 2882, $1,500. Geo. Carter, Box 164, Windthorst.
Garden River, No. 607, $800. Sidney Dunsmore, Henribourg.
Edenbridge, No. 2930, $1,500. Louis Vicker, Edenbridge.
Westasto Valley, No. 2945, $1,100. Jas. B. Woodley, Quill Lake.
Boxelder Creek, No. 2975, $1,400. Christ Deg, Jr. Walsh, Alta.

◆

NEW STEAMSHIP SERVICE BETWEEN ROTTERDAM AND CANADA.

The Royal Mail Steam Packet Company has inaugurated a regular monthly service from this port to the Pacific coast of Canada and the United States, where the following ports will be called at:—Vancouver, Victoria, also Seattle, Tacoma and Portland.

For the present the steamers will go through the Suez canal, via China and Japan, but as soon as the Panama canal is opened, it is the intention of the company to direct the steamers that way, which will shorten the route considerably.

The first sailings of the service have already taken place, per the ss. Vestalia on April 26; the next sailing by the ss. Den of Ruthven; others will follow in regular succession.

These steamers are carrying a full cargo to the east, and the cities on the Pacific coast, and advantage should be taken of this service to extend the trade between western Canada and this port.

◆

Less than a half crop of apples throughout the province is the best Mr. P. W. Hodgetts, director of the fruit branch of the Department of Agriculture, can promise the apple-eating people of Ontario this fall.

The Canadian Pacific Railway has appealed to the Cabinet against the Railway Commission's ruling directing that company and the Canadian Northern and Grand Trunk to readjust lumber tariffs from points west of the Rockies to Alberta, Saskatchewan and Manitoba. The claim is that the company had no opportunity properly to answer the complaint of the Mountain Lumber Association.

LAURENTIDE STOCK ISSUE

Terms to Shareholders—Story of Amalgamation is Revived

The Laurentide Company will issue $2,400,000 new stock to the present shareholders at par. As the outstanding issue is $7,200,000, shareholders will have a right to subscribe to one new share for every three shares held.

The new stock is to be issued to shareholders of record July 23rd and the first payment will be 10 per cent. due August 30th. Subsequent instalments will be spread over a period of nine months. The second payment will be due on October 20th and the other at regular intervals between then and the end of June, 1914.

A further feature of the terms is that interest at the rate of 6 per cent. will be allowed on all payments and shareholders will also have the privilege of paying up in full at any time.

Tariff and the Market.

Laurentide's authorized capital is $10,000,000, so with the new issue the outstanding capital will be raised to within $400,000 of that amount. The only other capital liability is an issue of $1,200,000 bonds but of this $321,801 had been redeemed by sinking fund at the time of the last annual statement a year ago.

The Laurentide Company will probably use a large proportion of the new power generated in their own business, as the change in the United States' tariff will enlarge their market, so that the company will have a ready sale for any increased output. The company now owns 2,200 square miles of timber limits, while it has another 5,000 square miles contributory.

The earnings of the company for the year ended June 30th, 1912, were $753,572, after writing off $103,879 to betterment to plant. Notwithstanding an accident to the sulphite mill, the 1913 report should be as good as last year's. The company is apparently in a position to earn and pay 8 per cent. on the total capitalization of $9,600,000 without counting profits from the expenditure of new capital. The Laurentide Company's sulphite mill has been enlarged to enable an increased production of 25 per cent. starting May, 1913, which will make further increased net earnings. The company should be able to increase its net earnings by $1,075,000 when the full results of the new capital and the changed tariff are experienced.

History of the Company.

The Laurentide Pulp Company, Limited, ten years ago, had a capital stock of $1,600,000 with a bond issue of $1,200,000. Subsequently as the Laurentide Paper Company, Limited, there was an issue of $1,200,000 preferred stock, to finance the new paper mills and this preferred had the privilege of conversion into common stock, share for share. This conversion privilege ultimately retired the preferred stock. In 1909 a new issue of $800,000 common stock was made at par.

In the summer of 1911 the business of the Laurentide Paper Co., Limited, was acquired by the Laurentide Company, Limited, shareholders of the former company receiving two shares of stock in the new company for every one share held in the old. The effect of this was to bring the outstanding capital stock of the company up to $7,200,000.

The shares of the old company which sold ten years ago as low as 70, had risen to 230 in advance of the doubling up of the capital and the maintenance of the dividend on the old 8 per cent. basis. Last summer the new shares, which were first traded in around 145, sold as high as 240, or equivalent to 480 for the original stock.

The Montreal Light, Heat and Power, Shawinigan Water and Power, and Laurentide companies are said to have considered amalgamation, and should this merger materialize, the Laurentide Company would be brought in on a favorable basis.

SEVERAL COMPANIES CHANGE NAMES

The Church Kipton, Limited, has changed its name to Church & Church, Limited.

The Canadian Credit Men's Association has changed its name to the Canadian Credit Men's Trust Association, Limited.

Sorel Ironworks, Limited, has changed its name to Oxford Motor Cars and Foundries, Limited.

The Montreal Elks Club has changed its name to the Business Men's Club of Montreal, Incorporated.

The Henrick-Halvorson Company has changed its name to the Empress Realty Company, Limited.

The Bouseman Lumber Company, Limited, has changed its name to the Assiniboia Lumber Company, Limited.

IN TORONTO TO SELL BONDS

The mayor and city treasurer of Macleod, Alberta, are in Toronto to dispose of a block of that city's debentures.

SASKATOON'S BONDS

Mr. F. E. Harrison, mayor of Saskatoon, informs *The Monetary Times* that negotiations are proceeding for the sale of the city's bonds to a United States firm, but are not yet completed.

DEBENTURES AWARDED

Belleville, Ont.—$23,000 to Oddfellows' Relief Association, Kingston.

Berlin, Ont.—$112,968 6 per cent. 30 years to Mutual Life Insurance Company, Waterloo.

Penetanguishene, Ont.—$25,000 5 per cent. to Messrs. R. C. Matthews & Company, Toronto.

Calgary, Alta.—$103,000 4½ per cent. 20 years to Messrs. G. A. Stimson & Company, Toronto.

SASKATCHEWAN TO MAKE LOAN IN LONDON

Saskatchewan province will negotiate a bond issue in London. Hon. A. Turgeon, Attorney-General, and Hon. A. P. McNab, Minister of Public Works of the province, are on the way to London. Mr. Turgeon says that the government has not decided how large the debenture issue will be. That will depend on the market, and on other conditions.

Saskatchewan issued £1,000,000 4% 10-year debentures in London in April. Owing to market conditions, 85% of this issue was left with the underwriters. Manitoba's latest loan overseas was one of £400,000 4½% registered stock, in April, at 102.

MANY COMPANIES INCREASE CAPITAL STOCK

The capital stock of the Polo Club, Limited, has been increased from $10,000 to $25,000 by the issue of 150 new shares of $100 each.

The capital stock of the Gaetz-Cornett Drug and Book Company, Limited, has been increased from $25,000 to $35,000 by the issue of 100 new shares of $100 each.

The capital stock of Hardy and Hunt Piano Company, Limited, has been increased from $20,000 to $75,000 by the creation of 550 new shares of $100 each.

The Swastika Mining Company, Limited, has increased its capital stock from $2,000,000 to $3,000,000 by the creation of 1,000,000 shares of new stock of $1 each.

The Maclaren Imperial Cheese Company, Limited, has increased its capital stock from $400,000 to $450,000 by the creation of 500 new shares of $100 each.

The Shelvin-Clarke Company, Limited, has converted the outstanding preference shares of the company into Series "A"; and has increased the capital stock from $1,200,000 to $3,200,000 by the creation of 20,000 Series "B" six per cent. preference shares of $100 each.

QUIET INVESTMENT BUYING IN LONDON

That the Balkan war is the cause of keeping investors out of the market in London, and that Canada's credit abroad is as substantial as ever are statements made by Mr. Melville Greenshields, London member of Messrs. Greenshields and Company, of Montreal. Mr. Greenshields is spending a month in Canada and said that the bulk of the business being done in London was confined to the placing of issues underwritten some time ago by London houses.

"There is," said Mr. Greenshields, "considerable quiet investment gathering at the present low levels of shares, and Canadian Pacific, especially, is being absorbed by investors who have been keeping out of the market for some time. I know of one brokerage house which lately bought approximately $2,500,000 worth of securities for a client, and a large part of this was Canadian Pacific Railway at 220, London price, or about 214 equivalent here. The shares of the Canadian road are well regarded abroad, and the issue should be one of the first to feel the improvement which nearly every one is looking forward to."

"Canada's credit is just as solid at present as ever," said Mr. Greenshields. "Municipalities looking for money will be able to get all they want for legitimate expansion contemporaneously with improved financial conditions, even if the towns and cities have to pay a little more than formerly for their accommodation."

BONDS AND BONDHOLDERS

When is a bond not a bond, will become a popular vaudeville question in Canada if some of our financiers continue to indulge in financial novelties. Instances have been too numerous in recent years wherein a company's bond has proved a poor thing, indeed. Investors are taught to regard the average bond as an investment giving a fair interest return with the maximum amount of safety. Reorganizations of certain Canadian companies have done much to blast that idea, which happily was becoming well established.

The reorganization of the Canadian Coal and Coke Company is another example of unfortunate financing. It involves the surrender of mortgage bonds for preferred stock, a transaction which no one will label desirable. This scheme, it is said, was practically the only way to solve the difficulties of the companies interested. Working capital was urgently required, and it was thought that this could be secured only through the removal of the existing mortgages held by the bondholders. This is a sort of "Now you hold it and now you don't" finance, which might appeal to office boys, but reflects little credit upon modern financiers.

A holder of Canadian bonds should know that he has a security which cannot be swept away at the whim or in the troublous times of company promoters, reorganizers and financiers. The sooner we get back to the old English idea that a bond is an investment surrounded with a fence of financial purity, and live up to that idea, the better will it be for Canadian credit.

We are told that only one bondholder dissented from the reorganization plan of the Canadian Coal and Coke Company. It is pleasing to know that at least one holder was not stunned by the trend of events.

Another matter to which bondholders must give attention is the recent innovation of those who draft trust deeds, giving facilities in the trust deed for complete control by the majority of bondholders over the mortgage, which is security common both to the majority and minority. If this practice spreads, minority bondholders' rights will not be worth a tinker's expletive.

LOCAL GOVERNMENT BOARD FOR CANADA

The suggestion that a Local Government Board should be established in Canada is a healthy sign. Mr. W. Sanford Evans, of Winnipeg, raised the question at the municipal convention, Saskatoon. He advocated the establishment of a board which shall fulfil the same functions as the Local Government Board of Great Britain, so that before municipal debentures can be floated the official approval of the board would have to be given for proposed expenditures under the loan.

The growth of the country having been so rapid, the volume of municipal securities to be marketed has greatly increased. It is somewhat difficult for those in older countries to appreciate the rapidity of legitimate municipal growth in Canada. The constant increase in population, natural and by immigration, has multiplied cities and towns and maintained a continuous demand for funds for local improvements of all kinds. Considerable sums have been obtained and expended in that way. Civic authorities, seeing local needs, have sometimes expended money before it was actually obtained by the sale of debentures. This may have passed in times when the supply of capital was almost unlimited, but that it was questionable financing is now proved in these days of financial stringency. Many committee members, town and city treasurers, and others interested in municipal finance will be ready to admit that they have experienced during the past few years occasional strenuous times with civic balance sheets, and they would probably welcome the establishment of a local government board. In England, we believe, there is a central board for the entire country. In Canada it would probably be found more workable to have a board for each province. One of the chief duties of these boards would be to sanction or disallow proposed municipal loans. Politics being so much more in evidence in our municipal affairs than they are in England, the provincial local government boards would have a delicate duty in considering municipal loans. That might be argued as a reason for a central board for the entire country, where the political influence would be less. The personnel of any such authority would have to recognize the business and not the sentiment of municipal finance always with the final end in view, namely, the maintenance of Canadian municipal credit at home and abroad.

At the civic luncheon given at Edmonton to the Winnipeg business men in May, Mr. Vere C. Brown, a capable banker, who has at heart the interests of the great western country, expressed the view that there was urgent need for legislation providing for the appointment by each of the prairie provinces of a municipal commission, by whom all expenditure for local improvements by urban municipalities would first have to be approved.

The proposal met with pronounced favor, the mayor of Edmonton expressing the opinion that had such legislation been enacted at an earlier date some of the financial difficulties of his own city would have been avoided. It has since been strongly approved by the representative of one of the leading financial houses of London. Mr. Brown amplifies his suggestion in the latest issue of Canadian finance. After discussing the subject at length, he suggests that the duties which would fall upon a commission of the character proposed would come under six main headings:—

(a) To regulate the limits to the boundaries of each municipality, beyond which expenditures for improvements may not be undertaken.

(b) To see that assessments are limited to conservative valuations of property. [In some cases we have high assessments and a low tax rate. A higher tax rate and a lower assessment would remove the ground for a good deal of ill-considered criticism.]

(c) To decide whether any proposed improvements are really warranted and well within the ability of the municipality to pay.

(d) To see that the plans and specifications call for work of an approved character, and that they have been prepared with a reasonable regard to the possible necessities of the future.

(e) To regulate the period of time for which the relative debentures shall be issued.

(f) To regulate the investment of sinking fund moneys.

It should be made clear that in offering his suggestion in the first instance Mr. Brown was mainly prompted by a consideration of the uncomfortable situation which has been created through the inability of many of our municipalities to find a market for their debentures, and of the serious consequences which must ensue if some steps are not taken to place the credit of our municipalities beyond the possibility of criticism. But even if our issues of municipal securities were marketable without question, the fact would remain that the work of a provincial commission, such as proposed, would be of incalculable benefit to the whole community.

Mr. Brown offers no reflection whatever on the amplitude of the security afforded by the issues of debentures by Western municipalities. That they do constitute a first-class security the leading financial authorities of Canada unanimously agree. Insufficient regard, however, has been had to the absorptive power of the securities markets. Hereafter municipalities will have to arrange a firm sale of their securities before embarking on capital expenditures, and our chief concern at the moment should be to see that everything possible is done to further the creation of a sufficiently broad market for such securities.

The municipalities of Canada may, with advantage, discuss these proposals. *The Monetary Times* feels that the adoption of some such idea will enhance considerably Canadian municipal credit.

MONTREAL'S FINANCING

A forecast of the assessment of the city of Montreal makes it evident that the value of the real estate will be about 15 per cent. higher than it was a year ago. This would bring the total assessed value of taxable property to $580,000,000 and that of property which is exempt from taxation to $152,524,000, making a grand total of $732,524,000, or a gain of $94,500,000 as compared with a year ago. The increase of 15 per cent., it is stated in Montreal, is only about half the increase which is occurring in the assessment of Toronto property. The difference between the Toronto and the Montreal methods seems to be that in Montreal the assessment is to the full value of the land and buildings, while in Toronto it is to the full value of the land and only three-fifths of the value of the building. The Toronto plan favoring the industrial rather than the speculative end works to the advantage of the city. Another taxation disadvantage Montreal experiences in comparison with Toronto, is the large amount of exemptions allowed. These are mainly of church property, and it is apparently hopeless to change the situation. Schools and government property are also exempt.

During the year about $20,000,000 in taxable buildings was added to the roll, through construction work, so that the total value of these is about $250,000,000. Meantime, although the city has not over-borrowed according to the by-laws and valuations, it is difficult to get the money necessary to carry on public works planned. The cause is the much-discussed shortage of money. Some time ago, the city authorized two loans, aggregating $14,000,000. These have not yet been floated, and there appears little likelihood of it being possible to float them in the near future. A loan of $11,900,000 should have been issued in May and a special loan of $2,300,000 in connection with the new aqueduct is making no progress. The Bank of Montreal is the fiscal agent for the city, and it wisely advises patience. The debt of the city is now large, being in excess of $60,000,000. That sum will be increased to $75,000,000, and more, when it becomes possible to float the loans. The per capita debt of the city is reported to be $150, so that if the new loans are made, this figure will be increased, despite any gains that occur in population.

LEVEL CROSSING GATES

Mr. Drayton, chairman of the Dominion Railway Commission, seems inclined to lay much of the burden upon the public in the matter of railway crossings. They trespass on the tracks, he says, despite the use of "gates" by the transportation companies. The safety of the public is ensured only when the public are credited with the common sense of sheep—that is, no loophole must be left for hasty or foolish action on their part. In that light, the so-called railway crossing "gates" are a farce, being nothing more than a horizontal bar and a continual temptation to break the law. When the railway companies erect real gates instead of useless sticks, the number of level crossing fatalities will be greatly reduced.

SMALL CHANGE

The higher cost of living actually hesitated last month.

* * * *

And all it needs now is for those officers to ask the Hon. Sam Hughes to have a drink.

* * * *

The downfall of Mellen, of New England, is not half as interesting in July as the downput of melon.

* * * *

Senator McCumber says the United States tariff bill is assault upon the farmer. Now someone will pepper the Senator.

* * * *

A Toronto store advertises that it has been "squeezed by the bank"—what terpsichorean financiers would call a money hug.

* * * *

Through the growth of the home market, Canada no longer exports butter. In short, it is becoming the whole cheese.

* * * *

A Toronto paper tells of "wonderful feats of thinking horses." They are scarcely excelled by financing feats of Canadian mayors.

* * * *

Three million feet of moving picture films have been censored in Saskatchewan—enough to make any grain-raising province reel.

* * * *

William Jennings Bryan says he cannot live on $12,000 a year—probably a result of intense study of commodity index figures.

* * * *

When Washington legislators do anything unpopular, the aggrieved stick thumb in mouth, pout, and threaten to move to Canada.

* * * *

The Chicago railway will put car steps nearer the ground, thus taking the first much-needed step to prevent a race of American elastic-legs.

Lord Decies, who states he was overcharged $40,000 by contractors, says "I am a mug," having earned, though, the title of a whole set of china.

* * * *

"Capital flowing to Canada from London on the wave of Imperial sentiment" is poetic, but not as near truth as capital flowing on the wave of 6 and 8 per cent.

* * * *

On July 21st, the price of shares in King's Quicksilver Mining Company, Limited, advanced from 70 cents to 90 cents per share. Who shoved up the price and why?

* * * *

The plea of a Western paper that the Dominion Government should relieve the present financial stringency is as logical as asking the office boy to hold back Niagara Falls.

* * * *

Since Lord Fitzgerald told a Toronto reporter he would settle on a Niagara fruit farm or a western ranch, his lordship probably knows the color of a real estate agent.

* * * *

All seem to be agreed as to a couple of the consonants in Lamar, who told the $82,000,000 forgery story to the Washington lobby committee, but there appears to be a mistake in the vowel.

* * * *

On January 2, 1912, the Canadian Pacific Railway issued $18,000,000 new stock; on January 2, 1913, it issued $60,000,000 more new stock; and on January 2, 1914,—it is the day after New Year's.

Former Detective-inspector Duncan threatens to publish "The Wrecking of the Farmers Bank, or Who Got the Money." He should forget those troubles and try truck gardening for a healthy exercise.

* * * *

Discussing the process of destroying soiled money at Ottawa, a contemporary states that it is carried out "with great formality every few months, the air in the block becoming redolent of the peculiar odor of burning lucre." How is that for financialese?

NEW OFFICERS OF MUNICIPALITIES UNION

The new officers of the Union of Canadian Municipalities elected at the Saskatoon convention are as follows:—President, Mr. F. P. Bligh, mayor of Halifax; first vice-president, Mr. C. M. R. Graham, mayor of London, Ont.; second vice-president, Mr. W. Short, K.C., mayor of Edmonton; third vice-president, Mr. F. E. Harrison, mayor of Saskatoon; honorary secretary-treasurer, Mr. W. D. Lighthall, K.C., ex-mayor of Westmount, Que.

RESERVE EXTENSION IN NORTHERN ONTARIO NEEDED

A brief preliminary reconnaissance of a portion of western Ontario was made last summer for the Commission of Conservation by Mr. J. H. White of the Faculty of Forestry at Toronto. This examination shows that a very large percentage of Ontario west of Sudbury and south of the Height-of-Land is absolutely non-agricultural and is valuable only for the production of timber. Fires have done enormous damage, especially during the period of railway construction. However, a great deal of valuable young growth has come in and requires protection in order that it may reach maturity. Some merchantable timber remains in the area back from the railways, which has not yet been included in forest reserves or in timber limits.

Ultimately, the whole territory south of the "Clay Belt," lying between the Timagami and Nipigon reserves, should be included in permanent forest reserves and protected and administered under forestry principles. This section will unquestionably prove a source of large revenue to the province in the future.

INTERPROVINCIAL CONFERENCE

The Prime Minister of Ontario and the Prime Minister of Quebec have issued a joint letter to the prime ministers of the various provinces calling an interprovincial conference to be held in Ottawa, on October 20, 1913.

The Monetary Times has made a request that the question of the inclusion of Canadian provincial securities on the British Trustee list, should be discussed at the conference and this will probably be done.

MR. WOODLAND BACK FROM EUROPE

Mr. C. W. I. Woodland, manager for Canada of the Employers' Liability Assurance Corporation, has just returned to Toronto from a trip to Great Britain. Mr. Woodland tells *The Monetary Times* that gilt-edged Canadian securities are going begging in the British market on account of current conditions. The representatives of many municipalities, especially of western Canada, are in London endeavoring to dispose of their debentures. Not a few undesirable propositions have been peddled in England and the description given them, for the benefit of prospective investors, compared with actual facts, emphasizes the need of sound advice being taken before money is invested.

Mr. Woodland says that his home office is thoroughly satisfied with the business of the Canadian branch and have the fullest confidence in the future of Canada and in their Canadian investments. The Employers' Liabilitv is doing an excellent business in the Dominion and as they do not accept risks "at any price," their business is safe and remunerative.

VICTORIA'S HEALTHY FINANCES

President of Board of Trade Tells of Satisfactory Prevailing Conditions

People in Canada are so optimistic that they wish to accomplish in one year that which, perhaps should take several years, stated Mr. J. J. Shallcross, president of Victoria Board of Trade, in a recent address. In Victoria, there had been, within the last few years, a large increase of population. Wisely, in his opinion, it was agreed that these newcomers must be provided with all the facilities that are generally considered necessary in the life of a city. Thus many public works had to be undertaken, such as the extension of sewerage systems, the building of more and larger schools, the procuring of an adequate water supply and the extension of water distribution, as well as other important works. In addition, there were what is known as local improvements, cement sidewalks, asphalt streets, cluster lights, street widening and street extensions, and for this class of work obligations to the extent of over $5,000,000 were undertaken in one year, and I believe some of this work is still unfinished.

It was here, Mr. Shallcross suggested, that the difficulty was encountered, for the law provides that bonds cannot be issued for works of local improvement until the work is finally completed. Therefore the necessity arose to arrange, temporarily, a large floating debt. That was the situation at the beginning of the year. Then, partly owing to phenomenal expansion of trade and partly because of the German Empire's new military dispositions, there was experienced the trouble, of which most business men knew, of marketing bonds.

Financing had been Accomplished.

What made the conditions worse was the conservatism of the banks. They were not advancing any more than they had to, and would not give the city the usual overdraft on the security of the current year's taxes.

However, Mr. Shallcross continued, this was past history. Since then the city had disposed of $4,000,000 worth of bonds. Of this amount about $2,250,000 had been applied to the floating debt, leaving approximately $1,700,000 for new work. It was planned to expend this sum on only those enterprises that were imperative for the welfare of the community. For instance, on sewers there was to be laid out $650,000, on schools $440,000, and on the Sooke waterworks scheme $450,000.

At the present time Victoria had on deposit with her bankers $4,000,000, against which there were advances of less than $2,500,000, leaving a balance of about $1,500,000, and Mr. Shallcross added, there would be a credit balance for the rest of the year. It is true that a considerable portion of these deposits is ear-marked for sinking funds, etc., but the important point is that the money is there and available to provide the accommodation required to meet the exigencies of the moment. The fact that this was the present situation was a matter of great credit to the city. I meant that it was unnecessary to look outside for assistance, that the money is here, and that all the banks have to do is to charge their commission.

Injudicious to Spend More Now

Some liquidation was still required, but it was of a character that would work itself out, all that was needed being the exercise of a little patience on the part of the people. As things now stand, about $2,000,000 has been expended on local improvements which it will require another $1,000,000 to complete. When the work involved in this outlay is finished, the speaker explained that bonds to the extent of $3,000,000 could be placed on the market.

It was Mr. Shallcross' opinion that, until these local improvement projects were out of the way, it would be a most injudicious thing for the civic authorities to enter upon any others. His contention was that it was not a healthy sign to find a large section of the population of a city dependent on the work provided by the works department and paid for by borrowed money. For this year, he stated, the expenditure of one million and three-quarters, as was intended, was quite sufficient. The purposes to which this money was to be devoted were of a character that must meet with the approval of all right-thinking citizens.

Reference also was made to the provincial law which stipulates that local improvement bonds cannot be offered for sale until the work is completed and the assessments arranged. It was this, which, in Victoria's case, made the floating debt, which has been spoken of, necessary. He thought the law was a faulty one and that the legislature might make such an amendment as would make it easier for a municipality to handle the finances in connection with great public works which must be paid for on the local improvement basis.

Generally, Victoria was in a happy condition. There had been no foreclosures, and, as far as the speaker was aware, there were no forfeitures under agreements for sale. Credit and confidence were the basis of the financial fabric of a community, as they were of a country or a nation. The facts stated appeared to indicate that Victorians had absolute confidence one in the other. That was a matter on which the city was to be congratulated. The speaker, continuing, expressed the hope that the people would pay their accounts regularly and not be impelled to hold back because of any fancied financial stringency. The future would look after itself. It was bright. The bankers of Canada were very cautious, although, perhaps, not too much so. The cash reserves of the London banks amount to 10 per cent. of their total liabilities, while the reserves of the Canadian banks totalled 15 per cent. of their aggregate liabilities This was a striking commentary on their strength. Victoria, its citizens might rest assured, was sound. The exercise of a little patience, a little restraint, and the city would pass the present state of general financial stringency and be stronger for the experience.

◆

CANADA'S TRADE GROWS.

Canadian trade for the year ended April 30, totals $1,079,934,011, as compared with $879,611,838 for the preceding year. Imports totalled $678,587,617, and exports $401,346,394.

There was an increase of 18 per cent. in imports from the United States which amounted to $442,213,343, or $75,000,000 more than the year before.

The exports increased by $73,000,000. Exports to Britain amounted to $183,734,820, and to the United States $168,605,800.

◆

YORKSHIRE INSURANCE COMPANY.

A glance at the eighty-ninth annual report of the directors of the Yorkshire Insurance Company for the year 1912, shows that this old established British corporation has maintained its strong position. The net premium income of the fire insurance department after deduction of re-insurances, amounted to $2,005,815, as against $1,597,225 in the previous account. The losses were $835,410, the ratio being 41.6 per cent., as against 51.7 per cent. for the previous year. From the balance at credit of this account $297,745 has been carried to profit and loss, and the reserve for unexpired liability has been increased to $802,330.

The fire insurance account is as follows:—

Reserve for unexpired liabilities brought from last year, $638,900; premiums, $2,005,815; interest, dividends and rents, less income tax thereon, $32,305; total $2,677,020.

Claims under policies, paid and outstanding, $835,410; commission, $248,425; expenses of management, $478,395; contributions to fire brigades, $13,325; bad debts, $1,390; carried to profit and loss account, $297,745; reserved for unexpired risks, being 40 per cent. of premium income for the year, $802,330; total, $2,677,020.

The manager for Canada of the Yorkshire is Mr. P. M. Wickham, with head office at Montreal. Chiefly to his energy and progressiveness is due the growth of the company's Canadian business, which for 1912 may be summarized as follows:—

Net cash received for premiums	$ 273,327
Re-insurance and return premiums	41,237
Gross cash received for premiums	314,564
Gross amount of policies, new and renewed	28,019,153
Net amount of risk at date	33,380,203
Net amount of losses incurred during the year ..	119,321
Net amount paid for losses	134,975

The Yorkshire, which commenced business in Canada in January, 1907, and does fire, accident, sickness, livestock, and plate glass insurance, has total assets in this country of $2,392,385, divided as follows:—

Real estate, $325,000; loans on real estate, $1,564,400; bonds and debentures, $350,721.04; agents' balances and premiums outstanding, $41,446.83; cash on hand and in banks, $94,580.73; interest and rents due and accrued, $7,736.70; other assets, $8,500; total, $2,392,385.30.

INDEX TO THE MONETARY TIMES

The index to Volume 50 of *The Monetary Times*, January to June, 1913, is ready and copies may be had on application to the head office, 62 Church Street. Toronto.

QUEBEC RAILWAY BONDHOLDERS

Analysis of Their Position—Company's Outlook is Brighter

Monetary Times Office,
Montreal, July 23rd.

Sir Rodolphe Forget is said to have stated that the interest on the bonds of the Quebec Railway, Light, Heat and Power Company had all been paid. When this statement was made, the holders of some of the bonds, who had deposited their coupons with the banks with instructions to notify them as soon as the coupons were honored, had not received this notification. It is now generally accepted that the coupons will be honored and that Sir Rodolphe's statement was intended as an announcement to this effect. The company has until the end of this month to meet its obligations in this respect, and it seems likely that by August 1st, the coupons will have been honored. Comment has been heard regarding the somewhat remarkable manner in which the coupons were met. It would seem that the company followed the practice of paying where trouble might have arisen, through refusal to pay, and also that, in a general way, large payments were avoided as long as possible.

Indications from Financial Statement.

The earnings of the Quebec Railway, Light, Heat and Power Company are apparently more than sufficient to meet the bond interest. The company is making progress and in the course of a few years, with careful management, it should have emerged from its present unfortunate position.

The last financial statement furnishes evidence of the approach of the present trouble. In that statement, can be seen the large decrease in the cash position, the big sums in dividends and interest unpaid and the large proportion of current assets composed of sums due by subsidiary companies. Also, it is seen that the company is earning enough to look after its interest charges, as will be seen from the following summary of the statement for the year ended June 30, 1912:—

Net earnings and miscellaneous income		$875,484
Fixed charges	$660,363	
Two dividends	199,990	
Organization expenses	3,920	864,273
Surplus for year ending June 30, 1912		$ 11,211

If the company had not paid about $200,000 in dividends, it would have been able to show a respectable surplus for the year, and would have been in a much better position at present to meet its bond interest. Doubtless this, and undue haste to carry out extensions, have been responsible for much of the present scarcity of cash.

Will Work Into Better Position.

Among the current assets, last year, were the following items:—

Advanced to controlled companies for construction	$ 871,337
Cash in hand and in banks	254,513
Accounts and bills receivable	235,665
Stores and supplies on hand	136,740

In the liabilities were the following:—

Accounts payable	158,572
Sundry loans	1,171,968
Accrued or unpaid interest and dividends	338,462
Accrued charges	8,154

At the end of the previous year, the company had over $2,000,000 in actual cash, and the controlled companies owed it over $900,000, and so had reduced this indebtedness but little during the year. In the liabilities, appeared only slightly over $590,000 as loans to the company, so that these doubled during the year.

Some question has been raised concerning the position of the holders of the bonds of the subsidiary companies. One who ought to be well acquainted with the situation states that the bonds of the subsidiary concerns all take precedence to those of the holding company itself—namely, the Quebec Railway, Light, Heat and Power Company. In the matter of the Quebec and Saguenay Company, however, it would seem that the obligations were guaranteed by the Quebec Railway, Light, Heat and Power Company in a way which would make that company liable only after its own bonds had been satisfied. In other words, the bonds and obligations of the Quebec and Saguenay would, in case of liquidation, come in with the other creditors of the Quebec Railway, Light, Heat and Power Company.

However, there should be no liquidation, the bond interest will doubtless all be met, and the company will probably work into a better position. It will be a long time before there will be any more dividends, however.

KAMINISTIQUIA POWER COMPANY

Extensions to Plant—Many Firms Locating at Head of Great Lakes—Markets for Power

Monetary Times Office,
Montreal, July 23rd.

The decision of the Kaministiquia Power Company to carry out further extensions to its plant at Fort William, thus increasing its power capacity is another evidence of the unusually active growth which is taking place in the advantageously-located twin cities of Fort William and Port Arthur.

Every few weeks is reported the decision of yet another industry to locate either its head office or a branch office at the head of the lakes. Within the last six months, or so, announcements of this character have been made by the Canadian Car and Foundry Company, National Tube Company, the Maritime Nail Company, the Canadian Steel Foundries, the Superior Brick and Tile Company, the Fort William Starch Works and the Great West Wire Fence Company, besides which, extensions are constantly being carried out by such large firms as the Canada Iron Corporation, the Copp Stove Company, the Ogilvie Flour Mills and others.

It is not surprising, therefore, to read the announcement of the extension of the Kaministiquia Power Company to increase its capacity.

Montreal Financiers are Interested.

The Kaministiquia Power Company is owned, mainly, by Montrealers, the president is Mr. H. S. Holt, vice-president Mr. C. R. Hosmer, and the directors are Messrs. W. A. Black of the Ogilvie Flour Mills, J. E. Aldred of the Montreal Power Company and Shawinigan Water and Power Company, F. H. Pippen, K.C., of Toronto, and J. S. Norris secretary of the Montreal Light, Heat and Power Company. Mr. W. A. Black is managing director. The late Mr. F. W. Thompson, who preceded Mr. Black as vice-president and managing director of the Ogilvie Flour Mills Company, was, previous to his death, vice-president of the Kaministiquia Company. The late Sir Edward Clouston was formerly also on the board.

The Kaministiquia Power Company was incorporated in 1905, when it purchased from the Ontario Government the Kababeka Falls on the Kaministiquia River, 18 miles from Port Arthur and Fort William, Ont., and immediately commenced the development of this water power. The initial development was completed in December, 1906, and subsequently has been added to. There are now installed three electrical units of 3,750 kilowatts, each making a total equivalent to about 15,000 horsepower. The hydraulic development may possibly have been made in three units, of about 7,000 horsepower each.

Capacity and Output.

The present hydraulic development is equal to a round 20,000 horsepower, of which there was added in 1911, one unit of 7,000 horsepower capacity in turbines, generators, etc., and the extension was made to the power house to accommodate this extra equipment.

It will be seen, therefore, that at the present time the company has a hydraulic development with a capacity of 20,000 horsepower and plant and machinery installed with a capacity of 15,000 horsepower. It is the intention to proceed with a hydro-development of 10,000 additional horsepower, making a total development of 30,000 horsepower. At the same time it will instal an addititional unit of electrical machinery with a capacity of 15,000 horsepower, thus doubling the present electrical capacity and making a total of 30,000. The company will thus be able to take advantage of the entire power at its disposal. It is said that the undertaking will involve an additional expenditure of about $1,000,000. It is the intention to begin work in the immediate future and it is expected that the undertaking will be completed at the close of 1915.

The Kaministiquia Power Company is in a somewhat unusual position in this that it does not enter into competition with the Hydro-Electric Power Commission of Ontario. Instead, it supplies the power to the Commission, the Commission in turn supplying current to the city of Port Arthur for municipal and industrial purposes. The Kaministiquia Company supplies Fort William direct.

◆

There is no possibility of a grain blockade, however large the crop this year may be, says Sir Donald Mann. The Canadian Northern Railway will construct a line from Port Arthur to Montreal via Toronto and to Halifax. Already a short route is under construction through northern Ontario, but the company realizes the importance of the line projected.

OPPORTUNITIES FOR CAPITAL

They Are Numerous in Manitoba, Saskatchewan and Alberta—Demand for Money

(Written for *The Monetary Times* by Charles F. Roland, Commissioner, Winnipeg Industrial Bureau.)

The openings for capital in the prairie provinces are so numerous and varied that they may be said to embrace almost every known form of investment. The large area of the new territory opened by the unprecedented railway expansion has created a demand for money for legitimate development which offers the investor a wide range for selection, now and for many years to come. It is safe to say that no portion of the globe holds out a more profitable, and at the same time safe, field for the investment of capital in large or small amount.

The main security behind Western Canadian investment of all kinds is the wealth-producing power of the land itself, as to-day the development of the agricultural and other natural resources of Manitoba, Saskatchewan and Alberta is only well begun. The growth of cities and towns depends, to a very large extent, on the power of the territory which maintains them to produce. The productiveness of the soil of Western Canada has, and is, building cities and towns with greater rapidity than the history of the world can show, and vast fortunes have been, and are still being made, by the increase in land values in the cities and towns, and cultivated and cultivateable lands, brought within reach of transportation. Wherever the wealth-producing processes of development have begun, at almost every point reached by the railroads, in the little prairie towns as well as the big centres of trade, investments can be found that offer at least absolute security for principal and interest, and very likely a handsome return for money employed.

Need of Only Ordinary Precaution.

Numerous specific instances illustrating the increase in values could be enumerated, but a few in the business centre of Winnipeg—a city of 200,000 inhabitants—will illustrate the extremely profitable nature of real estate investment where business foresight has directed purchase. In this city there are thoroughly authenticated instances where property in leading thoroughfares and adjacent streets, during the ten year period from 1902 to 1912 has increased in value ten, sixteen, twenty, twenty-five, and even thirty times; and these examples are not regarded on the spot as exceptional.

The captious critic might point out that the instances quoted were of a speculative character rather than that of investment—of which the dictionary definition is, "placing your money where it will secure a safe and reasonable return"—but just where the speculative element enters into investment in Western Canadian real estate is a subject for controversy, even among those whose business it is to know. It is unfortunate that there are now, and have been in the past, many so-called "real estate investments" offered to the public which are extremely unlikely to bring adequate return for the money invested for many years to come, but it is none the less certain that no one need be imposed on by the get-rich-quick promoters, if ordinary precautions are taken. There is no lack of reputable real estate agents, whose names and addresses may be secured by an ordinary business enquiry. Some, of course, are endowed with more foresight than others.

Mortgages and Agreements of Sale.

Apart, however, from the purchase of real estate in anticipation of a rise in values, there are very profitable investments in land in which the element of speculation plays no part. First of these may be mentioned the purchase of agreements of sale, which will yield some 15 per cent. or more, according to the state of the market. It is advisable to have expert advice, on the spot, in the purchase of this class of investment, as a knowledge of the property and of the parties interested in the agreement is necessary, if due precaution is observed.

Of a still more conservative character, and a favorite form of investment by insurance and trust companies is the real estate mortgage. At the end of last year it is estimated that trust, loan and insurance companies had invested in Manitoba, Saskatchewan and Alberta over $250,000,000, the great bulk being in mortgage loans. The constantly increasing values of farm lands and city property makes the mortgage investment much safer here than in older countries.

Bonds Are Safe and Profitable Investment.

Further, where in Great Britain and elsewhere advances are made on two-thirds or three-fourths of the value of the property, and the rate of interest varies from 3½ to 4½ per cent., or little better, in Western Canada, on the other hand, cash is advanced on only 40 or 50 per cent. of the value, and the rate of interest is usually 7 per cent., varying from 6 to 8, and even 9 per cent. There are many strong companies in Western Canada—some with offices in Great Britain—which act as intermediary between the borrower and the lender.

Probably the largest amount of British capital invested in Canada is drawing from 4½ to 5½ per cent. in the bonds of the larger Canadian cities, which are regularly quoted on the London Stock Exchange. There are, however, the more profitable bonds of smaller municipalities, yielding interest at from 5 to 6½ per cent. These have, up to the present, always been underwritten by Canadian mortgage corporations, and, owing to the fact that they are not quoted by the London Stock Exchange, which lists only the larger issues of debentures, are not a form of investment well known to the European investor. Many of these municipalities conduct the sale of these bonds through their fiscal agents in Winnipeg, Montreal or Toronto, who advise and direct the whole negotiations, from the fixing of the amount asked to the marketing of the bonds. There seems to be no reason why the British investor should not share in this safe and profitable form of investment by dealing direct with reputable bond houses in the Dominion.

Industrial Offerings With Their Characteristics.

Another form of investment which affords an abundant margin of safety, gives a 6 per cent. return and over, and is readily convertible into cash, is found in the better class of industrial bonds. Ready convertibility may be ensured by confining purchase of industrial bonds to issues sponsored by strong and old-established bond houses. Such houses will always make a market for their own bonds. A well-known Canadian financial publication lays down the following rules for the direction of the investor in industrial bonds: Guard against over-capitalization in bonded debt; consider only companies dealing in staple products; net earnings for the past five years should be at least double the interest charges; capital actually paid up in cash should be considerably larger than the bonded debt; the management should be in the hands of men of repute as to ability and integrity; the business should not be one whose plant and organization can be quickly and easily duplicated.

Lumber and Mineral Deposits.

The natural resources of the prairie provinces, such as coal, timber, and mineral deposits, to a great extent undeveloped, will undoubtedly afford a very profitable field for investment in the early future, and at the present time offer a very attractive subject for investigation by men with practical experience in these lines. Very little has yet been done towards exploiting mineral resources, which are known to be abundant, more particularly in the northern parts of the three provinces. Large quantities of valuable timber still remain untouched, and it is seldom that a new district is opened up without reports being received of discoveries of natural resources of commercial value. Some of the deposits known to exist in large quantities in many parts of the west are limestone with clay and shale for Portland cement; calcareous shales suitable for natural cement; gypsum; friable sandstone for glass; clay for the brick and tile industry; lignite coal and peat for fuel, and many others of commercial value. Large quantities of coal are, of course, mined in Alberta, and British, along with Canadian and United States capital, is being used in the development of this and various mining industries throughout the West. Development of the West's natural resources is, however, only begun, and much buried treasure will doubtless be disclosed during the next few years. At the time of writing exceptional activity is reported from the Rice Lake area in Manitoba, in which gold has been found over a large area, which, if present indications may be taken as a guide, will be producing in paying quantities shortly. Iron and specimens of copper ore are by no means uncommon, and discoveries such as have made Sudbury and Cobalt world-famous are by no means beyond the range of possibility.

Markets for Manufactured Products.

Another phase of industry offers unique opportunities for men with money and a knowledge of some line of manufacturing. The Western Canada market for manufactured goods is so extensive and varied in its demands that it will be many years before the West will be able to make what it uses and consumes. With the protective tariff on the United States border, and the long freight hauls from Eastern points, unique opportunity is afforded for the production of almost every class of manufactured goods on the spot. With other facilities, such as cheap power, good labor conditions, splendid transportation and an illimitable supply of numerous raw products, the manufacturing centre of the Dominion is slowly but surely being established in the west. Almost every city and town in the three provinces, and the railways, have departments formed and equipped for the express purpose of attracting the manufacturer, and are prepared to furnish free reports on any line of industry. Some of the railways, too, have industrial and commercial departments, which collect information regarding the opportunities for men and money throughout the West, whether they be for stores or boarding-houses, flour mills or livery stables, or vacancies for any of the hundred and one needs of a growing community.

Apart from the immensely profitable occupation of the cultivation of cereals, which has been extensively advertised in Great Britain and elsewhere by the Government and railways, and forms the greatest wealth-producing factor in the West, the investor who is prepared to assist his capital by personal effort, will find almost limitless opportunity in mixed farming, dairying and market gardening. The agriculturists are largely engaged in the cultivation of wheat, and the rapidly increasing population demands more and more fresh vegetables; more milk, butter and cream; more poultry and eggs; more beef, mutton and pork. Indeed, so great has the demand become that a remarkable state of affairs exists to-day in the capital of Manitoba. Situated in the Red River valley, the soil of which is noted for its richness, Winnipeg annually imports or receives from Eastern Canada thousands of dollars worth of these comestibles. The Western Canadian demand for many years will continue to grow faster than the supply of these products, the producing of which forms an extremely profitable industry in which comparatively few are engaged.

◆

STORAGE OF FUEL AT PANAMA

Coal and Oil Facilities Will be Provided for Government and Companies' Usage at Terminals

The United States government will set aside special areas for the storage of coal by individuals or companies, and as a duplication of plant is believed to be unnecessary, these areas will be served by the government coal-handling machinery which it is proposed to erect at Cristobal and Balboa, the Atlantic and Pacific entrances to the Panama Canal.

It is stipulated that the plant at the former port shall be capable of unloading 1,000 tons and loading 2,000 tons per hour. The Balboa plant will unload 500 tons and load 1,000 tons per hour. This machinery will serve the area set aside for individuals and companies with the same effectiveness as the government storage basin, reports Mr. J. R. Murray, the acting British Consul at Colon. By this arrangement the necessity for dredging, wharf construction or purchase of coal-handling machinery by private owners will be obviated. It is expected that the cost of taking coal in and out of storage, and of the wharfage facilities thus made use of, will be apportioned at a reasonable price per ton to all individuals and companies alike on an equitable basis. For the area to be occupied by private coal piles a rental basis upon the cost of fitting up the area for such private storage would have to be charged in addition.

Vessels requiring bunker coal will load in mid-stream from barges which will have been loaded by these plants. Colliers will discharge alongside the wharves.

Oil Storage at both Terminals.

After the completion of the coaling plants, piping and pumping plants for oil will be installed at both terminals. Oil companies and dealers will be allowed to obtain a revocable licence for land on which to construct oil-tanks and to run pipelines to the oil wharves and pumps, which will be used for all vessels alike. This, it is thought, will render unnecessary the exclusive occupancy or assignment of any water frontage at either terminus of the canal to an individual or company. A uniform rate per barrel of oil will be charged for pumping to and from the water front to the tanks

A pipeline for oil transportation across the Isthmus will be laid. The ownership thereof will be in the United States, and it will be considered a common carrier available for use by all individuals and companies on an equal basis at an equitable charge. This will tend to reduce the selling price of fuel, and will place all companies on the Isthmus on a uniform basis.

Beginning of Nineteen Fifteen.

It is hoped to have these plants fully working before January 1st, 1915, and in the meantime suitable temporary arrangements will be made for the supply of fuel to shipping using the canal.

Any taxes levied in connection with private coal and oil plants will be fixed with the object of reducing unnecessary duplication of plant, and encouraging the carrying of large stocks of coal and oil. There will be a tax, based upon the cost of improvements, probably amounting to 1 per cent. per annum, on such cost. In addition, a tax of about 1 per cent. on the sales of coal and fuel-oil by individuals and companies will be levied. This tax will probably be 1¼ cent (⅝d.) per barrel of oil, and 5 cents (2½d.) per ton of 2,000 lbs of coal. All companies or individuals applying for coal and oil privileges on the Isthmus must furnish satisfactory evidence to the canal authorities of their ability, financial and otherwise, to conduct the business they wish to undertake.

VALUE OF LIFE INSURANCE

XXII.

How to Make Money

BY C. A. HASTINGS.

Take the example of a man who has no capital, but is in receipt of a good salary—his capital is his earning power. There are many such men who have little beside their income and though I have endeavoured to point out in my previous articles, man's responsibilities, it is unfortunately true that many a man gambles on:—

1. His own premature decease.
2. Proper education of his children.
3. Danger of his family becoming dependants on others.

It may not be out of place to recall here that well-known idiom:—"In the old days it was the gambler who took assurance, nowadays, it is the gambler who does not." Nevertheless, the man who is drawing a good salary can easily save sufficient to provide:—

1. For his family in event of death.
2. Capital to supplement his pension.
3. A start for his children in the world.
4. Earlier retirement for himself.

One Thousand Dollars per Year.

As an illustration take the life of a healthy man, aged thirty, who can buy $20,000 twenty-year endowment with profits policy for an annual premium of $1,000. It is fair to assume that if he bought some security he would probably be liable to income tax, which would amount to say $50 a year, so that in twenty years $19,000 has been paid for $20,000 protection. Now then apart from the fact that he is worth $20,000, the moment he has made his first payment, and also the guarantee against non-depreciation of capital, bonus additions of $6,000 may be added. The result at age fifty is $26,000, or a profit of $7,000, over and above annual instalments spread over twenty years.

Most men will agree that $25,000 cash will leave their wives out of reach of want, and the illustration given indicates how a salaried man can acquire capital at a profit. Some persons may argue that a premium of $1,000 a year is a lot of money to "spend," but they can gain the same benefit for age fifty-five by "putting aside" $800 per annum, or $680 per annum for age 60; and profits would increase proportionately five or ten years, as the case may be.

Applicable to All.

Although the example I have taken is for a man whose salary is a good one, the same principle applies to every one of us, whatever may be the size of our yearly incomes, so no reader can put this idea on one side on the ground that he could not afford it. Looking at it from any view-point you like, socially, individually, or financially, this article would be defeating my object if the principle did not apply to everyone.

The following articles in this series have already appeared:—

(1) March 1st—How to become one's own master.
(2) March 8th—How depreciation of assets can be met.
(3) March 15th—How to borrow at a profit.
(4) March 22nd—The automatic production of capital.
(5) March 29th—How to redeem debentures.
(6) April 5th—Value of goodwill and how to preserve it.
(7) April 12th—How to protect capital in land, etc.
(8) April 19th—Short-term policies.
(9) April 26th—Endowment policies.
(10) May 3rd—Single premium policies.
(11) May 10th—The policy for the professional man.

(13) May 24th—Lucrative investment.
(14) May 31st—Partnership protection.
(15) June 7th—Home versus commerce.
(16) June 14th—Policies that are cheapest and best.
(17) June 21st—Higher education for children.
(18) June 28th—Relations of partners, active and sleeping.
(19) July 5th—Death duties and assurance.
(20) July 12th—Provision for daughters.
(21) July 19th—Endowment insurance versus Consols.

◆

Regina business men have organized a company to erect a flax mill with a capacity of 1,000 bushels of flax per day. It is intended to have the mill ready to handle flax this fall.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Ontario Power Company.—The combined income account of the Ontario Power Company, of Niagara Falls, and Ontario Transmission Company, Limited, as reported to the New York stock exchange for the year ended December 31st, 1912, follows:—

Gross earnings	$1,163,525
Net earnings	992,090
Other income	22,286
Total income	1,014,377
Surplus after charges	365,441

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited's, ore receipts at Trail smelter for the week ending July 3rd, and from July 1st, 1912, to date, in tons:—

Company's mines—	Week.	Year
Centre Star	2,106	157,194
Le Roi	1,087	49,967
Sullivan	911	32,712
No. 7	234	4,240
Richmond-Eureka	29	1,098
St. Eugene	35	1,522
No. 1	..	1,851
Molly Gibson	..	1,279
Other mines	1,519	83,372
Total	5,921	333,235

Mexico Tramways Company.—The statement of earnings and expenses from traffic only, as advised by cable, for the month of June, 1913, in Mexican currency, were as follows:—

	1912.	1913.	
Total gross earnings	$558,355	$588,780	+ $30,425
Operating expenses	262,427	275,137	+ 12,710
Net earnings	$295,928	$313,643	+ $17,715
Aggregate gross earnings from January 1st	$3,271,421	$3,265,540	— $5,881
Aggregate operating expenses from January 1st	1,577,364	1,542,986	— 34,378
Aggregate net earnings from January 1st	$1,694,057	$1,722,554	+ $28,497

The Mexican Light and Power Company, Limited.—The statement of combined earnings and expenses of the electric light and power services owned or controlled by the company, as advised by cable, for the month of June, 1913, in Mexican currency shows:—

Gross Earnings:—	1912.	1913.	Increase.
The Mexican Light & Power Company, Limited	$590,012	$613,568	$23,556
Pachuca Light & Power Company	110,126	131,689	21,563
Total gross earnings	$700,138	$745,257	$45,119
Net Earnings:—			
The Mexican Light & Power Company, Limited	$362,355	$472,804	$110,449
Pachuca Light & Power Company	59,385	73,509	14,124
Total net earnings	$421,740	$546,313	$124,573
Aggregate gross earnings from January 1st:—			
The Mexican Light & Power Company, Limited	$3,648,761	$3,813,615	$164,854
Pachuca Light & Power Company	671,902	779,924	108,022
Total aggregate gross earnings	$4,320,663	$4,593,539	$272,876
Aggregate net earnings from January 1st:—			
The Mexican Light & Power Company, Limited	$2,696,306	$2,927,563	$231,257
Pachuca Light & Power Company	302,022	447,087	55,065
Total aggregate net earnings	$3,088,328	$3,374,650	$286,322

Porto Rico Railways Company, Limited.—The comparative statement of earnings for June, 1913, of the Porto Rico Railways Company, Limited, is as follows:—

For June:—

	1912.	1913.	Increase.	%
Gross	$64,104.23	$71,656.43	$7,552.20	11.78
Net	18,564.96	33,914.05	15,349.09	82.68

For six months:—

	1912.	1913.	Increase.	%
Gross	$433,580.44	$434,777.24	$1,196.80	0.28
Net	170,826.45	193,713.11	22,886.66	13.39

Ottawa Light, Heat and Power Company.—The subscription rights for the new $800,000 issue of capital stock of the Ottawa Light, Heat and Power Company expired on Tuesday. This will increase the capital stock of the company to $2,800,000 and the extra revenue is to be used to cover the cost of a new half-million dollar gas plant in Ottawa East, and several improvements and alterations in the present gas and electric systems controlled by the company.

The new issue was offered to shareholders of record of July 1st at par. Each shareholder was allowed one new share for two and one-half already held, and the issue was readily taken up.

Canada Transportation Lines, Limited.—Messrs. Richardson & Company, Montreal, have prepared a circular on the new Canada Transportation Lines, Limited, which combines Richelieu and Ontario and eleven other water transportation companies.

In a statement of earnings, past and prospect, the following figures are given:—

Earnings.

Year ended December 31st, 1910	$ 885,545.39
Year ended December 31st, 1911	1,153,909.62
Year ended December 31st, 1912	1,503,948.67

The estimated earnings for 1913 are as follows:—

Allowing for new tonnage not in operation before this year, on the same basis as earnings on similar tonnage in 1912, increase in earnings over 1912	263,000.00
Estimate savings in executive and operating expenses for 1913	250,000.00
Net earnings of 1912	1,503,948.67
Total	$2,016,948.67

The latter figure, the circular states, does not include any allowance for the natural increase in earnings. Deducting $375,000 for interest on the $7,500,000 issue of 5 per cent. debenture stock and $875,000 on the $12,500,000 7 per cent. preferred shares, a balance of $666,948 is left from the total estimated earnings, or equal to 6⅔ per cent. on the common stock.

ALBERTA'S FARMING PROSPECTS

(Special Correspondence.)

Calgary, July 23rd.

Alberta is enjoying magnificent crop weather. Every day brings closer what to every appearance will be the largest crop of grain yet harvested. In addition, the first picking, as it were, of the results of the campaign in favor of live stock production, is bringing into the market some 250,000 hogs, or four times as many as any previous year. Farmers' credits have been restricted this season. The floating indebtedness of the agricultural communities is, on the whole, believed to be less than a year ago. The prospect is for a bigger crop, better yields, enormously improved grain-handling facilities, and, what is of paramount importance, more of the necessaries of life are being grown on the farm for use there, consequently less which must be purchased with the proceeds of the crop.

◆

The "James Carruthers," the large freighter, arrived at Fort William a few days ago on her maiden trip to the head of the lakes with a cargo of coal. The big freighter was built last year at Collingwood, Ont., and launched this spring. She has a carrying capacity of 15,000 tons gross, and can easily store away in her hold 375,000 bushels of wheat which would be equal to about 375 car loads. The new vessel is about 550 feet in length.

HENRY BIRKS GET WINNIPEG CONNECTION.

Messrs. Henry Birks & Sons, Limited, Montreal, inform *The Monetary Times* that they have entered into an arrangement with Messrs. Porte & Markle, whereby the business now carried on by them on Portage Avenue, Winnipeg, will be taken over by them on September 1st, when both Messrs. Porte and Markle will become closely identified with the interests of the Birks company as managing directors of its Winnipeg connection.

DOMINION BANK'S STATEMENT

The half-yearly statement of the Dominion Bank shows profits of $457,992 for the six months' period, after the usual deductions and provisions for bad and doubtful debts. This statement shows the satisfactory general position of the bank. The immediately available assets are well over $13,000,000, and the total assets are $78,223,000. In this bank premises are set down at $2,925,483. The commercial discounts amount to $48,536,000, and the loans on call are down to $5,182,237. The bank in the six months transferred to reserve the $375,757 received as premium on new stock, and the reserve is now $6,375,757.

BUSINESS OPPORTUNITY OFFERED

On page 227 of *The Monetary Times* this week will be found an advertisement requiring a partner who will be security to the extent of $25,000 in conducting a machinery agency business. The firm which is represented by the agency is a very large and favorably-known English engineering firm which does business all over the world, and has had an excellent record in Canada. It is understood that the English concern has guaranteed to stand a large portion of the Canadian agency's expenses, and the connection seems to be a good one. Little cash is required by the Canadian agency, as the English principals will supply practically all the cash required for the expenses of the agency, we are told, but some capitalist is required to guarantee to the bank that he will be responsible to the extent of $25,000 for certified cheques, which will be required at times by the Canadian agency for deposit purposes in bidding on municipal and other work.

EUROPEAN WARS SHUT OFF SOURCE OF SUPPLY

Western Canada might be considered as a large irrigation system, the headgates of which are at London, was the simile used by Mr. G. K. Nourse, of the Bank of Commerce, Lethbridge, when discussing financial conditions at a board of trade luncheon. Any disturbance in Europe, which would tend to shut off our financial water supply, is bound to be felt, even in the most remote part of Canada, and there can be no question but that our supply has been seriously cut off during the past year.

In connection with the over-development in all lines of business, it must be apparent that this is going on, and must have an enormous effect on money conditions. Much is being loaned by banks to assist good customers which, scientifically, they should never have been asked to advance.

Take the farmer as an example in a small way of what is required in his business on capital expenditures. He must build a house and barn, fence the property and break the land. All of these improvements cost money and are absolute necessities. Just think of the enormous amount of money which was required for these purposes in the last few years in Western Canada, and there is every indication that large amounts will be used in the future for the same purpose. The growth of Western cities has necessitated large municipal borrowings. In many cases the work was proceeded with before the bond issue was sold. Thousands of dollars have been advanced by the banks on the assumption that these loans would be cleaned up from the sale of debentures. Conditions have been such that this was not possible except at a great sacrifice, and the result is that the banks have had to carry these loans. The amount of money carried in this way in Western Canada alone must be enormous; and when you consider that this money is practically taken away from commercial channels, you will understand one of the gravest questions with which banks have to contend. If, within a few months, the different cities so involved were able to sell their debentures and clean up their bank obligations, it would make just that amount of money available for legitimate commercial purposes.

Mr. Nourse also made mention of the suggestion that each of the prairie provinces appoint a municipal commission, which would approve and regulate all municipal bond issues.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

St. Boniface, Man.—Tenders will be received up to August 1st for $345,890 debentures.

Carleton County, Ont.—Up to August 6th, for $20,000 5 per cent. debentures. C. McNab, county clerk.

Irvine, Sask.—A by-law to issue $3,000 debentures for town hall and market will be voted upon August 6th.

Ottawa, Ont.—Up to August 28th for $1,164,706 debentures. Tenders to be addressed Chairman, Board of Control.

Halifax, N.S.—Tenders will be received up to July 28th for debentures totalling $299,750. W. L. Brown, city treasurer.

Winslow R.M., No. 319, Man.—Up to August 2nd, for $5,000 10 per cent. 10 annual instalments. R. H. Percival, secretary.

Bradford, Ont.—The ratepayers will vote upon a by-law on August 12th, to loan $20,000 for establishment of wire screen factory.

Manitou S.D., Man.—Tenders are invited for $30,000 6 per cent. 20 instalment debentures. R. A. McIntosh, secretary-treasurer, Manitou.

Parry Sound, Ont.—Tenders will be received up to August 5th for $55,500 debentures for loan to a smelter industry and electric light improvements.

North Bay, Ont.—Up to August 4th, 1913, for $321,500 debentures. M. W. Flannery, treasurer, North Bay. (Official advertisement appears on another page).

Redcliff, Alta.—By-laws to purchase factory sites and construct extension to waterworks totalling $121,000 will be voted upon July 28th and August 4th respectively.

Wetaskiwin, Alta.—Up to August 20th, for $81,000 5½ per cent. debentures. E. Roberts, secretary-treasurer, Wetaskiwin. (Official advertisement appears on another page.)

North Battleford, S.D.—Up to August 5th for $60,000 6 per cent. 30-year debentures. H. Basil Thomas, secretary treasurer. (Official advertisement appears on another page).

Forest, Ont.—Up to July 31st for $20,000 5½ 30 instalment debentures. G. E. McIntosh, chairman, finance committee, Forest. (Official advertisement appears on another page).

Mantario R.M., No. 262, Sask.—Up to August 12th, for $6,000 6 per cent. 20 instalment debentures. Isaac Walker, secretary-treasurer, Alsask. (Official advertisement appears on another page.)

COBALT ORE SHIPMENTS.

The following are the shipments of ore in pounds from Cobalt station for the week ended July 18th:—Hudson Bay, 66,700; Cobalt Lake, 63,340; Pennsylvania-Canadian, 80,525; McKinley-Darragh, 144,515; Cobalt Townsite, 141,680; total, 496,760. Miller Lake and O'Brien, 46,500 (omitted from July 4th statement). The total shipments since January 1st are now 21,722,979 pounds or 10,861 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

BRITAIN'S MOTOR CAR INDUSTRY.

Last year there were imported into Great Britain 7,373 complete motor cars worth £1,826,678, and 7,518 chassis worth £1,901,829, together with parts to the value of £3,417,420, making a total of £7,145,927. Four years previously, in 1908, the total was £4,112,461, made up of 3,830 cars worth £1,389,552 and of 3,370 chassis worth £1,063,077 and parts worth £1,659,832. Thus, in 1912, as compared with 1908, imports had increased by about 74 per cent.

The exports of British manufacture in 1912 were worth £3,682,468; cars to the number of 5,277 accounting for £2,023,715, chassis (1,180) for £437,224, and parts for £1,221,529. In 1908 the corresponding figures were 2,216 cars worth £800,636 and 225 chassis worth £75,084, with parts worth £381,039; and the total, £1,258,559 was little more than a third of what it had grown to last year. It may also be noted that the re-exports in 1912, valued at £765,184, were more than double those of 1908.

MUCH CONSTRUCTION AT ST. JOHN

Normal Trade Conditions—Buildings Will be Completed —By-law re Wooden Structures

(Special correspondence.)

Saint John, July 22nd.

Trade conditions in St. John and New Brunswick generally are sound, and wholesale merchants in all branches report a good seasonable business in progress. There is a peculiar situation in St. John, and yet it goes to show that the general condition of affairs is healthy. The saw-mills have been idle for more than a month, because of a dispute over wages. In an ordinary season such a condition of affairs would affect the worker and the storekeeper, but there is so much heavy construction work and work of other kinds in progress that the men who left the mills have had no difficulty in securing other employment The most important effect has been a reduction in the export of lumber, as several charters were cancelled and shippers would not of course make new charters without the assurance of cargo.

Busy on Construction Work.

Rapid progress is being made with the new Canadian Pacific Railway grain elevator, which will be completed this year. The foundation for the sugar refinery, which required nearly one hundred and seventy-five concrete piers sunk to a depth of thirty-five to forty feet, is almost completed and the erection of the steel superstructure will soon begin. Messrs. Norton-Griffiths and Company are pushing forward the work on the breakwater on the site of the dry dock at East St. John, while the new wharves at West St. John give employment to large numbers of men, and the Federal government has just asked for estimates of the cost of grain conveyers on two of the steamship berths which have not yet been provided with these facilities.

The municipal council of the city and county of St. John have adopted a resolution pledging the municipality to grant assistance to any company which will lay down a shipbuilding plant at St. John, the assistance to be commensurate with the extent of the work and the employment of labor.

Fire Protection and City's Policy.

The St. John city council some time ago adopted a by-law providing that no wooden buildings should be erected in the city proper to a greater height than two stories. A largely-signed petition against the regulation has lately been presented, and in order to get a decided expression of popular opinion a plebiscite will be taken. Fire insurance men point out that insurance rates are higher because there are so many wooden buildings, and it is obvious that sooner or later only brick construction can be permitted in the city proper; but at present the plea that a third story increases the profit on a building and at the same time has a tendency to keep rents down seems to have weight with a good many people.—H.T.H.

◆

WILL DO BUSINESS IN ONTARIO

The following companies have been licensed to do business in Ontario:—The Samuel Austin and Son Company, Ohio, U.S.A., to use in Ontario $40,000; Pittsburgh Visible Typewriter Company, Delaware, U.S.A., $40.000; the J. R. Watkins Medical Company, Minnesota, U.S.A., $100,000; Dominion Glass Company, $2,000,000; Canadian Rogers Company, $1,000,000.

PLATE GLASS INSURANCE TRANSACTED IN CANADA

Fifteen companies are writing plate glass insurance in Canada, under the supervision of the Dominion insurance department. The accompanying table shows that last year they took in premiums $189,827. The losses incurred during the year totalled $85,900, and claims of $81,579 were paid. Unsettled claims, not resisted, aggregated $14,017. There were no resisted claims.

Mr. E. B. Anderson, of the plate glass department of the Royal Indemnity Company, speaking at Quebec the other week, stated that there is much to be done before the business reaches the plane on which it should have been placed years ago. Despite the fact that plate glass insurance is one of the oldest of casualty insurances, it is still in its infancy so far as it may be considered a scientifically rated and conducted business. The principal idea with some seems to be to feel complacent if the result as a whole is satisfactory; to establish a scientific method of estimating costs is quite unnecessary.

The method followed in classifying risks, and seemingly with success, in other branches of casualty insurance could well be adopted in plate glass insurance, he added. Divide the business as a whole into as many parts as there are classes and charge against each division the losses occurring on each risk in such division. The result of this classifying of risks will show in time whether or not plate glass rates are equitably distributed. At the present time the plate glass underwriters, who have more than a slight idea of the relative merit of risks, appear in the minority. One is tempted to say that plate glass underwriting at the present time is founded on meagre information and belief and developed by guesswork. The business is too important to be conducted on the hit or miss principles of to-day; probably in no other line of casualty insurance is so little attention paid to experience tables.

The one hope for the plate glass branch of casualty insurance, thinks Mr. Anderson, is that its prominent men broaden their views and exercise a little more initiative. The reduction of expenses both in cost of production and in the adjustment of losses is a feature which should be carried to its logical conclusion. In view of the vital importance which it means to the business as a whole, it is to be hoped that all underwriters will put their shoulders to the wheel and will bend their whole force to the continuation of the movement which in its conception means the betterment of conditions and in its conclusion a distinct benefit not only to the insuring public but to the insurers as well.

As Mr. H. C. Hedden, secretary of the New Jersey Fidelity and Plate Glass Company, pointed out at the recent casualty underwriters convention in Canada, when plate glass insurance was introduced to this continent in the late 'sixties, plate glass was a rare and expensive luxury. There were but a few store fronts equipped with it and the entire supply was imported from Europe. During the 'eighties plate glass ceased to be a luxury and became a necessity. Factories were erected in this country and as the supply increased its use became more common and even buildings of very modest pretensions were fitted with plate glass store fronts. From this time the business of plate glass insurance kept pace with the building developments.

Company (1912).	Premiums of the year	Number of Policies new and renewed	Number of Policies in force in Canada at date	Losses incurred during the year	Claims paid	Unsettled claims—not resisted

WINDING-UP BANKS A SLOW PROCESS

Liquidation of Ontario Will Not be Completed Yet—Farmers and Sovereign Banks

Three Canadian banks are still in process of liquidation though they failed several years ago. These are the Ontario, Sovereign and Farmers Bank. The first-named went into liquidation on October, 1906, the second on January 18, 1908, and the third failed in December, 1910. Two small Quebec provincial banks also disappeared from the list in 1908, the Banque de St. Jean and the Banque de St. Hyacinthe. That the winding-up is a slow process is clearly seen, especially in the case of the Ontario Bank. This was first in the hands of Mr. W. E. Stavert and now of the Royal Trust Company, who state that it is proving a very satisfactory liquidation. An effort is being made not to sacrifice any of the bank's assets. Better prices have been obtained by the adoption of a waiting attitude, than if the assets had been sold at once. It will probably be a considerable time yet before the affairs of the defunct bank are completely settled and all the assets sold.

Mines and the Farmers Bank.

With regard to the Farmers Bank the assets have been largely reduced to slow and doubtful accounts, including several large amounts where realization is tedious and uncertain; mining properties, of which the bank has several, including the Keeley mine, a small amount of real estate and some mortgages receivable, which are being collected as they mature and double liabilities against stockholders. From reports recently received, it looks as though there is a chance that the holders of the option against the Keeley mine may take it up, in which event the bank will receive $150,000, or can, if it so desires, retain a quarter interest, accepting three-quarters of $150,000 for interest to be sold.

So far as double liability is concerned, action has been taken against the shareholders and judgments exist against a considerable number who did not file a defence. These judgments have not been levied for, by reason of the possibility of the Dominion of Canada granting relief to depositors, in which event it is said depositors will make a contribution so that the shareholders may be relieved of double liability.

So far as the mining properties of the bank go, they will be realized upon as soon as possible. There is outstanding and not paid about $300,000 of circulation. In the event of the option of the Keeley mine being taken up, the Farmers Bank should be able to pay circulation in full. Should the property not be sold or bring any substantial price, it is dobutful if the assets of the bank will be sufficient to meet circulation.

Winding-Up the Sovereign Bank.

A company, International Assets, Limited, was formed in July, 1911 to handle the affairs of the Sovereign Bank. Its authorized capital stock is $4,000,000 of which $1,000,000 is common and $3,000,000 redeemable cumulative preference six per cent.

The immediate purpose of the incorporation of the company was the purchase of the debt due by the Sovereign Bank of Canada to certain other banks, and also the purchase direct from the Sovereign Bank of the equity of redemption in the assets which were pledged as security for that debt and of certain assets which were not so pledged. The debt of the Sovereign Bank was $3,938,997.77, with interest from the 30th of June, 1911, and this was taken at its face value, the payment for it to be $2,038,997.77 and interest in cash, and $1,900,000 in five per cent. bonds

In addition, the company assumed a liability of the Sovereign Bank amounting to $120,000, the payment of which had been guaranteed by the assisting banks, and in order to provide for the payment of this it issued a bond for $120,000 maturing on the 1st of January, 1912, being the due date of the liability, the total bonds issued thus amounting to $2,020,000.

Some Holders Stayed Out.

In order to obtain the cash portion of the price, the preference stock was offered for subscription to shareholders in the Sovereign Bank and subscriptions were received to the extent of $2,212,600, of which $54,850 has been forfeited for non-payment, leaving $2,157,750 actually outstanding.

As part of the general arrangement, the company undertook to relieve its preferred shareholders from all liability in connection with their holdings of stock in the Sovereign Bank and in carrying out that undertaking has accepted from its shareholders transfers of that stock. so that it is now a shareholder in the Sovereign Bank to the extent of $2,057,700. There are, however, a few shareholders who have refused or neglected to transfer their Sovereign Bank stock to the company, and they must take the responsibility of any risk there may be thus in declining to avail themselves of one of the means of protection offered to them.

The assets which this company purchased may be listed under four main headings:—1. Interest in Alaska Northern Railway Company. 2. Interest in Chicago and Milwaukee Railway Company. 3. Claims against previous directors of the Sovereign Bank. 4. Sundry assets.

The following particulars regarding the Sovereign Bank appear in the June bank statement:—Capital authorized, $3,000,000; capital stock—capital subscribed, $3,000,000; capital stock—capital paid up, $3,000,000; notes in circulation, $26,345; total liabilities, $3,797,720; greatest amount of notes in circulation at any time during the month, $26,685.

The second annual meeting of the International Assets, Limited, will probably be held during the next few weeks.

TRIP TO THE MARITIME PROVINCES.

Mr. J. J. Durance, manager for Canada of the General Accident Assurance Company and of the Canadian Casualty Insurance Company has completed a five weeks' trip in the maritime provinces. All his agencies there report satisfactory business. Mr. Durance does not think these provinces are feeling the financial stringency to so great an extent as western Canada.

Reports from the General Accident's agents in the west are, with few exceptions, very gratifying. The company has now a reserve fund almost double its paid capital. Mr. Durance will probably make a business trip to the Pacific coast in the fall.

CANADA EXPORTS HAY.

Over 2,000 bales of Canadian hay have reached Manchester by direct steamer since the opening of the St. Lawrence. Hay merchants in both Manchester and Liverpool report a quiet business, states Mr. F. A. C. Bickerdike, Canadian trade commissioner at Manchester, and latest prices are as follows:—

Prime Lincolnshire clover	110s.
Cheshire rye grass and clover	100s.
Irish ryegrass	80s.
Irish meadow	65s.
Canadian timothy and clover	87s. 6d.
Norwegian	100s.
Baled straw	45s.

GERMANS WANT TO DO BUSINESS.

Mr. J. J. von Weber, publisher of the Illustrite Zeitung, Leipzig, Germany, has forwarded to the Bureau of Provincial Information, Victoria, B.C., the following trade inquiries:—

Franz Naumann, Halle a Saale, Germany, asks information as to demand for machinery, etc., for granaries, silos and elevators.

Josef Fugner, Zuckmantel b. Teplitz, desires to be informed as to the market for moulded table-glass, ornaments, opalescent, antique, wired glass, and glass wall plates.

J. Heimann, Furth, as to market for elastic suspenders, etc.

Max Hoffmann, Sarotti Chocoladen und Cacao-Industrie, Berlin, wishes to secure suitable agents in Canada.

Richard Puchert, Ruppersgrun, near Werdau, wants to correspond with importers of cotton goods, ready-made clothing, large department stores, printing works, cotton mills and pasteboard mills.

Joseph Salomon, Hamburg, seeks the sale of Canadian farm produce on commission; also the exportation of all kinds of textile goods to an agent in Canada.

Edmund Wirth, Councillor of Commerce, Sorau, wishes to establish an agency for the handling of cloth, cloak material, etc., for ladies.

Mr. Zander, Councillor of Commerce, Bergisch-Gladbach, invites correspondence re cellulose and paper.

Johannes Dienst, Berlin, wishes to be informed about the market of musical instruments. He is open to an arrangement for the importation of certain Canadian goods.

Herr Fichtner, Vienna, wishes to establish a factory for the manufacture of photographic dry-plates and photographic paper, and invites correspondence on the subject.

MINING OPERATIONS IN BRITISH COLUMBIA

Greater Activity is Apparent—Busy Boards of Trade—Great Northern Railway

(Staff Correspondence).

Vancouver, July 21st.

British Columbia's large mining companies are getting more active, and if they extend their holdings and enlarge their operations this will serve to attract more money for mining propositions. Greater activity is apparent in the boundary, in the Similkameen, and up the coast where the Granby Company is expending two or three million dollars at Observatory Inlet. The British Columbia Copper Company, which has a big plant at Greenwood, will take up its bond on the Voight properties in the Similkameen, which is an indication of the mineral resources of that district. It is remarkable how little one hears of the interior of the province. Were it not for the mining men who come out every once in a while information as to what is going on would be scarce. The British Columbia Copper Company spent much money diamond drilling in the Similkameen, and the report is that it proposes to erect a concentrator near Princeton, B.C. The owners of the Nickel Plate at Hedley are also extending their holdings and have in prospect the further acquisition of claims adjoining their property.

Freight rates are heavy in British Columbia and these have had the effect to retard the development of the smaller claims. Under existing conditions, a concentrator is necessary at a mine, since shipments of raw ore cannot be made owing to the excessive charges. That is one of the reasons why only the larger companies are really active.

Mr. W. S. Edwards, of Toronto, a large shareholder in the Dome mine and Dome Extension in the Porcupine, has taken over the Surf Inlet gold mine on Princess Royal Island, owned by Vancouver people. Nine claims and a waterpower are included in the property.

Boards of Trade are Interested.

The Victoria board of trade is taking a keen interest in the suggestion that a memorial should be presented to Hon. J. D. Hazen, minister of marine and fisheries, when he visits the coast. In this will be a strong recommendation that something be done to stimulate the Canadian shipbuilding industry in Canada.

Another matter that is being given attention by the Victoria board of trade is a made-in-Victoria exhibit for the agricultural exhibition next autumn. Both in Victoria and Vancouver this subject is being discussed. Large amounts of money are sent out of the province for articles that either are or can be produced on the coast, and the object of these exhibits is to let people know just what is produced in their own cities.

The board of trade of Port Coquitlam, the new name of Coquitlam on the Pitt River, at the junction with the Fraser, held its annual banquet last week. The new officers are: Honorary president, W. J. Manson, M.P.P.; president, Mr. F. H. Seabrook; vice-president, Mr. Arthur Mars; secretary and treasurer, Mr. C. B. McIntyre.

Completion of Great Northern Line.

January 1st, 1915, is the date fixed for the completion of the Great Northern's line through the Hope mountains. That will be the direct line to the Kootenay, the road that has been looked for and expected for the past ten years. Once a line of railway extends straight east from the coast, there should be considerable development in the southern interior of the province, which at present, though near geographically, is remote as far as transportation is concerned. When the mainland line is ready right through, the Great Northern is to improve the link between Victoria and Sydney on Vancouver Island, which gives connection with the capital. Several gasoline-electric engines of the most approved type will be utilized immediately, and comprehensive improvements are proposed.

The Home Bank of Canada has declared a dividend at the rate of seven per cent. per annum for the three months ending August 31st.

Fur traders have been in Edmonton from Fort Chipewyan and Fort Smith, about four hundred and six hundred miles north, respectively, bringing in a portion of their season's takings in furs and will take back with them heavy cargoes of supplies for next season's trade. It is estimated that the value of the furs brought into Edmonton from the north and the return shipments of merchandise into which the proceeds are converted aggregate something over a million dollars annually. Edmonton is the distributing point for a territory extending northwards for something like 1,800 miles, reached by more than 3,000 miles of navigable waterways.

TORONTO'S EXPENDITURES.

The return of the expenditures of the various departments of the city of Toronto, controllable and uncontrollable, for the first half-year has been made by the city treasurer's department. The city has expended $4,116,976 of the total appropriations of $8,564,608.

GREAT BRITAIN'S CANADIAN PURCHASES AND SALES.

The following are the official figures of trade in the undermentioned articles during June:—

Imports from Canada.	June, 1913.	June, 1912.
Wheat	£1,106,038	£1,285,800
Flour	191,753	245,057
Oats	112,364	107,022
Cattle	18,980	48,644
Bacon	85,797	93,626
Hams	50,275	34,237
Cheese	256,792	443,305
Canned Salmon	26,698	7,388
Exports to Canada.		
Spirits	46,884	47,131
Sugar	4,594	12,950
Wool	6,612	10,541
Hides	13,302	4,737
Pig iron	14,020	21,123
Wrought iron	10,495	5,132
Rail iron	219	18
Plates	5,489	1,962
Galvanized sheets	36,939	32,908

LEADING AUTHORITY TALKS OF OUTLOOK.

Sir Felix Schuster, governor of the Union of London and Smith's Bank, one of the highest authorities in Europe on business and banking, expressed himself in hopeful terms upon the outlook for the stock exchange markets at the meeting of the bank's directors this week.

"A reaction must soon set in," he said, referring to the present monetary depression, "and when recovery takes place I believe it will be as rapid as was the fall in prices. I think it highly probable that investors' attention will turn itself once more to home securities, which now yield such tempting returns. The continuance of disastrous wars in the Balkans and the preparations for war elsewhere could not but be of the greatest importance in financial affairs, and I think it reflects great credit upon the money markets of Europe, that the strain had been stood so well, for the economic loss has been enormous.

"Furthermore, in consequence of war and of preparations for war on the continent considerable hoarding has taken place in various countries, and when peace is restored these hoards, the amount of which it is difficult to estimate, will gradually return to the monetary centres and bring considerable relief."

TORONTO TO ACQUIRE FRANCHISES.

The sale of every privately-owned electrical railway franchise, the Inter-Urban Light and Power Company, and all assets of such interests within the city limits of Toronto for $22,000,000, if the report of the experts shows the property and rights to be worth this amount, is the essential feature of the agreement reached by Mayor Hocken and Controller McCarthy, after a council with Mr. E. R. Wood, Mr. William Moore, Mr. Z. A. Lash and other representatives of the Mackenzie interests in Toronto.

The price of $22,000,000 includes the Toronto and Toronto and Suburban Railway's assets and franchises, the Inter-Urban Light and Power Company, the end of the Metropolitan Railway on Yonge Street, the sections of all radial lines within the city limits—in brief all the tracks and rights within the city limits.

Provision is made also, it is understood, by which the city may acquire other portions of such radials as the city boundaries are extended. It is a complete clean-up of all electrical railway franchises in the city.

The deal is conditional upon the city acquiring the Toronto Electric Light Company's franchise and holdings at a price of $8,000,000.

For the entire deal the city will be required to raise only $8,000,000 cash by the sale of city bonds, secured by the properties acquired.

PERSONAL NOTES

Mr. Richard Grigg, chief Canadian trade commissioner, is in Japan.

Mr. C. E. Abbs has been elected a member of the Toronto Stock Exchange.

Mr. C. Hamilton Wickes, British Trade Commissioner in Canada, is on a visit to England.

Mr. Ernest H. Godfrey, F.S.S., of the Census and Statistics Office, Ottawa, will represent the Dominion of Canada at the fourteenth session of the International Statistical Institute which will be held at Vienna, Austria, from September 6th to 13th.

Mr. J. Emo, of Montreal, general manager and secretary, Canadian Railway Accident Insurance Company, has been elected a member of the executive committee, International Association of Casualty and Surety Underwriters. The work performed by Mr. Emo, as chairman of the entertainment committee at the recent Quebec convention was much appreciated.

Mr. Jackson Dodds has been appointed secretary of the Bank of British North America, with headquarters at London, England, in succession to Mr. A. G. Wallis, who retires after a service of 46 years, during 32 of which, he filled the post of secretary. Mr. Dodds was educated at the City of London school. After four years' service at the London, England, branch of Comptoir Nationale d'Escompte de Paris, he entered the service of the Bank of British North America in February, 1901, at Halifax. He was subsequently stationed at the Montreal, Ottawa, Brandon and Darlingford branches. In 1907 he was appointed manager at Reston, Man., and in 1909 assistant manager at Vancouver. In February, 1911, he was appointed assistant secretary at London.

REFUSED OPTION AT NINETY.

No bids were received for the block of $25,000 6 per cent. town hall debentures of Broadview, Sask. One firm asked for an option at 90, but this was refused.

MOOSE JAW NEGOTIATES LOAN.

The city of Moose Jaw, Sask., has negotiated a loan through Messrs, Wood, Gundy and Company, Toronto, for $300,000, at 6 per cent., maturing January 1, 1914. The lenders are a London syndicate, and hold in pledge in return $500,000 of city bonds.

CANADA CEMENT AND BRITISH COMPETITION.

Mr. F. P. Jones, managing director of the Canada Cement Company, has returned to Montreal after a trip to Europe. He visited several cement plants in England and says he does not expect his company will have any trouble through English competition, as cement to-day is higher in Great Britain than in Canada. Mr. Jones also thinks that no British capital will come to Canada to be invested in any new cement industry.

CONTROL OF OCEAN FREIGHT RATES.

Action by the Canadian Government with a view to more effective control of ocean freight rates is likely to be a development in the near future, says an Ottawa dispatch. The Borden Government at the beginning of next month will despatch to Great Britain a representative charged with the duty of opening negotiations with the British Government, looking towards a joint control of the charges levied by ocean carriers upon freight in transit between Canada and the Mother Country.

IMPORTANT GATHERING OF GEOLOGISTS.

The delegates to the International Geological Congress left Toronto this week for northern Ontario. The party, which numbers 60, includes some of the leading geologists, mineralogists, and mining engineers of the world. The chief points of interest are the nickel and copper deposits of Sudbury; the iron mines of Moose Mountain; the iron range of Timagami; the cobalt-silver deposits of Cobalt and the gold quartz veins of Porcupine.

The party will later visit the western provinces and the Pacific coast.

GRAND TRUNK ISSUES FIVE-YEAR NOTES

Seven and Half Million Dollars Sold in London for Equipment Now on Order

An issue of $7,500,00 5 per cent. five-year equipment notes at 98 has been made by the Grand Trunk Railway in London, $10,000,000 4 per cent. debentures being deposited as security. Mr. E. J. Chamberlin, president of the road informs *The Monetary Times* that this issue is for equipment now on order. Canadian financial houses were somewhat surprised that such an issue was made overseas, as hitherto Grand Trunk equipment notes have been sold in the United States.

A London cable says that something like a shock was momentarily given the market by the discovery that the Grand Trunk directors were underwriting this issue. The financial editor of the London Standard says:—"The short-term note is not the sort of thing the Grand Trunk market has been used to. At first there was some hesitation in accepting the offer of underwriting, as the market would naturally be a limited one.

"These notes are, however, acceptable enough in many quarters, including insurance and trust companies, and there is little doubt that the company will get the money all right.

May be Fair Business Stroke.

"The unfortunate part is borrowing on such onerous terms tends to depreciate the value of the debenture stocks. Not so long ago the company could have issued four per cent. debentures about at par. Still if, as is thought possible in some quarters, the company by borrowing $7,500,000 for equipment at a cost of $360,000 per year can save $1,250,000 now paid annually for rental of rolling stock or even a great part of this, it may be a fair stroke of business after all."

The financial editor of the Daily Mail says that critics in the market say that such security should be issued only by a company which is in temporary financial difficulties, but expects to earn the profits in a few years.

Better Terms Later.

"The directors, however," it adds, "have probably taken this course because they consider a more permanent security may be issuable on better terms in a few years to come, and notes are the best way of bridging over the intervening period."

The London Morning Post says that the short life of the Grand Trunk notes gives them special recommendation to a growing class of investors which confines itself to redeemable securities of this sort.

INSANITY AND SANITY IN THE WEST

Moose Jaw Evening Times, July 19, 1913.—"Nowhere in Europe are there any reports of a state of affairs similar to that which prevails in this country and in the West in particular. Canada is in the grip of a small ring of financial sharks. How long will the people consent to be preyed upon by these institutions and the men that own them? If we had a Dominion Government worth anything it would come to the relief of the country and issue enough currency to relieve the situation, or if necessary secure from England sufficient to tide us through the crisis. If the present situation lasts six weeks longer the failures in the West will be appalling. The Government of Canada can take measures which will either bring the banks to time if they are merely tieing up money, or to prevent a crash in such institutions if they have no money."

Calgary Herald, July 18, 1913.—"To go begging to the Dominion for a loan for our individual relief as business men would be degrading. It would undermine the very foundations of our manhood as a community. Save money and pay your debts as fast as you can. That is the way to relieve this financial stringency. With the marvelous resiliency of western Canada, with the help of good crops and of immigration, and with the unbounded enthusiasm of our business community, we will not take long to overcome the difference between what we need to borrow and what we now can properly get. The sooner we start saving and paying the better, and the fewer quack doctors we listen to the better."

The Beauharnois Machinery Company, Limited, has changed its name to the Berthier Machinery Company, Limited.

EDUCATIONAL STATUS OF THE PEOPLE

Eighty-nine Per Cent. Can Read and Write—British Immigrant Best on the Ballot Paper

The educational status of the people five years of age and over is presented in a census bulletin. The number of persons under five years of age was 883,508, leaving 6,323,155 persons whose educational acquirements were recorded in the census of June, 1911. The increase in the population five years of age and over from 1901 to 1911 was 33.72 per cent.; during the same period the number of those who can read and write increased by 43.48 per cent., while the number of those able to read only decreased by 74.64 per cent. In 1901 there were 680,132 persons in Canada who could neither read nor write, in 1911 the number was 667,340, a decrease of nearly two per cent. in ten years.

Persons who can read and write constituted 88.93 per cent. of the population of five years of age and over in 1911 as against 82.88 per cent. in 1901; those who can read only were 2.74 per cent. in 1901 as against one-half of one per cent. in 1911, and the illiterates, classing as such, persons who can neither read nor write, represented 14.38 per cent. of the population five years of age and over in 1901 as against 10.55 per cent. in 1911, a betterment of 3.83 per cent. in the decade.

Improvement in Alberta and Saskatchewan.

The improvement in the educational status of the population of Alberta and Saskatchewan is strikingly illustrated by the fact that the percentage of those who can read and write has increased from 1901 to 1911 by 22.16 per cent. in Saskatchewan and 17.25 per cent .in Alberta; there being, of course, a corresponding decrease in the number of illiterates. In this connection it may not be out of place to mention that during the year 1910 Saskatchewan found it necessary to establish 254 new school districts and Alberta 251 to keep pace with the educational requirements of their rapidly increasing population.

Ontario still leads among the provinces as having the greatest percentage of persons five years of age and over capable of reading and writing. Of the Eastern provinces Quebec has made the greatest proportionate increase from 1901 to 1911 in the number who can read and write.

In every 1,000 of the male population 880 claimed to be able to read and write, and 896 in every 1,000 of the female population of five years and over inclined to have a like accomplishment. A greater proportion of females than of males have acquired an education in the Eastern provinces and a lesser in the Western provinces. In Ontario, Nova Scotia and Prince Edward Island the conditions are fairly even.

As to the British Immigrant.

That the educational standard of the British immigrant has improved in recent years is evidenced by the fact that their proportion of illiterates is smaller in those provinces which have received the greatest number of them within recent years. The per cent. proportion of illiterates among the foreign-born immigrants is much higher, and is fairly level for all the provinces, being highest for both sexes in Manitoba.

Of the Canadian-born nearly 10 persons in every 100 are unable to read the ballot paper; of the foreign-born nearly 17 persons in every 100 show a similar deficiency; of the British immigrants, including born in United Kingdom and possessions, only 3 in every 100 are so situated.

At the last census there were 2,197,663 males of voting age; and of these 1,990,341 or 90.57 per cent. could read in some language.

A much greater proportion of the immigrant population than of the native-born are adults. The percentage of British-born immigrants of five years of age and over is 98.2 per cent. for males and 97.4 per cent. for females; for the foreign-born it is 97.7 per cent. for males and 96.2 per cent. for females as against 85 per cent. for males and 84.9 per cent. for females of Canadian birth. The difference in the proportion is even more apparent in males of voting age as only 50.6 per cent. of the Canadian-born are 21 years of age and over as against 81.5 per cent. for British immigrants and 73.6 per cent. for foreign-born.

The statistics are presented for a younger age than children in the newly-settled portions of the country can attend school, and that the aboriginal population is included in the calculations.

◆

"Canadian municipal bonds deserve to be known as being among the soundest securities on the market," says Mr. L. Zuckermandel, a prominent banker of Berlin, Germany. Mr. Zuckermandel is manager of Messrs. C. Schlesinger-Frier and Company, of Berlin and is accompanied by Mr. F. T. Warschauer, of the National Bank of Germany

GRAND TRUNK IN NEW ENGLAND

If Rhode Island Legislature Moves and Funds Can be Got, Work Will be Resumed

Little progress has been made in connection with the Grand Trunk's New England work. Mr. E. J. Chamberlin, president of the road, has reiterated the fact that work on the Southern New England was deferred on account of the tightness of money caused by the Balkan war. Interesting comment on the feeling of the people of New England State on this matter appears in the report of the British Consul-General at Boston for 1912, just published.

Speaking of the industrial relations between New England and Canada, the report says:—"It is remarkable how the attitude of the average American citizen has changed toward Canada in the course of a few years. Canada, especially the Canadian North-West, now looms up large in the public eye, and strenuous efforts are being made to secure for Boston a share of the immense traffic of what is now universally regarded as being (with the possible exception of the Mississippi Valley) potentially the greatest and richest agricultural region in the North American continent. The extreme bitterness of the newspaper attacks made on the Grand Trunk Railway respecting their promise to build a terminal at Boston, connecting this port directly with Montreal, shows the importance which local business men attach to the matter."

How Boston was Disappointed.

It is stated that "great expectations were aroused in Boston by the announcement that the Grand Trunk was to make the port a terminal, and it was eagerly hoped that Boston would get a proportion of the immense traffic of the Canadian Northwest and that the alleged monopoly of the New York, New Haven and Hartford Railroad would be destroyed. Some business men, however, maintained the view all along that the Grand Trunk was little likely to develop an American port when the Canadian ports, such as St. John, New Brunswick and Halifax, Nova Scotia, were available, and that the whole affair was an attempt on the part of the Grand Trunk to obtain favorable agreements as to through rates from the New York, New Haven and Hartford Railroad. The recent cessation of the Grand Trunk's construction work confirmed this view, and the disappointment of the local public was very great."

Work May be Resumed.

After the Grand Trunk ceased its work in New England, the governor of Rhode Island vetoed the bill permitting the road to be leased to the Central of Vermont, and until that is corrected, there is no possibility of continuing the work. Mr. Chamberlin expects this situation well be remedied when the Rhode Island legislature meets next fall. If so, he says, when the road can get funds, the work will be resumed.

◆

MARKET FOR CANADIAN HONEY.

It is to be hoped that firms interested in the honey trade will not this year overlook the market available in Great Britain for this product. The demand for honey for various manufacturing and edible purposes is an expanding one and is being largely supplied from Jamaica, Australasia and Chili, in addition to the home supply. It would be pleasing to see Canadian firms bring themselves more into evidence on this market, says Mr. J. M. Mussen, Canadian trade commissioner at Leeds.

◆

WINNIPEG'S SUCCESS INSPIRES THE MARKET.

In view of the adverse criticism which recently has been leveled in England against Canadian municipal securities, the splendid reception given to the latest issue by Winnipeg, which was over-subscribed in advance, has produced the greatest satisfaction in Canadian financial circles in London, says a Canadian Associated Press cable message.

The comparatively low price at which the loan was floated is unquestionably due, it is said, to the recent uncalled-for attacks on civic borrowers, which it is now apparent the city has not taken too seriously.

Canadian financial authorities on this side are confident that the flotation will prove advantageous to the Canadian situation generally, but in their opinion it would be better for other cities, especially those of lower rank, not to attach too much importance to Winnipeg's success.

The whole situation bristles with difficulties, and civic authorities will be well advised to confine their financial commitments for the present to essentials.

HAMILTON'S FIRE DEPARTMENT

Last Year's Loss Was Heavier—Monthly Returns—Fire Chief Teneyck's Recommendations

During 1912 Hamilton's fire department responded to 422 alarms. This exceeds the number that has occurred in the city in any one year in the history of the department, being 56 more than in the year 1911. There were 238 day alarms and 184 night alarms, 13 from street signal boxes, 340 telephone calls, 10 on Dominion Messenger and Signal Telephone, 2 on May-Oatway fire alarm system and 57 stills. Of the above number of calls for the services of the department, 181 were for fires of a more or less serious nature. Sunday alarms totalled 49, Monday 56, Tuesday 58, Wednesday 62, Thursday 50, Friday 78, Saturday 69, and morning alarms were most frequent at 11 a.m., afternoon alarms at 3 p.m. and night alarms at midnight.

Two-thirds Due to Five Fires.

The total loss by fire and water for the year was $167,281.46. Total insurance on property damaged or destroyed, $4,178,125. Insurance over loss, $4,019,377.54. Loss not covered by insurance, $8,534. Over two-thirds of the total loss for the year was due to five fires alone, namely:—The Dominion Vinegar Company, vinegar works, 41 Stuart Street West, January 13th; the Robert Duncan Company, printing office and bindery, James Street North, February 5th; the Marshall Shoe and Leather Company, shoe store, etc., 323 King Street East, February 22nd; the American Can Company, can factory, Emerald and Shaw Streets, April 23rd; the Diamond Flint Glass Company, glass factory, 439 Hughson Street North, May 18th, involving a total loss of $112,060.74, leaving a loss of $55,220.72 for the remaining 176 fires, or an average of $313.69 for each fire.

Loss Month by Month.

The number of fires each month with loss and insurance was as follows:—

Month.	Fires.	Loss.	Insurance.
January	27	$ 25,512.38	$ 63,850
February	19	69,098.77	287,650
March	17	6,873.55	148,800
April	13	24,871.00	609,000
May	13	24,961.05	1,367,525
June	14	2,888.09	174,160
July	16	1,709.90	133,725
August	11	1,081.22	56,600
September	7	1,180.00	74,400
October	16	3,560.50	89,500
November	11	1,332.00	1,030,475
December	17	4,213.00	142,440
Total	181	$167,281.46	$4,178,125

Hamilton's total loss during the last 33 years has been $21,683,759.

Recommendations of Fire Chief.

In this comprehensive report of Fire Chief Teneyck, carelessness is definitely stated as the direct cause of 36 fires, while other causes that could probably have been eliminated if proper precautions had been taken by individuals were children and matches 32, electrical defects 19, spontaneous combustion 17, cigar and cigarette stubs 9, matchheads breaking off 8, hot ashes 3. Among the recommendations for increased fire protection are a new fire alarm system, a 30,000,000 gallon reservoir, larger water mains, two motor tractors, motor combination chemical and hose wagon, automobile hook and ladder truck.

The total expenditure of the Hamilton fire department during 1912 was $92,842.

◆

SEVERAL COMPANIES HAVE INCREASED CAPITAL

The capital stock of the Cameron Heap Company, Limited, has been increased from $100,000 to $500,000 by the creation of 4,000 shares of new stock of $100 each.

The Canadian Credit Men's Association Limited, which we reported last week to have changed its name to the Canadian Credit Men's Trust Association had increased its capital stock from $5,000 to $100,000, the increase consisting of 9,500 shares of $10 each.

The capital stock of the Standard Iron Company, Limited, has been increased from $100,000 to $300,000, the increase consisting of 2,000 shares of $100 each.

The Barcelona Traction, Light and Power Company, Limited, has increased its capital stock from $30,000,000 to $42,000,000, the increase consisting of 125,000 7 per cent. non-cumulative preference shares of $100 each.

ONTARIO'S WOOD-USING INDUSTRIES

Utilize Thirty-four Varieties of Woods—Prices Compel Search for Possible Substitutes

Thirty-four different kinds of wood are being used by wood industries, and the detailed information regarding the various uses to which such woods are put by 1,200 Ontario industries should be of considerable value, not only to the manufacturer by showing new means of waste disposal, but also to the householder by indicating what native woods are best fitted to replace the more expensive imported stock for interior decoration, furniture and flooring.

A bulletin which also shows incidentally the increasing poverty of Ontario with regard to the more valuable work-woods is being issued by the Forest branch of the Department of the Interior, Ottawa. Almost half of the thirty-four kinds of wood used are obtained principally from outside sources, and three and one-half million dollars are annually sent out of the province for imported wood stock. The imported oak alone costs one million six hundred thousand dollars annually, for this tree has become commercially extinct in Ontario, while the hickory and chestnut groves of southern Ontario have also almost entirely disappeared.

Home-grown in Place of Foreign Species.

Even good, clear white pine is becoming hard to obtain, and its market value is steadily rising, for it represents twenty-one per cent. of the total wood consumption in Ontario for industrial purposes.

Of more interest to the small consumer of wood-products are the side lights the bulletin throws on the possibility of substituting cheap home-grown woods for the expensive foreign species now used so extensively. Recent tests made of their physical properties have demonstrated the suitability for certain purposes of many native species, hitherto despised by the dealers. For hardwood flooring, in place of the oak and maple now in general use, may be substituted the home-grown birch and beech, which take a high polish, and have the advantage of being considerably cheaper. Likewise, for interior finishing, the expensive oak can be very closely imitated by stained black ash, and stained birch is almost indistinguishable from mahogany, while stained red gum requires an expert to distinguish it from the costly Circassian walnut.

Ontario is Market for Apple Logs, etc.

The now expensive white pine is being replaced, where durability is not a requisite, by the cheaper spruce, basswood and elm. Poplar and balsam-fir are two of the most common trees in Ontario, and that they have wider uses is evident from the fact that poplar is highly valued for hardwood flooring in Manitoba, while balsam-fir is, perhaps, the most widely used native species in the Maritime provinces.

The bulletin also indicates the existence of a market in Ontario for sumac, apple and cherry logs, the lumber cut from them being worth $30, $46.50 and $44.50 per thousand feet, board measure, respectively. The forestry branch has already been instrumental in securing sales of the wood of worn-out apple orchards, and is desirous of further serving the public along these lines. The bulletin can be obtained from the forestry branch, department of the interior, Ottawa. A similar report dealing with the Maritime Provinces will appear shortly.

◆

AMENDMENT TO THE FRUIT MARKS ACT

The Dairy and Cold Storage Commissioner has issued a circular giving the recent amendments to the Inspection and Sale Act with the new regulations. The amendments chiefly concern imported fruit.

Hereafter the words "Packed by" must precede the name and address of the packer as marked on any closed package of fruit intended for sale.

A new section is added empowering the Governor in Council to make regulations regarding the branding, marking, and inspecting of imported fruit. Persons violating such regulations are liable to a fine of not more than fifty dollars and costs or, in default of payment, to imprisonment for a term not exceeding one month. The packages of fruit not properly marked may be confiscated.

In virtue of this amendment new regulations have been passed and were published in the Canada Gazette of June 28th, 1913. According to these regulations every importer of fruit must have all grade marks found on closed packages containing imported fruit erased or obliterated when such marks are not in accordance with the Act or the new regulations. This must be done when the packages are being taken from the railway car, steamship or other conveyance in which they have been brought into Canada. The importer must place on the end of such packages the proper grade marks, the correct name of the variety of fruit, and his own name and address.

SEVENTY-TWO COMPANIES RECEIVE CHARTERS

One Large Corporation Has Million and Three-Quarter Capitalization—Many Interests Represented

The largest of the companies receiving incorporation this week is the J. H. Sherrand Manufacturing Company, Toronto, with a capital of $1,750,000. The total number of new companies is seventy-two, and their capitalization amounts to $6,745,000.

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Prince Edward Island	3	$240,000
Quebec	10	563,000
Ontario	28	3,950,000
Manitoba	4	610,000
Alberta	27	1,382,000
Total	72	$6,745,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Munson, Alta.—Wilsons, Limited, $50,000.

Samsonton, Alta.—Crossfield and Samsonton Mutual Telephone Company, $3,000.

Fort William, Ont.—Varlow Foundries, $40,000. H. J. Varlow, C. Varlow, C. Gray.

Tofield, Alta.—Tofield Foundry and Machine Company, $50,000. Dominion Brick Company, $10,000.

The Pas, Man.—Mineral Paint, $75,000. W. H. Morrow, V. W. Inglis, W. Bartholomew, both of Winnipeg.

Hamilton, Ont.—Warner W. Howell, $40,000, (fur dealers). W. W. Howell, A. M. Howell, F. W. Howell.

Ruthven, Ont.—Ruthven Cold Storage and Forwarding Company, $40,000. M. Whaley, C. R. Wigle, G. Fox.

Bradford, Ont.—Watson, Limited, $100,000, (general manufacturing). E. Watson, J. G. Smith, N. Sinclair.

Sault Ste. Marie, Ont.—Andrews Lumber Company, $150,000. J. R. Andrews, H. R. Andrews, I. C. Jennings.

Walkerville, Ont.—C. S. Forshee Company, $40,000, (dairy produce). C. M. Walker, H. R. Dingwall, T. Walker.

Roxton Falls, Que.—Roxton Concrete, $45,000. F. Dieulefet, Farnham; W. Poirier, J. H. Provost, both of Roxton Falls.

Redcliffe, Alta.—Brittain-Plewes Company, $40,000. Redcliff Construction Company, $40,000. Laurel Hotel Company, $40,000.

St. Catharines, Ont.—Bissell Motor Company of Canada, $50,000. F. Bissell, R. Sheldon, both of Toledo. W. P. Good, St. Catharines.

Lethbridge, Alta.—Canada Scots Investors, $100,000. Lethbridge Industrials, $25,000. E. T. Broad Contracting Company, $25,000.

Currie's Station, Ont.—Oxford Evaporating Company, $40,000. A. Alyea, Woodstock; G. H. Ficht, D. D. Haylow, both of East Oxford.

Victoriaville, Que.—La Compagnie Immobiliere de Victoriaville, $19,000. A. Blais, Bic; J. C. Tribeault, Victoriaville; A. Beaupre, St. Fabien.

Windsor, Ont.—Vincent Steel Process Company of Canada, $150,000. J. E. Campbell, Hepworth; R. J. Lillico, G. A. Penson, both of Toronto.

Galt, Ont.—Canadian Motors Company, $40,000. G. A. Dobbie, F. S. Scott, E. J. Getty. Manchester Realty Company, $40,000. S .L. Clark, B. F. Bennett, L. C. Howell.

Cobalt, Ont.—Young Men's Christian Association of Cobalt, (no share capital). F. L. Cody, C. B. Kingsley, A. D. Crooks. Sharon Mines, $500,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock.

London, Ont.—London Pure Milk Company, $50,000. R. H. Read, C. H. Parsons, A. R. Ulting. Dominion Metal Specialties Manufacturing Company, $40,000. C. E. Santo, J. S. Ferguson, B. L. Santo.

Medicine Hat, Alta.—Metzner's North Toronto Street, $75,000. Western Canada Threshing Machine Company, $100,000. Western Clay Products Company, $200,000. J. H. Tabor Candy Company, $150,000.

Edmonton, Alta.—Edmonton Pure Water Company, $25,000. Western Coals, $10,000. Federal Securities, $10,000. Simpson and Hunter, Limited, $30,000. Glasgow Canadian Land Company, $20,000. Fraser Wright Coal Company, $250,000.

Winnipeg, Man.—Irish-Canadian Investors, $100,000. S. Ruddell, Sam. Ruddell, J. Wright. South St. Boniface Industrial, $185,000, (real estate). J .H. Tremblay, A. Talbot, J .P. Tremblay. Commercial Power, Light and Coal Company, $250,000. F. M. Burbidge, R. C. McPherson, R. W. Killey.

Calgary, Alta.—Pilliod Development Company, $24,000. Calgary Sand and Gravel Company, $10,000. Leighton and Gilbert, $50,000. North-Western Engineering and Construction Company, $15,000. Smith and Whitney, $10,000. Cullon Patent Manufacturing Company, $10,000. Pure Food Exposition Company, $10,000.

Charlottetown, P.E.I.—Empire Black Fox Company, $150,000. G. Carruthers, H. E. McEwan, O'Leary; J. T. Lantz. Prince Albert Black Fox Company, $80,000. S. K. Bell, St. John's; J. B. Rombough, Baltimore; T. B. Woodman, Charlottetown. Charlottetown Selling Agencies, $10,000, (dry goods). C. McLure, J. S. Pierce, E. B. Huggan.

Montreal, Que.—Wm. H. Dunn, Limited, $100,000, (commission agents). H. J. Trihey, E. Lafontaine, P. Bercovitch. Dorval Land Company, $100,000. F. Cunningham, C. Castanier, W. G. C. Lanskail. Administration and General Construction Company, $100,000. P. Bonhomme, J. Bonhomme, J. B. Bonhomme. Canadian Railway Club, $10,000. F. Callaghan, H. L. Mitchell, P. Gregory. Prince Hotel Company, $20,000. G. Senecal, S. Tourmeur, U. Chapron. Parc Rolland, $49,000. W. Duquette, W. Lajeunesse, A. J. Bilbeau. Dorval Investment Company, $100,000. E. Cavanagh, L. Ure, G. C. Carvell. Emblem Millinery Company, $20,000. H. Lampard, H. M. G. Bellew, N. C. Bellew.

Toronto, Ont.—International Steel Corporation, Limited, $100,000. D. A. MacRae, T. W. Lawson, H. E. McKitrick. Canadian Oil and Fuel Company, $10,000. A. J. Reid, R. H. Montague Temple, W. L. Pinkney. Premier Mica, $50,000. W. J. Morrison, J. Legault, H. J. Baldwin. Sutherland-Davey, $50,000, (marble dealers). C. F. Ritchie, J. H. Oldham, A. E. Knox. Watt Gibson Realty, Limited, $100,000. S. J. Gibson, A. Watt, both of Toronto; H. B. Death, Township of Toronto. Canadian Merchants' Agency, $100,000. A. B. Taylor, J. C. Gibson, F. A. Campbell. Crown Lake Ironland Company, $100,000. F. Smith, Elk Rapids; W. F. Bowen, Marmora; J. Parker, Toronto. Royal Feather Company, $40,000. N. Moster, L. Wurtzel, S. Wurtzel. J. H. Sherrard Manufacturing Company, $1,750,000. A. J. Thomson, W. S. Morlock, N. B. Wormwith. Re-enforced Concrete Post Company, $50,000. G. Cooper, W. K. Fraser, F. A. A. Campbell. Progressive Builders, $200,000. E. C. Ironside, W. J. McLarty, C. M. Brearley. Continental Publishing Company, $40,000. L. Davis, S. M. Mehr, I. Culligan. Modern Realty Company, $40,000. C. H. Ashley, H. D. Cantlon, G. E. Gilroy.

JUNE BANK STATEMENT REVEALS SAVINGS WITHDRAWALS

Recent Speculative Period is Being Adjusted — Current Loans for Legitimate Business are Maintained

	June, 1912.	May, 1913.	June, 1913.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$373,500,189	$364,159,642	$362,769,928	—2.8	—0.3
Deposits after notice	631,317,687	630,755,603	622,928,969	—1.3	—1.2
Current loans in Canada	848,940,089	898,959,650	899,260,009	+0.5	+0.0003
Current loans elsewhere	34,254,568	37,691,786	36,894,681	+0.07	—0.02
Call loans in Canada	68,701,855	69,982,540	68,642,377	—0.0008	—0.01
Call loans elsewhere	120,569,812	96,151,209	89,363,520	—0.2	—0.07
Circulation	102,011,848	102,997,936	105,697,629	+0.03	+0.03

The above are the principal changes in the bank statement during the past month. The most notable feature is the decrease in deposits. During June, those on demand declined about $2,000,000, or 0.3 per cent., and were $11,000,000, or 2.8 per cent. less than a year ago. The decrease in savings departments was more significant. The month's decline was about $8,000,000, or 1.2 per cent., and the year's loss approximately $9,000,000, or 1.2 per cent. Savings deposits have for so many years made continuous expansion, that a decrease is quite unusual. It indicates that fairly substantial inroads were made on their bank savings by depositors last month, undoubtedly partly to meet payments falling due in real estates and other speculative ventures. The withdrawals are a natural outcome of the recent speculative orgie in Canada just as is the recent increase in loans on life insurance policies.

Current loans in Canada are slightly larger than a month ago, a sign that legitimate business is in a healthy state. Current loans abroad and call loans at home and abroad, all show slight decreases. Circulation exhibits an increase of approximately $2,000,000.

The following table shows the course of the domestic deposits accounts for the past thirteen months:—

	On demand.	After notice.
1912—June	$373,500,189	$631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,590
September	374,368,917	640,536,652
October	383,814,572	640,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,346
1913—January	354,518,964	635,000,056
February	349,661,830	630,467,518
March	357,756,659	630,434,708
April	365,340,002	631,160,280
May	364,159,642	630,755,608
June	362,769,928	622,928,969

Total deposits in June were $985,000,000, falling short of the billion dollar record established and maintained in 1912. Demand deposits have shown slight declines for the past two months, although larger last June than in January. They are considerably smaller than a year ago. Savings deposits have also shown a downward tendency in recent months, but this is only a temporary feature. The department's record for the past four years is given in the following table compiled by *The Monetary Times*:—

June.	On demand.	Afer notice.	Total.
1909	$226,480,468	$455,178,476	$681,658,944
1910	263,417,539	534,432,054	797,849,593
1911	309,804,854	564,867,554	874,672,407
1912	373,500,189	631,317,687	1,004,817,876
1913	362,769,928	622,928,969	985,698,897

From 1909 to 1912 total deposits made a continuous gain. It has remained for the current year to record the first decreases in recent years. Demand deposits have increased over $100,000,000 since 1909, although the June figures compared with last year show a decline of $11,000,000. Savings deposits are nearly $200,000,000 greater than four years ago, despite the loss of $8,000,000 when last month's total is compared with that of June, 1911.

The following table shows the trend of the Canadian loans accounts for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1912—June	$848,940,088	$68,701,855
July	852,256,651	70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261
October	879,676,655	73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661
1913—January	874,705,616	71,376,510
February	882,112,726	71,286,799
March	890,513,446	70,731,030
April	898,964,181	69,757,912
May	898,959,650	69,982,540
June	899,260,009	68.642.377

Current loans in Canada are $50,000,000 greater than in 1912, a pleasing fact. Call loans in Canada are about what they were a year ago.

The following table shows the expansion of loans, at home and abroad, during the past four years:—

June.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1909	$535,212,269	$33,403,171	$52,617,696	$115,254,868
1910	649,145,920	38,171,443	61,598,958	130,173,902
1911	717,869,386	33,557,617	61,507,268	97,865,400
1912	849,940,089	34,254,560	68,701,855	120,569,812
1913	899,260,009	36,894,681	68,642,377	89,363,520

Current loans in Canada have made great strides since 1909, having increased from $535,000,000 to $899,000,000. Current loans abroad have been maintained at about the same total. This also applies to call loans in Canada. Call loans abroad were smaller last June than in any June of the past five.

Commenting upon the Canadian banks' call loans abroad, an English writer says:—"At a time such as this, when the world is experiencing some difficulty in obtaining supplies of new capital in consequence of the political situation in the Balkans and the indisposition of Continental and American investors to place their capital freely, the existence of these large Canadian balances in New York and in London gives a measure of confidence to the Canadian people which otherwise they could not enjoy."

The June bank statement reflects that Canadians are feeling the pinch of tight money, but that legitimate business is not suffering to any great extent, as yet.

The Canadian Press has been informed that a contract of over £1,000,000 has been signed for the construction of a railway and new harbor on the west coast of Ireland in connection with the All Red route scheme, which the Canadian Government has now approved. The railway will run from Collconey to Blacksod Bay, county Mayo, which is to be the port for steamers, which will make the run to Halifax in three and a half days.

Track has been laid on the Canadian Northern Railway for a distance of 127 miles east from Port Arthur and 150 miles west from Sudbury, according to Contractor Foley, of Foley Brothers, who have the contract for the construction work. Some forty miles of grading on the line has been finished and the work is progressing rapidly. A new feature of the work was the use of automobiles equipped to run on the track, which were used to draw cars to take the men to and from their work.

Mr. Hugh Blain, of Toronto, read a paper at the Dominion Wholesale Grocers' Guild at Quebec, recommending that the guild should suggest to the government the formation of an independent trade and commerce commission that would contest trade combinations and govern rates of transportation, commissions, etc., with manufacturers on a fair and equitable basis to all concerned, and to which the wholesale trade in general could apply in matters relating to their business. The election of officers for the ensuing year resulted as follows: President, Z. Hebert, Montreal; vice-presidents, Quebec: Armand Chaput; Ontario, J. M. Dillon, London. Manitoba, R. R. Wilson, Winnipeg; Alberta, John Howe, Calgary.

T. C. BOVILLE,

Deputy Minister of Finance

GERMANY IS IMPORTANT BUYER OF CANADIAN APPLES

Ontario Fruit Well Known on Hamburg Market—Possibilities at Bremen.

The possibilities of Bremen as a market for Canadian apples deserves the attention of Canadian shippers. Direct shipments from Canada are almost unknown, and, with the exception of an occasional consignment transferred from London, the market is neglected. Bremen, like Hamburg, is a free port, occupying a situation, and possessing transportation facilities which make it a good centre of distribution for north-west Germany, the populous industrial districts of Westphalia, and for a considerable section of the Rhine country beyond. The Bremen transactions in fruit cannot, of course, compare with Hamburg's turnover. It was only some eight years ago that the fruit trade in Bremen was placed on an organized basis, when the system of fruit auctions were inaugurated on Hamburg lines. But the trade ever since has grown by leaps and bounds, and during the last season aggregated nearly 36,000 tons in weight.

The chief brokers controlling the apple trade in Hamburg, are the following:—Ph. Astheimer and Sohn, Fruchthof, Hamburg; Menke and Busse, Fruchthof, Hamburg; Timm and Gerstengorn, Fruchthof, Hamburg; Lütten, J. H., and Sohn, Fruchthof, Hamburg; Godenrath, Jacob, Fruchthof, Hamburg; Stier, Aug., Oberhafenstr, Hamburg; Olff, H., and Sohn, Bahnhofsplatz 1, Hamburg.

Disadvantages of Small Shipments.

It is perhaps unnecessary to refer again except in a sentence to the disadvantages attending the shipment of small lots. This still goes on, but is becoming more and more of an anomaly with the growing practice, especially in the United States, of shipping large lines of single varieties. Hamburg dealers prefer to take lots of 50 to 100 barrels or boxes of one kind as they are enabled thereby to execute repeat orders from their clients for the same mark and variety. The brokers were much interested to hear of the spread of the co-operative movement in connection with fruit as likely to improve Canadian supplies. In Hamburg the barrel trade in apples comes to an end in December and thereafter the market looks for fruit in boxes only. It is understood that in the coming season the shipping facilities for Ontario fruit will be improved by the establishment of a service from Boston as well as from New York under the joint arrangement between the North German Lloyd and the Hamburg American Steamship Company. This should give Ontario fruit growers an opportunity of testing the Bremen market, suggests Mr. C. F. Just, Canadian trade commissioner at Hamburg.

The final auctions of Australian fruit in the second week in June brought the overseas apple trade of Hamburg for 1912-13 to a close. It has been in several respects an eventful season. The imports received exceeded all previous records.

Fully ten per cent. of the North American receipts of barrel fruit were Canadian, and came chiefly from Ontario.

Markets and Reputation.

The course of the market for North American apples from the Atlantic as well as from the Pacific was, on the whole, disappointing to shippers. Prices for early apples at the outset remained satisfactory as long as arrivals were light, but with heavier imports a depression set in, and under the pressure of unusually heavy deliveries of Pacific coast fruit, where a huge crop had been obtained, a low and unremunerative level of prices was reached and continued at the end. An adverse factor for Canadian-American fruit was the competition of a larger local German crop than had been anticipated, coupled with heavy imports of apples from the adjoining countries.

In discussing the Canadian position with the leading fruit brokers, the commissioner found a general feeling existing that Canadian fruit was not keeping up to its old high reputation. During the last four or five years Canadian apples, it was stated, were not arriving in good condition. The packing was all right, but the color was unsatisfactory; there was also evidently an excess of moisture in the fruit judging by the frequent occurrence of mould, while the appearance of the fruit in other respects seems to suggest that more attention might be paid to spraying.

Two of these fruit brokers who have visited Canada for the last seventeen years, and one of whom has direct interests in orchards in Ontario, gave it as their opinion that the trees were allowed to make too much wood, or were not sufficiently pruned, so that the sun did not get at the fruit, and also if, during the picking rain fell, the heavy foliage prevented the evaporation of the drying out of the apples.

PREVENTIVE MEASURES AGAINST FOREST FIRES

Problem Presented is Similar to That in Cities—Necessary Equipment—What Manitoba Has Lost

The prevention of fire on forest reserves is a problem similar to that of the prevention of fires in cities. The things to be provided are: (1) Means of getting immediate information of fires; (2) means of reaching the fires quickly; (3) a staff of fire fighters; (4) equipment for fighting fires, and preventive measures, was the dictum of Mr R. H. Campbell at the Canadian Forestry Association recent convention.

Each reserve is divided into ranger districts with a forest ranger in charge. These districts now average 200 square miles and are too large. The area which one man can patrol will very with the special danger of fire that there may be in the district and with the efficiency of the preventive measures adopted. For effective protection in any frequented district the area should not be more than 100 square miles.

To get immediate information of fires a sufficient patrol is required and this is supplemented by stationing men at lookout points where a view can be obtained over large areas of the forest, and by constructing telephone lines by which warning of fire may be transmitted without delay.

To provide means of reaching fires quickly, roads and trails are opened up so that all parts of the reserve may be readily accessible.

To obtain fire fighters when more than the regular staff of the reserve are required for that purpose, a populated district in the vicinity is required with means of communication and of reaching the scene of the fire. One of the great difficulties of handling fire in the far north is that if the fire gets beyond the control of the ranger it is usually impossible to get assistance owing to the sparse population.

Equipment for fighting fires and preventive measures consist of the plowing or otherwise making of fire guards, the locating of fire fighting tools at convenient points, and the furnishing of easily transported tools, such as canvas water buckets, to the rangers.

Manitoba Has Suffered.

On the east side of Lake Winnipeg rock of the Laurentian formation intrudes from Northern Ontario and, skirting the lake to the north end, stretches over a great part of Northern Manitoba to Hudson Bay on the east and westward to a line running north-west from Limestone Bay on Lake Winnipeg, from which line limestone is the basic rock. With the exception of the large area of clay land on the Hudson Bay railway route and scattered valleys and prairies of small dimensions, the remainder of this area will be valuable only for timber growing, except in so far as mineral development may occur. Unfortunately at cycles of dry seasons these northern forests have suffered greatly from fire. The present stands seems to indicate that at periods of 80 and 40 years ago there were general conflagrant ones that swept over immense stretches of the forest, while smaller fires have occurred at more frequent intervals. The country is, however, covered practically everywhere with a growth of trees which, while generally yet too small to be of much utility, have great promise for the future. The stand on islands and places protected from fire of mature timber up to 24 inches in diameter, shows clearly the timber possibilities of the region and, with the water powers on the rivers flowing through it, industrial development there has possibilities that cannot easily be over-estimated.

Large Timber Cut Possible.

But the question will very properly be asked: Will the return for the expenditure for protection and reproduction of the forest be adequate?

In reply, the investigations made of the rate of growth of timber in the province of Manitoba compare favorably with the rates of growth in European countries, such as Germany, France and Sweden, where forestry is being practised profitably. The rotation, or the period required for maturing a crop of trees from seed, in Germany is with spruce and pine from 60 to 80 years. In Sweden the rotation is 60 to 80 years for pulpwood and 100 to 120 years for lumber. The investigations of rates of growth of spruce and pine so far as they have been carried out here indicate that on ordinary well-drained soil the period of rotation might be within similar limits.

The annual rate of production of timber in a European forest is from 250 feet board measure per acre up to as high as 1,000 feet board measure. If only a production of 100 feet board measure per annum were reached in the present Riding mountain, Duck mountain and Porcupine hills reserves in Manitoba, the aggregate area of which is 2,415,840 acres, which would mean an annual cut of 241,584,000 feet board measure, a cut equal to that of Manitoba, Saskatchewan and Alberta at the present time, and if the production were 200 feet board measure to the acre, it would be 483,168,000 which exceeds the present cut of lumber in Nova Scotia or in New Brunswick, and this includes only a portion of the old province of Manitoba, not considering at all the new area added in the north.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

St. David's, Ont.—July 13.—Lowrey's general store. Loss and cause unknown.

Erindale, Ont.—July 20.—Three residences. Loss $12,000. Cause unknown.

Ingersoll, Ont.—July 22.—Nagle and Mills' storehouse. Loss and cause unknown.

Mace's Bay, N.B.—July 19.—Mr. Mahoney's residence. Loss and cause unknown.

Point Grey, B.C.—July 14.—Industrial School. Loss $10,000. Cause unknown.

Medicine Hat, Alta.—July 18.—Miller's butcher shop, Third Avenue. Loss $2,500.

Le Pas, Man.—July 18.—David's store. Loss $1,500, fully insured. Cause unknown.

Trenton, Ont.—July 21.—Canada Creosoting Company. Loss $10,000. Cause unknown.

Granby, Que.—July 16.—Granby Rubber Company's premises. Loss and cause unknown.

Cobalt, Ont.—July 15.—Campbell and Deyell's building. Loss $600, insured. Cause unknown.

Hamilton, Ont.—July 14.—Rear 151 Victoria Avenue South. Loss $25. Cause, hot ashes.

Big River, Sask.—July 17.—Catholic Church. Loss $4,500. Insurance $3,500. Cause unknown.

Hull, Ont.—July 23.—Mr. H. Gabrinon's residence. Loss unknown. Cause, child playing with matches.

Weston, Ont.—July 21.—Mr. D. McClelland's residence, A concession line. Loss and cause unknown.

Charlottetown, P.E.I.—July 16.—Mesrs. A. Pickard and Company's building. Loss $8,000. Cause unknown.

Welland, Ont.—July 18.—Mr. D. Tewsley's residence on Fork's Road. Loss unknown. Cause, defective wiring.

Brandon, Man.—July 22.—Messrs. B. and J. Cristall's warehouse. Loss $10,000. Cause, supposed incendiary.

Baie, St. Paul, Que.—July 17.—Justice Simards yard "Namakanda." Loss $3,000. Cause, gasoline explosion.

New Westminster, B.C.—July 4.—Messrs. Walsh and Sons, sash and door factory. Loss $250. Cause, spark from stock.

Earl Grey, Sask.—June 14.—Messrs. S. W. Dawson and Company's store. Loss $15,000, partially insured. Cause unknown.

Gananoque, Ont.—July 19.—Mr. W. Sliter's 2 barns, Pittsburg; Mr. W. Fairman's barn. Loss unknown. Cause, lightning.

Waterford, Ont.—July 22.—Michigan Central Railway freight sheds. Loss $10,000. Cause, supposed spark from locomotive.

North Bay, Ont.—July 14.—Mr. J. Williams' residence. Loss unknown. Insurance, $1,600 building, $600 contents. Cause unknown.

Woodstock, Ont.—July 21.—Mr. M. Kerr's barn, seventh concession of West Zorra. Loss, building $2,000, contents $600. Cause, lightning.

London, Ont.—July 19.—Charlton Parke Press building Loss $800. Cause unknown. Toasted Corn Flakes factory, Dundas Street East. Loss $200. Cause unknown.

Hensall, Ont.—July 4.—47 Chatham Street. Loss $300. Cause unknown.

July 15.—Mr. G. Joynt's apple evaporator. Loss $9,000. Insurance $5,900. Cause unknown.

Kingston, Ont.—July 18.—Dr. Simpson's dental parlors, Princess and Bagot Streets. Loss $30,000. Cause unknown.

July 21.—Mr. G. Ireland's barn, Seeley's Bay. Loss $700. Cause, lightning.

South Dummer, Ont.—July 20.—Mr. A. Patterson's residence, Cottesloe. Loss $3,000. Insurance $600. Cause unknown. Mr. W. Buchanan's barn, 10th concession of Dummer. Loss unknown. Cause, lightning.

Ottawa, Ont.—July 17.—Mr. Bryer's residence, 738 Albert Street. Loss $1,800. Cause, spontaneous combustion. Canadian Mica Company's shed, 532 Wellington Street; Mr. E. J. Burke's two sheds; 538 and 540 Wellington Street. Total loss, $8,000. Cause unknown.

Toronto, Ont.—July 17.—Mr. J. W. Jones' residence, 52 Duggan Avenue. Loss $50. Cause unknown.

July 19.—Rear 329, 331 and 333 Queen East. Loss $1,000. Cause, supposed incendiary.

July 21.—Two houses on Fairbank Avenue, Earlscourt. Loss and cause unknown.

July 22.—E. Pullan Company, Bathurst Street. Loss, building $1,500. Insured in Equitable, contents $1,200, Insurance Employers, $500. Ross and Wright, adjusters for the assured, Toronto. . National Casket Company. Loss, building, $1,500; insurance, $2,500; contents, $4,000; insurance, $3,500. Ross and Wright, adjusters for the assured, Toronto.

Montreal, Que.—July 10.—Mr. A. Rousseau's sash and door factory, 1025 Boyer Street. Loss, $3,000. Mr. I. Lafranchette's store, 534 St. Denis Street. Loss, $600.

July 11.—Stables of Messrs. Gunn, Langlois Company, rear of 261 Dorchester Street East. Loss, $4,000. Origin, dropped match.

July 14.—Mr. William Upton's store, 358 Bourgeois Street, Pointe St. Charles. Loss $5,000. Origin, explosion of lamp.

July 16.—Crevier and Sons, sash and door factory. Loss $700. Cause unknown.

July 17.—Messrs. Crevier and Sons, planing mill, 498 Clarke Street, damaged. Loss, $700.

July 18.—Rear Lachine Syndicate Store. Loss $1,500. Cause, boy playing with matches. Delorimier Park stables. Loss $10,000. Cause, supposed incendiary.

SASKATCHEWAN'S ELEVATORS.

(Special Correspondence.)

Regina, July 22nd.

It was but a few years ago that the farmers of Saskatchewan got their heads together, as it were, with the provincial authorities, and arranged a scheme whereby the farmers would have a line of elevators which would be practically controlled by themselves. The scheme was put into action. It worked satisfactorily, and now the officers of the company at Regina, expect that during the present fall the Saskatchewan Co-operative Elevator Company's elevators will handle 15,000,000 bushels of grain. Hon. W. R. Motherwell, deputy minister of agriculture at Regina, gave out a statement to that effect a few days ago. During last year the company's elevators handled approximately 12,000,000 bushels of grain, and although the statement of the financial standing has not yet been completed it is expected that the profit will be about $200,000.

AGRICULTURAL CREDIT COMMISSION'S ACTIVITIES.

Saskatchewan's commission on agricultural credit and grain markets will commence its provincial inquiry on August 7 at Weyburn, and will continue until the last week of the month. No portion of Saskatchewan in which the farming industry is carried on will be omitted from the purview of the members of the commission.

In connection with the investigations of European systems of agricultural credit, two members of the commission —Mr. Haslam (chairman) and Dr. Oliver—have visited Italy, Austria-Hungary, Russia and Germany in company with the United States Commission of investigation. In the interests of the other branch of the inquiry—grain markets—the other two members of the commission—Hon. George Langley and Mr. Dunning—have visited all of the principal ports at which Saskatchewan grain is received and markets on which it is dealt in. Among those visited are London, Liverpool, Bristol, Hull and Glasgow in the British Isles, and Antwerp, Rotterdam, Amsterdam, Copenhagen and Hamburg in Europe. The commission will continue their inquiries in eastern Canada and then proceed to Weyburn, Oxbow, Lampman, Swift Current, Moose Jaw, Wolseley, Fillimore, Saskatoon, Scott, Kindersley, Govan, Yorkton, Prince Albert, Melfort, Battleford and Regina.

Mr. J. H. Haslam, Regina, president of the Haslam Land and Investment Company was appointed chairman of the commission, and with him are associated Hon. George Langley, minister of municipal affairs; Dr. Oliver, professor of economics at the Saskatchewan University; Mr. C. E. Dunning, manager of the Saskatchewan Co-operative Elevator Company; and A. F. Mantle, deputy minister of agriculture for the province, who is acting as honorary secretary.

In consequence of such extensive and thorough investigations, a large amount of data of value and interest to the farmers of the province should become available when the reports of the commission are prepared and published.

COMPULSORY AND EXCLUSIVE COMPENSATION

Law Should Not Permit Choice of Remedies by Employee—Minimize the Evils.

Every consideration of justice and economy demands that the law of workmen's compensation should be exclusive; that is, that it should not permit, after the accident has happened, a choice of remedies on the part of the employee. These considerations may be briefly stated as follows, suggested Honorable George Sutherland, United States senator from Utah, in an address upon "The economic value and social justice of a compulsory and exclusive workmen's compensation law," before the International Association of Casualty and Surety Underwriters at Quebec:—

"1. It is unjust to the employer, since its effect is to compel him to respond for such unlimited and sometimes extravagant damages as a jury may see fit to impose, whenever his negligence can be established, and then superadds a liability to pay the definite amounts prescribed by the law in all cases where he is without fault, including those where the injury was due entirely to the negligence of the employee. There is, to say the least, grave doubt whether such a law is not so arbitrary in character that the supreme court of the United States would declare it void as constituting a denial of due process of law. The exclusive law is based upon perfectly defensible considerations of mutual burden and mutual advantage. It compels the employer to pay definite compensation in all cases, but relieves him of the liability to respond in unlimited damages in some cases. It deprives the employee of his right to recover unlimited damages in some cases, but gives him in exchange the right to recover definite compensation in all cases. The effect of it is to make the employer an insurer of the safety of his employees in a fixed and limited amount, but to leave in his treasury the fund theretofore available for the payment of indefinite damages to enable him in whole or in part to meet the new obligations. It gives to the employee an insurance policy in exchange for the gambler's chance. This law guarantees the employee the certainty of compensation in place of the uncertainty of damages.

For the Benefit of All.

"2. By making the law exclusive larger compensation can be given than would be possible if a choice of remedies were allowed, since it is manifest that if the employer's liability to pay unlimited damages in case of negligent injuries be continued, and in addition he be compelled to pay large compensation in all other cases, his industry will be taxed beyond its capacity to pay. It must be recognized that the compensation law substitutes the communistic idea of benefit for the whole class in place of the individualistic theory which permits a minority of the class to recover much and the majority little or nothing. The justification for a compulsory and exclusive workmen's compensation law rests in the conception that the workmen employed in any enterprise are industrial soldiers, who, being injured in its service, are entitled to be cared for to a fair and equitable extent, having in view the ability of the industry to pay. Theoretically, therefore, we are to consider that we have a fund which, however large, is still limited; that this fund is to be distributed among the workmen who sustain injury resulting in disability and the dependents of those who sustain injury resulting in death; that this fund is to be distributed not for the purpose of penalizing the negligence of the employer, but for the purpose of aiding the injured, and that finally, it is better that everybody injured should receive compensation than that only a portion of those injured should receive damages and the remainder nothing.

To Avoid Great Waste.

"3. The double remedy will result in a continuation of the great waste which it is one purpose of the compensation law to avoid. To allow an election of remedies is to permit the injured employee to still remain a bone of contention between the personal injury lawyer, who urges him to sue for the sake of the contingent fee involved, and the claim agent, who seeks to make inadequate settlement in order to save the treasury of his company. Suits will go on as heretofore. Half of the amount recovered will be lost on its way from the treasury of the company to the pockets of the employees. The unfortunate feeling of antagonism between employer and employee which now results will continue without abatement. The expense to the taxpayer incident to the trial of personal injury cases will still continue.

"4. To allow an election of laws or a choice of remedies destroys one of the most pronounced advantages of the compensation principle, namely, the element of certainty. So long as we allow the employee to seek damages upon the basis of the employer's fault or the employer to defend upon the basis of the employee's negligence, just so long will the uncertainty of the lawsuit counteract the certainty of the fixed schedule and just so long will the fund which should be husbanded and utilized for the benefit of all be frittered away for the benefit of some. A compulsory and exclusive law saves the vast sum which is now wasted, and which would continue to be wasted, under a composite system for distribution among those who are injured. Expense will be saved to employer and employee and to the public. The only individuals who will suffer will be the personal injury lawyer and his lawsuit-hunting agents.

"5. A compulsory and exclusive law will, in my judgment, prove a powerful aid in the prevention of accidents. Under the liability system the employer and the employee are interested in exaggerating or concealing the real facts insofar as they tend to prove or disprove negligence, the employer coloring and distorting them in one direction and the employee coloring and distorting them in the opposite direction. Between the two the precise truth as to how the accident occurs is effectually concealed. When he employer knows that he must pay and the employee knows that he must receive a certain prescribed sum wholly irrespective of the way in which the accident happened, neither will have any reason for misrepresentation, and we shall be able to ascertain the cause of the accident, and knowing why and how it happened we shall be able to prescribe remedies which will have a tendency to prevent similar accidents in the future. In dealing with industrial conditions, the prime duty of society, and therefore the prime study of the lawmaker, should be to prevent or minimize the evils which give rise to the necessity for assisting the helpless."

◆

EUROPEAN OUTLET FOR CANADIAN MINERALS.

Prices and Prospects of Trade in Cobalt Oxide, Nickel Oxide and Arsenic.

Although the bulk of Canadian ores, and the products manufactured therefrom, continues to be exported to the United States, with the constant development of the mining industry in Canada and the increasing smelting facilities, shippers seem to be paying more attention to the prospects of securing an alternative outlet in European markets.

For some time past inquiries have been received at intervals from both United Kingdom and continental firms who were prepared to purchase from Canada supplies of particular ores in which they were interested. Latterly the London office, states Mr. Harrison Watson, Canadian trade commissioner at London, has been occasionally consulted by Canadian mine owners for information.

Inquiries instituted in connection with a recent application about the prospects of doing business in Europe in cobalt and nickel oxides and arsenic, indicate that such a considerable number of metal and chemical firms are interested in these products that a memorandum is herewith included dealing with the current market conditions in these specialties which a leading firm in the trade has courteously supplied, and also authorized its publication for the benefit of Canadian producers likely to be interested:—

In Hands of Syndicate

The European consumption of cobalt oxide is at the present moment almost entirely in the hands of certain interests working in conjunction with a syndicate composed of the principal European manufacturers of cobalt preparations. The selling price of this combination was, until recently, between 2s. 6d. and 2s. 9d. per lb., according to quantity, for black cobalt oxide guaranteed to contain not less than 70 per cent. cobalt metal, and in other respects of good commercial quality. Within the last few weeks, however, an attempt has been made to raise this price to a minimum of 3s. per lb. In view of the existence of a number of outside producers it is considered unlikely that the syndicate will be able to maintain this advance.

In addition to the black oxide of cobalt, there is considerable outlet for the so-called grey, or prepared, cobalt oxide, containing approximately 76 per cent. cobalt metal. This quality fetches a premium of 4d. to 6d. per lb. on the black oxide.

Nickel Oxide and Arsenic

The trade in nickel oxide is not, so far as known, under any form of control, and selling prices are as a rule based on the market quotations for nickel metal. There are three principal qualities of oxides, namely, black, grey and green. All three are at the present moment obtainable at a price varying between 170s. and 180s. per cwt. of nickel metal contents.

Germany, Belgium and Spain produce the bulk of the arsenic consumed in Europe; the English production no longer being of any great importance. The price for a finely powdered arsenic, guaranteed 98 per cent. pure, recently rose to the abnormally high figure of £24 per ton. It is now rapidly declining, and is at the present time nominally £17 per ton. There is every prospect of a further fall in the near future. Three or four years ago this article was selling at £11 per ton, and in view of the present over-production it seems probable that the price will revert to this level.

◆

Windsor, Ont., ratepayers defeated a $45,000 park by-law.

The Canadian Pacific Railway will commence operations for the construction of an electrical road from Hamilton to Niagara Falls. By this line the railway will be in a position to handle traffic direct from Hamilton to Buffalo on their own right-of-way, and without having to run their traffic over the Toronto, Hamilton, and Buffalo, and the Michigan Central Railroads.

LAKE SUPERIOR IRON AND CHEMICAL REORGANIZATION.

Bondholders Are Asked to Give up Their Mortgage Rights and Take Preference Stock.

In October, 1910, the Lake Superior Iron and Chemical Company sold in London £616,420, or $3,000,000 6 per cent. first mortgage gold bonds at par. Already the company has encountered trouble and has proposed a reorganization scheme. According to the prospectus, the company's average earnings for five years were "more than sufficient for interest requirements on all the bonds now issued, although they provide nearly $3,000,000 of new money for extensions and working capital." Further, according to an independent expert valuation, the total real property and plant on which the bonds were a specific first charge amounted, together with the cash, to $8,558,903, which compared with a total of first mortgage bonds then and now outstanding of $6,500,000. It was on the strength of these figures and also of the good names on the prospectus, that the bondholders put up their money.

Plan of Reorganization.

According to a plan of reorganization, drawn up and urged by a committee, the holders of the first mortgage bonds are to be asked to give up their mortgage rights, and to accept in exchange an equal amount of six per cent. cumulative preference stock of the reorganized company and 50 per cent. of common stock.

Discussing this proposal, in sarcastic vein, the London Financial Times says:—"The reason for the step from the company's point of view is perfectly simple. The existence of a large bonded debt, it blithely says, is proving a serious detriment to your company . . . because it seriously hampers, and may soon prevent, the obtaining of the banking facilities required to carry the large stocks of iron which accumulate at such times. We admit that creditors are often a nuisance. Mr. Micawber was not the only person who has found them so. We confess, too, that getting rid of awkward creditors by confiscating their security is a plan delightfully simple, but in the Old World, at any rate, it is still regarded as somewhat unorthodox, to put it mildly. From the bondholders' point of view, what is there to be said for the scheme? Is it that the company has got into such dire straits that the only hope for the bondholders is to find money, or submit to money being found, upon a prior lien bond? According to the reorganization committee's own statement, this is not so. We are told that for the six months ended 31st March, 1913 (the last figures available), the company showed net profits of $341,777, which is more than sufficient to meet all charges for the same period. It is true that, they add, owing to the cash position having been so seriously impaired during the period of reconstruction the money required for the coming July coupon will not be available.

What is the Explanation?

"That is unfortunate, but a temporary scarcity of available funds in the circumstances is not disastrous, and is no argument for the acceptance of this scheme. It is mentioned, with an emphasis intended to coax the bondholders to submit to the plan, that no mortgage shall be placed on any of the properties of the company while the preferred stock (including that to be given in exchange for the bonds) remain outstanding, except under certain special conditions. The company wants $700,000 in cash for construction work, but that is all to be found by an assessment upon the present issues of preferred and common stocks.

"Why, then, if the company is earning its charges and can raise the fresh funds needed by a call upon the stockholders, does it seek to tamper with the security solemnly pledged to the bondholders? There seems to be only one explanation. Amongst the liabilities appearing in the balance sheet as at 31st December last is an item, Bank loans secured by pig-iron warrants $629,200. It is not difficult to believe, having regard to the depression in the iron trade referred to in the company's reports, that the collateral security given to the bank in the form of pig-iron warrants is not as good as it was. By taking away the charge given to the bondholders the bank loans referred to would possess a first lien upon the company's property and plant, and thus loans which may at present rest upon questionable security would automatically become adequately covered.

Position of the Bondholders

"With all the other details of the scheme we are not greatly concerned. For instance, there is the position of holders of the $640,000 of six per cent. five-year notes (secured by a second mortgage upon the company's property), who are asked to exchange their notes for 95 per cent. of preferred stock. The exchange, we believe, would confer an advantage upon these holders as compared with the first bondholders if the prices they gave for their scrip be taken into account, and in any case their main interest is to see the company continue as a going concern, for the exercise of foreclosure rights by the first mortgage bondholders would have awkward consequences to those having a junior charge. It is, however, of secondary importance to discuss the scheme as it affects the noteholders and the stockholders.

"The consideration that dwarfs all others is the assurance of those who, after getting the public to subscribe at par for bonds solemnly declared less than three years ago to be secured by an absolute first mortgage upon assets worth over 130 per cent. of their face value, now seek, with no apparent reason other than to give a benefit to specifically unsecured creditors, to take away that first mortgage and reduce the first bondholders themselves to the rank of unsecured creditors. That the bondholder whose judgment is unfettered by any other consideration than that of his bond will resist the scheme tooth and nail goes without saying. If by some strange combination of circumstances the plan is forced through, we can only say that an interpretation will be put upon a first mortgage in an American company (this one was incorporated under the laws of the state of New York) that will make the British capitalist, when offers from the same quarter are made to him, button up his pocket."

FIRE INSURANCE IN SASKATCHEWAN.

There are 85 companies duly licensed to write fire insurance in Saskatchewan, of which 83 are foreign companies and two incorporated by the Saskatchewan legislature. Of these companies, 73 hold licenses from the superintendent of insurance at Ottawa, with whom the deposits to protect the policyholders are made. The remaining 12 have deposited with the minister at Regina the securities required by the Saskatchewan Fire Insurance Act. In addition to the above stock companies, there are 9 mutual companies of which number 4 were organized under the mutual fire insurance act of Saskatchewan, and five incorporated elsewhere but registered under the foreign companies act with the registrar of joint stock companies.

Two companies, the Western Union of Vancouver and the Winnipeg Fire are withdrawing from the province, having reinsured with the Pacific Coast and the Nova Scotia Fire respectively. At present two companies, the Equitable Fire and Marine Insurance Company and the Mount Royal Assurance Company are applying for admission into the Saskatchewan field.

Fifty-eight companies have filed their reports of 1912 business, which shows that last year the amount of risks written totalled $78,039,071.88 with premium income of $1,662,985.15. The net amount at risk during 1912 as reported to June 12th was $70,304,665, with premium income of approximately two million dollars.

Partner Wanted

who will be security to the extent of $25,000 in conducting excellent machinery agency business holding valuable agency contract.

Principals with whom agreement is held have done large volume of business in Canada during past few years and at excellent profit.

TRANSCONA'S DEBENTURES AND THEIR FISCAL AGENTS.

The town of Transcona, Man., for whom the Royal Canadian Agencies, Limited, are acting as fiscal agents, have not as yet sold their present bond issue of $51,500. These bonds are straight term, 20-year 5½ per cent. sinking fund debentures in even denominations of $1,000 with one odd debenture of $500. The debentures are payable both as to principal and interest at Toronto, New York and Transcona.

The validity of the issue has been passed upon by Messrs. Hull, Sparling and Sparling of Winnipeg. Transcona being the western terminal of the Transcontinental Railway, is destined to be a place of some importance. The assessment of the town is upwards of $7,000,000 and they have no bonded indebtedness at present, other than $18,000 local improvement.

The Royal Canadian Agencies are acting in the capacity of fiscal agents for twelve western municipalities. The need for advice and practical suggestions has been strongly felt by our western municipalities, particularly during the financial stringency of the last few months. The arrangements this company have made with the municipalities is for a nominal consideration based on the volume of security issued. They are prepared to advise upon financial conditions generally, upon the form of debenture, the time of issue and the price. They are also prepared to undertake negotiations with bond houses for the sale of debentures. Their position will differ from certain other fiscal agents, inasmuch as they propose to assist the municipalities in dealing with the bond houses, which are their primary market in Canada and not to compete with existing houses in the retail market of this class of security.

The municipality naturally is free as are also the agents to take any course in the interest of the municipality, but their first efforts will be to dispose of any securities for which they are agents, on reasonable terms through responsible bond houses. They think that much more satisfactory conditions can be brought about by an agent acting along these lines and that it will be possible for such an agent to negotiate with more flexibility and more promptness than could the municipality acting direct.

LEGAL NOTICE

BRITISH AMERICA NICKEL CORPORATION, LIMITED.

(Corrected Notice.)

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 2nd day of July, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants, William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase, lease or otherwise acquire and to prospect for, open, explore, develop, work, improve, maintain and manage nickel, gold, silver, copper, coal, salt, iron and other mines, quarries, mineral and other deposits and properties or interests therein, and to dig for, raise, crush, wash, smelt, roast, assay, analyze, reduce, amalgamate, make and otherwise treat coal, coke, ores, metals, clays and minerals, whether belonging to the company or not, and to render the same merchantable, and to sell and otherwise dispose of the same or any part thereof, or any interest therein, and generally to carry on the business of a mining, milling, reduction, quarry and development company; to carry on the business of treating, smelting and refining mineral ores, metals or other substances by means of electrolytic process or the application of electric power in any manner or form, or by means of any other process, and for such purpose to install all necessary plant, machinery and apparatus, and to purchase, sell and otherwise deal in ores of various kinds or other substances capable of being treated by electrolytic or other process, and to buy, sell and deal in any products or by-products of such ores or substances; (b) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electricity, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power, when exercised outside the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (c) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (d) To construct, alter, work, carry out or control, and to purchase, take on lease or otherwise acquire, and to sell, lease or otherwise dispose of any works, mains, lines, machinery or plant of any kind or description, or any roads, ways, bridges or other things whatsoever which may seem capable of being used or operated with any part of the company's undertaking for the time being, or calculated to benefit the company; and to acquire rights over or in connection with such works, mains, lines, machinery, plant, roads, bridges, ways or other things whatsoever, and to equip, maintain and operate by electricity, hydraulic or other mechanical power, all works belonging to the company or in which the company may be interested; and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (e) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (g) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To establish and work lines of steamers and other vessels, and to otherwise employ any vessels in the conveyance of passengers, mails, specie, goods, troops, munitions of war and other things between any ports throughout the world, and to carry on the business of shipowners, shipbuilders, shipwrights, ship repairers, charterers of ships or other vessels, warehousemen, wharfingers, shipping agents, managers of ships, ship's husband contractors, ship and insurance brokers, carriers by land or water, forwarding agents, importers and exporters, merchants and traders, commission and general financial agents, proprietors of land, jetties, piers, warehouses, stores, barge and tug owners, lightermen, marine engineers and manufacturers of and dealers in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (j) To construct, acquire, manage, maintain, alter, charter, operate, hire, lease, sell, exchange or otherwise dispose of all kinds of ships, vessels, barges and boats or shares, or interests therein, and also elevators, sheds, warehouses and buildings, wharves, docks, dry-docks, terminals, and generally to carry on the business of ship-building, ship repairing, engineering, elevator, warehousing, navigation, transportation and terminals company, or any such businesses, and to manufacture and deal in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (k) To purchase, take on lease or in exchange or otherwise acquire any docks, dry-docks, wharves, harbors, quays, jetties, ship-building yards, collieries, coal mines, meat freezing works, refrigerating stores, gas works, timber yards and other real and personal property or rights or any interests therein, and to manage, work and otherwise turn to account the same or any of them, and to enter into any working arrangements in respect of the same or any of them; (l) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorizeu to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (m) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (n) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (o) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (p) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable or being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (q) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (r) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (s) To assist in the promotion, organization, development or management of any corporation or company, and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (t) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (u) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (v) To amalgamate with any other company having objects similar to those of this company; (w) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company, or of which the company may have power to dispose; (x) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (y) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "British America Nickel Corporation, Limited," with a capital stock of twenty million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Secretary.

Toronto, July 16th, 1913.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, May 20th, 1913.

No. 332.

UNION BANK OF CANADA.

DIVIDEND No. 106.

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the paid-up capital and stock of this institution, has been declared for the current quarter, and that the same will be payable at its banking house in this city, and also at its branches, on and after Tuesday, the second day of September, next, to shareholders of record on August 19th, 1913.

By order of the Board.

G. H. BALFOUR,
General Manager.

Winnipeg, July 15th, 1913.

GERMANY AND THE CANADIAN PACIFIC RAILWAY

Mr. Edward Wassermann, of the New York stock brokerage firm of Wassermann Brothers, is on his way back from London and Berlin. He says:—"Germany is prepared to buy at least 100,000 shares of Canadian Pacific if the price falls below 200." Evidently Germany was disturbed over the report of a new stock issue of Canadian Pacific Railway, as Mr. Wassermann says:—"Herr Schiff, director of the National Bank of Berlin, showed me a despatch from Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, saying that the company had all the money that it would want for a long time. This dissipated the uneasiness which had been caused by the report that the company would put out a new issue of securities. I found the greatest interest taken in Germany in our securities, notably the Canadian Pacific and Baltimore and Ohio. The speculative holdings in the Canadian Pacific have been completely liquidated. The floating supply was sold in London and Montreal through New York brokers."

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Tenders will be received by the undersigned up to 12 o'clock noon, Monday, August 4th, 1913, for the purchase of the following Debentures of the town of North Bay, Ont.

1	" " " " "	384.29
	Total	$345,890.65

Principal payable at the end of term. Coupons for interest attached. Date of issue January 2nd, 1913, interest payable half-yearly on July and January 2nd.

Principal and interest payable at:—Banque d'Hochelaga, St. Boniface, Man.; Banque d'Hochelaga, Montreal, Que.; Canadian Bank of Commerce, Toronto, Ont.; Clydesdale Bank, Limited, London, Eng.

Debenture and Coupons expressed in sterling and Canadian currency.

Tenders may be for the whole or part.

Purchaser to pay accrued interest, take delivery and make payment in St. Boniface or Winnipeg, in Manitoba, Canada.

No tender necessarily accepted.

J. B. COTE,
City Clerk.

St. Boniface, Man., July 15th, 1913.

$1,164,706.40.

CITY OF OTTAWA, ONTARIO.

DEBENTURES FOR SALE.

Tenders addressed to "The Chairman, Board of Control," and marked "Tenders for Debentures," will be received by the City of Ottawa until 3 p.m., on Thursday the 28th August, 1913, for the purchase of $51,000 40-year debentures, $596,500 30-year debentures and $517,206.40 20-years.

They are all a liability of the city at large, and bear 4½ per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $236,000 30-year debentures, and the other for the remainder of the debentures $928,706.40.

All tenders must be on the official form. The tender for the $236,000 debentures must be accompanied with an accepted cheque for $1,000 and the tender for the $928,706 40 year debentures with an accepted cheque for $5,000.

Accrued interest from 1st July, 1913, must be paid in addition to price tendered.

The $236,000 debentures are in $1,000 denominations, principal and interest payable at Ottawa.

The remainder of the debentures will be made payable in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $236,000 debentures can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions, and official forms of tenders, can be obtained on application to the City Treasurer, Ottawa.

Sgd. J. A. ELLIS,
Mayor.

Ottawa, 4th July, 1913.

NORTH BATTLEFORD SCHOOL DISTRICT NO. 1438

Sealed tenders addressed to the undersigned will be received up to **August 5th, 1913,** for the purchase of sixty thousand ($60,000.00) thirty-year 6 per cent. School Building Debentures. Further particulars may be obtained from

H. BASIL THOMAS.
Secretary-treasurer.

North Battleford, Sask.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

SASKATCHEWAN'S HAIL INSURANCE ACT

One Hundred and Fifteen Rural Municipalities Participate in Plan

One hundred and fifteen rural municipalities have placed themselves under the Saskatchewan Hail Insurance Act. To give a proper understanding relative to this legislation the following circular has been sent to interested persons:—

Under the provisions of the act your crop is insured to the extent of $5 per acre if totally destroyed and a proportionate amount for crop partially damaged by hail, subject, however, to the provisions of section 19 of the said act.

The commission will require all claimants to show by proper legal documents therefor their interest in the lands damaged by hail, and to produce where the circumstances require an agreement in writing showing the mode of distributing hail insurance indemnity. (The commission recommend that where lands are held under lease, crop agreements for sale or similar title, that the parties interested at once make proper agreements in writing for the distribution of the hail insurance indemnity.)

Section 16 of the act provides:—"Any person assessed and liable for such special rate who may during the year for which he is so assessed suffer damage to his crops from hail upon the lands in respect of which such assessment is made shall within three days of such damage being sustained give notice to the secretary of the commission, by registered letter addressed to him at Regina, of his loss in full, particulars of the area of his crop damaged and the percentage of loss thereon."

Indemnity Should be Stated in Agreement.

Section 18 also provides:—"That no claimant shall be entitled to indemnity under this act for any damage less than 10 per cent. of the crop upon such hailed area at the time of damage."

Please note, therefore, that if your crop is damaged by hail to the extent of 10 per cent. or over, you should fill in particulars on form below, detach the form and forward by registered mail within three days to the commission.

Referring to the second paragraph of the circular a few words of further explanation are necessary. It is, of course, to the landowner that the commission looks for the assessments, but if the land is rented for cash to a tenant and loss occurs from hail then the whole of the indemnity is due to the tenant. On the other hand, if the land is held under a lease calling for half, one-third or one-quarter crop payments, as the case may be, then the interest of each of the parties in the hail insurance indemnity should be clearly set out in an agreement and the commission notified when claim is made, otherwise settlement will be greatly delayed.

Income and Cost.

The gross income of the commission can still only be estimated, but it is expected to reach approximately three quarters of a million dollars. The probable cost of administration was estimated at $50,000, but it is now felt that this cost is very unlikely to exceed half that amount, so that the commission will be in an excellent position to stand any loss that is likely to occur.

Under the old system the inspectors, being local men, were naturally interested in getting as much money as possible into their district, and without reflecting in any way upon their honesty were glad to see their friends and neighbours receive as much as possible in the way of indemnity when hailed out. Under the new plan things will be differently arranged, as none of the twenty-five inspectors will be given any special territory, but will be sent to any point where the demand arises, so that, the inspector and the claimant being strangers to one another, only strictly legitimate claims will be paid.

Accurate Results Anticipated.

An excellent method of inspection is to be followed. At least five tests will be made in different parts of the field, and the damage will then be averaged, so that the inspector's results will be accurately based on a foundation of facts and figures.

A considerable number of claims have already been made on account of hail damage done by the storm on June 4. These claims came in for losses on about 7,000 acres in the Gull Lake and Gravelbourg districts. Principally on account of this being so early the commissioners went personally to Gull Lake and inspected 38 quarter sections, but found that although some claims were made for 100 per cent. loss, the crop had revived so rapidly that there was no trace of damage to be seen. As an illustration of the working of the new plan, it was found that this inspection cost the modest sum of $25, whereas under the old plan, at the rate of $2 per quarter section, it would have cost $76, regardless of whether there was any damage done or not. Reports have been received of considerable damage from hail in the Rural Municipality of Browning, but at the time of writing the claims had not yet been investigated.

Another point which might be mentioned is that upon at least their first trip each inspector will be accompanied by one of the commissioners, so that uniform methods may be followed, and it is felt that this will result in better service, and tend to the mutual satisfaction of all concerned.

◆

CANADA'S GROWING FAMILY HAS NEEDS

Wall Street Journal's View of Our Situation—Buying Goods in Foreign Markets

Money is very tight and bound to continue so throughout the fall months. Barring any calamity which cannot be foreseen, bankers are satisfied that they have the situation well in hand, are the resultant remarks of the Wall Street Journal's investigator, Mr. W. P. Barclay, as to existing financial conditions in Canada.

Continuing, he adds, funds for legitimate needs of business are being provided by banking institutions at an average rate of 6 per cent., but virtually no money can be secured under any consideration for real estate transactions or stock market speculations.

Speculation in lands, with special reference to the Canadian west, has been checked, as has been the "sub-division" feature of real estate speculation throughout the Dominion. Many holders of such property, especially the subdivisions, will probably never see an opportunity to free themselves from their purchases at a profit. There has, however, been practically no decline in values in central real estate locations, including the growing cities, both east and west.

Bank collections, particularly in the west, are not up to the average, largely on account of the tendency of the agriculturist to add to his realty, trusting that his crops will provide funds for payments on his lands, while, if necessary, he may secure time on payments for machinery, etc.

Actual Capital Without Provisos.

After referring to the fact that municipalities will be more restricted in their expenditures, Mr. Barclay touches on immigration, and continues:—

Estimates of the amount of money brought into the country annually by new arrivals converge around the $200,000,000 mark. This is actual capital brought into the country without any string attached; no funds have to be sent abroad periodically to pay carrying charges, nor is it a debt which must be liquidated in a term of years.

To house the additions to Canada's family, to provide means of transportation, streets, sewers, lights, water and other accessories, millions of dollars worth of bonds have been sold abroad, the proceeds of which appear in the foreign trade returns in the form of imports.

The big transcontinental roads are supplied with funds for present needs in so far as the Grand Trunk Pacific and Canadian Northern are concerned, the two having secured together over $30,000,000 from the Government, and for a longer period of time as regards Canadian Pacific, which recently announced a $100,000,000 extension and development programme.

Consumption and Manufacturers.

Prospects are for good average crops, materialization of which assures the railroads of considerable traffic.

So long as Canada continues a consuming country rather than a large exporting country—and so long as immigration holds at its present record pace her exportable surplus is bound to be small—her need of funds and materials will continue. Canadian bankers contend that it is better to supply a portion of her needs from foreign factories than for her business men to embark on a wholesale policy of expansion, with its consequent heavy consumption of capital, only to find that they had overreached their market and must wait years for demand to overtake them, if it did overtake them in advance of bankruptcy. Steady conservative expansion involves less capital and sees its market keeping pace with manufacturing capacity.

Finally, Canada is not worried in the same way as the United States as yet by interference of politics with business. Canadians are always interested in their own political affairs, but in a different way than south of the border line. The most exciting feature of politics here at the present time is the question of a Canadian navy or Canadian contribution to the Imperial navy. This question is disturbing political leaders but not capitalists.

FLOUR EXPORTS AND HARVEST PROSPECTS.

Monetary Times Office,
Montreal, July 23rd.

An unusual quantity of flour has been passing outwards through the port of Montreal, for export to Great Britain, this year. Explaining this, Mr. W. A. Black, managing director of the Ogilvie Flour Mills, who has just returned from a trip abroad, says that the cause is the poor quality of the grain raised in England last year. It would appear, however, that the crop this year shows a very considerable improvement, in this respect, this year, even though the quantity is no greater, the result of which will in all probability be a smaller export demand once the new grain is harvested.

Mr. Black also explained how it comes about that the Balkan grain crop promises to be as large as a year ago, notwithstanding the fact that very large proportion of the men have been away with the army. He says that immediately after the Balkan-Turkish war the men hurried back in time to plant large areas not previously seeded. So far, therefore, the war seemed to be having little effect on the grain crop.

In addition to the above favorable crop reports, he mentioned that the crop in Russia promised to be larger than last year while the outlook in both Germany and France was quite favorable also.

Being asked his opinion of the financial situation abroad, he expressed the view that the trouble was not due so much to money being tied up in investments as to the fact that the wars and pessimistic talk had scared everyone, with the result that the hoardings had accumulated to large amounts and would not be released until the public began to get over its fright. As soon as matters were adjusted and confidence restored it would be found that there was much money for investment.

MUNICIPAL LOANS AND TIGHT MONEY

Civic Borrowing is Important Factor in the Situation—Bankers' Views

That municipal loans have been a far greater factor in creating tight money conditions in Canada than real estate speculation, is the conclusion of the Wall Street Journal. On short term bills, it recalls, Canadian municipalities have, as previously pointed out in *The Monetary Times*, paid as high as 6% to 8%, against 5% to 7% on long term bonds. In eastern Canada 6% was close to the high cost of funds, while in the West, rates of 8% were confined to the smaller towns and villages. Municipal issues are being offered by bond houses at the present time at prices to yield up to 7½%.

Less than twenty years ago, eastern Canada municipalities could secure their funds at from 3¼% to 4%, but they called on the money market for smaller amounts and at less frequent intervals than has been the case of late. During the last twelve months prices for municipals have been the lowest in two decades, barring perhaps 1907. The decline has been gradual, as has been the advance in interest rate.

Municipal Spending Will Be Less.

As a result of this higher cost of money, municipal spending in Canada is likely to be less for the immediate future, or until the British investor finds the return from capital in Canada better than he can secure in Europe, which is not the case at present.

A Montreal bank official, discussing these points, said:—

"Municipal credit in Canada has been high. There have been no defaults, or practically none. Municipalities had been able until just recently to secure funds at a low rate of interest. Consequently, in the last year or so, when money became tighter—and it is a worldwide condition, not merely a feature of the Canadian situation, as witness failures of bond sales in some leading cities in the United States—the town councillor or alderman in the average Canadian town to whom was entrusted the financing of the town's needs, declined to borrow on bonds at the ruling rate of interest. He insisted on waiting for lower rates.

Municipal Short Term Loans.

"In the meantime, the municipality carried short loans until it discovered to its chagrin that the lower rates were not in sight; in fact, rates were tending higher. Then these amateur financiers decided to yield to the inevitable and issue bonds. Their financing as a result was extremely costly.

"That the English market has been glutted with Canadian municipal debentures is not surprising when we look at the large aggregate of such securities taken there in the last few years and add to it the fact that in the first six months of 1913, more municipals were sold in London than in any similar period heretofore.

"Our banks now have municipal spending forced down closer to the capacity of markets to absorb their bonds. If they are bound to spend money when money is not to be had, we simply tell them to go ahead and sell their securities; with the necessary funds in their possession we are willing for them to go on with their work. But we absolutely will no advance any funds.

New Way of Financing.

"It had been the policy for our municipalities, in order to avoid the expense of making absolute estimates of the cost of improvement, to take a general estimate of that cost, start the work and borrow money from the banks for carrying expenses until the work was completed. Then with exact information of the cost of the work, bonds would be authorized and sold and the banks reimbursed for advances. The new way of financing is less convenient—but from the banker's point of view it has been effective."

Another bank official says:—"As a general proposition, much of the heavy expenditure by Canadian municipalities, particularly in the West, has been legitimate. With some 400,000 new people entering the country last year, a large percentage of whom have gravitated to the prairie provinces, western towns and cities were forced to spend large sums for improvements.

"In this spending, there must be reckoned the natural rivalry between large and small communities to gain residents. This has resulted in some towns supplying facilities which will not be needed for years to come.

Rapid Growth of Cities.

"But with this large influx of population, large expenditures were absolutely necessary at numberless points for sewers, water, streets, lighting and other similar improvements. The communities which were unable to supply these needs were sure to find themselves outdistanced in the race for population."

MARITIME PROVINCES' MUNICIPAL BONDS

Several Issues Have Been Sold—School Bonds are Marketed—Vancouver's Debentures.

Western municipalities borrowings have recently been much discussed and charges of overborrowing made, such charges can hardly be mentioned in connection with the borrowings of the Maritime Provinces, but the growth and progress prevailing there has made it necessary for several visits to the municipal market, as shown by recent and forthcoming issues. Moncton, N.B., has disposed of $150,000 debentures, Amherst, N.S. $75,000, Dartmouth, N.S., $63,000, and New Glasgow has already sold its issue to the Eastern Securities Company, while tenders have closed this week for Kentville's block of $37,000 and Halifax's $299,750 issue closes on Monday.

The city of St. John, N.B., finds it necessary to issue bonds this year to the extent of $200,000 for important public improvements. In view of the financial stringency and the dullness of the municipal bond market, the city council may adopt the plan of selling these bonds in small denominations to local investors.

Schools and their Requirements.

Messrs. Hanson Brothers, Montreal, are handling an issue of $100,000 5 per cent. Westmount, Que., school bonds.

Saskatoon school board has also disposed of $20,000 worth of the debentures it has for sale.

The Edmonton public school board has requisitioned the city for a matter of $475,000, required for maintenance of the city schools for the year. This is exclusive of a $40,000 grant which will be received from the provincial government for the same purpose. Notwithstanding large expenditures, the board are having difficulty in keeping educational facilities up to requirements, owing to the city's expansion. Contracts have been awarded for four temporary school buildings in outlying portions of the city.

Oakville's (Ont.), clerk, Mr. Crowley, who is visiting Great Britain, has been authorized to dispose of the town's bonds, if possible, while there.

Mr. John A. Hope, vice-president of D. E. Brown, Hope and Macaulay, Limited, of Vancouver, is stated to be ready on behalf of English investors to enter into negotiations for the purchase of $1,000,000 worth of the 4½ per cent. bonds that are now awaiting sale.

Mr. Hope has tentatively approached the city authorities regarding the matter, it is understood, but nothing definite has been concluded partly on account of the fact, it is supposed, of the agreement now existing between the city and the firm of Brown, Shipley and Company.

Including ordinary debentures and local improvement bonds, which Vancouver is ready to sell by reason of having the local improvement works completed, there is now about $9,500,000 worth of debenture stock ready for buyers. About $5,000,000 worth of this will pay 4½ per cent.

Offering ten per cent. Debentures.

Winslow Rural Municipality, No. 319, Manitoba, is asking for tenders for $5,000, 10 per cent., 10 instalment debentures. Mr. R. H. Percival is secretary of the municipality, and bids must be in by August 2nd.

GRAND TRUNK PACIFIC BONDS SUBSCRIBED.

The Grand Trunk Pacific Railway's issue in London of £1,500,000 five-year 5 per cent. bonds listed at 98, applications for which were invited on Saturday, have been oversubscribed, closing before the official time.

DEBENTURES AWARDED.

Dartmouth, N.S.—$31,000 5 per cent. 20-years to Bank of Nova Scotia.

Redcliff, Alta.—$150,000 6 per cent. to Alberta School Supply Company.

Dartmouth, N.S.—$21,500 5 per cent. 30-years to Nova Scotia Trust Company, Halifax.

Dartmouth, N.S.—$10,500 5 per cent. 30-years to Eastern Securities Company, St. John.

Bredenbury, Sask.—$15,000 7 per cent. 20-years to Western School Supply Company, Regina.

Lethbridge, Alta.—$66,930 4½ per cent. to Messrs. Wood, Gundy and Company, Toronto.

Brandon Schools, Man.—$20,000 5 per cent. 30-years to Central Canada Fire Insurance Company.

THE GRAND TRUNK PACIFIC

Scarcely had Mr. James J. Hill stated at Montreal that Canada has enough railroads, than Mr. E. J. Chamberlin, president of the Grand Trunk, said that as a railroad he never expects to see the Grand Trunk Pacific completed—because more mileage must continually be added to branch line construction and otherwise. This is according to the principle that no progressive railroad ever is completed. The time is fast approaching for the completion of the backbone of the Grand Trunk Pacific from the Atlantic to the Pacific Ocean. Its steel will be connected between Winnipeg and Prince Rupert within less than a year and Mr. Chamberlin sees no possibility of a hitch in the plans for the Grand Trunk Pacific to take over the National Transcontinental, the section built by the Dominion government between Winnipeg and Moncton.

This road is tapping the famous clay belt of Northern Ontario and is expected in due course to give an impetus to settlement and business generally in that region. The Grand Trunk Pacific has running rights by lease over the Temiskaming and Northern Ontario Railways, the Ontario government road. As Mr. Chamberlin points out, however, the question of routing of freight lies with the shipper. When he is shipping grain, for instance, he engages vessel room at Montreal, Quebec, Halifax, Boston or New York, as the case may be, and his grain is routed accordingly.

The Grand Trunk pays the Temiskaming and Ontario Railway Commission a fixed yearly sum, based on 4½ per cent. of one-half of capital cost, for the main line of the railway—North Bay to Cochrane, inclusive. For the purposes of the agreement at its initial point, the sum of $300,000 was fixed as the rental, based upon the capital cost of the main line as of July 1, 1911. Cost of additions and betterments from that date are added to capital cost, on which the Grand Trunk will pay interest upon one-half thereof, which naturally increases the rental annually. In addition, the Grand Trunk has to pay its proportionate share of operating and general expenses. The agreement is to be in force for twenty-five years from the date on which the Grand Trunk begins to use the line, and an option clause renews all rights for twenty-five or more years.

The financing of the road is progressing favorably, although it will cost considerably more than was originally estimated. The directors met recently and authorized the issue of $15,000,000 debentures in respect of the loan for that amount which was granted to the company by the Dominion government at the last session of parliament. This is the second loan of that nature which the company has been fortunate enough to obtain, the former being one for $10,000,000. The Grand Trunk Railway guarantees both issues. Mr. Chamberlin has hinted that the latest loan of $15,000,000 will not be sufficient to complete the line and further financing in connection with the road may be expected towards the end of the year or early in 1914. The company sold £1,500,000 5-year 5½ per cent. notes in London last week, which will pay for equipment on order.

FAIR MARKETS FOR THE FARMER

The farmer in Canada has innumerable problems to solve and not the least important appears to be the question of finding a fair market for his crops after they are raised. This is constantly being emphasized, more especially in Ontario. The farmer often gets the barest pittance for his products, and the consumer pays the highest possible price for the same products. Who absorbs the difference?

Mr. J. Lockie Wilson, superintendent of agricultural and horticultural societies for Ontario, the other day cited a striking instance. A man from near Wiarton, Ontario, went to him and said that, having heard of the demand for vegetables in cities, and thinking that perhaps the raising of them might pay him better than the ordinary farm crops, he decided to put in an acre of cabbages, with the object of selling them in Toronto. He did so, raising 10,000 head of cabbage. When he came to Toronto and asked the wholesale men what they would pay for his fifteen tons of cabbages they offered $5 a ton, f.o.b. in Toronto. That was $75 for his carload of cabbages, or about 1¾ cents a head. At this time, in the grocery stores of Toronto, cabbages were selling retail at 15 cents a head.

In order to transport his cabbages to Toronto the Wiarton man would have to charter a car, costing him $42, leaving him $33. He figured that the manure at 25 cents a load, labor necessary, spraying, etc., would increase his charges so that, after selling his cabbages, he would actually be thirty-five dollars out of pocket.

Hundreds of barrels of apples rotted on the ground in Ontario last year, while others were selling in the cities at high prices. Many similar instances could doubtless be instanced.

Is too much attention being paid to teaching the farmer how to grow and increase his crops, rather than showing him how to market profitably what he does grow?

FIFTEEN MILLIONS CAPITAL

It will not be surprising if the investor who has only a few thousand dollars to put in bonds, finds it somewhat difficult to comprehend the large capitalization of the Canadian Coal and Coke Company. The capital, we believe, is $15,000,000, $4,000,000 being preferred stock and $11,000,000 common. Is such capital really necessary for the coal and lumber developments proposed by this company?

TIME FOR ADJUSTMENT

The suggestion that the Dominion government should loan Alberta $10,000,000 to relieve the financial stringency is out of place. This is the time to pay off a few debts rather than create new ones. We have not had a period of economic adjustment since 1908, and can with advantage take a little financial stringency medicine.

CAPITAL AND LABOR

From January 1st, 1900, to December 31st, 1912, there were 1,319 labor strikes in Canada, in which 319,880 men figured, at a total estimated cost to the country of $18,000,000, based on the conservative estimate that the average value of a working day is $2.

During the twelve years nine million working days were lost owing to strikes, or an average of three-quarters of a million days per year for the period under review. These figures are embodied in a report by officials of the Labor Department at Ottawa, giving the important facts and figures on strikes and lockouts. Though there were 319,880 men involved, many of these men may have been involved in strikes or lockouts more than once during the period in question.

The figures make a striking appeal to capital and labor to adopt more modern and sane methods in dealing with their disputes.

INSANITY

Some grim facts are contained in the latest report upon the Ontario hospitals for the insane. There were 1,247 admissions during the past year, of which 653 were male and 594 female. Of the total, 849 were Canadian born, the remainder hailing from a large number of other countries. It is difficult to draw deductions from the statistics showing the occupation of those admitted. For instance, it might be reasoned that lack of education, having some effect, direct or indirect, on the state of sanity, would account for the fact that 200 laborers became inmates of Ontario's insane institutions. On the other hand, no less than 436 governesses, teachers, students, housekeepers, nurses, etc., were admitted. Mechanics at outdoor vocations, who became inmates, numbered 89, and those at sedentary occupations, 66. Professional men, such as clergy, doctors, lawyers, architects, civil engineers, etc., numbered 20. Insanity made greater inroads into commercial spheres, no less than 88 bankers, merchants, accountants, clerks, salesmen, etc., seeking refuge in the asylum. One might reasonably suppose that agricultural and pastoral pursuits would help to rebuff tendencies to insanity, yet 160 farmers, gardeners, stock men, etc., succumbed. Domestic service accounted for 92 and those with no occupation numbered 66. Miners, marine engineers, railway employees and seamen totalled only 19.

What were the causes of these 1,247 cases of insanity? They may be divided into three broad classes, moral, physical and hereditary. The first accounted for 268 cases, the second for 456, and the third for 523. Of the cases due to moral causes, the largest number, 137, were due to mental strain, worry and overwork, while 66 were due to adverse conditions, such as business troubles and loss of friends. Religious excitement accounted for 17, fright and nervous shock for 22, and love affairs for 26. In the physical class, senility was responsible for 122 cases and alcoholism for 70. The remainder in this class were due to a long list of causes.

The medical superintendents who contribute the facts and figures to this latest blue book do not take the opportunity of recording the many conclusions at which they must have arrived during the course of their duties. Those conclusions would undoubtedly be of service to men and women living in this age of insane rapidity.

SMALL CHANGE

Horne-Payne will not do it again.

* * * *

Sir Thomas Shaughnessy is rapidly becoming Canada's prize press agent.

* * * *

Wall Street financial papers are bubbling with good news of Canada these days.

* * * *

One of the few London loan oversubscriptions of the season was hung on Winnipeg.

* * * *

Apparently the only way to get those visiting British M.P.'s to talk is to say "Mr. Speaker."

* * * *

Moose Jaw should not talk so hard about the stringency or people will cease to ask "What's in a name?"

* * * *

Will the directors of the Kaministiquia Power Company please introduce a by-law to change the company's name?

Mayor Hocken, Toronto, seems intent on buying everything in sight for the city. It is quite easy to spend papa's money.

* * * *

When the International Geological Congress visit the asbestos mines they should be handed, as a souvenir, a history of the financing.

* * * *

A contemporary says that Calgary needs a stock exchange, forgetting that it is difficult enough to keep alive the Toronto and Montreal exchanges.

A Toronto contemporary's financial page says the underwriting of the Canadian Northern loan in England will probably be done at per cent.—safe prophecy that.

* * * *

Attorney-General Collins will file a suit in chancery court against the Illinois Central and Yazoo and Mississippi Valley Railroads, alleging an unlawful merger and asking penalties approximating $75,000,000. In these days of big penalties and small pays, the suit will probably end in a smile and a glass of grape juice.

WILL DEVELOP OIL SHALES

A company has been formed to operate the Albert oil shales in New Brunswick, as previously noted in *The Monetary Times*. The company is composed of Messrs. J. W. Hennessy, of Fort Coulonge, Quebec, lumberman; A. W. Fraser and H. D. McCormick, barristers; L. Simpson, engineer; W. S. Calvert and G. L. Orme, manufacturers, and E. Seybold, capitalist, of Ottawa, incorporated as the Oil Shales Company of Canada, Limited, to carry on a general mining and exploration and developing business respecting all kinds of minerals, ores and by-products thereof on any property owned by the said company. The company has a capital of $5,000,000 and Ottawa is the chief place of business. The Canadian company is closely identified with prominent English capitalists.

It is understood that Mr. Simpson, the company's engineer is at present in England for the purpose of purchasing machinery necessary to the opening of the works this fall, and work will be carried on simultaneously with the Mackenzie and Mann development of their areas, in Albert County.

In addition to the operation of the mines, it is stated as the intention of the new company to exploit the dumps of the old Albertite mines.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Saskatchewan.

Ensz, No. 1099, $15,000. P. D. Ensz, Morse.
Ibstone, No. 2929, $2,200. E. Price, Wilkie.
East End, No. 1119, $12,000. W. H. Sherman.
Barryville, No. 2946, $2,000. C. Bull, Macklin.
Wisnia, No. 2870, $1,200. G. Baker, Veregin.
Gren fell, No. 150, $5,000. H. Sayer, Grenfell.
Fell, No. 2982, $1,600. G. A. Garbutt, Dahinda.
Irvington, No. 2854, $1,200. S. Smith, Star City.
Clover Valley, No. 2887, $1,000. J. E. Moriarty.
Voll, No. 2934, $1,500. J. H. Sand, Rich Prairie.
Esmond, No. 2940, $1,500. A. J. Beer, Blairville.
Courval, No. 2710, $1,500. G. Laughton, Courval.
Elcapo, No. 3013, $1,000. E. Taylor, Broadview.
Patrick, No. 2931, $2,200. R. Millidge, Ethmuir.
Roia Dene, No. 2933, $1,800. F. Forbes, Bestville.
Strathmore, No. 2954, $1,200. F. Stafford, Fartown.
Schroeder, No. 2922, $1,500. H. Schultz, Walsh, Alta.
MacNutt, No. 793, $800. D. A. McFadyen, MacNutt.
Baldock, No. 993, $1.500. M. Harsbergerm, Milestone.
Blairbeth, No.2997, $1,000. W. T. Ritchie, Imperial.
Borden, No. 1364, $6,000. G. E. Wainwright, Borden.
Spring Valley, No. 2964, $2,000. E. R. Cole, Kramer.
Melville, No. 2187, $20,000. A. B. Burgman, Melville.
Fish Ponds, No. 1270, $1,400. P. L. Light, St. Walburg.
Rose Plain, No. 447, $37,000. W. R. Mickleborough, Brora.
Bredenbury, No. 1186, $15,000. A. Rodgers, Bredenbury.
Farmingdale, No. 1404, $1,200. F. L. Hand, Farmingdale.
Nut Grove, No. 2924, $1,200.. E. C. Clarke, Nut Mountain.
Orange Vale, No. 2932, $1,200. T. A. Brewis, Hazel Dell.
Westmount, No. 2979, $1,800. T. J. Derman, Sandford Dene.
Parnassus, No. 2991, $1,800. A. E. Hodgins. Box 6, Tompkins.
North Battleford, No. 1438, $60,000. H. B. Thomas, North Battleford.
Sweet Grass, No. 2892, $1,900. L. A. Nixon, Box 65, Mortlach.

NEW MANAGER OF STERLING BANK.

Mr. A. H. Walker has been appointed general manager of the Sterling Bank, succeeding Mr. F. W. Broughall. Mr. Walker has been chief inspector of the bank for four years. He is well known and respected in financial circles and the appointment generally is a popular one.

◆

PROVINCIAL LICENSES GRANTED TO SEVERAL COMPANIES.

The following companies have been authorized to do business in the province of Quebec:—The American Radiator Company of Canada, the Marine Welding Company, Tate Electrics, Limited, the Lautz-Dunham Company, Limited, Silver Spring Brewery Limited, Eastern Terminals of Canada, Limited, the Crown Cork and Seal Company of Baltimore City.

The following companies have been licensed to do business in Ontario:—The Urschel-Bates Valve Bag Company, Ohio, U.S.A., capital, $25,000; Hooker Electrochemical Company, New York, U.S.A., capital, $40,000; the Snyder-Gillett Contracting Company, New York, U.S.A., capital $40,000; Union Carbide Company of Canada, Limited, Dominion Charter, capital, $2,000,000; Boving and Company of Canada, Limited, Dominion Charter, capital, $600,000.

The following companies have been registered to do business in Saskatchewan under the act respecting foreign companies:—The R. E. Holland Company, Limited, the Equitable Fire and Marine Insurance Company, the Loyal Protective Insurance Company.

The following companies have been registered to do business in Alberta:—The Excess Insurance Company, Limited, head office, London, England, capital, $250,000; the Northern and Dominions Mortgage Company, Limited, Aberdeen, Scotland, $1,250,000; Overland, Limited, Fernie, $100,000; Franco-Belgian Investment Company, Brussels, Belgium, $400,000; Pacific Fruit and Produce Company, Tacoma, Wash., $100,000; Canadian Townsites, Limited, London, England $200,000; the Waterman-Waterbury Manufacturing Company, Limited, Regina, $15,000; Western Supply and Manufacturing Company, Winnipeg, $20,000; the Norwalk-Alberta Company, Norwalk, Conn., $100,000; Vancouver-Prince Rupert Meat Company, Limited, Vancouver, $400,000; Dominion Trust Company, Vancouver, $5,000,000; A. F. Calhoun, Limited Vancouver, $100,000.

MARKETING CANADA'S GRAIN

I.

Need of Drying Plants—Part of Past Year's Crop Graded Tough and Damp

Owing to climatic conditions a considerable proportion of the wheat crop of 1911-12 was graded as tough, damp and wet, according to the recently-issued report of the board of grain commissioners for that period. Much of the tough grain was marketed without being dried, and during the winter of 1911-12 the drying capacity of Port Arthur and Fort William was fairly equal to the demand. When the warm weather came, the damp and wet grain began to go out of condition. The board of grain commissioners watched closely to see whether the drying plants at Fort William and Port Arthur were able to dry all the grain that needed to be dried. It was not until the end of the first week of July that the quantity to be dried passed the drying capacity of the terminals. Owing to the multiplicity of grades, and owing also to the fact that in drying individual car lots were kept separate, the actual drying capacity of the terminals amounted to about 35,000 bushels per day, and on July 11th it was estimated that in the terminal elevators, and in cars in the yards, there was something over a million bushels of tough, damp and wet grain.

It was evident that much of this grain would become a total loss unless some way could be found to have it dried. Various alternative means of dealing with it were considered by the board. One was to have cars of grain diverted from the West to Duluth. Another was to have cargoes of grain shipped from Fort William to Duluth. Another was to order the terminal elevators to take in the grain and keep elevating it to prevent its becoming worse, until it should be dried. Another was to import a drying plant, if this were possible.

Drying Plant Imported.

Of these alternatives the last one was considered to be the best, if feasible, and immediately negotiations were opened with the Armour Grain Company, Chicago, which company had recently built a floating dryer. A representative of the company had visited Winnipeg and Fort William in the month of February with the object of ascertaining whether the company could get business for the floating dryer in Canada. At that time, however, the Canadian drying plants were equal to the demand. The company sent a representative to Fort William to meet the board of grain commissioners on July 11th. He stated that the dryer had a capacity of about 35,000 bushels per day, and that it could come from Buffalo as quickly as a freight steamer, and could elevate grain either into cars or elevators. He laid down three conditions to which the board of grain commissioners must agree before the company would send the dryer to Fort William:—

First, that if, after the boat came to Fort William, there took place any fire at an American elevator or grain port, or if there was any salvage work to be done the dryer would immediately leave Fort William. Second, that the company would not pay duty. Third, that the company would not accept the rates at which the Canadian plants dried grain; it must be permitted to charge higher rates. The board allowed the company to charge higher rates, but the filed rates for the Canadian drying plants were not changed. If, therefore, owners of grain needing to be dried were willing to pay the higher rates to the Armour Grain Company they could do so, whereas, if they preferred waiting their turn at the local dryers they could do so at the Canadian rates. This arrangement was submitted to the trade at Winnipeg and unanimously approved. It was also published widely in the public press so that producers should be informed of the conditions.

All Grain was Saved.

The company intimated that their rates would run from three to seven cents per bushel, according to the condition of the grain. The board also decided to recommend the government to remit the duty upon the floating dryer. The government agreed on condition that the rates charged were satisfactory to the commissioners, and also on condition that the dryer should be exported at a date mentioned. The dryer began work on July 19th and continued operating until September 16th.

The dryer operated forty-four days, charged on the average 4.85 cents per bushel, and earned $107,348.60. On the other hand, most of the grain was heating, or hot, and would have been utterly lost had not this foreign plant been available. It was all saved—all reports to the contrary notwithstanding.

It is to be regretted that Canada was so ill-prepared to meet an emergency, which, though hitherto rare, yet being climatic might occur at any time. Drying plants were not attractive to private capital at the rates current in Canada, and so the country lost heavily. This is not the only illustration which the last six months have afforded of the general inadequacy of existing facilities for handling western grain.

The government elevator will be equipped with a large drier, but as it cannot be in operation until September, 1913, the commissioners considered it necessary to endeavor to increase immediately the drying capacity of the terminals.

The Empire Elevator Company offered to install a drier immediately in the Empire Elevator, and if necessary another in the Thunder Bay Elevator on condition that a four (4) cent rate was sanctioned for treating damp and wet grain. This was considered expedient, and the drier has been installed in the Empire Elevator.

PERSONAL NOTES

Mr. G. A. Wintemute, treasurer of Essex county, Ont., died at his home at Sandwich on Wednesday.

Mr. A. M. Nanton, Winnipeg, has been elected a director of Ogilvie Flour Mills Company to fill the vacancy caused by the death of the late Sir Edward Clouston, Bart.

Messrs. Edwards, Morgan & Company, of Toronto, have opened an office in Winnipeg at 702 Electric Railway Building. Mr. T. Cresswell Parkin, F.C.A. (Eng., has been appointed local manager).

Messrs. J. N. Norcross, Toronto, and J. P. Steedman, Hamilton, have been elected as directors of the Richelieu organization, E. Bristol, M.P., and Mr. Grant Morden retiring in their favor.

Mr. Emile Lacas has opened an office as financial broker at 322 Transportation Building, Montreal, the partnership of Messrs. du Pont and Lacas, financial brokers, of Ottawa, Ont., having terminated.

Mr. John A. Reid, late deputy provincial treasurer of Saskatchewan, and now financial commissioner for Regina, has been appointed agent for Alberta in connection with the provincial offices recently opened in London.

Messrs. Macintosh & Hyde, chartered accountants, of Montreal and Winnipeg, have opened branch offices at No. 85 Bay Street, Toronto. These offices will be under the management of Mr. Charles R. Trobridge, A.C.A.

Mr. M. J. Patton, assistant secretary of the commission of conservation and editor of "Conservation," is severing his connection with that organization to become treasurer of the Publishers' Association of Canada, Limited, of Toronto. He will also become a director of the company.

Mr. A. Norman Young, C.A., of Messrs. Mitchell & Young, chartered accountants, 210 Union Street, Aberdeen, has received an important appointment with Messrs. Marwick, Mitchell, Peat & Company, chartered accountants, New York. Mr. Young, after a short stay in New York, is to proceed to Montreal to take charge of one of the company's branches there.

CANADIAN ANNUAL REVIEW OF PUBLIC AFFAIRS

The latest volume, the twelfth, of the Canadian Annual Review of Public Affairs contains a record of the progress made throughout the Dominion during 1912. Its various sections deal with matters of importance in imperial, federal, provincial and municipal spheres in an authoritative manner, indeed every phase of Canadian history is covered in the usual thorough style of this well-known annual. Canadian Annual Review of Public Affairs, J. Castell Hopkins, F.S.S. Annual Review Publishing Company, Toronto.

A resolution advocating the formation of a British Columbia Manufacturer's Association with headquarters at Vancouver, was carried at a recent meeting of interested manufacturers. An organization committee, composed of Messrs. Morrison, McMaster, Cope Tattersall, Morrow, Thurston and Baynes, was appointed.

INDEX TO THE MONETARY TIMES

The index to Volume 50 of *The Monetary Times*, January to June, 1913, is ready and copies may be had on application to the head office, 62 Church Street. Toronto.

RAISING MONEY FOR MUNICIPAL WORKS

Conditions and Procedure in Canada, Great Britain and South Africa Compared—Regulation of Municipal Loans

(Written for *The Monetary Times*, by R. O. Wynne-Roberts, M. Inst. C.E., M. Can. Soc. C.E., consulting engineer, Regina).

The present financial stringency affords an opportune occasion to offer a few observations on the question of loans required for the execution of municipal works in Canada.

My remarks will have special significance in connection with the Western Canadian municipalities, firstly, because much attention has been directed to the amount of money required by them; secondly, because the conditions are unique in the history of British municipalities, and thirdly, because the procedure observed in relation to obtaining money for new works is somewhat different to that obtaining in other parts of the empire.

My extended municipal experience in Great Britain, South Africa and in Canada, enables me to compare the conditions and procedures in these countries in respect to works carried out of loans.

In the first place, it is important to study the conditions in these countries so far as they concern the needs of the public with regard to utility works.

In England the growth of towns has been steady and practically uniform, during the last fifty years. Some towns have grown much quicker than others, but the average increase of urban population was about 15 per cent. between the years 1891 and 1901, and about 11 per cent. in the next decenium.

How London Boroughs Grew.

Some boroughs round London had grown about 26 per cent. in the years 1901-1911; this was due to immigration from the central parts to the suburbs owing to improved transportation facilities.

The following probably represents the largest increases in England and Wales during the last census period.

	Population.	Increase per cent.
Croydon	169,500	26.6
Rhondda	152,780	34.3
Swansea	114,663	21.3
Huddersfield	107,821	13.4
Cardiff	182,259	10.9
Sheffield	454,632	11.1
Belfast, Ireland	385,000	10.4

When Sir Robert Rawlinson was commissioned by the government to investigate the sanitary condition of Lancashire towns, in the forties or thereabouts, public health works were most inadequate and unsatisfactory. Sir Robert initiated great schemes to provide work for masses of men who were out of employment owing to the depression which then prevailed.

From that time to the present, English municipal authorities have gradually carried out such works. The growth of the population was steady, very few towns have had any exceptional development, and there has been no difficulty in undertaking schemes which would be ample for a generation ahead. Water supplies, sewerage schemes, street railways, electric light, gasworks, and other municipal works have therefore been provided without imposing an undue burden on the ratepayers. The only public work of importance which was difficult to carry out with a degree of assurance of success was that of the purification of sewage.

In South Africa, the conditions are different, for apart from Capetown district, Port Elizabeth, East London, Durban, Pretoria and Johannesburg, the population of the British and Dutch element has not grown to any extraordinary extent. The above towns during the ten years ending 1911 have grown considerably, but not in anything like the same manner as Western Canadian cities. Johannesburg is about 30 years old, but the other South African cities are much older and all have had time to carry out many municipal works, but there is much left to be done.

Regarding Canadian Expansion.

With regard to Canadian expansion, it may be instructive to analyse and compare the census returns for the 1911 decenium. The increase in population in Canada was 32 per cent. as compared with 11 per cent. in England and Wales. The province of Saskatchewan had increased 439.48 per cent.; Alberta, 413.08 per cent.; British Columbia, 119.68 per cent.; Manitoba, 78.52 per cent.; Ontario, 15.58 per cent.; and Quebec, 21.46 per cent.

The urban population in Canada had grown 62.25 per cent. as compared with 11 per cent. in England and Wales.

If we analyse the returns still further we find that the increase in a few of the cities were as follows:—Regina, 1243.40 per cent.; Moose Jaw, 787.23 per cent.; Edmonton, 848.21 per cent.; Vancouver, 51.35 per cent.; Fort William, 354.11 per cent.; Toronto, 80.99 per cent.; Saskatoon, 105.23 per cent.; Calgary, 893.72 per cent.; Medicine Hat, 257.20 per cent.; Winnipeg, 221.29 per cent.; Ottawa, 45.27 per cent.; Montreal, 75.73 per cent.

It may be interesting to know that Toronto and Belfast have about the same population but the rate of increase was as 8 is to 1. Montreal and Sheffield are somewhat similar in the number of inhabitants, yet the growth of Montreal was nearly seven times as great as in Sheffield. Winnipeg in 1911 was about three-fourths the size of Cardiff, but the expansion of the former was about 21 times as much as the latter.

New Population in Western Canada.

Unfortunately, comparative figures are not at present available to contrast the other Canadian cities mentioned, but there is no doubt that their growth has been enormous as compared with English standards. It is palpable that in the West, the development of villages into towns will show an abnormal percentage of increase, but even if such cases are excluded, the expansion was far in excess of what ordinarily occurs in other countries.

The influx of people into Western Canada during the last five years was even greater than in the decenium 1901-1911. For instance, the writer when investigating the question of water supply of Regina, found that the annual increment for five years ending 1912 was about 36 per cent. compound. It is, of course, possible that this rate of increase has been equalled or even exceeded in other cities.

The extension of railways, the great development of the agricultural industry and the immigration of people, demand the creation of new towns and villages to provide for the commercial and social requirements of the inhabitants generally.

The enormous growth of the existing towns and the ever-increasing number of new villages, some of which develop very quickly, give rise to sanitary works, better means of locomotion, more efficient lighting, cheap power, and the many other civic requirements of modern times.

Keep Pace With Requirements.

It will be acknowledged that the best policy and the only efficient administration for municipal authorities to undertake, is to carry out the necessary public works as the towns grow, and not to allow the works to accumulate in such a way as to be difficult to be overtaken. It is far cheaper and more satisfactory to carry out sanitary works in advance of the actual requirements, rather than to neglect keeping abreast of the times, and wait until a disastrous epidemic of some disease has broken out, which will not only need eradicating, but also the execution of the essential precautionary works, after causing sufferings and losses which cannot be reckoned in dollars and cents.

The influx of people into Canada, therefore, imposes an important and difficult duty on the municipal authorities, which cannot be safely ignored. That the majority of the authorities are endeavoring, within the statutory limits of their borrowing powers, to meet the requirements is proved by the calls for capital.

While English municipalities have had fully fifty years to carry out such works, the Canadian cities and especially, the Western ones, are called upon to undertake the same in about ten years. The difficulty is enhanced by the exceptional growth, for engineers find it almost impossible to estimate the future with the same confidence as they can in other parts of the world.

Not Familiar With Expansion.

This difficulty is not inherent to city works, for banking corporations have frequently erected buildings which were soon found to be inadequate; railway companies have built railways and structures only to find that it was necessary to enlarge the same almost before completion; governments are guilty of similar delinquency, and business men who erected what others called "white elephants," have had to face similar conditions and exigencies.

Such, then, is the almost universal development of municipal enterprises in Canada. It is small wonder that criticisms have been levelled at civic authorities, both by investors who are not thoroughly familiar with Canadian expansion, and by people who are disappointed to find that public utilities are not developed as in England. The problem is to find the money needed. The financial aspect of this question is probably more interesting than the incomplete description of the conditions which now prevail.

The monetary requirements of a Canadian city is controlled by the total assessable value of the properties, for the power to borrow is usually limited to twenty per cent. of such value.

Procedure in Seeking Loans.

The next question to be dealt with will be the procedure observed when seeking loans for new works.

In England and Wales, there are the borough councils, which consist of the mayor, aldermen and councillors. The mayor is elected from among the aldermen and councillors for one year, sometimes he is elected from outside the council. The aldermen are elected from among the councillors for a term of six years, and the councillors are elected by the ratepayers for a term of three years. The urban district councils consist of the chairman and councillors.

There is usually a plethora of candidates for these honorary offices, and in the majority of towns the members have held office for many years. In the boroughs the aldermen add more permanency to the membership and policy. There is much to be said in favor of aldermen and also against the institution. Aldermen act like a ballast to a ship, so long as they are sensible and progressive, but there is a tendency sometimes, for aldermen to adhere to obsolete ideas and ignore up-to-date requirements on the plea of economy.

How They Do It In England.

When any English municipal authority has decided to carry out any new scheme, the engineer prepares plans, estimates and specifications, and when these have received the approval of the council, the clerk is authorized to forward a copy of the same with an application to borrow the necessary amount of money, to the Local Government Board, which is a large government department controlling almost everything associated with civic affairs.

In due time an engineering inspector holds an official enquiry in the particular town, when the clerk, mayor, aldermen and engineer place full particulars of the town's indebtedness, population, assessment, borrowing powers, necessity for the works involved, and so on. When they have presented the case the inspector calls for evidence in opposition—if any—and at the close of the enquiry he proceeds to the site to make a personal inspection. The inspector reports to the board and that body sanctions or disapproves of the schemes, or it may consider it necessary that a poll of the ratepayers should be taken, before giving any opinion or decision.

If the scheme receives the sanction of the Local Government Board, and it has authorized the period of repayment, the council is at liberty to approach the public works loan commissioner, or any other financial concern for offers or terms.

The Local Government Board.

The Local Government Board, or the L.G.B., as it is known among the officials, is a restraining factor in the control of expenditure of public funds. The borrowing powers of the councils is usually limited to twice the rateable value, which in England is based upon the rack-rent of the properties, and not on the actual values.

The councils can undertake any new work, after its authorization by the Local Government Board at any time of the year, and float so much of the loan as is necessary or deemed expedient at the most propitious moment.

The Local Government Board is a slow moving department, often much criticised, but it is acknowledged to be an excellent organization, free from political influence, and possesses great powers to force recalitrant councils to execute any necessary works. Such powers, however, are very rarely exercised. It can, nevertheless, restrain too ambitious councils in their expenditure of moneys on doubtful schemes, or when their borrowing powers are nearly exhausted. It is somewhat conservative in its methods and adaptation to new development; bacteriological treatment of sewage and reinforced concrete structures, are instances of new methods to which it was for some time not prepared to give its sanction, except for short period loans. It will not consent to radical changes without ample proofs that they are essential in the interest of the public.

Under the English method the town authorities can take the fullest advantage of the financial fluctuations and thus ensure obtaining money on the most economical terms, which must be repaid in the period prescribed by the Local Government Board.

In South Africa, the procedure is different. The council having decided to undertake certain works for which preliminary plans, specifications and estimates have been prepared, calls a ratepayers' meeting and submits the proposals. If the ratepayers present are unanimous in favor, then the works are authorized, but if a certain number rise and demand a poll, then a plebiscite of the ratepayers is taken and the schemes are either agreed to or rejected. No formidable by-laws are necessary. If the schemes are approved by the ratepayers, the council can go on the money market at any time and thus take full advantage of the financial situation. Municipal schemes are decided upon at any time, and it is rare that any of them are suspended, altered, or turned down by new members because the policy is sufficiently established by the constitution of the council. Occasionally a scheme becomes the matter of an election contest, and the decision affords a guidance to the council in that particular case.

And In Canada.

In Canada the procedure is different to both the foregoing examples.

The council usually decides what shall be undertaken in any year, so far as is possible. Of course, some schemes require more than one year for their execution, but the council of one year does not often settle what may be done in the next year, because the members are elected for two years and it is quite possible under such conditions to find a large proportion of new members elected at any time. Aldermen are usually busy men, engaged in businesses which calls for their close attention, whilst civic administration also demands a great amount of time which many aldermen can ill-afford. The result is found in the appointment of city commissioners, or the election of controllers, who devote their whole time to civic business, and thus relieve the aldermen of some of the administration.

The new council takes office in January each year, and some time is necessary to get the organization into working order. The aldermen call for reports, plans, etc., of works to be carried out during the year, some of which have sometimes, been considered in the previous year, in which case, if the new council acquiesces, there is a certain economy of time. In due course the council decides to undertake many schemes, by-laws have to be prepared and read twice at the meetings. Then the by-laws, which recite in full various particulars and different legal phraseology, are published. The poll of the ratepayers is necessary and this is taken in ordinary course, and on the result depends whether and which schemes are to be carried out.

When the routine has been carefully observed, then the by-laws are read a third time, and advertisements are issued for bids, the most acceptable of which are selected.

All in the Money Market.

All this means time, if any preliminary consideration by the council of the preceding year has taken place it permits of more expedition, provided the present council agree to such proposals.

The above procedure has to be strictly observed, otherwise the work is null and void, and the correct formalities have to be gone through and more time absorbed. As this routine must be followed by every council at about the same time, it is evident that the work is complete from March to May each year.

In Saskatchewan, the authority of the commissioner of public health is necessary before any schemes relating to public health can be submitted to the ratepayers for their approval.

In Canada, therefore, the town authorities are on the market for money about the same time, with the result that the aggregate amount appears enormous. The occasion may, however, be most inopportune, owing to financial stringency, caused by political events, abnormal industrial requirements, and perhaps by popular momentary wave of preference for securities of other countries or class. It is well known, that there is a fashion in investments as in other mundane matters, and this induces a fluctuation in the value of Canadian municipal loans, etc.

Causes Financial Indigestion.

The almost simultaneous demand of many Canadian cities for money, is not to be commended. It does not usually occur in any other part of the world. It constitutes a flood of investments which cause financial indigestion and takes times to overcome.

There is a need for a greater continuity of municipal policy which can probably be attained by a longer period of election, say for three years instead of two as at present. Then fewer men will retire each year and councils will have a more established programme. If the present procedure is essential for the safeguarding of public interest, then it is a question whether the election should not be held at another time so as to permit the aldermen organizing their plans earlier. This, however, will not remove the disability due to the demand for money at practically the same time.

The character of the loan is a matter deserving of careful consideration. Instead of selling debentures required for various works in one class, they would possibly yield better average returns if those required for waterworks, electric works, street railways, and other reproductive works were disposed of individually. This is the usual practice in England and South Africa. Moreover, it is worthy of consideration whether ordinary debentures are as saleable as stock. Many cities find it profitable to obtain funds by selling stocks of $500 and upwards.

Elastic But More Rigid.

Reverting again to the matter of procedure, it would appear that something more elastic on the one hand and more rigid on the other is necessary. This may seem paradoxical, but it is not so. The procedure should be sufficiently elastic to enable the councils framing their public works programme so as to permit them taking advantage of the financial fluctuations. It should also enable the councils to decide what works should be carried out and what money is required and come on the market at any time of the year, so that not too many of the Canadian authorities will do so simultaneously. It should be elastic enough to allow the councils to submit proposals to the ratepayers, at any time of the year, if such a procedure is really necessary. The ratepayers have elected their representatives and they might be given more freedom of action in this respect.

To Protect Ratepayers and Investors.

The procedure should also be rigid so as to protect the ratepayers and investors alike. One section of the ratepayers may have sufficient influence to force a scheme which might not be essential to the general public as another one might be. Some ambitious new aldermen may want a scheme delayed so that his may have a chance. The investor also wants safeguarding, for he is usually away from the place where the money is required. At present he has documentary evidence of the city officials supplemented in some cases by the government official. It would seem that the procedure could be made more rigid by adapting the English Local Government Board method, to suit Canadian conditions. To adopt the Local Government Board plan would no doubt be too drastic, and perhaps too great a restraint on the enterprising western Canadian councils. But to the British investor, (for most of the money comes from Great Britain), some independent and impartial investigation and sanction is desirable.

The Board of Railway Commissioners of Canada is reputed to give satisfaction to the public. The Public Utility Commissioners of Manitoba and Quebec are also said to fulfil their functions impartially and have done good work. Would it not be an advantage if similar organizations were instituted to facilitate and regulate municipal loan schemes? The fact that all municipal schemes were considered, investigated and sanctioned by such boards would doubtless have a great influence on the opinions of financiers, for it would be a satisfaction to them as well as to the ratepayers to know that all schemes have to be sanctioned or rejected by independent official authorities, who shall be absolutely free from political control. If such boards were constituted the town authorities would be able to prepare and submit any scheme at any time, and having got the necessary sanction of the board, with the period of repayment fixed, the councils could then arrange to secure the funds at the most opportune moment and on the most favorable terms. The present cumbersome procedure would then be unnecessary as there would be every safeguard in the interest of the ratepayers.

Easier to Get Capital.

With the establishment of such boards, and a revision of the constitution of the town authorities, so as to secure a greater continuity of policy, Canadian authorities would be in a better position to obtain capital and to better arrange their programme of public works. Schemes could then be dealt with individually instead of collectively at any period of the year.

In conclusion it may be instructive to describe German municipal procedure. The city council consists of deputies elected by the ratepayers for three years; they appoint the Ober-burgermeister and a Vice-burgermeister at salaries for twelve years, and a number of stadräte or councillors, some of whom are salaried and correspond to our city commissioners. The burgermeisters and stadräte have a right to vote in council. When the council of deputies and stadräte presided over by the burgermeister has decided to embark on any scheme, the same is remitted to the burgermeisters and stadräte in charge of the branch controlling that particular work. The ober-burgermeister, vice-burgermeister and stadräte first settle all details in conference—called the magistrate collegium—and a report is presented to the council of deputies, when they finally decide the matter. The money is obtained either from an "operating fund" or by loan; but if it involves a large amount it ultimately means a loan. This is arranged with financial houses and the work proceeds. It is maintained that the ratepayers having elected their representatives it is left to them to use their judgment as to what is advisable to be done in the interest of the citizens. The government has certain powers of restraining municipal authorities, where it is felt that injudicious expenditures are incurred, otherwise the city authorities have complete independence in the administration of civic affairs.

FRAUDULENT STATEMENTS ARE CRIMINAL OFFENCES

The Canadian Credit Men's Trust Association has been working for some time on the proposition of making the issuance of a false or fraudulent statement a criminal offence. The passage of the following amendment has resulted from their efforts:—"Everyone is guilty of an indictable offence and liable to one year's imprisonment and to a fine of two thousand dollars, who

"(a) Knowingly makes or causes to be made, either directly or indirectly, or through any agency whatsoever, any false statement in writing with intent that it shall be relied upon, respecting the financial condition or means or ability to pay of himself, or any other person, firm or corporation in whom he is interested, or for whom he is acting, for the purpose of procuring, in any form whatsoever, either the delivery of personal property, the payment of cash, the making of a loan or credit, the extension of a credit, the discount of an account receivable, or the making, acceptance, discount or endorsement of a bill of exchange, cheque, draft, discount or endorsement of a bill of exchange, cheque, draft or promissory note, either for the benefit of himself or such person, firm or corporation; or

"(b) Knowing that a false statement in writing has been made respecting the financial condition or means or ability to pay of himself, or such person, firm or corporation in which he is interested, or for whom he is acting, procures upon the faith thereof, either for the benefit of himself or such person, firm, or corporation, any of the benefits mentioned in paragraph (a) of this section."

◆

Because the amount of Canadian gold being submitted to the refining process at the Ottawa branch of the Royal Mint is increasing year by year, the Government is taking steps to double the capacity of the building and plant. Tenders will be called for the work in a few weeks. The value of gold-refined last year was $1,688,823.

MOVEMENT OF CANADIAN BANK BALANCES

Some heavy shifting of Canadian balances occurred in June, points out a Montreal correspondent of the New York Journal of Commerce. Thus the Bank of Montreal drew down its balances in London $5,500,000 and increased its New York balances $4,100,000—the total rising from $5,874,706 to $9,992,930. Apparently the Bank of Montreal sold bills on London extensively in June and placed the proceeds with its New York correspondents—the National City, National Bank of Commerce, and the National Park.

The Canadian Bank of Commerce, on the other hand, was remitting bills to London—its net balances there increased $1,200,000, while its balances in New York went down roundly $5,000,000. In this case the New York correspondents are the American Exchange and the Chase. The Royal Bank of Canada, too, remitted bills to London—its balances there rising $1,400,000. As mentioned above, the funds apparently came from calling loans in New York. Perhaps the Canadian Pacific stock payments in June caused the Bank of Montreal to take this supposedly different position on the exchange market last month. It had been presumed that the Bank of Montreal would retain in London the moneys derived from the European stockholders of the Canadian Pacific Railway in June, in order to meet the bonds tendered on July 1st. It is said that £4,000,000 of these bonds were redeemed on that date. One would suppose that this payment by the Canadian Pacific's bankers in London would serve to still further reduce the outside reserve of the Canadian banks, and thus bring the July reserve ratio down to a lower point.

◆

The plant of the Edmonton Portland Cement Company at Marlborough, about 149 miles west of Edmonton, the installation of which has been in progress for the past eighteen months, is practically completed, and the plant will in a few days be placed in commercial operation, with an initial capacity of 1,500 barrels daily and provision for the installation of additional units when required.

HEALTH AND ACCIDENT INSURANCE AGENTS

Suggestions for Improving Their Status—Trend Towards State Insurance

The atmosphere surrounding the industrial health and accident field for several years past has been surcharged with criticism, and the tenor of the letters received at the New York insurance department and, as advised, at the various other insurance departments, certainly indicates that public confidence in this line of insurance has been shaken.

The agents are almost of necessity compensated by commissions, and industrial health and accident commissions, although relatively large, are usually insignificant in amount. At the outset, therefore, there seems little to attract a man of promise and ambition in this line of business, and the natural result is too often the recruiting of agents from classes which lack the mental and moral equipment which the business requires.

Makes Some Suggestions.

In view, therefore, of the existing conditions in the agency forces of the industrial health and accident companies, the following suggestions are made, in the belief that their adoption by the various state departments—through legislation when necessary—will contribute in some measure to relieve the situation and result in desirable reforms, said Mr. H. D. Appleton, New York State deputy superintendent of insurance at the National Convention of Insurance Commissioners at Burlington, Vermont:—

1. Certification of agents by company.—That when the appointment blank in use by state departments merely provides for the appointment of an agent without in any sense certifying to his character, such blanks be amended so as to require a certification that the company has investigated each agent designated and certifies that his record is satisfactory; and, in the case of a newly appointed agent, that the company has satisfied itself as to his trustworthiness and competency.

2. Filing statement of cause of cancellation of agent's license.—That when a company cancels an agent's license it should file with the department a statement of the facts causing such action.

Superintendent Should Have More Power.

3. Power given superintendent to refuse certificate.—That the supervising insurance official in every state—at least in the case of agents of health and accident companies—shall be given authority to refuse a license for good and sufficient reason.

Under the existing law in New York, the superintendent has no authority to refuse a license to an agent who has made application to the department and been duly designated by an authorized company. His only control over agents is the power to revoke their certificates if, after due investigation and a hearing, it is determined that the holder has violated any provision of the insurance law or has been guilty of fraudulent practices.

4. Profit-sharing contracts.—That the convention go a step further than did the Milwaukee convention when it adopted a resolution regarding profit-sharing contracts, by committing itself to a policy which will not permit any company to have profit-sharing contracts with its agents.

The resolution adopted at Milwaukee following the investigation of 1911 read as follows:—

"That hereafter no agent, collector, adjuster or manager of such a company who is compensated in whole or in part by a profit-sharing contract, have power to settle claims."

Existing conditions seem to call for the abolition of all profit-sharing contracts.

Trend Towards State Insurance.

5. Twisting.—That the various state departments follow the procedure adopted in New York last October when each company was notified in the event of application being made by another company for the licensing of a man already recorded as agent for the first company.

6. Amendment of laws affecting incorporation.—That the laws of many of the states should be so amended as to increase the capitalization requirement for corporations intending to carry on the business of health and accident insurance. This field is now overcrowded, and to properly protect the insuring public, incorporations of this character should be discouraged—not encouraged.

With the trend of sentiment in some quarters towards state insurance there is a possibility that company officials—particularly those supervising industrial health and accident corporations, which come so close to the wage-earner—may be brought face to face with state insurance, which, it is believed, would not be a situation particularly pleasing to the companies nor to a large majority of those present.

ONTARIO'S OCCUPIED LAND

Growth of Cities Responsible for Reduction in Small Holdings—Increase in Improved Lands, Etc.

The area of occupied land in 1911 was 21,933,700 acres as against 21,349,524 acres in 1901, and of 21,091,698 acres in 1891, being an increase of 2.73 per cent. in the last decade, as against 1.22 per cent. in the previous one, according to a census bulletin just issued. The land area of the province, exclusive of the new addition which is called the District of Patricia, is 141,125,330 acres. Of this only 15.54 per cent. was occupied for agricultural purposes.

The number of farm holdings in 1911 was 223,260 as against 224,127 in 1901 and 285,608 in 1891. This decrease in the last decade has occurred wholly in the case of the smaller holdings, the number of occupiers of less than one acre having decreased by 5,659 and those of from one to five acres by 225. These small holdings being usually contiguous to cities and towns, the natural tendency is to convert them into building lots to provide for the rapid development of urban centres and thus remove them from the number of producing agricultural areas.

Small Holdings Show Decrease.

It is also to be noted that while the number of small holdings has decreased in the decade, yet the number of holdings of the larger dimensions is on the increase, there being an increase, of 1,140 in holdings of from 5 to 10 acres, of 470 in holdings of 11 to 50 acres, of 1,007 in holdings of 51 to 100 acres, of 1,810 in holdings of 101 to 200 acres and of 434 in holdings of over 200 acres. The average size per holding in 1911 was 98.25 acres as against 95.25 acres in 1901.

The area of improved lands increased from 13,266,335 acres in 1901 to 13,460,353 acres in 1911, being an increase of less than 1½ per cent. in the decade. This small showing is no doubt more apparent than real, owing to the stricter interpretation of the term "improved land" in the last census.—"Improved land" for the census of 1911, according to the manual of instruction to enumerators, was defined as "land which has been brought under cultivation, and has been cropped and is fitted for producing crops."

Increases in Land in Field Crops.

In previous censuses no clear definition was given of the term "improved land." The result was that under this heading was included non-tillable areas used as pasture. In this census the areas of arable lands only were enumerated under this heading. Therefore the areas of improved land in this census are not strictly comparable with those of the previous ones.

Land in field crops increased from 9,212,478 acres in 1901 to 9,691,116 acres in 1911, being an increase of 478,638 acres or 5.19 per cent. in the ten years; the land in orchard and nursery increased from 267,478 acres in 1901 to 268,000 in 1911; the land in vegetables and small fruits was 70,4[illegible] acres in 1911 as against 65,303 acres in 1901. Land in vineyards increased by 1,081 acres in the decade. The acreage under small fruits is placed in this census at 10,883 acres, in 1901 the area was included with vegetables.

MONARCH LIFE'S PROGRESS

The Monarch Life Assurance Company, whose head office is at Winnipeg, reports new business and cash collections this year over 40 per cent. in excess of the same period last year, with only one death loss of three thousand dollars. The company's total business exceeds seven million dollars.

WHAT WAR COSTS.

The losses in the Balkan war have been estimated at 348,000 killed and wounded and $1,230,000,000 in property.

CANADA OBTAINS CAPITAL

Canadian interests in London have secured over seventeen million dollars in two weeks, as will be seen by these five issues:—

(1) Grand Trunk Railway £1,500,000 five-year notes.

(2) Canadian Northern Pacific £800,000 4½ per cent. debenture stock.

(3) Winnipeg £690,000 4½ per cent. consolidated stock at 97.

(4) Vancouver £510,000 4½ per cent, consolidated stock.

(5) Sherrard Manufacturing Company £150,000 7 per cent. preferred shares.

WORLD'S TEA SUPPLY

Great Britain Imported Over Forty-seven per cent. of Total—Transhipments and Re-exports

A summary of Great Britain's tea trade gives a total export from all countries of 749,250,000 lbs., compared with 737,000,000 lbs. for the previous year. Of this quantity, the United Kingdom received 357,000,000 lbs., against 347,250,000 lbs., while 392,250,000 lbs., against 389,250,000 lbs. were distributed amongst other markets of the world, states the annual review of Messrs. William James and Henry Thompson, of Mincing Lane, London, which presents a complete survey of this important business during the period, June 1, 1912, to May 31, 1913, and while mainly dealing with the trade of the United Kingdom, includes several matters of interest to Canada.

Omitting China tea, the London market has dealt with 3,251,000 packages at public auction, and the average price realized was 8.81d. per lb. Compared with last year, the figures were 2,950,000 packages, averaging 9.03d. per lb. About 50,000 packages of China black tea have been offered at public sale.

Deliveries to meet home consumption and for re-export have totalled 356,250,000 lbs. against 346,000,000 lbs., and transhipments have accounted for 19,000,000 lbs., against 22,000,000 lbs. a year ago. The total stock in bond on May 31 was 87,750,000 lbs., against 82,500,000 lbs., the excess being confined almost entirely to Java tea.

Re-exports for Two Seasons.

The report, which is accompanied by a variety of statistics, shows that the total re-exports for the past two seasons from the United Kingdom amounted to 55,777,800 lbs. in 1912-13 against 47,920,000 lbs. in 1911-12; whilst the re-export and transhipment figures, June 1st to May 31st, specially relating to Canada were as follows:—

	Re-exports.		Transhipments.	
	1912-13. Lbs.	1911-12. Lbs.	1912-13. Lbs.	1911-12. Lbs.
Indian	2,228,600	2,259,400	7,461,400	7,397,900
Ceylon	4,194,700	3,404,300	1,203,200	1,513,000
China	221,200	512,700	200	15,700
Java	402,500	355,000	50,800	129,900
	7,047,000	6,531,400	8,715,600	9,056,500

It is stated that although the past season has not been so remunerative to producers as its immediate predecessors, it has nevertheless been good, and with few exceptions returns have recorded another year of prosperity. Broadly speaking, the high prices of 1911-12 attracted increased crops, which, synchronizing with a somewhat inferior standard of quality, influenced a lower level of value. In the case of growers producing medium qualities, compensation for reduced prices has been found in larger yields, and this is more particularly applicable to Assam. On the other hand, those interested in the production of common tea have not been so fortunate; an appreciably lower market has existed for that variety, and taken as a whole, it has not been covered by heavier crops. Conditions, however, were abnormal during the previous year, bountiful crops and a high market for low grades giving exceptional results. Good to fine qualities have always brought full rates.

No Material Fluctuation in Values.

In comparison with 1911-12, when sellers enjoyed a consistently ready market with no material fluctuations in values, the reverse has been experienced, varying conditions having occasioned much irregularity, rendering the position frequently unsettled and difficult for all sections of the trade. The course of the market has, however, been influenced more by actual visible supplies than by anticipations, while the tone has been sensitive to the extent that only slight variations in shipments have on occasion been sufficient to cause a very pronounced change.

Among outstanding features have been that a much heavier proportion than usual of the total supply was shipped to the United Kingdom during the first half of the season, and that there has been a notable increase in the crop received from northern India. Other noteworthy features are the recent indications of curtailed outputs from many estates in Ceylon owing to rubber encroachments, the decrease in the use of China tea, the exceptional increase in that of Java tea in the United Kingdom, and whereas there has been steady progress in the consumption of tea outside of the United Kingdom, the increase in the home consumption has been insignificant, amounting to only three-quarters of one per cent.

As regards the future, it is thought that the question of prospective supply is the all-important factor. Results of the past year have been generally satisfactory to producers, and the crops have not in the aggregate proved to be over-abundant, so there is no inducement to growers to depart in any decided way from the present conduct of affairs except perhaps in the direction of avoiding the production of exceptionally low grade and unsightly tea, which would be a very desirable policy. Climatic conditions and the preponderance of additional mature areas over abandonments are the controlling influences.

Canada is a Potential Market.

As to the consumption of tea in markets outside of Great Britain, it is thought that the outlook is promising, and whereas, more particularly as regards Indian tea, the controlling influence lies with Russia—because during the last twenty years the import of China tea into Russia is officially stated to have declined about 33 per cent.—the tendency is for Java to benefit in the colonial markets by her favorable geographical position contrasted with India and Ceylon. The United States and Canada are potential markets, says Mr. Harrison Watson, Canadian trade commissioner at London, capable of useful expansion by reason of the continued addition to the population of habitual tea drinkers, and in this connection it is stated that Canada took about a million pounds more from the local market in Calcutta during the period under consideration, but consumption on the continent of Europe can only be regarded as more or less stationary.

The report concludes that, broadly speaking, the indications are similar to those of last year; that a fair increase can be absorbed at a remunerative level of price without inconvenience, but it is generally admitted that crops of somewhat better quality from India, Ceylon and also from Java, would be a welcome feature.

◆

USES FOR SAWDUST

Not so very long ago about the only real use anyone had for sawdust was for packing ice. That was when small local saw-mills were more common, and the amount of this form of waste wood was, or at any rate appeared, comparatively small. Now, when the tendency is to consolidate these into large mills with a capacity of several hundred thousand feet of lumber per day, the daily waste in sawdust is seen to be enormous and much experimenting is being done to discover new methods of utilizing it.

Perhaps the most promising venture in sawdust utilizaiton in this country is the manufacture of ethyl (or grain) alcohol. The sawdust is treated with sulphuric acid under suitable conditions, resulting in the formation of sugar, which is then fermented to produce alcohol. Several plants have been erected to produce alcohol from wood in this manner, and, though there are some difficulties still to be overcome, the ultimate success of the process on a commercial scale is assured.

Sawdust has been successfully manufactured into briquets for fuel for a considerable time in Europe by a very simple process. The shavings and sawdust are first steam-dried, the water contained in the wood being thus evaporated and the resin almost liquified. The sawdust is then compressed under heat into briquets of the desired size, the contained resin as a binder. A firm in Vancouver is engaged in a similar line of manufacture, the sawdust being compressed into a cylindrical tube where it is cut into short lengths by a revolving knife, emerging in the form of small round briquets. These briquets are clean to handle, easy to kindle, and leave very little ash.

In England sugar is manufactured on a commercial scale by treating sawdust in closed retorts with weak sulphurous acid under high pressure. In Austin, Texas, also a plant is being built to manufacture stock food from sawdust, by a somewhat similar process. The tar, pitch and turpentine are removed from the sawdust leaving only sugar and fibre to which is added forty per cent. of cottonseed meal. The mixture is sold for fattening cattle.

Two and one-half parts of clean sawdust mixed with two parts sand and one part cement make a warm long-wearing and sound-proof floor, to which carpets can be tacked with less injury than to a board floor, and which has the advantage over a cement floor in being more elastic. These qualities should win an extensive use for this form of flooring, which has the additional advantage that it can be stained to harmonize with interior finishings by the addition of color to the mixture while in a semi-liquid state.

The sawdust of certain kinds of wood is used in considerable quantities by manufacturers for metal polish, for packing, for meat curing, for making safety explosives and composition novelties, and for fibre and pulp manufacture. Patent cleaning powders for use on carpets and rugs consist principally of sawdust, lightly moistened by some cheap mineral oil.

RAILWAY CONSTRUCTION ON PACIFIC COAST

Pacific Great Eastern Plans—Cement and Coal Production

(Staff correspondence.)

Vancouver, July 20th.

Sixty-five acres of the Lonsdale estate, west of North Vancouver, near the mouth of the Capilano River, has been purchased by the Pacific Great Eastern as a site for its terminals. According to the agreement made, the railway company must expend $100,000 before the end of 1915 and $400,000 before the end of 1918 in terminal and other improvements. Not only that, but it is understood that a substantial cash offer has been made by the same railway company for the Squamish reserve, held by the Indians at the head of Howe Sound. According to the agreement under which the portion of the Lonsdale estate is reported to have been purchased, the stipulated expenditure of half a million dollars in five years does not foreshadow a very large amount of activity, but this figure is placed as a minimum and the railway may intend to do a great deal better.

Now that the United States Government plans lines in Alaska, Premier McBride has hopes that he may be able to accomplish something for this province. With the end in view of having a line straight through to connect with any that may be built in Alaska, the Pacific Great Eastern is being assisted by the provincial government. When it is constructed it will give access to the great hinterland of the north, the Peace River country and beyond.

Trade With Australia.

Hon. George E. Foster may not have been as successful as he might have wished regarding arranging better trade relations between Canada and Australia, but his overtures will very probably result in good in the end. Australia has had its own way in a measure. That is, with the steamers coming direct from Sydney to Vancouver, New Zealand had little chance of competing in a market which was quite open to it, and for which it had made a bid by granting a preference. With conditions such as those, Australian shippers were naturally somewhat independent, but of late a change has taken place. The Australian Government would not enter into an arrangement for subsidizing the steamers, but New Zealand did, with the result that New Zealand has first call on the cold storage capacity of the boats. Previously New Zealand could not get any accommodation in this respect, and to try and get into this market, a trial shipment was made some years ago to Vancouver via the Suez. This was not successful. Now, however, Australian shippers are losing the Canadian trade, which has been growing of late, and it is taken as correct that the federal government of Australia will be asked to do something without delay.

Cement and Coal.

British Columbia's cement manufacturing plants are gradually increasing in number. For some years a big plant has been in operation at Tod Inlet, not many miles from Victoria, and this summer another large plant has started at Bammerton, also in the same locality, but on the opposite side of Saanich Inlet. These two are on the coast, but the interior also boasts of a plant. This is located at Princetown, in the Similkameen, and it is calculated that cement can be made more cheaply there than at any place on the continent. With the completion of the railway line to the coast from the southern interior, an enterprise such as this will have the opportunity of getting into the market here. In Vancouver, New Westminster and Victoria the day of large buildings has arrived, and construction now is nearly altogether of reinforced concrete. Consequently, makers of cement see opportunities in the future.

Hon. Mr. Crothers, while on the coast, made an attempt to get the owners of the coal mines on Vancouver Island and the miners together in the hope of adjusting the labor dispute, but his efforts were of no avail. The mine operators will not have anything to do with a foreign organization, who call a strike against the wishes of nine-tenths of the miners, and on the other hand the foreign principals will not consider any proposition if the organization is not recognized. With such a deadlock, there is little prospect of a satisfactory settlement being affected. The Canadian Collieries (Dunsmuir) are getting back to their normal output, but even so the supply of coal will be short next winter. With a pronounced shortage, the public will certainly suffer, and both parties to the dispute are relying to some extent on the sequel resulting in their favor. The Western Fuel Company is bringing coal from Australia, and if the Panama Canal were open for traffic it would not be a bad venture to bring fuel from Nova Scotia to this coast.

CANADIAN IRON AND STEEL COMPANIES

Satisfactory Results Being Achieved by Various Corporations—Increased Output and Facilities

Monetary Times Office,
Montreal, July 30th.

The business of the various Canadian iron and steel concerns, to date, this year is proving satisfactory according to available information. The Dominion Steel Corporation has announced its intention to make quarterly reports of its output and the meeting was held the other day at which the results should have been announced. However, up to the moment, the figures have not appeared.

The Nova Scotia Steel and Coal Company has announced its output for the first half of its present year and this shows an increase in practically all products as follows:—

	First half 1912.		First half 1913.	
Coal shipped	322,716	tons	327,221	tons
Coke made	39,630	"	53,253	"
Pig-iron	24,930	"	40,043	"
Ingots	33,598	"	38,355	"
Finished material	31,899	"	33,625	"
Axles made	22,783	"	27,530	"
Total ore mined	248,540	"	271,911	"
Submarine ore mined ...	17,327	"	127,211	"
Ore shipped	94,620	"	151,033	"
Limestone	26,792	"	34,579	"

These figures are the largest for any first half year in the history of the company. It is expected that the shipments of coal will be larger in the second half year.

Increases in Production.

While the increase in the ore mined at Wabana in the first half year increased 23,500 tons, the ore won from the submarine portion of the mines has increased about 100,000 tons over the same period of 1912. July will probably establish a new high record in ore shipped, the total probably being not less than 114,000 tons. Output of ore at Wabana now exceeds the corresponding period of last year by about 2,000 tons per week, while the amount passing to the pockets of the loading pier exceeds 4,000 tons per day, an increase of about 10 per cent. over the best previous record.

At Sydney Mines a new 50-ton open-hearth furnace is approaching completion. Mechanical gas producers will be employed and steel will be produced early in August.

At New Glasgow, a new bolt and rivet plant is now in full working order and turning out a large quantity of material. The company is now in a position to take care of the entire requirement of the Eastern Car Company, which will be a very large user of these products.

Delivering Four Thousand Tons per Day.

At the middle of July, the company had orders already on its books sufficient to keep it operating on finished steel for four months, ensuring full employment to the middle of November. As for coal and ore, the full tonnage is already disposed of and deliveries are being made at about the rate of 4,000 tons of each per day and the company's entire fleet is employed.

Barring accident, the company will at the end of the present year, show the biggest output in its history and the profits, also, it is stated on good authority, will be greater.

Excellent reports are also received of the Lake Superior Corporation and its subsidiaries and progress is being made all along the line. Earnings for May amounted to $270,339, being an increase of $104,368 as compared with May, 1912. This is a gain of 63.2 per cent. For the eleven months to the end of May the net earnings amounted to $2,108,945 against $1,194,558, a gain of $914,385, or 76.5 per cent.

◆

SPANISH RIVER AMALGAMATION CARRIED

The proposed amalgamation of the Lake Superior Paper Company, Limited, with the Spanish River Pulp Company, was carried through at a meeting of the shareholders of the latter concern.

The Lake Superior shareholders had previously given their consent, so that no formalities now remain to be concluded. Considerably over the requisite three-quarters of the capitalization of the Spanish River Company was represented, either in person or by proxy, and the plan suggested by the directors was unanimously approved.

The Spanish River shareholders of record July 28 will receive a common stock bonus approximately equal to 10 per cent. on the holding of preferred and 20 per cent. on the holdings of common.

CANADIAN BANKING STATISTICS ANALYZED

Present Position Better Than That of Six Years Ago—Cash Resources Nearly Doubled—Ratio of Reserves is Higher

On June 30, 1907, current loans in Canada of the chartered banks of the Dominion amounted to $586,900,000 while public deposits in Canada were $589,500,000. It is necessary here to specify "in Canada" because several Canadian banks have branches outside the Dominion where deposits are received and money loaned. Under the heading in the bank statement of current loans is carried the amount of money loaned for commercial purposes as against that on call on loans on stocks and bonds.

The Canadian banks report their condition monthly. On May 31st the rates of current loans to deposits in Canada was something over 90 per cent., showing that the banks were in a relatively stronger position than in the chaotic period of six years ago, opines the Wall Street Journal.

Current loans and deposits in Canada compare as follows over recent dates:—

	Current Loans.	Deposits.	Ratio.
May 31, 1913	$898,958,000	$ 994,915,000	90%
January 31, 1913	874,705,000	989,519,000	88%
December 31, 1912	881,331,000	1,012,418,000	87%
June 30, 1912	848,940,000	1,004,817,000	84%
June 30, 1907	586,930,000	589,459,000	99%

While such a comparison is not a complete assurance of the strength of the banking situation—because in the making of loans there is almost invariably a transfer of credit to the deposits account thus swelling deposits correspondingly—yet it shows that at the present time the banks are not so heavily committed in the way of loans as they were in the crisis of 1907.

Cash Resources Nearly Doubled.

A better survey, however, of the banking position may be obtained by calculating the ratio which the assets that may be quickly realized upon bear to current liabilities.

Cash resources consist of specie and Dominion notes. Taking as of interest the statements for May 31, 1913; December 31, 1912; June 30, 1912, and June 30, 1907, cash resources appear as follows:—

	May, 1913.	Dec., 1912.	June, 1912.	June, 1907.
	$	$	$	$
Specie	40,325,676	33,780,333	37,122,765	24,101,603
Dom. notes .	93,109,636	94,584,484	93,048,039	45,554,182
Total cash resources .	133,435,312	128,364,817	130,170,804	69,655,785

In the six years since June 30, 1907, cash resources, it may be noted, have almost doubled.

Another important item in the bank's quick assets is the excess of balances due to banks from agencies or other banks outside of Canada above the amounts due to outside agencies or other banks. These figures compare thus:—(000 omitted):

Balances due from	May 1913.	Dec. 1912.	June 1912.	June 1907.
United Kingdom	$21,835	$10,119	$28,904	$10,300
Other countries	27,826	23,435	34,887	14,771
Total	49,662	33,555	63,791	25,071
Balances due to:				
United Kingdom	9,205	8,312	6,429	12,210
Other countries	9,675	7,982	7,567	5,891
Total	18,881	16,294	13,997	18,101
Excess Balance	30,780	17,261	49,793	6,970

Large Supply on Call.

Canadian banks maintain at all times large amounts abroad on call, largely in New York. On May 31, the figures exceeded $96,000,000 but even at that high level were considerably below the $120,500,000 of June 30, 1912, and $138,500,000 of December, 1909. These loans are quick assets of the first water being available for withdrawal when needed. Call loans on Canadian stocks and bonds can hardly be included in the category of assets which may be quickly realized upon except in normal times when they are really considered as call loans. But in periods of stress, call loans on Canadian securities are regarded rather by the banks as fixed loans. The Bank of Montreal has no call loans in Canada whatever.

So-called call loans in Canada are fairly steady now around $70,000,000. To call these loans as they are called in the New York market would be disastrous to Canadian stock exchanges, which volume of business at best is not large enough to sustain the liquidation which would ensue. While it is essential that banks have a large supply of cash on hand at all times it is not to the advantage of a country's business that an excessive amount be in the banks' vaults. But the banks' supplementary supplies must be quickly convertible into cash when needed and for this reason they maintain a large supply on call in New York. For an emergency no better market to liquidate in could be provided, as was amply demonstrated for Canadian bankers in 1907.

Current Loans Abroad.

Along with these foreign call loans must be set up the record of current loans abroad. These latter are distributed through the United States, Mexico, Cuba, the West Indies and elsewhere.

On the liabilities side of the account against these items must be set the figures of deposits received by Canadian banks abroad. These three items for the periods given in the above tables compare as follows:—

	Call Loans Abroad.	Current Loans Abroad.	Deposits Abroad.
May, 1913	$ 96,151,209	$37,691,786	$97,935,216
Dec. 1912	105,952,101	40,990,126	87,050,132
June, 1912	120,569,812	34,254,658	82,067,093
June, 1907	55,298,873	23,388,259	59,176,306

The funds for current loans abroad are provided out of deposits received abroad. On May 31 of this year, deposits received by Canadian Banks abroad exceeded by $60,000,000 the current loans abroad. As the foreign call loans aggregated over $96,000,000, it is manifest that some $36,000,000 of the amount loaned abroad on call is Canadian funds. But this does not imply any starving of Canadian business, as these foreign call loans are a secondary line of reserves for Canadian banks.

Circulation, Deposits, &c.

A fourth item in the list of assets, which may be quickly realized upon, is the holdings of railway and other bonds and stocks. In so far as these are held abroad, they may be rightly considered a quick asset, although where held in Canada their right to be considered as such may be somewhat open to question. The holdings of municipal bonds have been omitted as a quick asset, as under the present circumstances, at least, they hardly seem of that calibre.

Coming to current liabilities of the banks we find they consists of three items, namely circulation, deposits and balances due governments. The latter are divided into amounts due the Dominion Government and amounts due provincial governments.

Deposits consist of deposit payable on demand, deposits payable after notice or on a fixed day, both being "in Canada" items, and deposits received elsewhere than in Canada. These various items of deposits for the dates under consideration compare thus, (000 omitted):

Deposits payable:	May 1913.	Dec. 1912.	June 1912.	June 1907.
On demand .	$ 364,159	$ 379,777	$ 373,500	$170,042
On notice .	630,755	632,641	631,317	419,417
Abroad	97,935	87,050	82,067	59,176
Total ..	1,092,850	1,099,468	1,086,884	648,656

Among the assets of the Canadian banks is carried an item made up of "notes of and checks on other banks," which is strictly an inter-bank item. On this account in the table below this item is deducted from the liabilities.

Relation of Assets and Liabilities.

The relation of current assets to liabilities may then be compared as follows (000 omitted):—

Quick assets:	May 1913	Dec. 1912	June 1912	June 1907
Cash resources	$133,435	$128,364	$130,170	$ 69,655
Excess foreign balance	30,780	17,261	49,793	6,970
Call loans abroad	96,151	105,952	120,569	55,298
Ry. bonds and stocks ..	67,021	68,840	62,292	41,381
Total	327,388	320,418	362,826	173,306
Current liabilities:				
Circulation ...	$ 102,997	$ 110,048	$ 102,011	$ 75,510
Deposits	1,092,850	1,099,468	1,086,884	648,636
Bal. due govts. .	39,759	39,612	37,288	15,641
Total	1,235,608	1,249,129	1,226,185	739,788
*Deduct ...	61,386	81,684	57,753	29,516
Total	1,174,221	1,167,445	1,168,432	710,271
Ratio (per cent.)	27.8	27.4	31.0	24.3

*Notes of checks and on other banks.

These tabulations do not indicate that the Canadian banks are as heavily extended as in 1907. The ratio of reserve to liabilities due to the public, as shown in the comparison of quick assets and current liabilities, is much higher at the present time than it was six years ago. As regards current loans in relations to deposits, although the banks are heavily loaned up, the ratio is some 9 per cent. better than in June, 1907.

CANADA'S GRAIN CROP

One Estimate Gives One Hundred and Seventy Million Bushels of Wheat as Total—Returns from Provincial Departments

The Canadian wheat crop will, it is estimated, be 170,000,000 bushels, against 205,000,000 last year, and American spring wheat 225,000,000 bushels, versus 330,000,000 last year, by Mr. John Ingles, according to a Chicago despatch

The Manitoba provincial department of agriculture and immigration estimate the province's wheat crop for this year at 65,003,212 bushels. The acreage last year under wheat was 2,823,362, and the yield 58,433,579 bushels. The acreage this year is 3,141,218, the increase from last year being 317,856 acres. If the yield per acre this year is 4.07 bushels per acre less than last year the wheat crop of the province this year will be 50,258,488 bushels. If the yield per acre this year approximates that of last year, and this is the present indication then the wheat crop will be 65,003,212 bushels for the province.

Many Men Required.

To harvest this crop the province requires 25,000 men, and practically an equal number is claimed by each of the other western provinces.

A conference has been held between representatives of the three prairie provinces and the different railways for the purpose of making definite arrangements with regard to harvesters' excursions from Eastern Canada and elsewhere.

Saskatchewan Expects Large Total.

Should the present favorable conditions continue in Saskatchewan until a fair proportion of the grain harvest is gathered in, a total yield of 270,670,000 bushels of wheat, oats, barley and flax will be realized from the season's farming in Saskatchewan, according to an estimate based on the statistics of the department of agriculture. In 1902 the average was 22.57 bushels; in 1905 it was 23.09; in 1901, 21.41, and in 1909, 22.10 bushels.

The total wheat yield for the present season will be 125,557,000 bushels, according to the estimate, an increase of 17 per cent. compared with 1912.

Reports as to crop conditions in northern Alberta continue to be satisfactory. The grain crops have entirely recovered from their somewhat late start, and are now, under ideal weather conditions, making rapid progress. There is now reasonable assurance that the grain crops will be well up to the average of the excellent crops of the past three years. Timothy, which is a very important crop in this part of the country, and exceedingly profitable, is yielding better than was anticipated, and a considerable portion of the crop has already been saved in perfect condition. Cattlemen, both dairymen and beef-raisers, report that pasture and general conditions could not be improved upon.

◆

ONTARIO HIGHWAY COMMISSION

Messrs. Charles A. McGrath, C.E., William A. Maclean, C.E., and A. M. Rankin, M.P.P., have been appointed by the Ontario government as a commission to investigate and study all matters relating to the construction and maintenance of public roads and highways.

◆

ONTARIO POWER COMPANY

The Ontario Power Company, of Niagara Falls, and the Ontario Transmission Company, Limited, report income and expenses, with inter-company payments eliminated, as follows for the six months ended June 30th, 1913:—

	1913.	1912.	1911.
Sales of power	$724,040	$570,607	$437,051
Government rentals	37,107	31.835	28,077
Total gross	686,933	538,771	408,973
Net after taxes	597,215	451,104	336,310
Other income	11,903	11,204	8,060
Net income	609,118	462,309	344.370
Interest charges	339,083	323.793	292,638
Surplus	270,034	138,516	51,732

Earnings of the Ontario Transmission Company, Limited, for the six months ended June 30th, 1913, as reported separately from combined statement were:—

	1913.	1912.	1911.
Transmission line rental	$115,213	$ 95,233	$ 80,442
Bond interest	48,375	45,693	44,188
Surplus	66,838	49,540	36,253

VALUE OF LIFE INSURANCE

XXIII.

Pensions

BY C. A. HASTINGS.

The pension scheme I propose to illustrate in this article has only one weakness which can be raised, and that is the event of premature decease, but by payment of a small annual sum, all premiums would be returned in full to the assured's estate in the event of this happening, so this excuse is easily overcome.

After struggling in our separate walks of life, we also look forward to the same end—that we shall have some years of peace to make this struggle worth while.

In previous articles, there has been pointed out how responsibilities of all kinds can be borne by a reputable institution in return for deposits wisely banked.

A Young Man As Example.

I am now going to deal with the case of a man who wants to be sure of an income at a given age, when he proposes to retire from business—in other words a pension. Moreover, he wants a pension that cannot depreciate and which relieves him of all worry and expense. This is an old idea, but few men know how cheap it is. The figures given previously are merely examples and are not applicable to every man: no doubt my readers will have noticed I have taken round figures and have never gone into minute mathematical calculations.

This time I am going to take age twenty-five, as my example for a pension of $500 per annum, commencing—say—at age fifty. This will cost roughly $160 per annum, or $4,000 in twenty-five years. Now then, he has only to live eight years—or to age fifty-eight—to draw his $4,000, in annual instalments of $500 per annum, and at age twenty-five his average expectation of life is 39½ years: therefore, it will be seen on this basis that he draws his $4,000 six-and-a-half years below his average expectation of life.

At Fifty Years of Age.

Yet again, take the man who lives to age fifty, his average expectation of life is then 20½ years, and on this basis he draws his $4,000 12½ years below his average expectation of life. So that, my readers will doubtless observe, the cost of a pension commencing at age fifty is extraordinarily cheap.

Age fifty is rather a young age for a pension to commence, and if age sixty is taken the idea is still more attractive. The annuitant has his income guaranteed (if proper choice is made), he has not got to worry about his capital, and many men can easily afford to save $13 to $14 a month.

The following articles in this series have already appeared:—

UNITED STATES COMPANY MAY RE-INSURE NOVA SCOTIA FIRE

A special meeting of the shareholders of the Nova Scotia Fire Insurance Company, is to be held at Halifax on August 5, to obtain their consent to a contract with the Home Insurance Company of New York, for the re-insurance of the entire business of the Nova Scotia company, and for the sale to Home Insurance Company of the good-will and business of the company.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Harley, Ont.—Tenders are invited for $1,200 15-year school debentures. E. Cragg, clerk.

Carleton County, Ont.—Up to August 6th, for $20,000 5 per cent. debentures. C. McNab, county clerk.

North Bay, Ont.—Up to August 4th, 1913, for $321,500 debentures. M. W. Flannery, treasurer, North Bay.

Marcelin Village, Sask.—The council has been authorized to borrow $1,350. A. Lacetre, secretary-treasurer, Marcelin.

Pelly Village, Sask.—The council has been authorized to borrow $1,000. E. Challen Clark, secretary-treasurer, Pelly.

Avonlea Village, Sask.—The council has been authorized to borrow $1,500. T. H. Clay, secretary-treasurer, Avonlea.

Viceroy Village, Sask.—The council has been authorized to borrow $1,000. W. L. Gray, secretary-treasurer, Viceroy.

North Battleford, S.D.—Up to August 5th for $60,000 6 per cent. 30-year debentures. H. Basil Thomas, secretary treasurer.

Balcarres Village, Sask.—The council has been authorized to borrow $3,000. P. M. Rickard, secretary-treasurer, Balcarres.

Radisson Village, Sask.—The council has been authorized to borrow $2,500. A. H. Clark, secretary-treasurer, Radisson.

Esterhazy Village, Sask.—The council has been authorized to borrow $2,000. V. Flook, secretary-treasurer, Esterhazy.

Livingstone R.M., No. 331, Sask.—The council has been authorized to borrow $8,000. H. P. Archer, secretary-treasurer, Benito.

Eldersley R.M., No. 427, Sask.—The council has been authorized to borrow $3,000. W. L. Robertson, secretary-treasurer, Tisdale.

St. Agnes R.C., S.D., No. 22.—Up to September 1st, for $15,000 6 per cent. 40 instalment debentures. E. J. Baker, secretary-treasurer.

Connaught R.M., No. 457, Sask.—The council has been authorized to borrow $4,000. Hugh E. Jones, secretary-treasurer, Tisdale.

Foam Lake R.M., No. 306, Sask.—The council has been authorized to borrow $8,000. J. Janusson, secretary-treasurer, Foam Lake.

Arborfield R.M., No. 456, Sask.—The council has been authorized to borrow $1,500. F. V. Campbell, secretary-treasurer, Arborfield.

Beaver R.M., No. 276, Sask.—The municipality has been authorized to borrow $10,000. A. H. Parrott, secretary-treasurer, Foam Lake.

Rosetown, Sask.—Until Aug. 20th, for $13,500 7 per cent. 20-year debentures. A. Wilson Clark. (Official advertisement appears on another page.)

Sudbury, Ont.—Until August 9th, for $35,000 5 per cent. 30 instalment school debentures. G. Elliott, clerk. (Official advertisement appears on another page.)

St. Boniface, Man.—Tenders will be received up to August 1st for $345,890 debentures. J. B. Cote, city clerk. (Official advertisement appears on another page.)

Ottawa, Ont.—Up to August 28th for $1,164,706 debentures. Tenders to be addressed Chairman, Board of Control. (Official advertisement appears on another page.)

Wetaskiwin, Alta.—Up to August 20th, for $81,000 5¼ per cent. debentures. E. Roberts, secretary-treasurer, Wetaskiwin. (Official advertisement appears on another page.)

Winslow R.M., No. 319, Sask.—Tenders are invited for $5,000 7 per cent. 10 instalment debentures. R. H. Percival, secretary Druid. (Official advertisement appears on another page.)

Mantario R.M., No. 262, Sask.—Up to August 12th, for $6,000 6 per cent. 20 instalment debentures. Isaac Walker, secretary-treasurer, Alsask. (Official advertisement appears on another page.)

◆

Plans in connection with False Creek, Vancouver, are slowly developing, and it begins to look as if the reserve at the mouth of the creek will be the site of railway activity. The latest suggestion is union terminals, to be used jointly by the Great Northern, the Canadian Northern and the Chicago, Milwaukee and Puget Sound lines.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows:—

	Between Banks.		
	Buyers.	Sellers.	Counter.
N.Y. funds	1-16 pm.	5-64 pm.	⅛ to ¼
Montreal funds	Par	Par	⅛ to ¼
Sterling—60 days' si't	8 11-16	8¾	9 to 9⅛
do. demand	9 17-32	9 9-16	9 13-16 to 9 15-16
Cable transfers	9 21-32	9 11-16	9 15-16 to 10 1-16

Rates in New York:	Actual.	Posted.
Sterling, 60 days' sight	4.82-90	4.84
do. demand	4.86-55	4.87½

Call money in Toronto, 6½ to 7 per cent.

Bank of England rate, 4½ per cent.

Open market discount rate in London for short bills, 4 per cent.

◆

BANK CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Bank Clearing Houses for the weeks of August 1st, 1912; July 24th, 1913; July 31st, 1913, with percentage change:—

	August 1st, 1912.	July 24th, 1913.	July 31st 1913.	Chg. %
Montreal	$55,570,606	$54,889,578	$50,197,842	—10.7
Toronto	38,003,460	37,241,854	38,731,816	+ 1.8

ADVICE TO CANADIAN MUNICIPALITIES

Municipal and provincial authorities, it was said, should not run away with the idea that because Winnipeg and Vancouver achieved success that the situation of the London market towards Canada had undergone a sudden change and returned to the same position as two years ago, states a cable message from the Metropolis. There is in the first place shrewd suspicion that the issues in question were nominal and not actual, successes. While this common knowledge was evident, flotations were made in spite of adverse conditions and in the face of serious difficulties. The onerous terms on which the Winnipeg, Vancouver, Grand Trunk and Canadian Northern issues have been floated and the exceedingly high rates of discount on all Canadian treasury bills, is proof, if any were needed, that Canada has suffered serious diminution of popularity in this market. The universally stringent money conditions do not fully explain the low prices which Canadian funds are at now.

◆

Speaking to the shareholders of the Canadian and Empire Investment Trust in London, Mr. Wm. MacLeod assured them that the present period of stringency was largely a blessing in disguise. Canada was intrinsically sound and would continue to offer lucrative fields for investment. One result of the present situation would be that land speculation would be vigorously discouraged and greater care would be exercised by those who lend money to the Dominion to ensure that it was properly and efficiently spent.

EQUIPMENT ORDERS ISSUED BY THE CANADIAN NORTHERN RAILWAY

The Canadian Northern Railway has awarded the following contracts in connection with the additions to the rolling stock:—The contract for 7 consolidation locomotives to the Canadian Locomotive Company; 15 heavy ten-wheel locomotives to the Montreal Locomotive Works; 6 first-class cars, 5 baggage cars and 50 box cars to the Canadian Car and Foundry Company; 2 combination cars to the Preston Car and Coach Company; 5 second-class cars and 100 flat cars, 60,000 pounds' capacity, to the Crossen car Company, and the contract for 170 Hart cars to the Hart-Otis Car Company.

◆

YANKEES MAY TRY FOX FARMING, TOO

A number of Canadians have written to the Department of Commerce at Washington seeking to buy some of the blue and silver foxes from the Government's preserves in Alaska, but no citizen of the United States has made similar request, although the Department is anxious to get citizens of the United States to go in for fox breeding.

Assistant Secretary Sweet says, that good profits await those who take up the industry. The United States Government, he said, has a number of small islands off the Alaskan coast, which it will lease to anyone who desires them for fo farming, and at the same time the government will furnish breeding animals at low prices.

There are several fox raising establishments in Canada which are reported to be making big profits, and as the skins bring fancy prices in London, centre of the fur selling trade, Mr. Sweet thinks that his compatriots should be reaping part of the returns.

◆

TRADE WITH GERMANY

It has been frequently held and openly expressed by prominent Canadians, that Germany has always had the best of the trading with Canada, the balance being in her favor at the ratio of about three to one. The conclusion drawn was, that Germany could do more for Canada and thus prove herself a valuable customer, to whom special consideration should be shown. Public men such as Mr. W. K. George, G. T. Somers and others, who visited Germany lately and met many prominent persons, readily affirm that the Germans are most willing to give evidence of their keen desire to bring about a better understanding with Canada and to open their markets to Canadian trade.

Since the removal of the surtax on German goods, the atmosphere in Germany has cleared considerably in favor of Canada.

According to official German statistics, German imports for home consumption from Canada, exclusive of gold and silver were for the fiscal years:—

Fiscal Year.	Mark.
1908	7,076,000
1909	8,389,000
1910	10,636,000
1911	23,956,000
1912	58,130,000

German exports to Canada were for the fiscal years:—

Fiscal Year.	Mark.
1908	20,302,000
1909	24,821,000
1910	36,587,000
1911	42,870,000
1912	54,254,000

For the first time, since the existence of German trade statistics, have Canadian exports to Germany shown an increase over German exports to Canada.

◆

CONDITIONS IN THE WEST

A well-informed Saskatchewan correspondent writes that business conditions in that province will probably be somewhat more stable by the end of the year. Business in the West, that is legitimate business, is generally good. The prospects are that we will have an average crop in the three prairie provinces. Little difficulty in getting payments this fall is anticipated.

The machinery manufacturers will have suffered a decided curtailment of their business, but that may not be an unmixed evil so far as the Western farmers are concerned. They are buying now only what they actually require for their operations and that is a good thing. A year or two of that sort of thing would put western Canada in comfortable circumstances again.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended July 25th:—La Rose, 105,700; Crown Reserve, 45,000; Dominion Reduction 89,200; Cobalt Townsite, 46,400; McKinley-Darragh, 64,717; Cobalt Comet, 78,500; Cobalt Lake, 126,500. Total 566,107. The total shipments since January 1st are now 22,279,086 pounds or 11,139 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

◆

CANADIAN FINANCIERS IN UNITED STATES POWER FIELD

Monetary Times Office,
Montreal, July 30th.

The Pennsylvania Water and Power Company has several Canadian financiers interested in its progress. The entry of these Canadians took place, in all probability, at the instance of Mr. J. E. Aldred, of the Shawinigan Water and Power Company. Mr. Aldred became president, and among the Canadians who became interested with him and took positions on the board of directors were Messrs. H. S. Holt, president of the Montreal Light, Heat and Power Company, and E. R. Wood, of Toronto, as well as Mr. R. M. Aitken, of London.

The company is a re-organization of the McCall Ferry Company combined with the Susquehanna Water and Power Company.

Earnings for the year ending December 31st last were $721,883 gross and $619,908 net, as compared with $516,285 gross and $447,325 net in 1911.

Recently the company listed $8,495,000 of its capital stock, together with $925,000 of its first mortgage bonds, out of the total authorized issue of $12,500,000, on the Baltimore stock exchange. It is stated that this listing is preliminary to the listing of the securities of the company on the London stock exchange.

◆

DOMINION TELEGRAPH COMPANY

The financial position of the Dominion Telegraph Company at the close of the year ended June 30th, 1913, is shown in the annual report as follows:—

Assets.	
Capital expenditure	$1,281,819 47
Toronto, Grey and Bruce Railway Company 1983 bonds and interest thereon	1,596 20
Canada Permanent Mortgage Corporation, accrued interest	234 38
Cash in bank and on hand	26,052 85
	$1,309,702 94
Liabilities.	
Capital stock paid up	$1,000,000 00
Dividends unclaimed	1,983 80
Dividend No. 148, payable July 15th, 1913	15,000 00
Suspense	197 13
	$1,017,180 93
Balance at credit of profit and loss account	292,522 01
	$1,309,702 94

The directors reported the payment, quarterly in advance, for the past thirty-four years, of the guaranteed interest of six per cent. per annum on the capital stock of the company, by their lessees, the Western Union Telegraph Company, which interest has been distributed to the shareholders of the Dominion Company.

Sir Henry Mill Pellatt presided at the annual meeting in the absence of Mr. T. Swenyard, president.

The following were elected directors for the ensuing year: Messrs. Belvidere Brooks, Thomas F. Clark, Colonel Robert C. Clowry, Æmilius Jarvis, Charles O'Reilly, M.D., A. G. Ramsay, Frederic Roper, Thomas Swinyard, and Colonel Sir Henry Mill Pellatt, C.V.O., and at a subsequent meeting Mr. Thomas Swinyard was reappointed president, Colonel Sir Henry Mill Pellatt, vice-president, and Mr. Frederic Roper, secretary and treasurer.

◆

The capital stock of the Suburban Securities Investment Company, Limited, has been increased from $5,000 to $60,000 by the issue of 550 new shares of $100 each.

The John McPherson Company, of Hamilton, Limited, have increased their capital stock from $500,000 to $1,000,000 by the creation of 20,000 shares of new stock of $25 each.

ONTARIO CHARTERED ACCOUNTANTS

Held Thirtieth Annual Meeting—Growth and Progress is Shown—New Bank Act

The 30th annual meeting of the Chartered Accountants of Ontario was held in Niagara Falls. The reports of the committees showed steady progress during the year.

The election of officers resulted as follows:—President, Mr. Osler Wade; first vice-president, Mr. Edmond Gunn; second vice-president, Mr. Bryan Pontifex; secretary-treasurer, Mr. Arnold Morphy; registrar, Mr. T. Watson Sime; council, Messrs. A. K. Bunnell, George Edwards, Edmond Gunn, W. T. Kernahan, Arnold Morphy, W. R. Morris, A. C. Neff, Bryan Pontifex, M. C. Robinson, C. S. Scott, G. W. Stiff, W. B. Tindall, Harry Vigeon, Osler Wade and Rutherford Williamson; representatives on the council of the Dominion Association: Messrs. A. K. Bunnell, George Edwards and John I. Sutcliff; auditors: Messrs. J. A. Howell and H. Percy Edwards.

Mr. G. W. Stiff was elected a life member.

Mr. A. K. Bunnell, the retiring president, in his address stated that the membership of the institute is now one hundred and eighty-five divided into one hundred and fifty-four associates and thirty-one fellows. Fourteen were admitted during the year: seven by examination, and seven without examination; and as the council has been advised of the death of Mr. H. C. Screaton, the net gain is thirteen.

The number of applications for admission to the institute from members of other societies, coming to practise in the province is gratifying evidence of the value of the institute, and of the goodwill towards its members.

The council have unanimously agreed to confer the honor of fellowship upon Mr. G. T. Clarkson, the well-known liquidator of Toronto and Mr. T. W. Watson Sime, the respected and valued registrar of the institute.

Students' Association is Part.

The Chartered Accountants Student's Association is an integral part of the institute, and its prosperity is an essential to our growth and development, fifty-five students were enrolled in the year ending May 1st, of whom 50 per cent. were not clerks in the offices of chartered accountants, but bookkeepers ambitious of increasing their knowledge.

During the winter season forty-eight lectures were given principally by members of the institute and were well attended. The action of the banking committee of the Dominion Parliament in inviting the president to appear as an expert witness was a compliment to the institute and the opinion expressed by Mr. Bunnell was:—

(a) That an external audit of banks was desirable.

(b) That two auditors should be appointed by each bank, one of whom should be a practising accountant.

(c) That the statement of profit and loss should be published in more detail.

(d) That certain charges in the way of more clear definitions should be made in the certificates to be given by the auditors.

New Bank Act.

The act as finally passed so far as an audit is concerned is in the nature of a compromise; what is enacted is that the Canadian Banker's Association shall draw up each year a list of not less than forty persons deemed by them to be competent, any one of whom will be eligible to be appointed an auditor under the act.

The Minister of Finance reviewing this list may in his discretion disapprove the eligibility of any one of the forty, either for apposition on the list of all, or as an auditor of a particular bank. From this list the shareholders of each bank at their annual meeting will appoint an auditor or auditors to hold office for one year.

Additionally the minister has the right to appoint an auditor to examine affairs of any particular bank at any time.

It will be noticed that the all important question of qualification is left with the Banker's Association subject to the review of the Minister of Finance.

◆

OUTLOOK FOR MONEY

Sir Felix Schuster says it is almost impossible accurately to forecast money to the end of the year because of the many obscure factors, but there is no reason whatever for an alarmist view. Nevertheless, a certain amount of self-restraint is necessary. "We must not lend too freely abroad," he adds. "General development may be somewhat retarded, but with a fair amount of caution we need not expect excessive money rates in the autumn. Rates, however, cannot be expected to move much lower than they are now."

BANKS AND UNDERWRITING

Some are Conservative and Will Not Undertake Operations—Successful Flotations and Failures

In the course of Sir Edmund Walker's evidence before the Banking and Commerce Committee at Ottawa, Hon. Mr. White, the Finance Minister, asked him if it was good banking to advance money on securities of new enterprises pending the sale of the bonds. Sir Edmund is quoted as replying, "It is quite proper; in fact, the industries could not be established unless this were done."

Sometimes complaints are made by parties in the smaller towns to the effect that the funds belonging to their communities are drained away to the monetary centres and there used as loans to underwriters, promoters, and others engaged in the practice of high finance. It would be well if the fact were remembered that many of the large factories or industrial units located in suburban districts and country towns could not have been built unless the facilities for financing the underwriting operations were available.

Mr. White's question indicates that there is some difference of opinion among bankers as to whether the chartered banks should engage extensively, in this way, in the promotion of new industrial companies. Some of the banks are admittedly old-fashioned in their views of the matter. They will not enter freely into the business of underwriting; and probably a few will not join underwriting syndicates at all.

Banks and Flotations.

It is quite clear that the notion that banks and other underwriters fat fees or commissions, without risk or trouble, through underwriting new issues of industrial securities, is erroneous. In numerous instances the fees are well earned.

When a bank participates in the flotation of a large issue of this kind, and the securities are all taken up at once by the public, it, in company with the other underwriters, receives the agreed upon commission, without being under obligation to take up any of the securities. But, even in that case the bank will likely be obliged to make loans to brokers on the security of the newly-issued bonds, writes Mr. H. M. P. Eckardt, in Industrial Canada. And if the bank has the account of the promoters of the enterprise, it will most likely be required to make extensive loans to them prior to the public flotation. Some portion or part of these loans would remain in the books after the flotation. This is what may be expected even when the flotation is entirely successful. Circumstances are not so comfortable for the bank when the issue is only a partial success; and they may be decidedly uncomfortable when the flotation proves to be a flat failure.

May Have Loans for Long Terms.

When the public does not take the securities, the bank, as one of the underwriters, must take its proportion of the unsold stuff; and it may have to make large loans to other underwriters to enable them to take up their loads also. It is to be remembered that when a broker or other financier enters an underwriting syndicate, he does not usually contemplate putting any of his own funds or capital into the venture, even if the flotation proves to be a failure. He will count upon borrowing the requisite amount from his bankers; and he will perhaps expect the bank to carry the loan until the syndicate succeeds in finally disposing of the issue. If the stuff is very slow of sale, the bank may have the underwriters' loans on its hands for long terms. They will not perhaps offer to reduce the loans—except as the securities are sold—and if the banker suggests reductions they may not receive his suggestion kindly or warmly.

◆

MANITOBA JOINT STOCK COMPANIES ACT

It may not be generally known that at the last session of the Manitoba legislature an amendment to the Manitoba Joint Stock Companies Act was passed, to take effect as from the 1st of June, this year.

This amendment makes it compulsory for all Joint Stock Companies to have the word "Limited" or "Ltd." placed after their names on all of their stationery and literature, as well as on the signs on their places of business.

◆

The Canadian Locomotive Company's fiscal year ended June 30th and when returns are complete, it will probably be found that the year just past was a more profitable period than the preceding year.

The capital stock of Gowan & Company, Limited has been increased from $20,000 to $350,000 by the creation of 800 common shares of $100 each and 5,000 preference shares of $50 each.

CANADA'S NEW COMPANIES

Sixty-two Corporations Include Several Investment Companies

Sixty-two companies have received incorporation this week, the largest being the Mexican Tin Corporation, Limited, with headquarters at Montreal. Its capital is $1,000,000. The total capitalization of the sixty-two companies amounts to $6,536,000.

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
New Brunswick	6	$ 192,000
Quebec	15	2,536,000
Ontario	15	2,331,000
Manitoba	9	497,000
Saskatchewan	11	780,000
British Columbia	6	200,000
Total	62	$6,536,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Weyburn, Sask.—United Coal Company, $25,000.

Swift Current, Sask.—Pinto Hotel Company, $25,000.

Plenty, Sask.—Alonzo Brown Land Company, $20,000.

Moose Jaw, Sask.—Great Western Securities, $250,000.

Mont-Laurier, Que.—Scierie Mont-Laurier, $49,000. H. Chasles, S. Ouellette, N. Thomas.

Prince Albert, Sask.—Southern Holdings, $20,000. Prince Albert Creamery Company, $50,000.

St. John, N.B.—Wanamakers, $100,000 (restauranteurs). G. D. Wanamaker, R. N. Rive, C. H. McLean.

Grimsby, Ont.—Northern Veneer Company, $200,000. T. C. Haslett, W. F. McGiverin, G. E. McLachlin.

Victoria, B.C.—W. V. Coons Company, $10,000 (fiscal agents). Clark & Lyford, $20,000 (lumber dealers).

Campbellton, N.B.—Marquis & Company, $15,000 (dry goods). H. A. Marquis, A. G. Adams, E. Marquis.

Fredericton, N.B.—The Victoria Steamship Company, $20,000. R. Fitzrandolph, W. G. Clark, E. G. Hoben.

St. Catharines, Ont.—Melvin Gayman, $250,000 (real estate). A. H. Archer, J. A. Anderson, M. M. Harris.

Sherbrooke, Que.—Denault Grain and Provision Company, $150,000. D. O. E. Denault, A. Veilleux, A. C. Demers.

Hull, Que.—La Compagnie Immobiliere de la Cite de Hull, $149,000. J. E. Fontaine, J. Bourque, H. P. Charron.

Three Rivers, Que.—Fitzpatrick Realty Company, $99,000. J. Boivin, E. Gauthier, La Tuque, J. A. Bourbeau, Quebec.

Regina, Sask.—The New Era Tire Treatment Company, $20,000. Central Brokerage and Investment Company, $200,000.

Quebec, Que.—Anglo-Canadian Abattoir and Cold Storage Company, $149,000. H. Ievers, J. P. Ross, R. R. Anderson.

Kingston, Ont.—Frontenac Floor and Wall Tile Company, $250,000. J. C. Connell, J. T. Richardson, C. A. Macpherson.

St. Stephen, N.B.—Clark Brothers, $49,000. John Clark, Lynchburg, U.S.A.; J. F. Clark and W. E. Clark, both of Marlboro, U.S.A.

Saskatoon, Sask.—Westminster Investment Company, $100,000. Elgin Investment Company, $50,000. H. G. Baker Commission Company, $20,000.

Carberry, Man.—Manitoba Independent Oil Company, $100,000. F. L. Saunders, Carberry; R. W. Simpson, Portage la Prairie; F. W. Rosser, MacGregor.

North Elmsley, Ont.—Elmgrove Cheese and Butter Manufacturing Company, $1,000. W. G. Cherrie, North Burgess; J. A. Stewart, H. A. Chadwick, both of Perth.

Ottawa, Ont.—Federal Investments, $200,000. W. Y. Dennison, E. F. Holcomb, J. H. Barker. Wrightville Realty, $100,000. A. T. Shillington, L. H. Morisset, J. K. Meredith.

Moncton, N.B.—"Oysters," $4,000. Matthew Lodge, R. O'Leary and H. B. O'Leary, both of Richibucto. Busy East Press, $4,000. E. E. Kelly, G. L. Smith, H. D. Buchanan, Sussex.

Vancouver, B.C.—Auto Clearing House, $10,000. Deep Cove Development Company, $10,000. Okanagan Falls Water and Irrigation Company, $75,000. Wingdam Company, $75,000 (mining).

Winnipeg, Man.—Canadian Public Service Corporation, $40,000. M. L. Frankenstein, F. B. Hugg, F. O. Larson. South Alberta Development Company, $40,000. W. J. Donovan, A. M. Doyle, B. Allen. Greater Canadian Investment, $100,000. W. J. Wilson, E. D'H. McMeans, W. C. Wright. National Insurance Agencies, $20,000. W. T. Alexander, E. L. Taylor, H. Alexander. Frontier Investors, $25,000. J. CUBA COMPANY'S ISSUE

Monetary Times Office,
Montreal, July 30.

The Cuba Company of which Sir William Van Horne is president, has sold in London, $1,953,200 of 7 per cent. cumulative preferred shares. The total outstanding issue including the present offering, is $2,500,000 of this kind of stock. The issue price is said to be 104.

The Cuba Company owns the whole of the $10,000,000 of the common stock of the Cuba Railroad Company, which, in 1912, paid a dividend of 4 per cent. on the common stock. This rate, it is understood, will soon be increased. The net earnings for the year ending June 30, are estimated to have been equal to 7½ per cent. on the common stock. The Cuba Company owns 300,000 acres of selected land in Cuba, numerous valuable town-sites along the route of the Cuba Railway, including the terminal city of Antilla, and extensive sugar mills and plantations. Quite apart from its holdings of Cuba Railroad common stock, an estimate is placed on these properties equal to the entire capitalization of $14,500,000.

The gross and net earnings of the Cuba Railroad for the past nine years are as follows:—

Year ending June 30.	Gross.	Net.
1905	$1,029,258	$ 295,623
1906	1,619,081	562,525
1907	1,953,309	658,354
1908	2,039,467	721,287
1909	2,157,165	950,088
1910	2,559,335	1,107,299
1911	3,059,649	1,374,071
1912	3,819,253	1,819,859
1913	4,632,040	2,215,502

The surplus earnings of the Cuba Railroad Company and the Cuba Company, after payment of all prior charges, and after payment of dividends on the preferred stock of the Cuba Railroad Company, have been as follows:—

June 30.	Cuba R.R.	Cuba Co.	Total.
1910	$322,089	$128,564	$450,653
1911	347,316	24,721	322,595
1912	509,862	395,463	905,326
1913 (estimated)	750,000	245,000	995,000

NORTHERN CANADIAN MORTGAGE COMPANY

The Northern Canadian Mortgage Company has issued its report for six months, owing to a change being made in its fiscal year. Satisfactory progress has been made during that period, as is evidenced in the report appearing on another page, the company's net profits amounting to $30,011. Increases in subscribed and paid-up capital and deposits are noticeable in the following comparison, together with the reserve of $35,000, this being created from premiums on shares issued and an appropriation of $19,472 from the profit and loss account:—

	Full year, 1912.	Six months, 1913.
Capital subscribed	$990,000 00	$1,000,000 00
Capital paid up	410,755 56	482,418 19
Bills payable	60,729 19	5,564 46
Deposits	2,000 00	4,299 18
Accounts payable	....	38 00
Reserved for unearned discounts	23,759 46	21,182 78
Dividends unpaid	16,586 04	21,106 60
Suspense	142 24	....
Premium account	14,408 28	....
Reserve	....	35,000 00
Profit and loss	13,371 90	2,804 32
	$541,752 57	$ 572,413 53

	$19,978 28
Less commissions part for sale of shares	4,450 13
	$15,528 15
Profit and loss appropriation	19,471 85
Total	$35,000 00
Balance carried forward, profit and loss	$ 2,804 32

EDWARD CASS,
President

REPORT OF AUDITORS for the six months ended 30th June, A.D. 1913

The President and Shareholders,
Northern Canadian Mortgage Company (Limited), Winnipeg

18th July, 1913

Gentlemen:—

We have completed the audit of your Accounts for the half year ended 30th June, 1913, and herewith submit for your information:
Exhibit "A"—Profit and Loss Account for the half year. Exhibit "B"—Statement of Reserve Account.
Exhibit "C"—Balance Sheet as at 30th June, 1913.

We would point out to you that as no mention was made at your last Annual Meeting of Directors' remuneration, no charge is made in these Accounts for same. In your previous year's Accounts, profits were charged with a fee of $250.00 for each Director.

The Reserve of $35,000 is created by the Premiums on Shares issued, less the amount paid for commissions, with a further appropriation of $19,471.85 from Profit and Loss Account; these transfers being made under resolution of your Directors.

The books are in good order, and we have to acknowledge the courtesy and assistance extended to us by your Secretary and Staff during the Audit.

Yours faithfully,
WEBB, READ, HEGAN, CALLINGHAM & CO.
Chartered Accountants.

We have audited the Books and Accounts of The Northern Canadian Mortgage Company, Limited, for the half year ended 30th June, 1913, and we report to the Shareholders that we have received all the information and explanations we have required.

We have examined the Agreements, Mortgages, etc., constituting the security for the Company's investments, and have found same in order; the Company's Solicitor certifying as to the sufficiency of the title and conveyancing.

In our opinion the above Balance Sheet is properly drawn so as to exhibit a true and correct view of the affairs of the Company, according to the best of our information, and the explanations given us, and as shewn by the said books.

Winnipeg, 18th July, 1913.

* Owing to the fiscal year of the Company being changed, the statement as of 30th June, 1913, is for six months only.

ADJUSTMENT OF CAPITAL DEMAND TO SUPPLY

Three Years' Activity Due to Development of Backward Countries—Canada's Borrowings—Discrimination is Difficult

The would-be borrower on the London market is finding it almost impossible to get new issues underwritten at any price. London is the chief capital market of the world, so that this action of London underwriters is of world-wide significance, comments the London Economist. These remarks confirm the statement made on another page of this issue, in reference to the difficulty in restraining would-be borrowers and should be heeded. As regards investments abroad, the capital raised has gone (if not into war) into new enterprises, which will not be immediately reproductive. Many of them will require the expenditure of more capital to bring them to the profit-earning stage. Money spent in building a hydro-electric station, for instance, or in irrigating a tract of dry land is capital wasted if the respective expenditure stops short before current can be generated, or the dykes can be filled with water. The expenditure must go on.

Limit to Development.

The trade activity of the past three years is due very largely to the development of the resources of backward countries. The great volume of our exports is most certainly due in part to capital investment abroad. To complete their programmes, the directors of big enterprises abroad are relying upon their ability to borrow more upon the ultimate prospects of the enterprise. The money is not being wasted in the majority of cases; it is being exchanged for goods in this country, and for labor in the developing countries.

But their is a limit to the rate at which new countries may develop, and it is determined by the rate at which the surplus capital of the older countries accumulates.

All countries in course of rapid development live for the time being by borrowing from old and wealthy nations. Canada, for instance, has been taking about £40,000,000 per annum lately in exchange for securities issued publicly in London, and this is quite apart from the very large sums which must have been invested there by insuring companies, private individuals, and in other undisclosed ways. The expenditure of this money has given employment to numbers of people, directly, in the building of railways, roads, factories and power plants, and has also employed an even greater number indirectly in older enterprises able to supply materials for building of new. The Economist refers to the effect when this inflowing stream is cut off and loans are curtailed and it adds that with the usual sources of capital run nearly dry, with industry at home finding full employment for all its liquid resources, it is evident that the applications for new capital must undergo some restriction.

Better for a Fast.

It is an easy and obvious remark that underwriters will be the better for a fast until the capital accumulations of the community catch up with the demand, but anything more than a postponement of new issues is not easily brought about. What is wanted is not postponement, but an adjustment of the demand for capital to the inelastic supply, and, above all, a cessation in the frightful waste caused by the Balkan war.

The investor's confidence is not shaken, and if he has the money, he is ready to place it in anything which offers the prospect of a high return. If that confidence is to be maintained, the demands for capital must be restricted to those necessary to bring enterprises already begun to the reproductive stage. Strictly new enterprises can wait until capital is available for their development. The exercise of this discrimination, however, is not an easy matter.

◆

The Anglo-Canadian Leather Company, Limited, has increased its capital stock from $2,000,000 to $5,000,000, such increase to consist of 30,000 shares of $100 each.

LEGAL NOTICES

INTERNATIONAL STEEL CORPORATION, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 9th day of July, 1913, incorporating Donald Alexander MacRae, Thomas Wallace Lawson and Harold Ernest McKitrick, barristers; John Fraser MacGregor, accountant, and Harry Riley, law clerk, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, produce and deal in iron, steel and all other metals, and in manganese, copper, lead, zinc, coke, stone and all mineral and metallic substances from the ore to the finished products thereof, and also to manufacture and deal in all goods, wares and merchandise in which iron and steel or any other metal is or may be used, and generally in property of every class and description; to carry on the trades or business of iron founders, steel manufacturers, colliery proprietors, coke manufacturers, paint and color grinders, oil and color men, manufacturers and dealers in cements, oils, paints, pigments and varnishes and other chemical and industrial preparations of every description in all of their respective branches; (b) To purchase, lease or otherwise acquire natural gas lands, oil lands, mines, mining rights, metalliferous lands and timber lands, timber limits and water powers, movable and immovable property, rights, easements and privileges and any interest therein, and to explore, work, exercise, develop, turn to account, deal in, sell or otherwise turn to account the same; (c) To search for, get, work, raise, make merchantable and deal in natural gas, oil, timber, iron, coal, ores, brick earth, bricks, cement and other metals minerals and substances and their products; (d) To crush, win, get, quarry, smelt, calcine, refine, dress, amalgamate, manipulate and prepare for market, buy and sell natural gas, timber, ore, metal and mineral substances of all kinds and to carry on any other metallurgical operations which may seem conducive to any of the company's objects; (e) To buy, sell, manufacture and deal in minerals, plants, machinery, implements, conveniences, provisions and things capable of being used in connection with metallurgical and other operations which the company may carry on or be interested in or required by workmen and others employed by the company; (f) To construct, carry out, maintain, improve, manage, work, control and superintend any roads, ways, pipe lines, tramways and railway sidings on lands owned or controlled by the company, bridges, reservoirs, water courses, aqueducts, wharves, furnaces, sawmills, crushing works, hydraulic works, electrical works, factories, warehouses, shops, dwelling houses and other works and conveniences which may seem directly or indirectly conducive to or convenient for any of the purposes and objects of the company, and to contribute to, subsidize or otherwise aid or take part in any such operation; (g) To manufacture, buy, sell and supply light, heat and power of every kind and description and to carry on the works of a gas company in all its branches; provided, however, that any sale, distribution or transmission of electric, pneumatic or other power or force or gas for the purpose of light, heat or power beyond the lands of the company shall be subject to local and municipal regulations in that behalf, and to deal with, manufacture and render saleable coke, coal, tar, pitch, asphaltum, ammoniacal liquor and other residual products obtained in the manufacture of any article which the company is authorized to manufacture or deal in; (h) To apply for, purchase and otherwise acquire any trade marks, patents, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired; (i) To develop and turn to account any land acquired by the company, or in which it is interested, and in particular by laying out and preparing the same for building purposes, constructing, altering, pulling down, decorating, maintaining, fitting up and improving buildings and conveniences and by planting, paving, farming, cultivating, letting on building lease or building agreement and by advancing money to and entering into contracts and arrangements of all kinds with builders, tenants and others; (j) To buy, sell and manufacture, refine, manipulate, export and import and deal in all substances, apparatus and things capable of being used in any such business as the company is authorized to carry on or required by any customers of or persons having dealings with the company; (k) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (l) To acquire or undertake the whole or any part of the business, property and liabilities of any company carrying on any business which the company is authorized to carry on, or possessed of any property suitable for the purposes of this company, and to pay therefor in fully paid-up or partly paid-up preference or ordinary shares of the company or in the bonds, debentures or other securities of the company; (m) To enter into partnership or any arrangement for sharing profits, union of interests, co-partnership, joint adventure, reciprocal concession or otherwise with any company carrying on or engaged in or about to carry on or engage in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such company, and to take or otherwise acquire shares and securities of any such company and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (n) To take or otherwise acquire, hold, own or otherwise dispose of shares in the capital stock, or the bonds, obligations or other securities of any company having objects altogether or in part similar to those of this company, or carrying on any business capable of being conducted so as to directly or indirectly benefit this company, or possessed of any property, rights or franchises capable of being used so as to directly or indirectly benefit this company or enhance the value of its undertakings, notwithstanding the provisions of section 44 of the Companies Act, and to guarantee the payment of dividends on any such stock and the payment of the principal of and interest on any such bonds, obligations or other securities and to aid in any manner any such company; (o) To enter into any arrangement with any authorities, supreme, municipal, local or otherwise, whether domestic or foreign, that may seem conducive to the company's objects or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out or exercise and comply with any such arrangements, rights, privileges and concessions; (p) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependants or connections of such persons, and to grant pensions and allowances and to make payments towards insurance and to subscribe or guarantee money for charitable or benevolent objects or for any exhibition or for any public, general or useful object; (q) To promote any company or companies for the purpose of acquiring all or any part of the property and liabilities of this company or for any other purpose which may seem directly or indirectly calculated to benefit the company; (r) Generally to purchase, take on lease or in exchange, hire or otherwise acquire any real and personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business; (s) To construct, acquire and operate vessels, steamboats and barges and to carry on the business of lumbermen, vessel agents, cartage system, cartage agents, wharfingers, warehousemen and forwarders, for the purposes of the company; (t) To invest and deal with the money of the company not immediately required, in such manner as may from time to time be determined; (u) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (v) To remunerate any company for services rendered or to be rendered to the company in placing or assisting to place or guaranteeing the placing of any of the shares of the company's capital or any bonds, debentures or other securities of the company, or in or about the formation or promotion of the company or the conduct of its business; (w) To issue fully paid-up shares, bonds or other securities for the payment, either in whole or in part, of any property, real or personal, rights, claims, privileges, concessions, choses in action, services rendered or other advantages which the company may lawfully acquire, and to issue such fully paid-up shares, bonds or other securities in payment, part payment or exchange for shares, bonds or other securities of any other company; (x) To sell or dispose of the whole or any part of the assets and undertakings of the company as a going concern or otherwise, for such consideration as the company may think fit, and in particular for shares, bonds, debentures or securities of any other company having power to acquire the same; (y) To obtain any provisional order or Act of Parliament for enabling the company to carry any of its objects into effect or for effecting any modification of the company's constitution, or for any other purpose which may seem expedient, and to oppose any proceeding or application which may seem calculated directly or indirectly to prejudice the company's interests; (z) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (aa) To do all such other things as are incidental or conducive to the attainment of the above objects; (bb) To draw, make, endorse, accept, execute and issue promissory notes, bills of exchange and other negotiable and transferable instruments; (cc) To distribute in specie or otherwise, as may be determined, any assets of the company among its members and particularly the shares, bonds and other securities of any other company owned by this company; (dd) To cause or to allow the legal title, estate and interest of any of the property, real and personal, owned by the company, or in which it has any interest, to remain in or be vested in or registered in the name of any individual or individuals or corporation either in trust for or as agents or nominees of the company in accordance with the terms of any instrument creating such trust or agency; (ee) To procure the company to be registered, licensed or otherwise recognized in any foreign country and to designate and appoint any person or corporation therein as attorneys or representatives of the company, with full power to represent this company in all matters according to the laws of such foreign country, and to accept service for and on behalf of this company in any process or suit; (ff) To do all or any of the above things as principals, agents, contractors, trustees or otherwise and by and through trustees, agents or otherwise and either alone or in conjunction with others; (gg) To amalgamate with any other company or companies having objects altogether or in part similar to those of this company; (hh) The word "company" in clauses (i) to (ii), both inclusive, shall be deemed to include any person, partnership or other body of persons, whether incorporated or unincorporated, and whether domiciled in Canada or elsewhere, and the objects specified in each of said clauses shall be in no wise limited by reference to or inference from the terms of any other clauses or the name of the company; (ii) The business or purpose of the company is to do from time to time one or more of the acts and things herein set forth. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "International Steel Corporation, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada this 15th day of July, 1913.

BRITISH AMERICA NICKEL CORPORATION, LIMITED.
(Corrected Notice.)

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 2nd day of July, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants, William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase, lease or otherwise acquire and to prospect for, open, explore, develop, work, improve, maintain and manage nickel, gold, silver, copper, coal, salt, iron and other mines, quarries, mineral and other deposits and properties or interests therein, and to dig for, raise, crush, wash, smelt, roast, assay, analyze, reduce, amalgamate, make and otherwise treat coal, coke, ores, metals, clays and minerals, whether belonging to the company or not, and to render the same merchantable, and to sell and otherwise dispose of the same or any part thereof, or any interest therein, and generally to carry on the business of a mining, milling, reduction, quarry and development company; to carry on the business of treating, smelting and refining mineral ores, metals or other substances by means of electrolytic process or the application of electric power in any manner or form, or by means of any other process, and for such purpose to install all necessary plant, machinery and apparatus, and to purchase, sell and otherwise deal in ores of various kinds or other substances capable of being treated by electrolytic or other process, and to buy, sell and deal in any products or by-products of such ores or substances; (b) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electricity, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power, when exercised outside the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (c) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (d) To construct, alter, work, carry out or control, and to purchase, take on lease or otherwise acquire, and to sell, lease or otherwise dispose of any works, mains, lines, machinery or plant of any kind or description, or any roads, ways, bridges or other things whatsoever which may seem capable of being used or operated with any part of the company's undertaking for the time being, or calculated to benefit the company; and to acquire rights over or in connection with such works, mains, lines, machinery, plant, roads, bridges, ways or other things whatsoever, and to equip, maintain and operate by electricity, hydraulic or other mechanical power, all works belonging to the company or in which the company may be interested; and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (e) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (g) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To establish and work lines of steamers and other vessels, and to otherwise employ any vessels in the conveyance of passengers, mails, specie, goods, troops, munitions of war and other things between any ports throughout the world, and to carry on the business of shipowners, shipbuilders, shipwrights, ship repairers, charterers of ships or other vessels, warehousemen, wharfingers, shipping agents, managers of ships, ship's husband contractors, ship and insurance brokers, carriers by land or water, forwarding agents, importers and exporters, merchants and traders, commission and general financial agents, proprietors of land, jetties, piers, warehouses, stores, barge and tug owners, lightermen, marine engineers and manufacturers of and dealers in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (j) To construct, acquire, manage, maintain, alter, charter, operate, hire, lease, sell, exchange or otherwise dispose of all kinds of ships, vessels, barges and boats or shares, or interests therein, and also elevators, sheds, warehouses and buildings, wharves, docks, dry-docks, terminals, and generally to carry on the business of ship-building, ship repairing, engineering, elevator, warehousing, navigation, transportation and terminals company, or any such businesses, and to manufacture and deal in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (k) To purchase, take on lease or in exchange or otherwise acquire any docks, dry-docks, wharves, harbors, quays, jetties, ship-building yards, collieries, coal mines, meat freezing works, refrigerating stores, gas works, timber yards and other real and personal property or rights or any interests therein, and to manage, work and otherwise turn to account the same or any of them, and to enter into any working arrangements in respect of the same or any of them; (l) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (m) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (n) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (o) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (p) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable or being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (q) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (r) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (s) To assist in the promotion, organization, development or management of any corporation or company, and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (t) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (u) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (v) To amalgamate with any other company having objects similar to those of this company; (w) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company, or of which the company may have power to dispose; (x) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (y) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "British America Nickel Corporation, Limited," with a capital stock of twenty million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 11th day of July, 1913.

WHAT CAUSED THE FACTORY FIRE?

First Report on Binghamton Fire is Issued—Question of Exits

The appalling fire in the Binghamton Clothing Company's factory, New York State, has created great interest among fire insurance men and others. Five official investigations are being held. The report of the first to be concluded is that of Mr. James P. Whiskeman, consulting engineer of the New York State Factory Investigating Commission, who has issued the following as to his findings regarding the fire:—

"All the accounts indicated that the flames spread with considerable rapidity, and in a very short time the entire building was one mass of flames. It was undoubtedly due to the open stair wells and to other vertical openings by means of which the flames were communicated from one floor to another, the spread of the flames being assisted by the open windows, of which there were a great many.

Walls Fall Outward.

"In a very short time the building collapsed, the walls falling outward, and an examination of these walls showed that there was little bond between the brickwork and the mortar which caused them to be unstable. An examination of the fallen walls showed that the mortar had completely fallen off the brick. It is an undisputed fact that the fire started on the first floor on a shelf that was built underneath the stairway. And despite the effort of the employes, who emptied all the water in the buckets at their disposal on to the fire, the flames could not be quenched, indicating the fire must have had a deep-seated origin and had considerable headway before it was discovered. The boilers did not explode.

Storage of Inflammables.

"Considerable material was stored on all the floors, and being of an inflammable nature, burned readily.

"The building was a four-story non-fire-proof building with brick walls filled with openings on three sides. The floors were supported by wood posts on piers, which in turn supported the girders, floor beams and flooring.

"The stairways were unenclosed and were wide enough to allow the free egress of two persons walking abreast.

"The elevator ran through a hatchway with automatic trap doors at each floor level.

Few Partitions in Building.

"With the exception of the first floor, which was filled with wooden partitions, the other floors had very few partitions on them. On the south-east corner of Center Street was a fire escape, which took in two windows and had an inclined ladder leading from one balcony to the other with a drop ladder to the first floor. This fire escape ran past unprotected windows through which the flames poured, rendering the fire escape utterly useless in the emergency, so that there was practically only one exit from the building, and this was soon cut off by the flames which poured up through it. From the first to the second floor there were two stairways, and if it had not been for the extra stairway on the front of the building, the loss of life would have been very much more, as the rear stairway was rendered useless on account of the fire having its seat of origin there. Every building, no matter what its height, should have at least two means of exits remote from each other, so that in case one of them was cut off, the other will be available in case of panic or fire."

This fire is another warning to Canadian factory owners to see that they have taken every possible step towards fire prevention.

◆

FIRES IN GREAT BRITAIN

The cost of the principal fires in the United Kingdom during the past half-year is estimated at £1,675,000, an increase of £312,500 over the figures for the corresponding period of last year. The cost of the principal fires in the past month is shown to have been considerably heavier than that of the fires in June, 1912, largely, it is believed, owing to the dryness of the month. Losses attributed to suffragists last month are estimated to have amounted to £47,500.

◆

The name of the Lear Plumbing and Heating Company, Limited, has been changed to the Townsend-Caven Company, Limited.

The Motor Car Supply Company, Limited, has increased its capital stock from $10,000 to $50,000. This is divided into 1,000 shares of $50 each.

DOMINION'S FINANCIAL ACCOUNTS

Show Large Reduction in Net Debt—Revenue and Capital Expenditure

The financial accounts of the Dominion for the last fiscal year has been completed with the result that it is found that the net debt of the Dominion, which at the end of the fiscal year 1912, stood at $339,919,460, was on March 31st, 1913, returned at $314,301,625, a reduction in the year of $25,617,835.

This being $2,300,000 more than the total announced by Hon. W. T. White, Minister of Finance, in the financial showing for the year, gives added emphasis to the finance minister's summing up of the budget upon this head when he declared, "that in a period of great financial stringency not only have we not been obliged to resort to the congested money markets of the world, but have been able to reduce so substantially the debt of the Dominion, thus diminishing our interest charges and still further enhancing the high standing of our securities."

Statement of Revenue.

The revised statement of revenue for the year ended March 31st, 1913, compared with the statement of revenue for 1912, is as follows:—

	1912.	1913.	Inc.
Customs	$85,051,872	$111,764,698	$26,712,826
Excise	19,261,661	21,447,444	2,185,783
Post office	10,492,394	12,051,728	1,559,334
Public works, railways and canals .	11,034,165	13,158,077	2,123,912
Miscellaneous	10,268,125	10,267,956	169
Totals	$136,108,217	$168,689,903	$32,581,686

The toal expenditure on consolidated fund for the fiscal year 1913 was $112,059,537, leaving a surplus of revenue over ordinary expenditure amounting to $56,630,366.

Included in Capital Expenditure.

Capital expenditure, including $27,205,661 on public works, railways and canals, also on the National Transcontinental, and $4,935,507 on railway subsidies, amounted to $32,396,816. Thus the revenue provided for all expenditure both on ordinary and capital account, and left a balance of $24,233,550 to the good. To this net surplus is to be added the sum of $1,384,285 invested in sinking fund, making the total of $25,617,835 by which the national debt was reduced during the year.

For the first two months of the current fiscal year, May and June, the revenue amounted to $41,268,690, an increase of $3,430,580 over the revenue for May and June, 1912. The ordinary expenditure was $10,777,911, a decrease of $1,704,020. The capital expenditure upon public works, railways and canals and including subsidies to railways for the two months, was $7,729,726, an increase of $6,195,806.

◆

ELEVATORS IN SASKATCHEWAN

Probably 15,000,000 bushels of grain will be handled by the elevators of the Saskatchewan Farmers' Co-operative Elevator Company this fall, according to figures given by Hon. W. R. Motherwell, Minister of Agriculture for the Province of Saskatchewan. By this fall the company will have nearly three times as much storage capacity as any other line of elevators in the province.

In its first year, Mr. Motherwell said, the company operated 46 elevators, handling about 3,000,000 bushels of grain. On this business there was a profit of $50,000 to the shareholders. Last year 140 elevators were operated, handling approximately 12,000,000 bushels. Although the annual statement has not yet been issued for 1912 it is expected that the profit on that year's business will be in proportion to the profit on the first.

This year at least 40 more elevators will be built by the company.

◆

Halifax Tramway interests are stated to be in the market for $1,000,000, and Montreal financiers are supposed to have been asked to secure a loan of that amount for a period of eighteen months at 6½ per cent. interest.

The ratepayers of Dundas, Ontario, passed the by-law providing for the guarantee of $15,000 bonds of the Canadian Abrasive Wheels, Limited. The company is the first manufacturing concern to locate on the banks of the Desjardins Canal. It is capitalized at $500,000.

DIVIDENDS AND NOTICES

THE CANADIAN BANK OF COMMERCE

DIVIDEND 106

Notice is hereby given that a quarterly dividend of 2½ per cent., upon the capital stock of this institution has been declared for the three months ending the 31st August next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 2nd September next, to shareholders of record at the close of business on the 16th day of August, 1913.

By order of the Board,

ALEXANDER LAIRD,

THOS. F. HOW,
General Manager.

The Bank of Toronto, Toronto,
July 23rd, 1913.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, May 20th, 1913.

VISITING PARLIAMENTARIANS TALK OF CANADA.

Right Hon. Thomas Lough, M.P., one of the British members of Parliament visiting Canada, says:—"The present financial situation in the London market need cause no depression to Canadians. The war troubles have tightened up money and the situation is no worse for Canada than for other countries. The house of Rothschild was not able this year to float a loan for the first time in its history. The Austrian Government has had to pay six and a half per cent. on a Government loan. The great natural resources of the Dominion are her greatest asset and this year the lumber logs will come down the rivers, and the grain in ships down the waterways and on the railways and her prosperity this year will be greater than ever."

Mr. Hamar Greenwood, another visiting member of Parlament, says that this country's position in the London money market is improving, adding:—"No one questions the great and growing capacity of Canada to meet her obligations, and to undertake new ones, but there is a feeling that certain urban values are high enough and wide enough for the present. Wars and rumors of wars have tightened the purse strings of London, where most of the liquid capital of the world tends to gravitate, but the unprecedented prosperity of the Mother Country will compel capitalists to find investments outside of England for the surplus millions, always growing larger.

"The real wealth of Canada is in her land, and as long as the tide of immigration keeps flowing and the productive areas keep growing the money for legitimate enterprises will be forthcoming. The present stringency ought to quicken the minds and hearts of every living Canadian to the greatest of all economic facts—namely, that Canada and her development depend absolutely upon British capital."

◆

The Imperial Steel and Iron Company's plant at Prince Albert, Sask., will when completed be capable of handling 4,000 tons of iron per month and employ over 500 men. The site covers more than 30 acres.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Five thousand dollars debentures for sale, Rural Municipality of Winslow, No. 319, seven per cent. Repayable in ten annual instalments. Municipal road improvements.

R. H. PERCIVAL,
Secretary.

Druid, P.O., Sask .

DEBENTURES FOR SALE

Sealed tenders will be received by the Clerk of the Town of Rosetown, Sask., until the 20th of August, 1913, on an issue of $13,500 of 7 per cent. debentures, payable at the end of the period, 20 years, interest payable semi-annually. The purchaser to pay printing and banking expenses.

ANDREW WILSON,
Clerk.

Rosetown, Sask.

CITY OF WETASKIWIN.

ISAAC WALKER.
Secretary-Treasurer.

Alsask, Sask.

DIVIDEND NOTICES

CANADIAN PACIFIC RAILWAY COMPANY

ISSUE OF $60,000,000 ORDINARY CAPITAL STOCK

SPECIAL INTEREST PAYMENT

In accordance with the President's Circular to the shareholders, dated January 3rd, 1913, an Interest Payment at 7 per cent., or $3.67^{184} per share, will be paid on October 15th next, on the first four instalments ($140.) from the due date of each instalment, to September 30th, 1913, on the shares of the above New Issue represented by the Certificates of Subscription, to holders of record at the close of business August 18th next, who have paid these instalments on or before their respective due dates. Notice is hereby given that this Interest Payment will be mailed from New York to the registered addresses of holders, or their duly appointed Attorneys, on October 14th, 1913.

For the purpose of this Payment the Certificate of Subscription Books will close August 18th at 3 p.m., and re-open September 18th, 1913.

All the shares of this Issue, when paid in full, will rank with the existing Stock for the full dividend accruing for the quarter ending December 31st, 1913, which dividend will be payable April 1st, 1914.

W. R. BAKER,
Secretary.

Montreal, July 31st, 1913.

THE WINNIPEG PAINT AND GLASS COMPANY, LIMITED.

DIVIDEND NOTICE.

Notice is hereby given that a dividend at the rate of seven per cent. per annum for the half-year ending July 31st, 1913, on the preferred stock of the company has been declared and will be payable at Winnipeg on the 1st day of September next to shareholders of record of July 31st, 1913.

The transfer books will be closed from August 1st to August 15th inclusive.

By order of the Board.

R. W. PATERSON,
Managing Director.

BANK OF OTTAWA'S NEW PRESIDENT

Mr. David MacLaren has resigned the presidency of the Bank of Ottawa, owing to ill-health and Hon. Geo. Bryson of Fort Coulonge, has been elected president in his place. Mr. J. B. Fraser succeeds Mr. Bryson in the vice-presidency.

Mr. MacLaren will remain on the board of directors and hence there will be no vacancy. He has been seriously ill, but is now steadily improving in health. He became president of the bank a few years ago on the death of Mr. George Hay. Mr. MacLaren's father was the first president of the bank.

The St. John Railway Company is making an issue of stock at a par value of $200,000 to cover the extensions now in progress at St. John, N.B.

New South Wales will shortly be floating a loan of one and a half million pounds sterling at 97½ in the London market. It was originally proposed to offer two millions.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

CANADA PROMISES TO BE HIGHLY PRODUCTIVE FIELD

General Situation is Healthy, is Summing Up of Sir Thomas Shaughnessy

"Our Canadian banks realize their responsibilities as financial guides and guardians and just now they are taking up a conservative attitude which is both wise and timely. Like wise bankers in other countries, when there is a war feeling in the air, they are strengthening their reserves and I think that at the present time our banks are very strong in their reserves. So the situation in that respect is sound," stated Sir Thomas Shaughnessy in a recent interview

"The existing general scarcity of money, or rather the high rate of interest demanded by lenders has necessarily had the effect of restricting the issue of municipal and other securities and there has been a consequent falling off in the amount of public work that is being done.

"But this state of affairs is merely temporary, due almost wholly to extraneous causes and I can see no real reason for anxiety. The general trade of the country appears to me to be reasonably good, and, with a fair crop, we have every reason to expect that conditions will be quite normal again in the late autumn.

Must be Large Expenditures.

"You tell me that in some quarters gloomy prophecies are being made to the effect that there is likely to be serious financial trouble in Canada this autumn, but, for my part, I have no fear of any trouble this autumn and I cannot see any reason why there should be any.

"People who are talking about Canada's reckless expenditure, asserting that she is unwarrantably pledging her future and that a crisis is imminent do not, I think, realize just what has been occurring here during the past few years.

"Let me quote the case of a town in the West where the assessed taxable value has jumped from $275.000 in 1903 to $35,000,000 in 1913. In the ten years covered by that stupendous increase many miles of excellent roadway have been constructed, sidewalks, sewers, electric light, an electric car system, water supply and many other public utilities have been provided and many hundreds of factories, warehouses and large residences have been put up. To meet conditions such as that, there must necessarily be large expenditures on the part of the municipal corporations but there is not the slightest doubt that the people who have loaned money for these purposes possess excellent security. In my opinion the municipal securities in Canada have been and are now gilt-edged.

General Situation is Healthy.

Sir Thomas made it quite clear that there is no need to anticipate anything in the nature of an economic crisis in Canada. He said that the banks and other interests concerned had the situation well in hand and expressed the belief that the fact that his company had recently decided to spend $100,000,000 on extensions and new constructional work during next and ensuing years was calculated to increase confidence and have a steady effect.

"The tide of immigration is greater this year than ever," said Sir Thomas, "and this is another encouraging feature. We are fortunate in getting a better class of immigrant than the United States got in their early days. The United States had to look to the United Kingdom and the Continent of Europe for their new population whereas we, in addition to that field, have the United States as well and the people we are getting from the United States are among the best coming to us, especially for farming purposes.

"All those who come to Canada from over the border are most welcome whether they be farmers or manufacturers, and I do not think that those who have come to us in the past have had to regret their coming. Canada, in short, is still a comparatively new field; a field which promises to be highly productive in the future. And the general situation is quite healthy."

◆

CANADIAN SURETY COMPANY FORMED

The Canadian Surety Company of Toronto has been formed as a subsidiary of the American Surety Company of New York. It will re-insure in Canada the business of the American Surety Company and take over its agency organization here. Mr. W. H. Hall, formerly manager for Canada of the American Surety, is general manager, and Mr. W. H. Burgess, secretary.

◆

The Peerless Cafeteria Company, Limited, has increased its capital stock from $12,150 to $100,000 by the creation of 87,850 new shares of $1 each.

WAYAGAMACK PULP AND PAPER COMPANY'S REPORT

President Reviews Progress Made—Net Earnings—Outlook is Bright

The satisfactory profit and loss statement submitted at the first annual meeting of Wayagamack Pulp and Paper Company covers one year's lumbering and the operation of the pulp and paper mills for six months. The net earnings as shown by the statement, were $256,773.99.

Mr. J. N. Greenshields, K.C., president of the company, in his address to the shareholders, remarked:—

"The construction of the plant was designed with an initial capacity of fifty tons of pulp and fifty tons of finished paper, but so designed as to permit of its gradual extension to reach ultimately a capacity of two hundred tons of paper. This policy necessitated the installation of considerable portions of the plant on a scale much larger than would have been required to deal with the present output. By having incurred these additional expenditures at the present stage, the company will be enabled to effect the extension without disturbing the continued operation of the first units.

Gradually Put Into Operation.

The pulpwood plant was completed in sufficient time to operate during the summer of 1912, thereby furnishing the necessary supply of raw material for the operation of the paper plant, when completed and started during the following winter. During the next four months the various parts of the pulp and paper mills were gradually put into operation, machinery tested, and samples of the product delivered to the trade for the purpose of securing the market.

The permanent running of the pulp and paper plant on the standard product was begun on the first day of January, 1913. The profit and loss statement submitted covers one year's lumbering and the operation of the pulp and paper mills for six months.

A third machine is being erected and should be running by the beginning of September. The output of this machine will be readily sold in conjunction with the present product, and will complete the line of "Kraft" papers.

What Balance Sheet Shows.

The company's assets are as follows:—

Cash and accounts received		$ 145,787.35
Inventory:—		
Pulpwood	$145,951.95	
Lumber in yard	61,566.51	
Logs in boom and river	285,708.91	
		$ 493,227.37
Stores		53,066.94
Stock of paper on hand		54,990.00
Buildings, plant, etc.		2,077,784.34
Property limits		6,560,807.35
		$9,385,663.35

And the liabilities are:—

Accounts payable	$ 190,371.69
Bills payable	118,207.05
Loans	128,381.70
Accrued interest on bonds	87,500.00
Charges accrued	41,162.21
Reserve against contingencies	168,266.71
First mortgage gold bonds	3,500,000.00
Common stock	5,000,000.00
Profit and loss	151,773.99
	$9,385,663.35

Mr. Greenshields stated that a good market had been secured in New Zealand, Australia, South Africa and the United States, while the demand in the home market, which they had counted on as taking 50 per cent. of the output, can now be depended upon to absorb 80 per cent. of the total output.

◆

INQUIRY DESIRED INTO UNION LIFE AFFAIRS

A resolution was unanimously passed at a meeting of British shareholders appealing to the Canadian minister of finance to take all possible action to cause a government inquiry to be held as to the failure of the Union Life Assurance Company, particularly as to the prospectus issued to the English shareholders in 1910, at a meeting of British shareholders.

LAUGHING AT CRITICS' CROAKING

Mr. George H. Wykes, special correspondent of Financial America, who has recently visited Canada, says: "In my first article I made it quite clear, I venture to think, that the criticisms and gloomy predictions concerning Canada's financial position lately indulged in by certain financial writers in the United States and England have engendered in financial circles in Montreal and in government circles in Ottawa nothing beyond a feeling of unfair treatment. In neither city did I find anything but complete and quiet confidence in the soundness of the country's economic position and in the steady advance of the tide of prosperity.

"In Toronto I have found the spirit of optimism even more pronounced and the croakings of the critics are being good-naturedly laughed at. It is admitted that at the present time a lull in municipal and commercial enterprise is being experienced, but it is argued that this is due wholly and solely to universal financial stringency, and that nothing is wrong with the fundamentals of Canadian finance."

Mr. Wykes publishes also a lengthy interview with the editor of *The Monetary Times*.

◆

CANADIAN NORTHERN NEXT YEAR

Sir Donald Mann states that the recent government subsidy of $15,000 will be used to complete the terminals of the western end of the Canadian Northern Railway. It will involve the usual construction work of tracks, traffic sheds and ferry slips. At Steveton these must also be built. If an immediate start is made, by pushing the work vigorously the company will have the terminals complete and in operation next summer about mid-season. This will be the final link in the Canadian Northern Railway system for a through service from coast to coast by the end of 1914.

MONTREAL'S FUNDED DEBT

City Treasurer's Official Statement—Borrowing Powers —Value of Real Estate

Monetary Times Office,
Montreal, July 30th.

Much has been said of Montreal's heavy indebtedness and of the difficulty the city is experiencing in putting through further loans. City Treasurer Arnoldi, being asked for an official statement concerning the matter, submitted the figures which appear below:

"The city of Montreal has at the present time a funded debt of $62,000,000 and other projected loans, as follows:—

Aqueduct debentures	$ 2,320,000
For general purposes	11,904,000
Present funded debt	62,000,000
Total funded debt Dec. 31, 1913	$76,224,000

"The $11,904,000 referred to above, as a loan for general purposes, will be expended as follows:—

To retire 6-months notes for £250,000 due November, 1913	$1,250,000
To retire 6-months notes for £750,000 due February, 1914	3,650,000
For permanent improvements, roads, sewers, etc.	7,000,000

"The notes for $4,900,000, referred to above, are the only short-term, city of Montreal notes outstanding.

Twelve Per Cent. of Increase.

"The city has the power of borrowing each year on an amount equal to 12 per cent. of the increase in the value of assessable property. The city this year shows an increase in the value of assessable property of nearly $100,000,000 over last year. The city, therefore, has the power to borrow 12 per cent. of this amount—or, to be more accurate, $11,904,000. The city formerly had the power to borrow 15 per cent. of the increased assessment, but this was changed at the city's request, two years ago, to 12 per cent.

"The city will pay $2,750,000 interest charges this year on the amount already borrowed, namely $62,000,000 and on temporary borrowing. This sum will probably be increased to $3,500,000 when the projected loans are floated.

Yearly Revenue Returns.

"While the interest payments are increasing, the revenue is also showing a yearly increase. Last year the revenue was $9,000,000. This year it will be $10,000,000. None of the loans which go to make up the total of $62,000,000 will fall due for some years, as they are all long-term debentures.

"In the amount of the total debt is comprised $3,000,000 for local improvements, repayable by proprietors.

"The real estate owned by the city, itself, is valued as follows:—

Aqueduct, giving an annual rental of	$ 1,200,000
Public Parks	14,000,000
City hall, fire and police stations	26,000,000
Hospital and public markets	6,500,000
Total	$46,500,000

◆

DEBENTURES AWARDED

Vancouver, B.C.—$1,700 4½ per cent. 10-years, to local investors.

South Springfield S.D., Man.—$35,000 5½ per cent., to Messrs. Moore and Sutherland, Winnipeg.

Watrous, Sask.—$70,000 6 per cent., to Messrs. Terry, Briggs and Slayton, Toledo, Ohio.

Edmonton, Alta.—$3,500 4½ per cent. 40-years, to Messrs. G. A. Stimson and Company, Toronto.

Saskatchewan.—Carrot River, $1,000; Gwyfe, $1,800, to Messrs. G. A. Stimson and Company, Toronto.

Vancouver, B.C.—$111,500 4½ per cent. 20-years, to Messrs. G. A. Stimson and Company, Toronto.

Alberta.—Donahoo, $500; Cobourg, $600; Golden Heights, $1,500; Akenstad, $1,300; Elmer, $1,200; Farming Valley, $1,500; Lavada, $1,300; Maypole, $1,[illegible] [illegible] Hill, $800; North Park, $1,200; Peyton, $1,200, to Messrs. G. A. Stimson and Company, Toronto.

A branch of the Canadian Bank of Commerce has been opened at Oshawa, Ont., under the management of Mr. H. H. Hyland, formerly manager at Mansoville, Que.

MUNICIPAL FINANCING

Undesirable Practice Affects Bond Sale—New Westminster Bonds to be Hypothecated—No Tenders for Two Issues

An interesting corollary to the article which appeared in a recent issue of *The Monetary Times*, calling attention to the undesirability of municipalities paying commercial firms with debentures, is furnished by San Francisco's problem.

The city having tied its finances into a temporary knot as a result of having paid off its contractors with city bonds at prices that enabled the contractors to undersell the main issue of $5,104,000. The contractors' sales so clogged the market for San Francisco securities that the bankers, Messrs. N. W. Halsley and Company and E. H. Rollins and Sons, of New York, refused to exercise the option they held on the remaining $2,904,000 bonds of the main issue.

San Francisco, therefore, has nearly $3,000,000 of new 5 per cent. city hall bonds left on its hands that it cannot dispose of through the bankers until the effect of the contractors' prices cutting sales is overcome. In addition, the city has $1,144,000 bonds of other issues on its hands.

Messrs. N. W. Halsley and Company and E. H. Rollins and Sons, agreed to take the $5,104,000 bonds at par at the rate of $1,100,000 in monthly instalments. They had taken $2,200,000, when they refused to take the July instalment.

Lethbridge Took no Action.

Lethbridge, Alta., council at its recent meeting again took up the consideration of the capital expenditure estimates for 1913. A representative of Messrs. Stimson and Company, Toronto, bond brokers, intimated to the council that no bond house would care to buy bonds now unless they would yield 6½ per cent. This would mean selling 5 per cent. bonds at 80.41, which is nine points lower than the last sale, no action was taken after this intimation.

Vancouver, B.C., sold seventeen $100 4½ per cent 10-year debentures at its first days sale "over the counter."

Calgary school board debenture sale has not yet been completed.

Hypothecating Bonds.

Mayor Gray, of New Westminster, stated recently that the bank had been supplying the city with money, though the bonds had not yet been hypothecated. The hypothecation was attendant on the consolidation of all the money by-laws and as these had been consolidated, a resolution was passed through the council hypothecating them to the extent of $200,000.

Messrs. Moore and Sutherland, Winnipeg, are handling an issue of $35,000 5½ per cent. South Springfield S.D., Man., debentures.

No satisfactory bid was received for Merritt's, B.C., issue of $80,000 6 per cent. debentures.

Kentville, N.S., did not receive any bids for its issue of debentures.

◆

UNITED STATES FIRMS BUY CANADIAN BONDS

Halifax, N.S., has disposed of an issue of $299,000 debentures to Messrs. N. W. Harris and Company, Boston, and Messrs. J. C. Mackintosh and Company's, Halifax, tender for an issue of $90,000.

A Toledo bond house, Messrs. Terry, Briggs and Slayton, have acquired $70,000 6 per cent. Watrous, Sask., debentures.

◆

ACADIA FIRE INSURANCE COMPANY'S WESTERN OFFICE

The Acadia Fire Insurance Company has removed from the Keewayden Building, Winnipeg, to new offices at 1004 Lindsay Building, Notre Dame Avenue.

Mr. L. S. Baker, branch manager, at Winnipeg, is a Westerner, and an experienced insurance man, having previously been Western Inspector for one of the largest and oldest insurance companies, and is therefore, conversant with the conditions of this territory.

THE COST AND FINANCING OF WAR

At the recent convention of New York State bankers at Ottawa, many speakers emphasized the fact that war is impossible without the help of bankers. Mr. James J. Hill stated at this gathering that capital is the most cosmopolitan force in the world and has broken down more barriers and cemented more bonds than all the armies and navies of the world. "Capital to-day," he added, "furnishes the sinews of war, for none can long be carried on anywhere, as a rule none would ever be begun, if the great bankers of the world should agree in refusing to finance it."

Mr. George E. Roberts, director of the Mint at Washington, recalled at this Ottawa convention the occasion when two years ago a German warship steamed into a port of Morocco, with a remotely implied threat of war with France, with the result that so much French money was withdrawn from Germany that the Imperial Bank was obliged to expand its loans by $200,000,000 within 30 days, and meantime the Berlin Stock Exchange was in panic and German industries and securities lost hundreds of millions more.

Another speaker reminded us that the effect of the Balkan war is being felt by every municipality in Canada. A cable message now says that London is not likely to lend to the Balkans. Therefore, if the Balkan states are to get loans to wind up the war to establish some kind of good government in the territories from which they have driven the Turks and to begin at last with opening up their resources, they will have to look to France for the accommodation. France is still using all her influence to bring about peace. If the Balkan States refuse to listen to France, they will be in a bad dilemma.

Commenting on this situation, the London Statist says: "If France succeeds where Austria-Hungary caused so much mischief, and where Russia, after getting herself acknowledged as the patron of the Balkans, has failed to bring about a pacification, she will have taught the peoples of Europe a most valuable lesson, namely, that they have it in their own power if they choose to exert themselves to prevent wars in the future.

"It is quite true that a great military power can begin operations without borrowing. It can order mobilization and set its forces in movement. But in these modern days war costs immense sums, and even the richest power soon feels the need for borrowing. Let the governments once understand that they cannot induce their subjects to lend to them all they ask for unless their subjects are heart and soul with them in their policy and we shall have fewer wars in the future."

Bankers of Paris, who have been the chief financiers of the Balkan war, have formed the following estimate of the losses sustained since last autumn:—

	Killed and wounded.	Cost in money.
Bulgarians	140,000	£90,000,000
Servians	70,000	50,000,000
Greeks	30,000	25,000,000
Montenegrins	8,000	800,000
Turkey	100,000	80,000,000
	348,000	£245,800,000

The London Economist sees reason to suppose that the expenditure out of money actually borrowed and of money drawn from the taxes into war must be very much less than this prodigious and appalling figure. "But it may," the paper continues, "stand as an approximate indication of the total economic loss which has befallen the five peoples, to which may be added an estimated expenditure on mobilization and armaments during the last nine months of 12 millions by Roumania, and of perhaps 20 millions apiece by Austria-Hungary and Russia."

Some of Roumania's money was found by Berlin no doubt with the usual arrangement that armaments should be bought in Germany. Part of the Austrian money was supplied by New York and part by Berlin. Moreover, the war has been made a ground or pretext for a capital levy of 50 millions in Germany, a capital expenditure out of loans of perhaps 25 millions in France, and a large increase in the army estimates of France, Germany and Russia. The chief argument for these national sacrifices was that the strength of the little Balkan States had been so enormously increased by the war and the balance of power in Europe altered. The Kingdom of Italy, which started the trouble by its attack upon Tripoli, has also suffered heavily, and it is not difficult to see why the banking resources of Europe are just now undergoing a severe strain.

ANTIQUATED ROLLING STOCK

By utilizing upon holidays old rolling stock which has been out of commission and should have been on the junk heap long ago, the transportation companies of Canada are inviting catastrophe and disaster. Antiquated boats and train coaches, pressed into service for holiday traffic every year constitute a danger which should not be tolerated longer.

PEACE FOR THE VISITING GEOLOGISTS

Whenever a party of distinguished visitors arrives in Canada, the heart of *The Monetary Times* beats with sympathy, because the Canadian has an unequalled reputation for statistical oratory. This art has developed so alarmingly in recent years that guests can no longer be called guests. They have become victims. The usual procedure is to gather the visitors under a convenient roof, feast them with the best of the land, and then to shove up, one after another, twenty or thirty local orators. Each is a specialist. One will talk of lumber products, another of mines, a third of municipal growth, a fourth of agriculture, and so on. They reel off yards of statistics and reams of general information, giving the impression that their diet for the previous week was composed exclusively of blue book sausages turned out of adding machines.

They deal first with their own town, the surrounding locality, then with their own province, and finally with their own country as a whole. They stretch their oratorical elastic from the Atlantic to the Pacific, then north and south and a dozen other ways, and still it does not break. They have the distinguished visitors for but a few hours and are bent on filling them at the banquet table with more than the material things of this world. It is forgotten that the next town will do the same thing, and that long before the tourists have reached their destination, they will be overcome with statistical indigestion. The Canadian speech makers are shedding this information in a good cause, but if they would cut sixty and ninety-minute speeches down to five and ten, those who have been forced in the past to try and appear interested in lengthy orations will be exceedingly thankful.

Canada is entertaining many distinguished geologists from all parts of the world. It is to be hoped that the hosts will have mercy upon their guests. It is even possible that the geologists, who are usually armed with small hammers, may themselves take drastic steps to cut short any attempted flow of statistical rhetoric. The Dominion's mining men should recollect that the twelfth international geological congress has come more particularly to discuss coal rather than to observe natural gas. The vein which will appeal most to the visitors, in high-grade entertainment bodies is commonly known as the lighter vein. In short, the visiting geologists should not be compelled to drink geological statistical information by quartz. Why not have the speeches printed ahead of time and taken as read?

MANNERS IN BUSINESS

If Lord Rosebery feels it necessary to apologize for the manners of the people of the British Isles, what would he think of the manners which prevail, especially in business spheres, in North America? It is not always one meets with courtesy in business on this continent. It may be due partly to climate, partly to the craze for hustle, partly to the fact that we are knee deep in the haste of nation building, and partly to the fever of money making. All these excuses, however, do not make a good reason for the lack of manners in our business life. Many offices are plastered with such instructions as "Talk business," "Be brief," "Get on or get out." There is an atmosphere of discourteous haste which almost creates fear and trembling in the caller. Lord Rosebery remarked that good appearance and good manners have an enormous commercial value in life. Good looks are not at our command. They are the gifts of the gods, but a good, straightforward, manly appearance, an appearance without self-consciousness, which is the most disagreeable feature, perhaps, of all appearances, is within the command of everyone. Manners are even more important than appearance, said Lord Rosebery. Let us say three boys are applying for the same situation, he illustrated. One boy may not have the ability of either of the other two, but if he has good manners, if instead of grunting an answer like the first one or giving only an inarticulate sound like the second, he gives a clear, respectful answer to the question asked him, it is ten to one against the other two.

This is very true and we can well afford to cultivate in North America the art of good manners which is rapidly being lost. No man is too busy to be polite.

SAFEGUARDING MUNICIPAL SECURITIES

Some excellent recommendations are contained in the report of the Royal Commission on Municipal Government in British Columbia. The commissioners are Messrs. W. H. Keary, chairman, H. A. Maclean and A. E. Bull. One of the most important matters dealt with in this report, which has just been published in pamphlet form, is the question of government supervision of municipalities. On this point the commissioners say: "We firmly believe in municipal home rule, but, like everything else, this can be carried to excess. The province at large, as represented by its government, cannot afford to be indifferent to what is taking place in the municipalities. Cases have occurred in Canada where a province had to go to the assistance of municipalities which had bankrupted themselves by recklessly bonusing railways. In this province there is not even a government office where information can be obtained regarding the financial affairs of municipalities. In England there is a department of the government, called the local government board, which exercises a very real control over municipal bodies. Before a local government can contract debenture indebtedness, we understand the scheme for which the loan is intended must receive the approval of the board. While we do not think it advisable to establish such a system in British Columbia, we do think the government should have full information as to what the municipalities are doing."

They therefore recommend that the British Columbia government should establish a municipal department similar to those in Manitoba and Alberta. Under this municipal department there should be one or more inspectors, whose duty it would be to see that the books of each municipality, including the school accounts, are kept in a proper manner, that they are duly audited at least once a year, and that a uniform system of municipal accounting is established. It should also be the duty of each municipality to transmit annually to the municipal department a full statement of its financial position. The municipal commissioner of the government could also certify the validity of money by-laws and debentures issued thereunder, as is done in Ontario by the railway and municipal board, and in Manitoba by the municipal commissioner, thus preventing any attack upon debenture by-laws or debentures. This would be an excellent beginning and little harm could result from a further extension of such a system, as time goes on.

Certain sections of British Columbia's municipal act authorize the councils of municipalities to invest their sinking funds in a large number of excellent securities, but they also empower them to invest these funds on the security of first mortgages on land. The commissioners recall that experience has shown that investment in mortgage is, or in some cases may be, a dangerous form of investment for municipalities. Even when the security is good, there is often great difficulty in compelling an influential ratepayer to make prompt payment of interest. Few municipalities in British Columbia have availed themselves of this power. The commissioners think, and rightly, that it would conduce very much to the safety of sinking funds if this power were taken away from municipalities. It might well be made the duty of a government inspector of municipalities to report upon the investment of sinking funds.

A great many British Columbia municipal debentures are marketed in the province of Ontario. The Ontario Act respecting the investment of trust funds provides that the debentures of municipalities in the provinces of Ontario, Manitoba, Saskatchewan, and Alberta are legal investments for trust funds, but does not include the debentures of the municipalities in the province of British Columbia. The fiscal agents of some of the municipalities in British Columbia have represented that it would help the market for British Columbia municipal securities if British Columbia debentures were placed in the same class as the debentures of the municipalities of these other provinces, and have asked the commission to recommend that the British Columbia government open negotiations with the government of Ontario with a view to having the Ontario Act amended to cover this. The governments of the other provinces of the Dominion might also be approached with the same end in view. We do not think any objection will be raised by the various provinces in granting British Columbia a privilege which it should have had years ago.

FERNIE'S EXPERIENCE

About twenty-five salesmen of real estate in the prairie provinces recently descended upon Fernie, British Columbia, told their story of easy fortunes to be made, to miners in that famous town and in a little more than a week, returned to their prairie tents with $50,000 of Fernie's money. That is the chronicle related to *The Monetary Times* by a reliable authority. In the mining town was freely circulated literature specially dotted with the terms used by miners, urging them to buy western real estate.

Some of the land for sale may have been good, some of it probably was not. The citizens of Fernie, however, do not like to think of the fifty thousand dollars lost to local business. The banks' deposits in that district probably show a decline to about that amount. The citizens of Fernie, too, can draw a host of morals from the incident, which again proves that the real estate salesman has no geographical limit and that every man with $100 in his pocket is a "prospect."

SMALL CHANGE

For the shareholders, where there is Union Life, there is no hope.

* * * *

Despite its hundred years, we do not see many grey hairs on Hamilton's head.

* * * *

The feature of the Balkan war most women worry about is that currants are dearer.

* * * *

As the feminine mind would say, the money market these days is a regular hobble skirt.

* * * *

The highest form of politeness is to listen attentively to the latest Canadian from Europe telling why money is tight.

* * * *

The only hope for the declining game of lacrosse is to merge it with baseball and issue bonds with a bonus of common.

* * * *

Vancouver, Winnipeg and Grand Trunk issues in London beg to announce that they are joyfully full to overflowing.

* * * *

Hamilton is holding its Centennial Industrial Exposition next week and all the province will visit, despite the way it spells exhibition.

* * * *

Madam Kin Seno is the only woman bank president in Japan. A correspondent says he Kin Seno sign of any such innovation here.

* * * *

A house worth $6,000 is to be built in a day at Hamilton, as a feature of the Centennial celebration—but not by union labor, we assume.

* * * *

Canadian cities, railroads and industries got over $20,000,000 in London last month—which is pretty good fishing for a hot July in tight money waters.

* * * *

A London critic says Canada is learning not to bite more than it can chew. That is not the trouble. The British investor is giving us so little to bite just now.

* * * *

George Ham, the Canadian banker who was imprisoned for three months by the Mexicans—a little trick of theirs—has managed to escape to Canada before they made him a sandwich.

* * * *

Jacques Vernes, the well-known French financier, thinks that the efficiency of workers can be increased by inducing them to sing while at work. We dare not try it with the voices of a newspaper office.

* * * *

A London cable message says that a garden wall separated the gardens of two houses on the Chelsea embankment. On one side lived Sir John Wolfe-Barry, on the other Eliza Theodora Minturn. Litigation began in 1910 to decide whether there was a defect in the wall, and, if so, who was responsible for its repair. The case was taken from court to court until it was finally submitted to the House of Lords, and decided last week. Although the defect could have been repaired for a small amount, thousands of dollars were expended in law costs. The moral seems to be that Sir John and Eliza, like the little Dutch boy, should have stuck their fingers in the defect, even if it were imaginary.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions Dividends and Future Plans

Steel Company of Canada.—Good progress is being made with the erection of the Steel Company of Canada's new plant, Fort William, which is situated near the Canada Iron Corporation's plant. The first five cars of steel arrived a few days ago, Messrs. Prack and Perrine are the contractors.

The Lake Superior Iron and Chemical Company.—Sold in London in November, 1910, £616,420 6 per cent. first mortgage gold bonds at par. A reorganization scheme is being undertaken and in connection with the criticisms of the plan, it seems to have been concluded, incorrectly, that the company is a Canadian concern, whereas, as Mr. Gibson points out, it is a Michigan company.

Detroit United Railway.—The city and the company have come to an agreement. In return for new concessions which the company made, it was promised that the city council should take no action either to enforce a three-cent rate of fare on the lines now operated without franchises, or pass a resolution instructing the city treasurer to seize sreet railway property as payment for back taxes.

Hudson's Bay Company.—The North Battleford city council are negotiating for the purchase of 375 acres of land at a price of $95,000, the intention being to create an extensive park. This is close to the present improved portion of the city and a subway, costing $50,000, is being constructed under the Canadian Northern Railway so as to afford safe access to the side of the city which this intended park site adjoins.

Nova Scotia Steel and Coal Company:—At the Sydney Mines plant of the company a new 50-ton open-hearth furnace, eqipped with Blair patent water cooled port ends, is approaching completion. The company for July shows 69,600 tons of coal from the mines, pig-iron, 7,100 tons; steel ingots, 7,500 tons and ore mined 53,600 tons. The ore shipment for the month was the largest in the history of the company amounting to 115,000 tons.

Dominion Steel Corporation.—The first quarterly statement has been issued covering the three months ended June 30th, showing earnings of 1⅜ per cent. on the common stock. The total earnings available for dividends are given as $705,262. From this is deducted the dividend on preferred stocks of the corporation and constituent companies, amounting to $245,000. This leaves $460,262, from which was taken the common stock dividend of one per cent., totalling $318,977, leaving a surplus of $141,285.

The British Columbia Permanent Loan Company.—The following is the result of the company's operations during the six months ended June 30th. After providing interest for accumulating stocks, deposits and debentures and expenses, the profits amount to $71,361, but of which $42,795 has been taken to pay a 10 per cent. per annum dividend on permanent capital, leaving $28,566 in profit and dividend account. This sum is increased to $50,001 by the addition of the balance carried from 1912, and premium account. Maturing payments on permanent stock sold last year on the instalment plan have been met with, all things considered, promptitude. The permanent capital stands at $868,241 and debentures have increased ten per cent.

The management tells *The Monetary Times* that conservative methods are being adopted to meet existing conditions and expansion is being left to brighter times.

Lake Superior Corporation.—*The Monetary Times* has received the following letter from Mr. T. Gibson, general counsel of the Lake Superior Corporation:—

> "I am informed that statements have been appearing in Canadian financial papers to the effect that the Lake Superior Iron and Chemical Company has made default in the payment if its bond interest. The assertion is also made that this is a Canadian company.
>
> "This is being copied in London papers and is doing Canadian companies a great deal of harm. The company in question is a Michigan company and not a Canadian company.
>
> "In justice to Canadian companies, I suggest that you might state in the next issue of your paper that the company referred to is a Michigan company and not a Canadian one."

Spanish River Pulp and Paper Company.—The Dominion Bond Company has made an arrangement with the syndicate from which the Spanish River Pulp and Paper Mills, Limited, purchased the shares of the Lake Superior Paper Company, Limited, for the distribution among the preference and common shareholders of the Spanish River Company of record July 28, of $900,000 of the common stock of the Spanish River Company, received by the syndicate on the sale of the shares of the Lake Superior Paper Company, Limited. Upon this distribution shareholders will receive a bonus amounting, as nearly as possible without adjustment of fractions, to 10 per cent. of their holding of the preferred stock of the Spanish River Company on July 28, and to 20 per cent. of their holdings of common stock of the company on the date. Certificates for the new shares will be forwarded on or about September 1, 1913.

Quebec Railway, Light, Heat and Power.—A correspondent writes *The Monetary Times* as follows.—

"From a French financial weekly printed in Paris, I read that Sir Rodolphe Forget has declined to pay the French stamp tax due to the government on July 15th on the 52,345 French bonds outstanding, the tax amounting to $3,000. If so, it is a good move, and it is to be hoped that he will pay neither the income tax nor the transmission tax, both amounting to about two and a quarter francs per bond, or about $25,000 for the whole.

"It is indeed a farce to pay a foreign government to be allowed to sell bonds in a country where none can be sold as the result of the shortsightedness of the politicians of the Canadian House who refused a guarantee which would not have been called for. It was reasonable to expect that the normal development of the traffic would allow the payment of interest without reference to the proposed guarantee."

Canadian Pacific Railway:—A circular announces that in accordance with the statement of January 3, 1913, an interest payment at the rate of 7 per cent. per share will be paid on October 15th next, on the first four instalments ($140), from the due date of each instalment to September 30, 1913, on the shares of the recent new issue of $60,000,000 capital stock of the railway, represented by the certificate of subscription.

This interest payment will be made to holders of the new stock of record at the close of business on August 18th, instant, who have paid these instalments on or before their due dates. The interest payments will be mailed from New York to the registered addresses of stockholders, or their attorneys, on the 14th of October next.

For the purpose of this payment the certificate of subscription book will close on the 18th of August, instant, at 3 p.m., and open September 18, 1913. All the shares of the new issue, when paid in full, will rank with the existing stock for the full dividend accruing for the quarter ending December 31, 1913, which will be payable on the 1st of April, 1914.

Canada Cement Company.—There has been considerable discussion concerning the cause of the advance in the price of the stock of the Canada Cement Company, which was accompanied by reports of large earnings and absorption of stock by English buyers. Interviews with Mr. Frank P. Jones, managing director of the company, did not give encouragement to the present rise. He knew no reason for the present advance. Mr. Jones further stated that the sales of the company were showing a decline owing to the money shortage. Many large undertakings were not being carried out as originally intended, owing to the difficulties large companies and municipal and other governments were experiencing in getting the necessary money. The capacity of the various plants of the company was about 12,000,000 barrels per annum while the consumption of Canada was 10,000,000 barrels.

Asked if it would be feasible for the company to issue quarterly statements, he said that such statements would be misleading to many people. From November to March, sales are at a low ebb, fully 80 per cent. of total sales being recorded in June, July and August. Consequently, a statement of the winter months would be disturbing to foreign bondholders who are not familiar with conditions in Canada.

ST. JOHN WANTS GRAIN CONVEYERS

Federal Government's Action Needed—Conditions in New Brunswick Are Good

The first week in August finds the general business situation in New Brunswick generally satisfactory, although the financial stringency is said to have made payments somewhat slower than a year ago. The merchants claim that so far as business in this province itself is concerned, the conditions are quite as healthy as they were a year ago. The industrial situation is good, the farmers have the promise of good crops, and a larger expenditure is being made on public works than was the case last year. Wholesale merchants report that there has been as large or larger volume of trade this year than last.

With regard to the crops, while hay is light in some parts of the province, it is a heavy crop in others and is being harvested in good condition. Grain also promises a good yield and the like is true of roots and vegetables. The potato crop, while the yield may not be unusually large, will be of excellent quality, and the farmers are not at all troubled this year by the potato bug. Some small fruits are a large crop, and others light. Apples will be a comparatively light crop, but they are not as important a factor in New Brunswick as in Nova Scotia or Ontario.

While the lumber trade is active all over the province, the saw mills at St. John have been idle for many weeks, because of a dispute about wages. The owners are ready to resume operations whenever the men return to work at the old scale of wages, but the latter have been encouraged to hold out by their ability to get other employment in the meantime. During the last week, however, efforts have been made by merchants in those portions of the city and suburbs where the men live who usually work in the mills, to bring the mill owners and men together and have operations resumed.

Will Make Shoes.

Not only have the citizens of St. Stephen liberally subscribed stock in a new shoe factory, but the town council has undertaken to provide the building. At a meeting of the town council last week the tender of Thos. Toal to erect a building at a cost of $10,855 was accepted, and the work of construction will begin at once.

Coal is now being shipped over the Gibson and Minto Railway from the coal mines in Queens County to Fredericton. Although the steel bridges on this railway have not yet been completed, temporary structures are in use and the rails have been laid over the whole line, making it possible to begin the shipment of coal. Among those who are interested in the coal mines are Sir Thos. Tait, the Robert Reford Company, of Montreal, and other outside investors. The mines will be developed more rapidly, since it is now possible to ship the product to points on the Canadian Pacific Railway, which also controls the branch railway now being completed.

The Partington Pulp and Paper Company at St. John has enlarged its plant, so that the output of pulp may be increased. It was intended to add four paper machines, but this has been postponed for the present.

The exports from St. John to the United States for the quarter ended June 30th, were valued at $741,000, the chief items being lumber and pulp, hides and skins.

Want Grain Conveyers.

There is still no assurance that the grain conveyers which are required will be constructed on three steamship berths at West St. John in time for next winter's business. The Canadian Pacific Railway, which will have its new million bushel elevator completed, refuses to build grain conveyers. The federal government had asked for estimates of the cost, but has not yet declared its intention to erect the conveyers. If they are not provided the port will lose some business next winter, for the facilities will not be equal to the demand upon them.

The Canadian Pacific Railway Company will lay down ten new tracks on an area filled in beside the new grain elevator in order to be able better to handle export business next winter.

The unusual amount of heavy construction work in progress in St. John is giving employment to large numbers of men, both mechanics and laborers. Work is still being done on several large contracts. Norton Griffiths and Company are making good progress with the breakwater at Courtenay Bay. The steel superstructure is being placed on the Canadian Pacific Railway grain elevator at West St. John. The Dominion Bridge Company have begun work on the superstructure of the new sugar refinery. The contractor for the foundation of the new highway and street car bridge between east and west St. John, has a large crew at work. The new Keith's Theatre on King Square is nearing completion. Despite the money stringency there is much more house building in progress in the city and its outskirts than there was last year.

While the real estate business is quiet in St. John at present, there is still a fairly steady movement and values are firmly held. Some outside capital is still coming in to pick up desirable properties as an investment.

New Timber License Law.

The new timber license law adopted at the last session of the New Brunswick legislature is now in force. The holders of licenses who desired to have them extended for a further period were required to pay a bonus, and also a slightly increased stumpage on all timber cut on the area under lease. Practically all of the operators have paid the bonus and secured renewal of their leases for another twenty-five years.

The department of agriculture of the province has decided to grant aid for the purpose of having a test made, for a period of five years, in the growth of alfalfa as a fodder crop. As a matter of fact, it has already been demonstrated, not only that alfalfa will grow and yield a good crop in New Brunswick, but that it will produce seed, and this native seed will germinate in the soil of the province. A vigorous effort under government auspices will now be made to encourage its cultivation on a large scale, to take the place of the heavy feed of which so much is imported every year from the western provinces. Successful production of alfalfa would revolutionize farming in New Brunswick.

M.C.M.

◆

COMPANIES CHANGING NAMES.

The name of Douglas Brenton, Limited, has been changed to the Albert J. Brenton Company, Limited.

The Canadian Publications, Limited, has changed its name to the Hart Press, Limited, and the capital stock of 5,000 shares of $10 each has been consolidated into 500 shares of $100 each.

The Vogel Company of Canada, Limited, has changed its name to the H. G. Vogel Company (Canada), Limited.

The R. and F. Manufacturing Company, Limited, has changed its name to the Rogers-Frankfort Company, Limited.

CANADA GOT TWENTY MILLION DOLLARS IN LONDON LAST MONTH

New capital issues in London during July indicated offerings of £21,892,000. This compares with £29,846,000 in July of last year. For the seven months ended with July the total offerings have been £173,062,000, against £150,829,000 in 1912 and £130,825,000 in 1911. The principal destinations of July's issues were: United Kingdom, £5,646,000; India, £64,000; the colonies, £6,648,000, and foreign, £9,534,000. According to figures compiled by *The Monetary Times*, Canada's offerings in London during July totalled £4,408,219.

For the seven months the principal destinations of the new capital issues were: United Kingdom, £31,227,000; India, £3,502,000; the colonies, £62,954,000, and foreign, £75,377. *The Monetary Times'* record of Canadian flotations in London shows that Canada has offered in that market for the seven months securities aggregating £24,170,325.

How quickly the supply of capital in London has been exhausted as a result of the recent rush of security offerings, among which were several Canadian issues, is indicated by the fact that the underwriters of the Buenos Ayres Pacific Railway issue have been themselves compelled to take 60 per cent. of the issue, says a London cable. The offering was made on July 25th, and was an issue of £1,000,000 5 per cent. bonds at 98.

The paint factory of the Great West Iron, Wood and Chemical Company, established in Prince Albert is now in full operation with a plant capable of turning out 1,000 gallons of finished products per day.

LITTLE DIFFICULTY IN FINANCING CANADA'S CROP MOVEMENT

Canadian Banks Have the Situation in Hand—Assistance of British Capital—How the Crop is Financed

Two London banks have agreed each to advance £500,000 in connection with this year's Canadian crop movement. As one London writer points out, that amount would not be even a noticeable extent of assistance. As a matter of fact, certain Scotch banks have for some time past made advances against grain shipments, and have done well by them, and it may be that others are about to follow suit, but such participation bears a small proportion to the work to be done.

British Banks Have Helped.

The demand of Canada for heavy funds during crop movement time is a natural one. It is the period when financial facilities are strained to the utmost, and help from any good quarter is acceptable. As "Canada" recalls, for some years past financial arrangements have been entered into between the Canadian and some British banks to assist in financing the movement of grain, and London bankers have found it such a satisfactory and remunerative business that they are only too glad to guarantee advances if necessary in a larger measure than before. The security is undeniably sound, and London bankers are enabled in many cases to earn quite substantial commissions merely by a guarantee without the emission of actual cash.

An English View.

Commenting on the proposed advances of the two London banks, the London Financial Times says:—

"It is particularly significant, however, that the offer was volunteered by the institutions in question, and this renders their services all the more acceptable. It is quite possible that the knowledge of such an important degree of financial support being available will render it unnecessary for the Canadian interests to take up the loan, and in this connection a great deal will depend upon the course of events during the next two or three months. It may be taken, however, that the severe stringency which was expected this year in connection with the crop movement all over the world will prove to have been exaggerated, and, while there may be a little scarcity of money in the height of the crop-moving season, it is not likely to be either severe or prolonged. In the event of the loan now offered being required, it will be carried out by means of ninety-day bills of exchange, renewable if necessary.

It is, of course, difficult to estimate the amount of the Canadian grain crop this year, but it will certainly be much larger than ever before, owing to the greater area under cultivation, while there is also the possibility of an increased yield per acre. It is, therefore, all the more desirable that the financial side of the situation should be arranged for well in advance. In Canadian circles particular importance is attached to the fact that the offer now made will very probably be repeated hereafter under similar conditions, thereby greatly relieving the anxiety which has been felt for some time past in regard to the rapid increase which is taking place in the amount of money required each year for the shipment of the Canadian harvest."

Banking System Can Handle Movement.

The anxiety in Canada regarding the amount of money required for the Canadian crop movement is not, we think, as great as our London contemporary indicates. The banks have the facilities provided by the emergency circulation for the movement. The establishment of central gold reserves, under the new Bank Act, also gives greater elasticity in this connection. The crop movement invariably creates a strain on the Dominion's financial machinery, but one of the admirable points of the Canadian banking system is its efficiency in handling the yearly harvest. A brief description of how the western wheat crop—the most important part of the harvest—is financed will give an idea of the working of the system. The operation is described, as seen from the inside of a bank, in Eckardt's (fourth edition) Manual of Canadian Banking, just published by *The Monetary Times*.

Moving the Western Wheat Crop.

During the summer, the banks prepare for the crop-moving by ordering large supplies of new bank notes from the bank note companies. Big parcels of these come in at more or less frequent intervals. At the head office, and perhaps at several depot branches, clerks are set to work countersigning them. Every year between August and the end of November, the amount of bank notes in circulation increases some $15,000,000. This increase is chiefly in fives and tens. Then there may be anywhere from $10,000,000 to $15,000,000 of notes withdrawn as worn out or disabled each year. To replace those withdrawn and to provide the fresh notes needed when the maximum circulation of one year exceeds the maximum of the preceding year, $20,000,000 might be required. If this $20,000,000 were half fives and half tens, three million notes would have to be got ready.

Credits of the Grain Firms.

Preparation for the crop is also made in another way. The grain firms arrange their lines of credits, and their respective banks undertake to advance the moneys needed for buying the grain. The manager of the Manitoba branch office is expected to keep himself informed as to the exact date on which grain deliveries will commence at his town. We may suppose that he has as his customer a grain-buying firm, with elevators at four or five points in the neighborhood, and which has arranged for a line of credit of $50,000. A few days previous to the expected beginning of deliveries the manager will arrange to have a supply of the bank's notes sent to the branch to augment his stock in hand. These are mere printed promises to pay, and represent no actual cash whatever.

The deliveries commence. The day before, the grain firm will come in with cheques for $6,000 or so, and will ask for cash to send to the points at which it is buying. Then, perhaps every day, the firm will require some cash—taking it in the bank's notes. It will begin by using its own capital, but that will soon be exhausted; then it begins to borrow under the terms of its line of credit.

Into the Elevators.

As fast as the grain is bought it is put through the elevators and loaded on cars for Fort William, Port Arthur, or Duluth, the terminal points on Lake Superior. As soon as a car is loaded, the railroad station agent gives the shipper the railroad bill of lading, made out for a round number of bushels—the capacity of the car. So the grain firm is receiving, day by day, the bills of lading for cars loaded from its elevators at its buying points. These bills of lading constitute the security it is to give the bank. It turns them in as cover for the loans. Day by day the loan gets bigger, day by day the bank's notes are rushing out. Every few days fresh parcels of notes are received from the depot branch that is supplying. In the meantime the cars are proceeding to the lake ports. The grain firm will, perhaps, sell from time to time to Winnipeg exporters, or to the big milling companies. For each sale it draws its draft on demand, or at sight, upon the purchaser, and instructs the bank to attach certain bills of lading to the draft. The bank applies the amount of the draft upon the firm's indebtedness, forwards the draft to Winnipeg, and instructs its branch there to "deliver documents attached on payment only." When the draft is paid in Winnipeg, the security is given up. So the account will run. The drafts covering sales of wheat are being applied on the debt; the purchases of grain are increasing it. The maximum of the credit, $50,000, may be reached, or it may not. As the deliveries begin to fall off, the demand for the bank's notes will slacken; and by-and-by the grain firm's indebtedness will begin to come down. After lake navigation closes, it may allow its elevators to fill up with grain to hold through the winter, to avoid shipping to the seaports, via all-rail route, which is expensive, and to save the storage charges levied by the terminal elevators at the lake ports. In that case a dead loan of some thousands of dollars may be asked for through the winter. In the spring the advance runs off.

Agents of Milling Companies.

Besides this grain dealing firm there will probably be several Winnipeg firms buying in the market at this point, as well as the agents of the two big milling companies, Lake of the Woods and Ogilvies. The operations of these would be financed in much the same way, but in Winnipeg banks.

After the process has been going on for some time, the bank's notes begin to come in again. They are brought in by the farmers, who deposit them, by the traders and merchants of the locality, and by the other bank or banks in town. Eventually, the receipts of notes exceed the payments, and the circulation is said to be contracting. In redeeming them the bank gives credit on its books, or, in the case of other banks, its supplement draft is on a settling centre.

Grain Accounts in Winnipeg.

To follow the process to the cities. There it is a case of the big exporting and milling firms sending out large amounts of cash to many points at which they have elevators, of their taking over or paying the drafts from country dealers and farmers—their indebtedness to the banks meanwhile growing to large proportions. The security against their advances consists largely of wheat in store at lake ports or milling centres. Their accounts are liquidated by sales and shipments from these points. A boat is loaded with grain for Buffalo for export via New York. The bank buys the lake bills of lading and carries them till they can be exchanged for an ocean bill and a sterling bill of exchange drawn on Liverpool or London. The sterling bill is sold in the New York exchange market and the bank has its money. Similarly with the exports via Montreal. When the sterling bill of exchange is drawn, with ocean documents, it can be negotiated in New York.

Utility of the Note Circulation.

The strong point about the Canadian method of financing the crop, that which enables the operation to be so easily done, is the use which is made of the bank notes. The extra $15,000,000 or so that is injected into circulation is not cash at all; it is merely a mass of credit instruments. It serves the purpose of a circulating medium every bit as efficiently as the hard cash which the United States banks are obliged to use. In Canada it is not a case of an existing stock of money being called upon to do extra work at crop-moving time; it is, instead, a case of an extra supply of credit instruments being called into existence specially to do that work. When the work is done, the extra supply vanishes and is seen no more till further need for it arises. The banks are able so easily to make the large loans to grain buyers because the grain buyers take the proceeds of the loans in the bank's own notes.

◆

TRADE WITH GREAT BRITAIN

According to official figures received from Mr. C. A. Wickes, British Trade Commissioner in Canada, the values of the imports from Canada and of the exports and re-exports to the Dominion during the first half of each of the years 1912 and 1913 were as follows:—Imports in 1912, $50,992,000, in 1913, $53,215,000. Exports of United Kingdom, produce and manufactures in 1912, $50,338,000, in 1913, $58,414,000; re-exports in 1912, $8,576,000, in 1913, $9,004,000. There was thus a substantial increase in 1913 under each head.

Among the principal articles were the following:—

Imports from Canada in 1913: Wheat, $15,909,000; wheat meal and flour, $5,235,000; bacon and hams, $3,029,000; cheese, $3,044,000; canned salmon, $2,377,000; wood, sawn or split, planed or dressed, $4,453,000.

Exports of United Kingdom produce and manufactures to Canada: Iron and steel and manufactures thereof (so far as distinguished in the monthly accounts,) $4,234,000; cotton piece goods, $5,310,000; woolen and worsted tissues (including carpets and carpet rugs,) $8,560,000; apparel, $2,403.000.

◆

GUARDIAN ASSURANCE COMPANY

The Guardian, one of the oldest British companies, having been established in 1821, commenced business in Canada in 1869, two years after confederation. The report presented at the company's annual general meeting held in London recently, showed that the premiums, after deducting re-insurances, amounted to $3,128,450, an increase of $157,880 in comparison with those of the previous year. The losses, after making the same deduction, amounted to $1,722,885, or 55.07 per cent. of the premiums. The expenses of management, including fire brigade charges and commission, amounted to $1,127,450 or 36.04 per cent. of the premiums.

The funds of the company as on December 31st, 1912, were as follows:—Capital paid up, $5,000,000; life assurance fund, $21,787,615; fire insurance fund. $4.141,750; accident, burglary and general assurance fund. $887,290; redemption assurance fund, $91,415; officials fidelity guarantee fund, $10,995; investment reserve fund, $225,000; profit and loss balance, $720,865; Total, $32,864,930.

The following figures show the business done by the Guardian Assurance Company in Canada last year:—Net cash received for premiums. $827,130; re-insurance and return premiums, $133,481; gross cash received for premiums, $960,611; gross amount of policies, new and renewed, $68,149,725; net amount of risk at date, $86,093,564; net amount of losses incurred during the year, $510,638; net amount paid for losses, $522,783.

The head office for Canada of the Guardian is at Montreal, where Mr. H. M. Lambert is manager and B. E. Hards, assistant manager. As will be seen from the above table, the company is doing a satisfactory business in Canada. The Guardian has total assets in this country of $1,257.086 of which bonds and debentures account for about one half.

CROP OUTLOOK IS GOOD

Reports From the West are Pleasing—Harvesting Has Begun

The crop outlook in Canada is excellent. Weather conditions are ideal and the immediate prospects are that they will continue so.

Mr. Andrew Kelly, of the Western Canada Flour Mills, Winnipeg, has returned from a tour of the prairie provinces and says if the present weather continues, Western Canada will have one of the best crops of recent years.

Crops in Saskatchewan.

The final figures of the Saskatchewan government's estimate of cultivated acreage and crop yield for the province are as follows:—

Wheat—5,707,137 acres. Increase 6 per cent.
Oats—2,369,905 acres. Increase 9 per cent.
Barley—307,209 acres. Increase of 15 per cent.
Flax—967,137 acres. Decrease 13 per cent.
Total yield of all grains is estimated at 270,670,000 bushels,

Total yield of wheat is estimated at 125,557,000 bushels, an increase of 17 per cent. over 1912.

The condition of the grain crop throughout the district tributary to Saskatoon is satisfactory, and the outlook is for a large yield per acre. Heavy rains, followed by many days of hot dry weather have brought along the growth to a marked degree and there is sufficient moisture in the country to carry the crop to maturity. The necessary steps are being taken with regard to the labor situation, and it is estimated that about 4,000 men will be needed in this district.

Crops in Manitoba.

Harvesting has begun at Gretna, Plum Coulee, Winkler, Morden, Brandon, Portage la Prairie, Arden and Stockton, according to a report received by the Manitoba Department of Immigration. There are a number of other places where harvesting was commenced this week, and in a large portion of Southern Manitoba cutting was in operation at the end of the week.

World's Wheat Production.

The estimated production of wheat this season in Bulgaria is 64,301,000 bushels; Spain, 110,100,000; England and Wales, 55,080,000; Italy, 198,417,000 bushels. The estimated combined total of Belgium, Bulgaria, Denmark, Spain, Italy, Luxemburg, Switzerland, United States, India, Japan, Great Britain, European Russia (Winter wheat) and Hungary, excluding Croatia and Slavonia, is 1,962,000,000 bushels or 100.2 per cent. of last year's production in these countries.

The estimated production of rye is, in Belgium, 21,964,000 bushels and Spain, 25,024,000 bushels. The combined total production of Belgium, Bulgaria, Denmark, Spain, Italy, Luxemburg, Switzerland, Russia (Winter rye) and Hungary, excluding Croatia and Slavonia, is 1,052,000,000 bushels, or 92.4 per cent. of last year's production.

Barley and Oats.

The estimated production of barley is, in Spain, 63,742,000 bushels; England and Wales, 46,450,000; Hungary, excluding Croatia and Slavonia, 75,609,000 bushels. The combined total production of Belgium, Bulgaria, Denmark, Spain, Italy, Luxemburg, Switzerland, United States, Japan, Great Britain and Hungary, excluding Croatia and Slavonia. is 539,000.000 bushels, or 92.0 per cent. of last year's production in these States.

The estimated production of oats is, in Belgium, 46,795,000 bushels; Spain, 26.838,000; England and Wales, 91,777,000; Hungary, excluding Croatia and Slavonia, 97.678.000, and Italy. 35,826.000 bushels. The combined total of Belgium, Bulgaria. Denmark, Spain. Italy. Luxemburg. Switzerland, United State. Japan, Great Britain and Hungary, excluding Croatia and Slavonia. is 1,410,000.000 bushels, or 80.8 per cent. of last year's production in these countries.

◆

IMPERIAL LIFE PRESIDENT'S TRIP

Mr. H. C. Cox. president of the Imperial Life Assurance Company. and Mr. Weston. the general manager, have been making an inspection trip in the prairie provinces and British Columbia. Mr. Cox has returned to Toronto, and Mr. Weston will be back in a few days. The company's president reports good business and prospects in life insurance. The Imperial's results for 1913 are likely to excel the record of last year's. Mr. Cox says that, despite the money stringency. Western Canada and the Pacific Coast have unbounded faith in their future.

GUARANTEEING MUNICIPAL LOANS BY GOVERNMENT BOARDS

Experts in Financial and Engineering Administration Would Have To Be Chosen—Present and Proposed Methods Compared

(Written for *The Monetary Times* by R. O. Wynne-Roberts, M. Inst. C.E., M. Can. Soc. C.E., Consulting Engineer, Regina).

Since writing the article which appeared in *The Monetary Times* last week on Canadian Municipal Loans, the Union of Canadian Municipalities has met at Saskatoon, and the subject of municipal loans occupied a prominent position in the programme of topics for discussion.

Mr. Sandford Evans, ex-mayor of Winnipeg, was the principal speaker on this subject, and some of his arguments were on lines more or less similar to those expressed in the first article. But he is reported to have gone a step further and suggested that the governments should appoint boards which should be empowered to issue bonds for consolidated municipal loans. Provided that the public was made aware of the fact in clear and definite terms that such loans or bonds would be for municipalities, and would under no condition be used for government purposes, Mr. Sandford Evans considered it would not affect the credit or borrowing powers of the governments; if, however, it was thought inadvisable to act in this manner, then he considered that the governments might at least give their assurance that the loans had been thoroughly investigated.

It will be instructive, if not also interesting, to study what such action on the part of the governments would entail or involve, as, although the fact that the first suggestion, namely, to appoint a board which shall be authorized to issue bonds to cover consolidated loans is more or less an innovation, inasmuch as it has not, so far as the writer is aware, been tried on a comprehensive scale by any government, except in a modified way by the British Government. Such a plan, nevertheless, suggests co-operation and stability.

Experts in Administration Problems.

Whether in the appointment of such a board empowered to deal with the consolidated municipal loans, it would be optional for all municipalities to voluntarily float their loans by this means and take full advantage of such facilities, or whether all authorities would have to do so willingly or otherwise, is a matter for future consideration.

Unless there would be some tangible monetary advantage, then it would seem unwise to make it compulsory, for hitherto every municipality has had absolute freedom in this respect.

Let it be assumed that such co-operation between the government and the municipalities is to be voluntary. Then to carry out such a scheme it will be essential that there should be an independent and impartial board consisting of men experienced in municipal administration, finance and engineering. These men should hold office ad vitam aut culpam—for life or fault—like our judges, public utility commissioners and railway commissioners, and be absolutely independent of politics, although appointed by politicians of their own color or otherwise. These men should be at full liberty to use their judgment within a prescribed limit imposed by statutory regulations. They should be provided with technical and clerical assistance, and be paid salaries commensurate with their experience and responsibilities. They should report annually to parliament on the work done during the year, and submit suggestions as to any improvement in the procedure, organization or law as may by them be deemed expedient in the interest of the government, municipalities and investors.

Having established such an independent board, it will be necessary to consider what might be the procedure to be observed when any municipal authority requires loans for public works, and it voluntarily desires the government to act as intermediary in the matter of the flotation of such loans.

How Scheme Would Work.

The Council of the city of Wynton (which, of course, is a suppositious name) has decided to apply for loans to carry out a water supply scheme, street improvement, and a sewerage and sewage disposal works at a cost of, say, $500,000. Plans, specifications and detailed estimates would be prepared by their engineer, and copies of the same would be forwarded to the board with a request that the above sum be included in the next consolidated municipal loan to be placed on the market. Full particulars as to population, indebtedness, etc., would be supplied on official forms and any other definite details given as may from time to time be found essential.

The board, or one of its members, would in due course hold a public enquiry in Wynton, when all matters relating to the scheme would be elucidated and any further information presented which might in the opinion of the council and its officials be considered essential to show the need of the schemes; that the town can afford to incur the expenditure; that the rateable values are fair and legitimate; that the schemes are the best for the town, and that they are not born of rivalry with neighboring towns. The evidence of the opposition, relevant to the schemes would also be considered. By this means the ratepayers who desired to be heard in favor or in opposition could present their respective cases and would receive equal consideration. By this means the ratepayers' interests would be protected, and this would constitute a valuable safeguard against injudicious expenditure. Moreover, the procedure and investigations would appeal to the investors as a sound businesslike assurance that the matter had been independently investigated before the loan was in any way placed on the market.

When the member of the Board has fully considered the matter of the proposed Wynton schemes, he and his colleagues would decide whether the loan should be authorized in full or in part, or to reject the same on grounds to be stated.

If this procedure is compared with the present one, it will no doubt be observed that there would be economy of time, as many formalities could be avoided, schemes could be submitted to the board at any time, and frequent plebiscite of the ratepayers on every item of capital expenditure could be obviated. Furthermore, the council would possess greater liberty of action and the ratepayers greater protection. The ratepayers, at present, do not take a very active interest in the matter of voting for or against money by-laws, as the number of votes cast in proportion to the number on the roll will testify. The tendency is to leave money by-laws to the council, who has been elected to represent them, and what it proposes is usually voted for. Occasionally, however, some of these by-laws are rejected at the poll, but this is more often due to personal rather than technical objections.

How Proposed Plan Is Worked.

Under the present plan, all municipalities can obtain money or loans by whatever means they choose to adopt and on what terms they consider reasonable. The larger municipal authorities ordinarily find no difficulty in obtaining money by the sale of debentures or stock, but the smaller ones are not quite so fortunately placed. Any authority which oversteps the bounds of judicious expenditure tends to create a suspicion in the minds of the investing public that others may be equally guilty, if all things were known. Under the above system there would be no room for such possibilities, as it would reflect on the board (and thereby also on the government), who placed the bonds for consolidated loans on the market.

Under the British arrangement the council, after receiving authority to borrow, can negotiate for the money with any financial concern.

Mr. Sandford Evans and Mr. Scrimmingar—the latter a London financier, and, therefore, in close touch with the pulse of the London money market—proposed that the government, after making the necessary inquiries, should invest powers in the board to issue bonds covering the amount required to provide loans to the municipalities, and that these bonds should bear the government's guarantee.

When it is considered that the government would have the securities of the rates and the municipal properties of the several municipalities, which the board would, of course, satisfy themselves as being amply sufficient to cover the liabilities, it would be a question in what manner would the government's borrowing powers be affected by undertaking to guarantee bonds for consolidating loans for such authorities. The cities and towns and villages are growing; the value of property is always on the up-grade; the rateable value, if properly assessed, would increase; the commercial and financial fluctuations would not in such a country as this be severe for long; the vitality of the communities under consideration is more virile than in older established countries; the people are much more enterprising, and anything which might cause a depression in any village or town would, under our conditions, soon be obliterated or surmounted.

Supervise Expenditure of Moneys.

The consolidation of municipal loans would nevertheless involve another duty on the board, and that is that it would have to supervise the expenditure of the money advanced, otherwise the government might possibly find that some of the loans had been diverted or used for other purposes or had been unwisely spent. The board could not effectively supervise the works and expenditure of the money, except in a general way, without employing a large staff of inspectors, and this would be unwise. To do more than watch the interests of the government would be tantamount to relieving the councils of their individual responsibilities, and this would militate against the scheme. The check on the councils would be found in another way. Suppose Wynton again applied for another loan, which it would inevitably do in the course of time, the application for another loan would mean another local enquiry, when all particulars would be submitted and minutely enquired into. If it was found that the previous loan had not been carried out, or the money had been spent injudiciously, this would be the occasion to apply the remedy. This is the method adopted by the British Local Government Board, and it has been found to be effective.

The question of whether the government, through an independent board, should consolidate municipal loans, and thereby possibly affect its financial standing, brings forward the argument that it is equally possible that if it does not do so, then it will be affected by the manner in which municipal loans are now floated. Governments and municipalities are closely allied. What affects one, often, if not usually, affects the other.

On the other hand, the assurance to the investor that each proposal to loan money has been carefully investigated by an independent board will inevitably be a satisfaction to them, and may result in the appreciation in value of such loans or bonds.

Interest British Financier in Smaller Towns.

At present the larger municipalities have the British market open to them, because London financiers rarely care to handle less than $1,000,000. It means just as much trouble to float a small loan as a large one, and the remuneration is, of course, in proportion to the sum required. Consequently, the smaller municipalities have to seek other markets for the disposal of their debentures, with the result that a 6 per cent. debenture has had to be sold for 91, whereas it should easily get, say, 95 to 98. Thus if several smaller municipalities placed their loans on the market through the board, it will open to them a new financial possibility, with material advantage to themselves and the country.

Furthermore, the introduction of British capital in this manner for the smaller towns and villages will also act as an excellent inducement to British investors to consider them more in the future in industrial enterprises.

The board might in time keep a stipulated amount of money as floating capital account for these towns and villages, same as is done in some German cities, and this will help to meet urgent cases.

Winnipeg, Regina, Edmonton and other prominent cities are so well known on the London exchange, and the financiers ordinarily want only the authoritative documents to advance the amount required, but in the case of our smaller towns and villages, they have the grave disadvantage of being comparatively unknown, and the amounts they want are too small to attract attention.

The prairie provinces have sufficient securities and have ample funds to command a very large amount of capital, and if guaranteed by the Government it would doubtless be available on easier terms than at present.

The problem is for our statesmen to evolve a scheme such as has been proposed. It is believed that the matter is being carefully considered by them, but it rests on the municipal authorities themselves whether any such action will be taken. The initiative must naturally come from without. Which of the Unions of Saskatchewan, Manitoba or Alberta will take such initiative?

◆

JULY FIRES

Point Pelee, Ont.—July 26.—Mr. F. Wigle's barns, etc. Loss, $3,000. Cause, sparks.

Harwich, Ont.—July 26.—Mr. J. C. McGuiggan's barn. Loss, $2,000. Cause unknown.

Dalhousie, N.B.—July 25.—Sydney Lumber Company's mill. Loss and cause unknown.

Matapedia, N.B.—July 28.—Business block on Intercolonial Railway. Cause unknown.

Brandon, Man.—July 28.—King Street School. Loss unknown. Cause, supposed incendiary.

Erie, B.C.—July 30.—Mr. J. J. Hickey's hotel and five other buildings. Loss and cause unknown.

East Oxford, Ont.—July 28.—Mr. B. Scott's barn. Lot 23, Con. 3, East Oxford. Loss and cause unknown.

Hull, Ont.—July 28.—Mr. A. Beaulie's residence, 28 St. Etienne Street. Loss, $30. Cause, overheated chimney.

West Templeton, Ont.—July 27.—Mrs. S. Maringer's barn, etc. Loss, $1,500. No insurance. Cause unknown.

Beaverton, Ont.—July 28.—Mr. R. K. Gunn's barns. Messrs. Jardine's barns. Losses unknown. Cause, Lightning.

Lethbridge, Alta.—July 31.—Western Canada Lumber Company's yard at Barons. Loss, $15,000. Insured. Cause unknown.

Fredericton, N.B.—July 24.—Mr. C. Kitchen's livery stable. Loss, $5,000. Partially insured. Cause, supposed defective wiring.

South Vancouver, B.C.—July 24.—Messrs. McGibbon and Hodgson shingle mill, 55th Avenue and Victoria Drive. Loss, $5,000. Cause unknown.

Orangeville, Ont.—July 31.—Mr. Fleming's barber shop., Adamson Hardware Store and Ritchie Brothers. Messrs. Ritchie Brothers store. Loss, $30,000. Cause unknown.

Forest, Ont.—July 28.—Mrs. Bannister's barn, concession 14, Plympton. Loss, $1,750. Insurance, $750. London Mutual. Mr. Steer's. Loss, $1,200. Insurance, $400. London Mutual. Cause, lightning.

Ottawa, Ont.—July 24.—Mr. M. Whalen's residence. Eardley Road, Aylmer. Loss, $1,000. Cause unknown.

July 25.—Mr. E. Dawson's residence, 1017 Bank Street. Loss, $20. Cause, overheated stove.

Winnipeg, Man.—July 21.—Mr. P. J. McRal's residence, Ashburn Street. Loss, $3,700. Cause, boy playing with matches.

July—23.—Two houses on Dominion Street. Loss, $8,000. Cause, supposed plumbers torch.

Montreal, Que.—July 26.—Mr. F. C. Nursey flat, 2602 Esplanade Avenue. Loss and cause unknown.

July 31.—Sawmill on St. Lawrence Street, owned by Mr. Fishman, 58 St. James Street. Loss, $13,000. Insurance, $10,000. Other buildings. Loss, St. Lawrence Fur Company, 1236 St. Lawrence Street, $2,500; a barber shop belonging to S. Zaner, No. 1238, $500; and the photographic supply business of S. Zeigler, $1,000.

Toronto, Ont.—July 28.—Mr. S. Phillip's planing mill and garage, 943-5 Keele Street. Loss, $150; 1-15 Saunders Avenue. Loss, building, Mr. Creech, $1,500; contents, Messrs. Campbell, $4,000; Kilburn Medicine Company. Loss, $2,000. Latter loss adjusted by Ross and Wright, Toronto. Mr. J. Watson's residence, 499, Palmerston Boulevard. Loss, $20. Cause, gasoline; 89, Miller Ave. Loss, Miss B. Heydon, $500. Ross and Wright, Toronto, adjusters for the assured.

July 30.—E. Flavelle, fruit dealer, 686 West Queen Street, building owned by McBride Estate, 145 Havelock Street. Damage to contents, $50; H. Battaglia, fruit dealer, 688 West Queen Street. Damage to contents, $50. Building owned by the McBride Estate; R. C. Warriner, pork store, 690 West Queen Street. Damage to contents, $2,500; Samuel Arrigo, fruit dealer, 692 West Queen Street. Damage to contents, $300; damage to house of Dr. Watson, on Euclid Avenue, $50; The four buildings and the stables in the rear of the stores were damaged to the extent of $5,000, but were insured. Total loss, $7,000. Cause unknown.

July 31.—Central Press Agency, 70-76 Pearl Street, electro and stereotypers. Loss on building, $50,000, machinery, $10,000; Hall, Borchert Company. Loss, dress goods, $5,000. All covered by insurance. Cause unknown.

Louiseville, Que.—July 31.—Loss, $200,000. The buildings that are burnt include the following:—

Mr. J. E. Beland's house and shirt factory. Loss, $35,000.

Mr. Francis Trepanier's house and store, $10,000.

Mr. L. Asselin's house and shoe store, $10,000.

Mr. Gerard Chevalier's small factory, $3,000.

Mr. J. Bourret's house, store, stables, horses and vehicles, $25,000.

Mr. Alfred Plourde's stable and shed, $500.

Mr. L. O. Nobert's buildings, including damage to store, $1,200.

Eugene Bellemare, house shop and workmen's tools, etc., $4,000.

O. Pichette, bakery and goods in store, $3,500.

H. Dupuis, building, $800.

All the stores and houses were burnt to the ground and contents destroyed.

The following people also suffered:—

Ovila Desrosiers, damage to house, $800.

Dr. O. E. Milot, damage to house, $500.

T. Vanasse, damage to house, $500.

The losses are only partly covered by insurance. Cause unknown.

◆

Brazilian Traction may be listed on the Paris Bourse.

The steamer Waimate, from Montreal to New Zealand, at the Dominion Steel Company's pier, loaded 300 tons of wire for New Zealand. Waimate is the new freight and passenger steamer of the recently organized Canada-New Zealand steamship line, and is making her first trip on the new route.

MINING FLOURISHING IN BRITISH COLUMBIA

Large Output Last Year—Victoria to Have Public Market

(Staff Correspondence.)

Vancouver, August 4th.

Authoritative figures of the mine production for 1912 are given in the annual report of the department just issued by the provincial government. The showing is satisfactory, since there is a large increase over both 1911 and 1910. Conditions were not favorable in 1911 for a normal output, and for that reason production declined. Any deficiency has been more than made up in 1912, and the figures show that considerable progress is being made in this important industry. The large companies are extending their interests, and news from the interior parts of the province indicate that smaller holders are becoming more active.

In 1910, the output of mineral products was valued at $26,377,066, and in 1911 the aggregate was $23,499,072. In 1912, there was an increase to $32,440,800. The gratifying feature is that the increase was not confined to any section of the province, meaning that activity was greater in metalliferous mining as apart from coal mining. This is further shown in the production of lead and copper. Taking 1910, the last previous year of larger production, the quantity of lead mined amounted to 34,658,746 pounds, while in 1912 the amount was 44,871,454 pounds. The amount of copper was 38,243,934 pounds in 1910 and 51,456,537 pounds in 1912. The amount of gold mined in the two years mentioned was about the same, the production of coal being less, so that all the increase was in silver, lead, copper and zinc.

Victoria to Have Public Market.

The city of Victoria is to have a public market, the first institution of its kind in that city. A site has been secured, and nearly all the space has been contracted by ranchers living in the territory near to Victoria. Under conditions that have existed, the producer cannot get to the consumer, with the result that local products are not given adequate representation. This has been felt during the past year or two. In the Okanagan, a central exchange has been formed, and, while this is dealing through the middleman, the day may come when they may have their own market in the larger cities and sell direct. On Vancouver Island, special attention is being paid to market gardening, and in recent months many people have taken up holdings not only in the Saanich peninsula, but along the route between Victoria and Nanaimo, and beyond. A public market will enable people in the city to see what is produced and to get a selection at a reasonable price when the products are freshest.

The provincial government has been doing what it can to help market the fruit products of the interior. To have packing uniform and up to grade, the packing is not done by the individual growers, but at central warehouses by expert packers working under a competent inspector. In connection with this organization, a contract is to be filled to supply 20,000 boxes of red apples to the Antipodes at $1.40 per box.

Busy on Howe Sound.

With the prospect of the Pacific Great Eastern being constructed within the next few years, companies are getting locations at the upper end of Howe Sound. One of these is the Howe Sound Power Company, which proposes to erect a power-house, grain elevators and an ice plant. It is being brought to public notice particularly through the objection raised by the Britannia Mining Company that the plans entail the taking of too much water from Furry Creek. While the line of railway north from Burrard Inlet to Fort George is being built under the name of the Pacific Great Eastern, it is generally known that it will be the southern route of the Grand Trunk Pacific, and will carry considerable traffic to this harbor from Fort George Junction.

◆

MODERN GRAIN HANDLING PLANT.

The new terminal elevator being built for the Fort William Elevator Company at West Fort William, commonly known as the David Horn elevator, is assuming a finished appearance. The building when completed will be one of the most modern and up-to-date grain handling plants on the continent. The storage house consists of forty-eight round tanks and thirty-five interspace bins, ninety feet in height, with a capacity of 1,500,000 bushels. The work house portion contains thirty-two circular bins and sixteen outer-space bins with a capacity of 500,000 bushels, so that the total capacity of the elevator will be 2,000,000 bushels. The special feature of the elevator is the drying plant to be used for the treatment of tough or damp wheat; 1,000 bushels of grain per hour can be put through the drying process without any difficulty.

VALUE OF LIFE INSURANCE

XXIV.

The Best Method of Employing Small Savings

BY C. A. HASTINGS.

Let any man, who has bought different investments, look up the records of the concerns he has invested in; let him also look up the records of other concerns—in short, study all the records, which, in England, can be found in the Stock Exchange Year Book, and he will discover the number of times prices have fluctuated, and how often they have been quoted at a discount; how many companies have re-constructed in order to turn over a new leaf and start again, and so forth. I again point out that the man with small means, without training, without stamina, is acting very unwisely if he dabbles in anything of the kind.

The best possible purchase for him is life assurance in some form or another, for not only does it create an immediate estate, but it is earning good interest.

Certainty of Results.

An assurance policy may not be so tempting, as other securities, but, in the case of a life policy, results are sure and the risks are nil; whereas in other securities, much is offered, but what proportion of it is carried out? Many a tempting proposition is offered to every man in course of time, and the speculative chance of trebling his money, and so on and so forth, is a bait that is very palatable, but beware of the hook that is hidden.

As is pointed out by the "Joint Stock Companies' Journal," history has shown that the Britishers are always willing to accept all kinds of risks, and that is why the sun is always shining on the Union Jack. But what he is most ready to risk is his skin, nevertheless, in these days of speculation or investment, call it what you like, in acres and in lots, thousands of men and women too, in all classes and conditions, have been, and are still, trying to follow the get-rich-quick idea which seems infallible to them.

Uses of Insurance.

I have illustrated in previous articles the usefulness of insurance to an employee; to the man who wants to buy a business; to the man who wants to raise a loan; to buy out a sleeping partner, and so on, and these, with the others I have written, all go to show what a splendid thing is Life Insurance, yielding—as it does—good interest, and being absolutely solid from the point of non-depreciation of capital.

> "Then old age and experience, hand in hand,
> "Lead him to death and make him understand,
> "After a search so painful and so long,
> "That all his life he has been in the wrong."

The following articles in this series have already appeared:—

◆

Negotiations for reciprocal trade relations between Canada and Australia, which were temporarily suspended in consequence of the Australian Federal elections, have now been resumed. Mr. Ross, the Canadian Trade Commissioner, acting for Hon. George Foster, says, that while finality has not yet been reached there is every hope that a mutually satisfactory arrangement will ultimately be made, provided no political difficulties present themselves.

CANADA TO BE REPRESENTED

On International Convention of Insurance Commissioners —Accident and Health Agents

The presence of two insurance supervising officials of Canada at the annual meeting of the National Convention of Insurance Commissioners recently held at Burlington, Vermont, may result in making the body of international importance. At one of the sessions Commissioner Preus of Minnesota presented an amendment to the constitution changing the title from National to International and making supervising officials of Canadian provinces eligible to membership. At Mr. Preus' request action on the motion was deferred until the December meeting in New York. Appreciation of the proposed amendment was made by Colonel Gunther, Superintendent of insurance of British Columbia, who also thanked the convention for an earlier resolution expressing its felicitation on the presence of two delegates from across the border, the other being Mr. A. E. Ham, inspector of insurance for Manitoba.

Mr. Ham invited the convention to meet at Winnipeg either in 1914 or 1916 and the invitation will probably be accepted for one of these years.

Supervision of Agents.

Henry D. Appleton, deputy superintendent of insurance of New Jersey, in a paper on the supervision of accident and health agents, offered the following suggestions:—

"1. Certification of agents by company.—That when the appointment blank in use by State departments merely provides for the appointment of an agent without in any sense certifying to his character, such blanks be amended so as to require a certification that the company has investigated each agent designated and certifies that his record is satisfactory; and, in the case of a newly appointed agent, that the company has satisfied itself as to his trustworthiness and competency.

"2. Filing statement of cause of cancellation of agent's license.—That when a company cancels an agent's license it should file with the department a statement of the facts causing such action.

To Refuse Certificate.

"3. Power given superintendent to refuse certificate.—That the supervising insurance official in every State—at least in the case of agents of health and accident companies—shall be given authority to refuse a license for good and sufficient reason.

"4. Profit-sharing contracts.—That the convention go a step further than did the Milwaukee convention when it adopted a resolution regarding profit-sharing contracts, by committing itself to a policy which will not permit any company to have profit-sharing contracts with its agents. Existing conditions seem to call for the abolition of all profit-sharing contracts.

"5. Twisting.—That the various State departments follow the procedure adopted in New York last October when each company was notified in the event of application being made by another company for the licensing of a man already recorded as agent for the first company.

Laws of Incorporation.

"6. Amendment of laws affecting incorporation.—That the laws of many of the States should be so amended as to increase the capitalization requirement for corporations intending to carry on the business of health and accident insurance. This field is now overcrowded, and to properly protect the insuring public, incorporations of this character should be discouraged—not encouraged."

A number of other interesting papers were read at the convention.

INQUIRY FOR HARDWOODS AND MARBLE

In connection with the large addition to the offices of the Hamburg-Amerika Line in Hamburg, Canadian Trade Commissioner C. F. Just, Hamburg, is endeavoring to interest Canadian exporters of marble and hardwoods.

The new building is to be a very ornate structure, and when Commissioner Just suggested to the Director-General that Canadian products could probably be used to advantage in its construction, he at once requested that samples should be forwarded. In the line of woods to be used, birdseye and curley maple would probably be most desirable for interior finishing. Canadian limestone and serpentine marbles could be utilized for the entrance and stairways.

Samples of marbles, in rectangular slabs half an inch thick and a foot square, together with specimens of hardwoods, might be sent to Mr. Just's office, giving f.o.b. Montreal.

NEGRO AND INDIAN MORTALITY

Synopsis of Results of Medico—Actuarial Mortality Investigation

The second volume of the Medico-Actuarial Mortality investigation deals briefly with the mortality among negroes and also among North American Indians. The negroes were divided into two classes:—

A—Teachers and other professional men.

B—All other colored men.

The mortality was measured by the average experience of the forty-three companies in the investigation. This standard table was prepared from the experience on average lives accepted at the regular rates of premiums by the insurance companies, and is known as the M. A. mortality table. The expected deaths are calculated by that table, which takes account of the age at entry and the duration of the policy. When the ratio of actual to expected deaths is 137 per cent. it means that the mortality is 37 per cent. greater than the normal mortality experienced by the companies on risks accepted at the regular rate of premium.

Mortality Higher Than Among Whites.

The following is a synopsis of the results of the investigation into the mortality among negroes:—

	Actual deaths.	Expected deaths.	Ratio of actual to expected.
Ministers, teachers and other professional men	202	147	137 %
All other colored men..........	792	540	137 %

It is evident from the foregoing that even when colored men are carefully selected by the companies the mortality is higher than among white men of the same age. The foregoing investigation was based on the experience of the companies on nearly 22,000 colored men.

North American Indians.

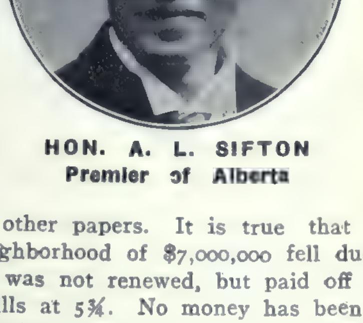
The companies did not insure a large number of North American Indians, the total number accepted at the regular rate of premium by all the companies during the twenty-four years (1885 to 1908) being 1,400. The following was the result:—

Actual deaths	47
Expected deaths	38
Ratio of actual to expected deaths	124 %

Notwithstanding great care in the selection of risks, the companies had a mortality among the North American Indians of twenty-four per cent. in excess of the corresponding mortality among white men.

ALBERTA'S FINANCES IN GOOD SHAPE

Hon. Arthur L. Sifton, premier of Alberta, a province that bulks large in the world's eye just now, tells *The Monetary Times* that no attempt has been made by the province to borrow new money, and, therefore, no failure has occurred in any Albertan flotation, as erroneously reported in New York and other papers. It is true that a loan of in the neighborhood of $7,000,000 fell due on July 1st. This was not renewed, but paid off by a new issue of bills at 5¾. No money has been borrowed by the province from any bank or individual at a higher rate than 6 per cent.



HON. A. L. SIFTON
Premier of Alberta

The outlook generally in Alberta is good.

GOOD REPORT OF MONTREAL TRAMWAYS

Company Earned Dividends and Charges and Carried Liberal Balance to General Surplus

Monetary Times Office,
Montreal, August 6th.

The annual meetings of the Montreal Tramways Company and of an associated company, the Canadian Light and Power Company, were held here on Tuesday. The Canadian Light and Power Company, together with the Tramways Company, in the main make up the Montreal Tramways and Power Company, which is a holding concern. The directors were not extravagant with information concerning the Canadian Light and Power Company. They gave out no information whatever concerning the earnings. This was doubtless in part owing to the fact that the public is not financially interested in the Canadian Light and Power Company. The Tramways and Power Company owns the stock with the exception of a few shares. In connection with the company, Mr. F. Howard Williams, president, stated that the connected load on its system amounted to 26,538 horse-power. The number of light customers was 5,144 and power customers 581. The directors were re-elected.

First Twelve Months' Report.

The financial statement of the Montreal Tramways Company was satisfactory from the shareholders' standpoint. This report is the first which has appeared for a full twelve months' period. The previous report was for a nine months' period, and consequently, it is impossible to make comparisons. However, there is no question that the company has done better during the past year than was ever done before in the street railway business in Montreal.

The profit and loss account for the year ended June 30th, 1913, was as follows:—

Gross earnings		$6,754,227
Operating expenses		4,032,664
Net earnings		$2,721,563
From which deduct:—		
City's p.c. on earnings	$489,080	
Interest, bonds and loans	721,152	
Interest, debenture stock	800,000	
Taxes	73,000	
		2,083,232
Net income		638,221
Dividends		156,382
Surplus		$ 481,949
Less:—		
Proportion of discount on bonds sold	$ 63,714	
Transferred to contingent account	200,000	
Transferred to capital reserve	23,670	
		287,384
Transferred to general surplus		$ 194,565

Statement of Liabilities.

The statement of liabilities shows the following securities:—

Common stock subscribed		$3,000,000
Less unpaid and subject to call		818,790
		$2,181,210
Debenture stock		16,000,000
First and refunding mortgage 5 per cent. bonds		13,335,000
Underlying bonds—		
4½ per cent., due August, 1922	$ 681,333	
4½ per cent., due May, 1922	1,500,000	
4½ per cent., due May, 1922	2,238,667	
	$4,420,000	
Less redeemed	524,713	
		3,895,287
Mortgages		36,863
		$35,448,360

Further statistics are:—

Expenses, per cent. to earnings	59.71 %
Passengers carried	159,892,021
Car earnings per passenger	4.09c.
Transfers	53,505,304
Car earnings per passenger, total carried	3.06 %

Securities Issued this Year.

President Robert explained that $200.000 had been appropriated from the surplus for the contingency account, this being in addition to the $300,000 appropriated from the earnings for the same purpose. This, added to an amount previously credited to this account, makes a total of $627,648, against which had been charged $442,892, leaving a balance to the credit of this account of $184,756. During the year the company had spent on capital account the sum of $796,008. Also, $2,890,000 of 5 per cent. bonds had been issued during the year, and from the sale of these bonds there still remains at the credit of the company in Harris Trust and Savings Bank, Chicago, $1,637,953. In addition to this, 9,993 shares of the common stock of the company have been sold to shareholders of the company at par during the year.

The following exclusive franchises have been granted to the company: Parish of St. Laurent and town of Mount Royal, each 25 years; Pointe Aux Trembles and Montreal East, each 40 years.

During the past year an interim dividend of 5 per cent. was paid, and a dividend of 2½ per cent. for the last quarter of the year was payable on the first of this month. The company not only earned its dividends and charges, but was able to carry a liberal balance to general surplus.

◆

PERSONAL NOTES

Mr. A. Scott Ives has been elected a member of the Montreal Stock Exchange.

Mr. A. E. Ham, inspector of insurance, Manitoba, was a visitor to Toronto this week.

Mr. John A. Tory, Toronto, manager of the Sun Life, is back from a vacation in Nova Scotia.

Mr. Arthur Stewart, formerly manager of the National Trust Company, Toronto, and lately in business for himself at Winnipeg, is dead.

Mr. George Boyd Wickes, who is promoting the Empire Life Insurance Company, has returned to Toronto from a business trip to England.

Mr. J. J. Salmond, managing director of *The Monetary Times*, is making a business trip to Winnipeg, Minneapolis, Chicago and New York.

Mr. George S. Berry, drygoods manufacturer, of London and Warminster, Wilts., was a visitor to *The Monetary Times* head office. He is seeking business in Canada.

Mr. J. J. McIntosh, New York and Mr. W. G. Ross, formerly general manager of the Montreal Street Railway, have been elected directors of the Montreal Tramways Company.

Hon. George E. Foster, Minister of Trade and Mr. Richard Grigg, chief Canadian Trade Commissioner, have completed their commercial mission in the far East and are returning to Ottawa.

Mr. A. C. Baillie, manager of the Nova Scotia Fire Insurance Company, now taken over by the Home Insurance Company, will be appointed superintendent for Canada of the Nova Scotia Fire Underwriters.

Mr. S. Cole Evans, brother of Mr. Pollman Evans, who was recently superintendent of the Union Life at Vancouver, has joined the Metropolitan Life and has been appointed a superintendent of that company in California. Mr. Pollman Evans is in Europe.

◆

EMPLOYERS' LIABILITY ASSURANCE CORPORATION.

One of the largest assurance companies of England, the Employers' Liability Assurance Corporation of London, has just presented its thirty-second annual report. The premiums of the year are $8,418,721, against $6,837,722 for 1911. The balance of this year's account is $7,534,562. Out of this the directors paid an interim dividend of 97c. per share and a further dividend of $2.43 per share (free of income tax) making together a dividend of $3.40 per share for the year. This will absorb $340,000, leaving $7,194,562 to be carried forward.

The company does a large business in Canada for which branch it has offices at Montreal and Toronto. Mr. Griffin and Mr. C. W. I. Woodland are managers for this country. Both are capable and energetic underwriters and largely to their efforts are due the good results achieved in the Dominion. The company writes personal accident, insurance, employers' liability, guarantee and sickness.

The following are the investments of the company as on December 31st, 1912:—

British and Colonial Government securities, $395,789.39; foreign Government securities, $1,334,375.88; foreign and Colonial municipal securities, $2.301,256.26; railway and other debentures and debenture stocks, $4,403,001.06; preference and ordinary stocks and shares, $154,013.47; Hamilton House, $318,536.63 and redemption fund investment, $39,743.44—$358,280.07; freehold premises, $21,409.11; loans on security, $55,966.67; $9,024,091.91; less (to write down to below market value), $472,066.67; total, $8,552,025.24.

Messrs. Griffin and Woodland report an excellent business to date this year. They are careful in selecting risks with the result that their company is doing a profitable business and has a good reputation in Canada.

REVIEW OF THE MONTH

Canadian Flotations in London—Investment Offerings —Dividend Changes

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were among those made in Canada during July:—

William Neilson, Limited.—$300,000 six per cent. first mortgage 20-year sinking fund gold bonds at par.

Progressive Builders, Limited.—$200,000 shares of common stock at $1 per share.

British Canadian Brick and Coal Company, Limited.—$200,000 seven per cent. preferred stock at $10 per share with a bonus of 25 per cent. common and $300,000 common at $10 per share.

Eastern Cafeterias, Limited, Montreal.—$50,000 seven per cent. preferred cumulative and participating, and $100,000 common stock. Par value of shares $10 each.

NEW STOCK EXCHANGE LISTINGS

The Ottawa Light, Heat and Power Company, listed 8,000 additional shares on the Montreal Stock Exchange.

The Canadian Car and Foundry Company listed $500,000 on the Montreal Exchange.

Illinois Traction Company listed 88 additional shares on the Montreal Exchange.

CANADIAN FLOTATIONS IN LONDON IN JULY

The following flotations of interest to Canadians were made in London during July:—

Imperial Loan and Investment Company.—£400,000 5 per cent. 1st mortgage debentures at 89, with a full half year's interest payable on October 15th.

Grand Trunk Railway Company of Canada.—£1,500,000 five-year, five per cent., secured notes, dated 1st October, 1913, due 1st October, 1918, at 98 per cent. payable as follows:—5 per cent. on application, 30 per cent. on allotment, 30 per cent. on August 30th, 1913, and 33 per cent. on 30th September, 1913.

Canadian Car and Foundry Company.—£308,219 6 per cent. 1st mortgage gold bonds at 107.

British North American Tobacco Company.—5,000 shares of $5 each at $5.25 per share.

J. H. Sherrard Manufacturing Company.—£150,000 7 per cent. cumulative preferred shares at par.

Canadian Northern Railway Company.—£800,000 4½ per cent. guaranteed debenture stock at 95.

Winnipeg City.—£690,000 4½ per cent. consolidated stock at 97.

Vancouver City.—£510,000 4½ per cent. debentures at 95.

DEBENTURES AWARDED

Lethbridge, Alt.—$427,522 local improvement straight term bonds. About $300,000 have been sold to Messrs. Wood, Gundy and Company, Toronto and the balance are under option to the same firm until to-day. Part of the balance has already been taken up. A further issue of $362,500 is being made by the city.

Weston, Ont.—$2,000 debentures for purchase of public library site.

Saskatoon, Sask.—(Schools) $20,000 debentures, to Messrs. Wood, Gundy and Company, Toronto.

New Glasgow, N.S.—$60,000 5 per cent. debentures, to the Eastern Securities Company.

St. Stephen, N.B.—$12,000 5 per cent. debentures, to the Eastern Securities Company.

◆

Mr. J. B. McKechnie, M.A., F.I.A., F.A.S., who was among the successful candidates in the recent examinations of the Institute of Actuaries of Great Britain, graduated in 1903 from the Queen's University as medalist in mathematics, he joined the actuarial staff of the Manufacturers Life Insurance Company. He was elected Fellow of the Actuarial Society of America in 1908, and received the appointment of actuary of the Manufacturers Life in March, 1909, which position he still holds.

JULY BANK CLEARINGS.

The following are the returns of Canadian Bank Clearing Houses for July, 1913, and June, 1913, with percentage increase or decrease over July, 1912:—

	July, 1912.	June, 1913.	July, 1913.	Ch'g %

BANK CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Bank Clearing Houses for the weeks of August 8th, 1912; July 31st, 1913; August 7th, 1913, with percentage change:—

	August 8th, 1912.	July 31st, 1913.	August 7th 1913.	Chg. %
Montreal .	$57,825,518	$50,197,842	$51,344,791	—12.6
Toronto* ..	*39,117,524	38,731,816	37,252,255	— 4.005
Winnipeg .	24,602,076	23,736,777	26,041,399	+ 5.5
Vancouver	12,455,185	9,836,892	11,419,203	— 9.06

*Five days only.

EDMONTON SIZING UP CONDITIONS

On Monday morning, a special train left Edmonton carrying sixty-five heads of Edmonton wholesale and industrial enterprises. The train will cover as much of the territory commercially tributary to Edmonton as can be covered in the seven days at the disposal of the party. The train will travel about 2,200 miles, and stop at about seventy towns with which the Edmonton shippers are doing business. The party will be on the train for seven days and eight nights. There will be represented in the party 24 wholesale houses, 21 industrial concerns, and 11 financial institutions.

CASE OF ARSON.

Harry Brown, incendiary, has been committed for trial at Orangeville, Ont. On July 26, Brown set fire to the residence of the ex-Reeve of Mono, Hilliard Anderson, during the absence of the family. There was a large assortment of jewelry, recovered by High Constable Marshall, produced in Court.

The accused, having been duly warned, stated that he had fired Anderson's house by putting a match to the hired man's bed upstairs and to Anderson's bed on the ground floor. He was a Barnardo boy, in the country nine years.

MUNICIPAL FINANCING IS ACTIVE

Lethbridge Has More Bonds to Sell—Edmonton Gets Funds

The city of Lethbridge, Alberta, wants tenders for the following straight term bonds:—

Purpose.	Interest.	Years.	Maturity.	Amount.
Shortages under by-laws Nos. 62, 97, 101, 122, 149 and 151	5%	10	1923	$ 14,500
13th Street subway	5%	30	1943	42,000
Street Railway shortages under by-law 132	5%	30	1943	141,000
City's share, local improvements	5%	30	1943	165,000
				$362,500

The principal is payable at the end of the term. The denomination of each debenture is £100 with currency equivalent payable at the Bank of Montreal, London, England, New York, Montreal, Toronto and Lethbridge. The interest is payable on January 1st and July 1st, with interest coupons attached. Delivery is to be made at the Bank of Montreal, Lethbridge.

North Battleford's Financial Position.

North Battleford's assessment roll, just completed, shows a large increase over last year, being $10,034,137 for general assessment purposes, whereas for 1912 it totalled $5,579,397. In making up the assessment 100 per cent. of the value of the land has been taken and only 30 per cent. of the value of the buildings. It is expected that in two years at least the city of North Battleford will have adopted the single tax policy, when no taxes will be levied on buildings. The assessment in 1911 was only $1,498,821, which included 60 per cent. of the value of buildings. Reports state that the tax rate will be in the neighbourhood of 15 mills, an increase over 1912 of 3 mills. In the assessment there is fully 30 per cent. of the land within the city limits assessed on acreage, held mainly by the Hudson's Bay Company and the Canadian Pacific Railway.

The bonded indebtedness of the city at June 30th was $549,839.08. The sinking fund to redeem these debentures is being put aside annually, and the city council have adopted a policy of loaning the sinking fund on first mortgages to citizens putting up new buildings within the improved area of the city. The rate of interest secured on these loans is double the rate payable on the bonds. Thus the sinking fund, in the interim, is put to work for the development of the city. With this loaning policy, however, *The Monetary Times* disagrees and the British Columbia municipal commission has also reported against it.

Saskatoon's Assessment Details.

The following is the civic assessment of Saskatoon in detail for the current year:—Land, $54,452,090; improvements, $3,572,215; business, $1,977,867; income, $7,120; total, $60,009,292; exemptions, $3,714,075; net, $56,295,217. This is an increase of 41 per cent. upon last year's assessment, which totalled $39,867,335. The tax rate is 19 mills.

Mayor Harrison and Alderman Young, of Saskatoon, are in Chicago on business connected with the sale of the city's bonds. The sale of civic securities to the extent of $918,000 is anticipated, with the possibility of a further sale to the extent of $1,000,000.

Bidders for Halifax Loan.

The amount of the recent Halifax 4½ per cent. loan was $299,750, due July 1st, 1945. The following tenders were received:—J. A. Chisholm, Halifax, for $12,000, at 90.

Messrs. J. C. McIntosh and Company, conjointly with the Eastern Securities Company, of Montreal and St. John, and Messrs. J. M. Robinson and Sons, $150,000, 84.44, or for 5 per cent. debentures, 96.50.

Messrs. N. W. Harris and Company, of Boston, 89.125, on condition that the interest and principal are payable at Boston or New York.

The loan was awarded to Messrs. N. W. Harris and Company. A loan, not advertised, for about $120,000, for school purposes, 4½ per cent. debentures, due July 1st, 1945, was awarded to Messrs. J. C. McIntosh and Company and their associates, at 90.06.

Edmonton to Get Funds.

Word has reached Edmonton that Kleinworts, of London, have cabled the head office of the Imperial Bank to make certain advances to the city of Edmonton on Kleinworts' account.

Mr. Leon Melekov, president of the Standard Trust and Industrial Company, of Vancouver, who has returned from a trip to Europe, makes a suggestion to municipalities having bonds for sale. He declares that Canadian cities have not got representatives in proper places to sell bonds. In some instances cities have five or six representatives in London, and this system works to their detriment, inasmuch as financiers are averse to considering investments unless handled by independent and influential brokers, known by the character of the bonds they float. Mr. Melekov suggests that the sale of municipal bonds should be left in the hands of the agents-general of the respective provinces, or, as an alternative, there should be specially appointed commissioners to handle them.

REAL ESTATE CONVENTION AT WINNIPEG.

The convention of the National Association of Real Estate Exchanges, held at Winnipeg last month, was a great success and some excellent addresses were delivered. Several hundred delegates were in attendance. A silver trophy cup was presented to the National Association of Real Estate Exchanges, on behalf of the Chicago Real Estate Board, by its president, Mr. Edward M. Willoughby. Five minutes were given to a member of each board represented at the convention, in which to speak for his board and city. The trophy cup was awarded to the board whose representative made the best address. It was engraved with the name of the winning board and held by such board until the next annual convention, when it will again be competed for. A committee of three, composed of Colonel Nathan William MaChesney, general counsel, Mr. James Schermerhorn, publisher Detroit Times and Mr. Joseph Chapman, vice-president Northwestern National Bank, Minneapolis, acted as judges.

Many members handed in questions which were answered briefly by other members. Among the questions were:—"Are Weekly Real Estate Board Luncheon Meetings a Success?" Mr. Alfred G. Merritt, ex-president Nashville Real Estate Exchange; "Is a Municipal Real Estate License Law Effective?" Mr. Dean Vincent, president Portland Realty Board.

"The Hudson's Bay Company and Western Development," was the subject of an address by Mr. J. A. M. Aikins, K.C.M.P., Winnipeg, and "International Realty Associates," by Mr. N. J. Upham, Duluth, vice-president of the National Association of Real Estate Exchanges, chairman of the committee on organization of international realty associates.

"Increased Real Estate Values as a Result of Efficient Farming," was a matter dealt with by Mr. Joseph Chapman, Minneapolis, vice-president Northwestern National Bank, president Minnesota Bankers' Association and chairman of the committee on Agricultural Development and Education of the National Association of State Bankers and "Fourth Estate and Real Estate," by Mr. James Schermerhorn, Detroit, publisher the Detroit Times.

The Winnipeg Exchange gave a luncheon to all secretaries. At the close of the luncheon, Mr. R. Bruce Douglas, Milwaukee, president secretaries conference, presided at the annual meeting, where the following subjects were discussed:—"Making Board Members Work," Mr. A. I. Creigh, secretary, Omaha Real Estate Exchange; "How to Increase the Membership of a Board," Mr. M. H. Goffschall, executive secretary Pittsburgh Real Estate Board; "Publicity and its Importance in Board Work," Mr. J. J. Dowling, secretary St. Louis Real Estate Exchange; "Methods for Maintaining Interest and Attendance at Meetings," Mr. Stanley L. McMichael, secretary Cleveland Real Estate Board; and "That Value of the Multiple Listing System," Mr. Geo. B. Hibbard, secretary Fresno Realty Board.

Members were again invited to hand in questions which were answered by other members. Among the questions already asked were the following:—"What is the Proper Basis of Valuation for 99-year Leases?" Answer by Mr. Alexander S. Taylor, Cleveland, past president of the National Association of Real Estate Exchanges, followed by discussion; "How can the National Association Assist in Exchange of Business Between Members?" Answer by Mr. Telfair Stockton, Jacksonville, vice-president of the National Association of Real Estate Exchanges, and others.

"The Greatest Factor in the Development of Prairie Land," was the subject chosen by Mr. E. W. Hamilton, manager, "Canadian Thresherman and Farmer," Winnipeg.

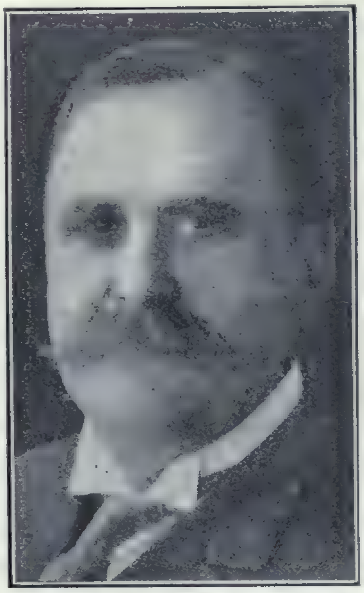
Other subjects and speakers were:—"Some Suggestions for Financing Real Estate Deals," Mr. S. S. Thorpe, Minneapolis, past president of the National Association of Real Estate Exchanges; "National Banking Loans on Real Estate," Mr. C. F. Garfield, Rochester, N.Y., president Garfield Real Estate Company, vice-president National Bank of Commerce, president New York State Real Estate Association; "Developing a Sales Force," Mr. E. H. Close, Toledo, president E. H. Close Realty Company, president Toledo Real Estate Board; and "The Mighty Right Hand of the Continent," Mr. Philip D. Wilson, secretary Los Angeles Realty Board.

The officers of the Winnipeg Real Estate Exchange are Messrs. T. H. Crotty, president, Fred H. Stewart, 1st vice-president, G. A. Metcalfe, 2nd vice-president, Philip Langlois, secretary-treasurer, and J. S. Evans, executive secretary.

MOVING HIS PLANT TO CANADA

Governor Foss, of Massachusetts, Creates a Stir by Transferring Part of Machinery Works to Galt

Quite a stir has been caused by the statement issued by the third-time Democratic Governor of the Bay State, Eugene N. Foss, in announcing the removal of part of his machinery works from Massachusetts to Galt, Ontario, blaming the tariff action of the Democratic Congress for forcing him from the United States and accusing "arbitrary and tyrannical" labor leaders of "stifling business." The immediate result was a variety of editorial comment on the tariff, free trade, and reciprocity generally, but mostly and particularly about Governor Foss himself, and summarized by the Literary Digest. The New York World (Dem.), in a short sketch of the man and his career, reminds us that Governor Foss left the Republican party because "it had proved faithless to reciprocity," left the Democratic party "when he assailed it for moving to reduce taxation," and now he is leaving the country, "because he cannot have markets extended by reciprocity, a tariff-protected product at home, and docile labor."



GOVERNOR FOSS, OF MASSACHUSETTS
Who Says Democratic Tariff Has Pushed His Industry Into Canada

The World also calls attention to the signal honors Governor Foss has received at the hands of his State since he became a Democrat, having been elected to Congress, having been elected Governor three times, and during the past campaign having been "often mentioned as a candidate for the Presidency or Vice-Presidency." In his "manifesto," as it is called by some, Governor Foss says for more than twelve years "one of the principal Massachusetts corporations" which he "represents" has had under consideration a plan to transfer a large portion of its work to Canada.

Off to Canada.

Although he personally, he tells us, has all along opposed this plant, he is "now convinced that it is no longer possible to defer action on this matter," and informs us that "all over the United States the tendency among the principal manufacturing interests is toward the establishment of plants in Canada." The movement has been going on for many years, according to Governor Foss, who tells us the important news that "it is estimated that from three to five hundred million dollars of American capital is now invested in these Canadian plants," and suggests a remedy, here quoted from his statement to the press:

"We should have with Canada and other countries such trade agreements as would enable us to manufacture our goods in the United States giving employment to American workingmen, and utilizing only American capital. But such agreements would imply a recognition of the principle of reciprocity."

It is the opinion of the Springfield Republican (Ind.) that Governor Foss "would have been much more candid and honest" if he had called attention to the fact that the Canadian Government "has passed under the control of the high protectionist party that fought and defeated reciprocity with the United States," whereat the Republican asks:

"Is any party in America now to blame because Canada levies a protective tariff against American manufacturers? Not three years have passed since a Republican President, Mr. Taft, supported by most of his own party and by all of the Democratic party, made into law an act of far-reaching reciprocity with the Dominion. It is not the fault of the United States, nor any party in it, that Canada, exercising a free choice, rejected these well-meant and sincere advances toward close trade relations."

Seeing the matter similarly, but in lighter mood, the Boston Transcript (Ind. Rep.) wishes to know why Governor Foss allies himself with the country responsible for the defeat of reciprocity, unless he means to try to bring the Dominion "into a more reasonable frame of mind," while the Boston Herald (Ind.) suspects him of "playing politics" in a measure, and hints behind a smile that "perhaps after he has established himself in Canadian business, the Governor will also take a flyer in Canadian politics" and make "things interesting for the old boys at Ottawa."

Congress will Not Shrink.

The New York Journal of Commerce, defining reciprocity to be a mitigation of the protective policy, without a place in a policy of tariff for revenue only, urges Governor Foss "to take one side or other of a fundamental principle and stick to it," while the New York Evening Post (Ind.) thinks the Governor's attitude and declaration "will hardly create a tremendous stir in the country, or cause Congress to shrink back appalled from passing of the Tariff Bill." Quite the reverse is the verdict of the Philadelphia Inquirer (Rep.), which, in view of Governor Foss's position in the Democratic party, considers his statement "extraordinary," and wonders "how the Democratic Senators will treat this action by one of their leaders," while the Washington Post (Ind.) sees in the Foss action and manifesto a test case for "the Democratic policy of reprisals against interests which attribute wage reductions or mill closings to the new Tariff Bill" and inquires apropos, "Why not tackle Foss?"

Inquiry as to United States Capital in Canada.

The Monetary Times is now making its second investigation of the amount of United States capital invested in Canada, in branch factories and otherwise. The first inquiry ever conducted on this subject was undertaken by *The Monetary Times* in 1909. This journal will be glad to receive information on the matter from its correspondents.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 1st:—Cobalt Comet Mines, 73,460; Coniagas, 84,203; McKinley-Darragh, 62,970; Day and Gordon, 56,100; Nipissing, 125,000; La Rose, 178,220; Cobalt Townsite, 144,400; O'Brien Mines, 128,870; Kerr Lake, Bailey Mines, 55,600. Total, 908,823. The total shipments since January 1st are now 23,187,909 pounds or 11,593 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835, tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

ELIMINATE THESE CAUSES OF FIRES

A large proportion of Canada's waste is the result of causes that can be eliminated as will be seen from the following statements and from the fire record of *The Monetary Times* which appears on another page of this issue.

Fire Chief Tessier, Hull, has stated that half the small fires in Hull, Ont., have been caused by carelessness or defective chimneys. With the assistance of the mayor he is going to have every residence and store in the city kept in such a condition that the danger from fire will be practically nil.

Commenting on his half-yearly statistical statement of fire losses for the first half of the year, Fire Commissioner Lindback, of Manitoba, points out that of these losses $150,000 was traceable to phosphorous matches, and $170,000 to sparks.

In the annual report of Fire Chief Teneyck, of Hamilton, as stated in a recent issue of *The Monetary Times*, carelessness is definitely stated as the direct cause of 36 fires.

Welland town, Ontario, has granted a fixed rate to the Electric Steel and Metals Company, which has purchased a site for works there to treat steel and iron ores by electric power.

MARKETING CANADA'S GRAIN

II.

MULTIPLICITY OF GRADES

Capacity of Elevators Was Reduced and There Was Tendency to Confusion in Inspection

In dealing with Canada's 1911-12 crop the capacity of the elevator was reduced by the excessive number of grades. It was calculated by the acting chief inspector that under the existing practice no less than 530 grades of grain were recognized, though not all of these were found in any one harvest. The reasons for these as given by the inspectors appeared to indicate different values. It was, therefore, an easy step to treat them as sufficient grounds for separate binning and trading, and this step was taken because of a certain pressure from producers and traders. Increasing the number of grades was the only way by which the grading system could be made elastic enough to provide for lots of grain which, while within the same grade, varied in character and value. In the markets of the United States trading by sample gives the elasticity required, so that the grades are few. In the absence of sample markets in Canada, the multiplicity of grades is almost inevitable.

Reduction of Number of Grades.

The excessive number of grades tended to confusion in the inspection. A still worse effect was that it reduced to a marked degree the capacity of the elevators. A large bin might be occupied for several weeks by a small lot of one of these absurd grades, and the drying capacity of the terminals was reduced 25 per cent. by the same cause.

At the request of the grain commissioners, a committee of expert grain men, along with the acting chief inspector, attempted to reduce the list, with the following result:—

The grades in use for the crop of 1912 were: No. 1 Hard, No. 1 Northern, No. 1 northern damp, smutty No. 1 Northern, rejected No. 1 Northern on account seeds, rejected No. 1 Northern on account heated.

This makes six divisions of each of the six grades of spring wheat. The same applies to the five grades of winter wheat.

No. 1 CW oats, No. 1 CW oats tough, No. 1 CW oats damp, rejected oats mixed with heated, condemned.

This makes five divisions of each of the six grades of oats.

No. 3 CW barley, No. 3 CW barley tough, No. 3 CW barley damp, rejected barley mixed with heated, condemned barley.

This makes five divisions of each of the three grades of barley.

No. 1 NWC flax, No. 1 NWC tough, No. 1 NWC damp, rejected mixed with heated, condemned.

This makes five divisions of each of the three grades of flax.

Still Too Long.

A substantial reduction has thus been effected. The list is, however, still too long. Minnesota has seven grades of spring wheat, and this reduced list leaves thirty-six in Canada, with corresponding differences in the number of grades in the other varieties of wheat and other kinds of grain. It would be unjust to the producers of grain in Canada to insist on a radical reduction in the number of grades unless sample trading was permitted.

◆

HOME COMPANY TAKES OVER NOVA SCOTIA COMPANY

A special meeting of the shareholders of the Nova Scotia Fire Insurance Company was held at Halifax on Tuesday to obtain their consent to a contract with the Home Insurance Company, of New York, for the re-insurance of the entire business of the Nova Scotia Company, and for the sale to Home Insurance Company of the good-will and business of the company. The shareholders ratified the transfer.

◆

Provided crops mature before frost injures them, Western Canada will raise 15,000,000 bushels more wheat than last year, according to estimate of Mr. A. R. Searle, of Messrs. F. H. Peavey and Company. Western Canada's wheat crop was 183,000,000 in 1912, including production of the three provinces.

SIXTY-FOUR NEW COMPANIES FORMED

They Have Aggregate Capitalization of Twelve Million Dollars

Sixty-four new companies were incorporated this week as follows:—

Province.	No. of Companies.	Capitalization.
Quebec	14	$1,742,000
Ontario	16	2,555,000
Manitoba	12	1,165,000
British Columbia	22	6,785,000
Total	64	$12,247,000

Here are details giving the companies' names, head office, capital and some of the provisional directors:—

Corbin, B.C.—Flathead Hotel Company, $30,000.

Revelstoke, B.C.—West Kootenay Steam Laundry Company, $25,000.

Hedley, B.C.—Hadley Trading Company, $25,000 (general merchants).

New Westminster, B.C.—Jones Cornell Construction Company, $50,000.

Penticton, B.C.—Penticton Hospital. A. H. Wade, F. C. Bird, R. S. Conklin.

Kamloops, B.C.—Kamloops Knights of Columbus Building Association, $25,000.

Renfrew, Ont.—Renfrew Realty Company, $100,000. T. A. Low, F. D. Vickers, S. Moffat.

Guelph, Ont.—Bell Music and Piano Company, $200,000. J. Brown, A. M. Brown, J. S. Allan.

Prescott, Ont.—James S. Elliot and Son, $10,000. H. J. Elliot, C. J. E. Charbonneau, L. J. M. Dugas.

St. Boniface, Man.—Union Rendering Company, $40,000. A. C. Turner, A. M. Doyle, W. J. Donovan.

Coteau du Lac, Que.—La Compagnie Hydro Electric du Couteau du Lac, $149,000. A. Jeannotte, Couteau Landing, J. A. Bourbeau, Quebec, J. Langevin.

Vancouver, B.C.—Bowes Music House, $60,000. Bridgeport Lumber Company, $250,000. Empire Valley Development Company, $100,000. Jovian Power Company, $10,000. Lloyd's Securities Corporation, $100,000. Milne and Middleton, $100,000 (textile manufacturing). Northern Oil Company, $200,000. S. S. Glass Advertising, $10,000. Art Engravers, $10,000. B. C. McLennan, McFeely and Company, $5,000,000 (dealers in machinery). Rex Amusement Company, $200,000. Vancouver Box Company, $100,000.

Winnipeg, Man.—Acme Welding and Engineering Company, Limited, $10,000. S. J. Tufts, F. Evans, A. Styles. Smith Grain Company, $40,000. M. K. Smith, M. H. Smith, M. A. Smith. Strome-Bravender Company, $150,000. U. S. Strome, W. C. Bravender, A. Paling. Selkirk Development Company, $500,000. C. W. N. Kennedy, F. A. Gemmel, A. J. Norquay. Sterling Manufacturing Company, $20,000. R. E. Emery, Guelph, Ont., A. C. Ferguson, A. E. Dilts. Canadian Empire, $20,000. W. W. Powers, J. Grant, T. J. Buckley. Tuxedo Gardens, $75,000. G. H. Baird, A. G. Henderson, J. MacNeil. Business Collectors, $5,000. C. E. Shortridge, E. H. Howey, R. C. Parsons. Canadian Shimmer Poliches, $25,000. J. A. Hobbs, C. Nolan, M. A. Peak. Strathcona Assets, $100,000. R. Siderfin, J. Ledingham, E. B. Eadie. C. and E. Townsites, $180,000. R. Siderfin, J. Ledingham, E. B. Eadie.

Montreal, Que.—Wilson Holding Company, $99,000 (real estate). W. R. L. Shanks, F. G. Bush, G. R. Drennan. L'Association Athetlique Hochelaga Incorporee, $40,000. A. Lauzon, J. R. Cardinal, J. A. Santoire. Canal Frontage Realty Company, $125,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. La Compagnie de Pret Mutuel, $500,000. J. U. Meunier, J. A. Parent, J. D. Camirand. Security Construction Company, $45,000. R. Poirier, G. Ste Marie, J. M. Z. Daoust. Viewbank, Realties, $150,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. La Salle Construction Company, $50,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. American Flexible Bolt Company of Canada, $75,000. A. E. Howard, J. DeWitt, H. C. McNeil. Canadian Gurney Elevator Company, Limited, $50,000. G. W. MacDougall, L. Macfarlane, C. A. Pope, F. Galibert, $350,000 (footwear manufacturing). R. Taschereau, A. R. W. Plimsoll, F. Bernard. Home Alliance Realty and Invesment Company, $50,000. A. H. Elder, P. F. Brown, W. G. C. Lamskril.

JULY FIRE LOSSES

Over Two Millions and Half Consumed in Smoke—Several Incendiary Blazes

The Monetary Times' estimate of Canada's fire loss during July amounted to $2,614,198, compared with June loss of $3,069,446 and $1,741,371 for the corresponding period of last year. There were 40 fires where the loss exceeded $10,000. The following is the estimate for the July losses:—

Fires exceeding $10,000	$2,056,250
Small fires	216,966
Estimates for unreported fires	340,982
	$2,614,198

The following are the monthly totals of the losses by fire during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 1,275,246	$ 2,250,550	$ 3,002,650	$ 3,913,385
February	750,625	941,945	1,640,153	2,037,386
March	1,076,253	852,380	2,261,414	1,710,756
April	1,717,237	1,317,900	1,355,055	1,470,622
May	2,735,536	2,564,500	2,251,815	2,123,868

Forty Large Fires.

The fires at which the loss was estimated at $10,000 and over were:—

Trenton, Ont.	Creosoting works	$10,000
Erindale, Ont.	Three houses	12,000
Point Grey, B.C.	Industrial school	10,000
Brandon, Man.	Warehouse	10,000
Earl Grey, Sask.	Store	15,000
Waterford, Ont.	Freight sheds	10,000
Kingston, Ont.	Business block	30,000
Montreal, Que.	Stables	10,000
Brandon, Man.	Elevator	10,000
London, Ont.	Factory	10,000
London, Ont.	Store	35,000
St. John, N.B.	Business block	12,000
Meaford, Ont.	Elevator	220,000
Bridgewater, N.S.	Business block	90,000
Calgary, Alta	Store	20,000
Jacksonburg, Ont.	Lumber mill, &c.	20,000
Three Rivers, Que.	Courthouse	30,000
Milverton, Ont.	Factory	60,000
Milverton, Ont.	Residences	10,000
Scott's Junction, Que.	Lumber mills	60,000
Point Edward, Ont.	Elevator	300,000
Rosthern, Sask.	Business section	33,000
St. John, N.B.	Six buildings	16,250
St. John, N.B.	Grist mill	20,000
Brandon, Man.	Telephone exchange	100,000
Brock, Sask.	Business section	100,000
Calgary, Alta	Store	25,000
Hymers, Ont.	Sawmill	30,000
Listowel, Ont.	Hotel	10,000
Quebec, Que.	Buildings	20,000
Lethbridge, Alta	Lumber mills	15,000
Louiseville, Que.	Buildings	200,000
Montreal, Que.	Sawmill	13,000
Port Huron, Ont.	Wrecking plant	15,000
Orangeville, Ont.	Business block	30,000
Toronto, Ont.	Business block	15,000
Ottawa, Ont.	Motion picture theatre, &c.	115,000
Hamilton, Ont.	Freight sheds	75,000
Montreal, Que.	Business block	50,000
Montreal, Que.	Church	200,000

Structures and Causes.

The structures damaged and destroyed included 49 residences. 25 stables and barns, 15 stores, 12 factories, 6 lumber mills, 5 warehouses, 5 business blocks, 4 hotels, 4 elevators, 3 boathouses, 3 churches, 2 freight sheds, 2 garages, 1 evaporator, 1 bridge, 1 school, 1 picture theatre.

There were destroyed 67 horses, 16 cows, 5 calves, 29 pigs, 150 chickens, 111,350 bushels wheat, 72,000 bushels oats, 150 tons hay, 650,000 feet lumber, 150 cords of pulpwood, 500 egg boxes, 12 autos, 3 sleighs, 5 buggies, 3 waggons, 1 steamer, 1 yacht.

Of the presumed causes 12 were attributed to incendiaries, 10 lightning, 9 sparks, 6 gasoline, 6 matches, 3 upset and exploded lamps, 2 gas jets, 2 defective chimneys, 1 hot iron, 1 hot ashes, 1 engine back firing, 1 cigarette.

During July, 9 lost their lives through fire.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	22
April	18	37	20	15	11
May	21	15	28	18	33
June	16	52	13	6	18
July	4	15	110	9	9
August	17	11	22	16	..
September	10	10	13	6	..
October	26	16	17	21	..
November	34	19	20	22	..
December	33	19	17	28	..
Totals	219	256	317	203	128

The fires at which fatalities occurred were:—

St. Saveur, Que.	Using coal oil to light fire	1
Cornwall, Ont.	Burning building	2
Midland, Ont.	Burning building	3
Toronto, Ont.	Set clothing alight	1
Midland, Ont.	Set clothing alight	1
Ottawa, Ont.	Burning building	1
		9

Provincial Fire Losses

The fire waste in each province for first seven months of this year has been estimated by *The Monetary Times*, as follows:—

Ontario	$4,911,727
Alberta	2,756,728
Quebec	2,634,626
Manitoba	1,932,704
Saskatchewan	1,609,120
Nova Scotia	1,250,459
New Brunswick	875,774
British Columbia	584,206
Prince Edward Island	384,317
	$16,939,661

◆

With harvest only two weeks away, the following is the estimate of the Saskatchewan Department of Agriculture for the 1913 grain crop:—Wheat, 125,557,014 bushels; oats, 121,435,630 bushels; barley, 10,137,897 bushels; flax, 13,539,918 bushels; total grain crop, 270,670,459 bushels.

Partner Wanted

who will be security to the extent of $25,000 in conducting excellent machinery agency business holding valuable agency contract.

Principals with whom agreement is held have done large volume of business in Canada during past few years and at excellent profit.

Auditors.

Vancouver, July 8th, 1913

ONTARIO FARMERS' FINANCIAL RETURNS

Live Stock and Crop Statistics—Total Investment and Gross Returns Shown

Of cereals, the largest gross monetary return per acre in Ontario was given by beans with $26.29, followed by fall wheat with $20.12 and corn with $19.11 per acre, and the smallest return per acre was got from rye, oats, peas and barley in the order named, according to census statistics. The return from hoed crops is very much higher than from the grain crops, tobacco giving a gross return of $170.60 per acre, while the returns from potatoes and roots run from $43 to $66 per acre. The average value per farm holding of field crops, vegetables and fruits was $693.30 in 1910 as against $490.56 in 1900, being an increase of 41 per cent. in the decade.

The statistics of live stock show that horses increased by 90,447 in the ten years, swine by 301,469, turkeys by 27,275, geese by 129,880, ducks by 111,466, and hens and chickens by 3,584,185. The number of milch cows was 1,065,653 in 1901 and 1,032,979 in 1911, a decrease of 32,784 from 1901 to 1911; other horned cattle increased by 49,651 in the ten years.

Decrease in Sheep Production.

There seems to be the same tendency to a decrease in the production of sheep in Ontario as in Quebec and the Maritime Provinces, the number having fallen from 1,046,456 in 1901 to 743,483 in 1911. That the quality of live stock is being steadily improved is evidenced by the increase in the numbers of all pure-bred animals, the greatest improvement being made in cattle. The production of wool has dropped from 5,017,585 pounds in 1901 to 2,758,699 pounds in 1911.

The average value of horses in 1911 was $138.64; of milch cows, $47.15; of other horned cattle, $22.56; of sheep, $6.03. and of swine, $7.28. In 1901 the average value of horses was $76.17; of milch cows. $30.53; of other horned cattle, $17.33: of sheep, $5.27, and of swine, $6.77. The average of all live stock per farm holding in 1911 was $951.69 as against $571.99 in 1901, being an increase of 66 per cent. in the decade.

In comparing the values of live stock for the census years 1910 and 1911 it should not be forgotten that a greater number of young animals are included in the returns of the recent census than there were in the previous one, owing to the census of 1911 being taken as for June 1st, while the census of 1901 was taken as for March 31st.

The value of live stock sold in 1910 is given as $77,550,584 as against $35,385.376 in 1900, being an increase of $42,165,208, or 119 per cent., in ten years. The value of animals slaughtered on the farm shows a decrease of $219,585, or 2¼ per cent.; dairy products show an increase of more than twenty-five million dollars in the decade, and eggs of nearly five million dollars.

Capital and Labor.

The number of weeks of hired labor on the farm in 1910 was 1,689,123 and the value $12,003,095, being an average wage per week of $7.16 as against 2,359,632 weeks in 1900, with a value of $12,152,915, with an average per week of $5.15, being an increase in the cost per week of farm labor from 1900 to 1910 of 39 per cent.

The working capital (including under this heading the value of lands owned, buildings, farm implements and live stock on hand) of the farmers of Ontario in 1911 totalled $1,216,864,992, being an average per holding of $5,450, as compared with $929,858,777, and an average of $4,148 in 1901. The gross earnings from this investment as represented by field crops, fruits, live stock sold, dairy products, animals slaughtered on the farm, wool, eggs, honey and wax were $314,112,073. From this must be deducted the cost of seeds, of feed for animals and of labor before the net earnings can be even approximately determined.

◆

EQUITABLE FIRE REGISTERED IN THE WEST.

The Equitable Fire and Marine Insurance Company, of Providence, R.I., which has recently entered this country, under the management of Mr. J. W. Tatley, Montreal, has been registered in the provinces of Alberta and Saskatchewan, the business in those provinces reporting through the office of Hornibrook, Whittemore and Allan, general agents, Calgary. The Equitable will transact fire business only. The Equitable was established in 1859, the policies guaranteed by the Phoenix Insurance Company, of Hartford.

The Boston Journal says the Canadian Northern is making efforts to gain terminal in Portland, and this step is preliminary to attempt to bring lines to Boston.

The Employers' Liability Assurance Corporation, Limited

LONDON, ENGLAND

EXTRACTS FROM THE DIRECTORS' REPORT, 1913

The Directors submit to the Shareholders their Thirty-second Annual Report, together with the Audited Accounts to 31st December, 1912.

The premiums for the year are **$8,418,721** against **$6,837,722** for the year 1911.

The balance of this year's account is **$7,534,562.** Out of this, the Directors have already paid an interim dividend of **97c.** per Share, and now recommend a further dividend of **$2.43** per Share (free of Income Tax), making together a dividend of **$3.40** per Share for the year. This will absorb **$340,000,** leaving **$7,194,562** to be carried forward.

19th February, 1913.

W. E. GRAY,
General Manager and Secretary.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Port Credit, Ont.—July 31—Port Credit Brick Company's plant.

Trenton, Ont.—July 28—The Meyers' homestead. Cause unknown.

Woodstock, Ont.—July 30.—J. Bartley's barn tenanted by F. Scott.

Chateau Richer, Que.—August 4th.—Four houses and three barns.

Winnipeg, Man.—August 1.—W. A. Taylor's confectionery factory.

Transcona, Man.—August 2.—Mr. Borden's residence. Cause unknown.

Hamilton, Ont.—July 31—W. B. Foyster's stables. Loss, $2,000. Cause unknown.

St. Catharines, Ont.—July 30.—H. Wilcox's barn. Loss, $1,000. Cause, incendiary.

Lethbridge, Alta.—July 21—Mr. Savage's farm. Cause unknown, possibly lightning.

Moose Jaw, Sask.—August 1.—W. J. Chantler's store. Loss, $5,000. Cause, unknown.

Vancouver, B.C.—August 2nd.—Alhambra Hotel. Cause red hot cinder from kitchen stove.

Lewisville, Que.—July 31.—Several hotels, dwellings and other buildings. Loss, $200,000.

St. Jean, Isle of Orleans, Que.—August 4th.—Mr. Paquet's residence. Loss, $6,000 to $8,000.

Mortlach, Sask.—July 28—W. Vickey's barn, near Caron. Loss insured. Cause, lightning.

Brantford, Ont.—Aug. 5—George H. Biggar's residence. Loss insured. Cause, gas or oil stove explosion.

Leamington, Ont.—July 27—F. Wigle's grain separator. Loss, $3,000. Cause, sparks from threshing engine.

Barons, Alta.—July 31.—Western Canada Lumber Company's yard. Loss, $15,000; insured. Cause, incendiary.

Brandon, Man.—July 28—New King George School.

July 24—Local telephone office. Loss, considerable.

Brandon, Man.—July 30.—Gwenmar Farm residence of J. D. McGregor. Loss, $8,000 or $10,000. Cause unknown.

Harrisburg, Ont.—Aug. 4—Braithwaite Hotel and G. Vrooman's barn. Loss, $4,000. Cause, supposed incendiary.

Montreal, Que.—August 3.—McGill University, medical laboratory. Loss, $7,000. Cause, electric light short circuit.

Halifax, N.B.—August 1st.—Sable Lumber Company's factory at Wilkins Siding and eight residences. Loss, $50,000.

Wilkin, Siding, N.S.—Aug. 1—Sable Lumber Company's box factory and eight houses. Loss about $50,000. Cause unknown.

Montebello, Labelle County, Que.—Aug. 3—About one-quarter of this village was wiped out by fire on Saturday afternoon. Twenty-nine buildings, including a general store, the Grey Nun's Academy and some of the best residences in the village, were destroyed. Loss about $80,000.

Montreal, Que.—August 6th.—Mr. A. M. Wener's sash and blind factory. Loss, $7,000. Group of buildings, 16 to 24 St. George Street. The firms affected are:—W. C. Fuller and Company, artistic printers; Jas. Cleland, manufacturer of dies, paper, cloth, rubber, etc.; F. A. McKay Continental Upholstered Furniture Company; Felton Brass Works; Standard Paper Box Company and the Dominion Lubricating Oil Company. Loss, $100,000. Cause unknown.

August 5th.—Vacant factory. Loss, $7,000. Cause unknown.

Erin, Ont.—Aug. 3—Queen's Hotel, Steel and Foster's general store, A. J. Steven's boot and shoe store, Homer's Butcher shop and Blackwood and Sons insurance agency. Only a small portion of the stock was saved in any instance. The Queen's Hotel Block, which was owned by Mr. McDonald, of Toronto, was worth six thousand dollars and S. Ridler, the hotel proprietor, will lose nearly three thousand dollars, partly covered by insurance. Steel and Foster's store was owned by M. Overland, and was valued at four thousand five hundred dollars, carried a stock worth about sixteen thousand dollars, and was insured for $10,000. Mr. Stevens carried a stock of four thousand five hundred dollars, insured for two thousand dollars. The building, owned by Dr. Gear, was worth two thousand five hundred dollars. The armories, which were upstairs in the Queen's block, were destroyed. The total loss will be in the neighborhood of thirty-five thousand dollars.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Toronto, Ont.—August 3rd.—99, Jersey Avenue, owned by Mr. Kelso. Loss to building, $750. Occupied by Wm. Dear. Loss, $400. No insurance. 101 Jersey Avenue, owned by Mr. Leitervitz. Loss $800. Insured. Occupied by A. Moore. Loss $500. Insured in Merchants. 103 Jersey Avenue, owned by J. Russell. Loss, $900. Insured. Occupied by Elger Chard. Loss $500. No insurance. 105 Jersey Avenue, owned and occupied by Chas. A. Tell. Loss to building, $1,000. Insured in London and Lancashire for $1,000. Loss to contents, $600. No insurance.

August 2nd.—John H. Locke, 110 Robert Street. Loss to contents, $400. Insured in York for $1,000. Ross and Wright, adjusters for the assured, Toronto.

Erin, Ont.—August 2nd.—Messrs. Steele and Foster, general merchants. Loss, $10,000. Insurance, $11,000. Ross and Wright, adjusters for the assured, Toronto.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Lethbridge, Alta.—$362,500 debentures. See particulars under heading "Municipal Financing is Active."

Rosetown, Sask.—Until Aug. 20th, for $13,500 7 per cent. 20-year debentures. A. Wilson Clark. (Official advertisement appears on another page.)

Ottawa, Ont.—Up to August 28th for $1,164,706 debentures. Tenders to be addressed Chairman, Board of Control. (Official advertisement appears on another page.)

Wetaskiwin, Alta.—Up to August 20th, for $81,000 5½ per cent. debentures. E. Roberts, secretary-treasurer, Wetaskiwin. (Official advertisement appears on another page.)

Battleford, Sask.—Until August 16th, 6 p.m., for $6,500 5½ per cent. 30-year high school bonds. J. P. Marshall, secretary-treasurer. (Official advertisement appears on another page.)

Mantario R.M., No. 262, Sask.—Up to August 12th, for $6,000 6 per cent. 20 instalment debentures. Isaac Walker, secretary-treasurer, Alsask. (Official advertisement appears on another page.)

Togo, Sask.—Until August 23 noon, for $10,000 20-year 6 per cent. school debentures. C. A. Hulse, secretary-treasurer, Consolidated S.D. of Makaroff. (Official advertisement appears on another page.)

MONTREAL BROKERS GOT MIXED.

Montreal Star, Aug. 6.—London, August 6.—The Standard says that the Montreal city bills maturing on the twelfth have apparently been renewed for six months on a five and a half per cent. basis.

The bills referred to in the above cable were taken by the Bank of Montreal some six months ago at a rate of approximately 4½ per cent. The increase to 5½ per cent. charged on the renewal reflects in a striking way the conditions existing in the money market as compared with those of six months ago.

Montreal Telegraph, Aug. 6.—London, Aug. 6.—(Cable)—The Standard says that the Montreal city bills maturing next Tuesday, August 12, have apparently been renewed for a period of six months on a 3½ per cent. basis.

Local brokers, commenting upon the renewal of the city loan at 3½ per cent., expressed some surprise at what they considered the achieving of a bargain for the city. They had been of the opinion that at least 4 per cent. would have had to be paid under present conditions in the money market, and reflected that monetary matters must be somewhat more cheerful than is generally considered.

ANOTHER CANADIAN NORTHERN ISSUE IN LONDON.

The Canadian Northern Railway will issue £1,500,000 5-year 5 per cent. notes in London, at 98.

◆

Mr. C. C. Sinclair, B.A., of the Great West Life Assurance Company, who has already qualified in the associateship examination, conferring the degree of A.A.S., has just been notified that he has passed the first examination for the fellowship of the American Actuarial Society.

LEGAL NOTICES

BRITISH AMERICA NICKEL CORPORATION, LIMITED.

(Corrected Notice.)

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 2nd day of July, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants, William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase, lease or otherwise acquire and to prospect for, open, explore, develop, work, improve, maintain and manage nickel, gold, silver, copper, coal, salt, iron and other mines, quarries, mineral and other deposits and properties or interests therein, and to dig for, raise, crush, wash, smelt, roast, assay, analyze, reduce, amalgamate, make and otherwise treat coal, coke, ores, metals, clays and minerals, whether belonging to the company or not, and to render the same merchantable, and to sell and otherwise dispose of the same or any part thereof, or any interest therein, and generally to carry on the business of a mining, milling, reduction, quarry and development company; to carry on the business of treating, smelting and refining mineral ores, metals or other substances by means of electrolytic process or the application of electric power in any manner or form, or by means of any other process, and for such purpose to install all necessary plant, machinery and apparatus, and to purchase, sell and otherwise deal in ores of various kinds or other substances capable of being treated by electrolytic or other process, and to buy, sell and deal in any products or by-products of such ores or substances; (b) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electricity, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power, when exercised outside the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (c) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (d) To construct, alter, work, carry out or control, and to purchase, take on lease or otherwise acquire, and to sell, lease or otherwise dispose of any works, mains, lines, machinery or plant of any kind or description, or any roads, ways, bridges or other things whatsoever which may seem capable of being used or operated with any part of the company's undertaking for the time being, or calculated to benefit the company; and to acquire rights over or in connection with such works, mains, lines, machinery, plant, roads, bridges, ways or other things whatsoever, and to equip, maintain and operate by electricity, hydraulic or other mechanical power, all works belonging to the company or in which the company may be interested; and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (e) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (g) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To establish and work lines of steamers and other vessels, and to otherwise employ any vessels in the conveyance of passengers, mails, specie, goods, troops, munitions of war and other things between any ports throughout the world, and to carry on the business of shipowners, shipbuilders, shipwrights, ship repairers, charterers of ships or other vessels, warehousemen, wharfingers, shipping agents, managers of ships, ship's husband contractors, ship and insurance brokers, carriers by land or water, forwarding agents, importers and exporters, merchants and traders, commission and general financial agents, proprietors of land, jetties, piers, warehouses, stores, barge and tug owners, lightermen, marine engineers and manufacturers of and dealers in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (j) To construct, acquire, manage, maintain, alter, charter, operate, hire, lease, sell, exchange or otherwise dispose of all kinds of ships, vessels, barges and boats or shares, or interests therein, and also elevators, sheds, warehouses and buildings, wharves, docks, dry-docks, terminals, and generally to carry on the business of ship-building, ship repairing, engineering, elevator, warehousing, navigation, transportation and terminals company, or any such businesses, and to manufacture and deal in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (k) To purchase, take on lease or in exchange or otherwise acquire any docks, dry-docks wharves, harbors, quays, jetties, ship-building yards, collieries, coal mines, meat freezing works, refrigerating stores, gas works, timber yards and other real and personal property or rights or any interests therein, and to manage, work and otherwise turn to account the same or any of them, and to enter into any working arrangements in respect of the same or any of them; (l) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (m) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (n) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (o) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (p) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable or being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (q) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (r) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (s) To assist in the promotion, organization, development or management of any corporation or company, and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (t) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (u) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (v) To amalgamate with any other company having objects similar to those of this company; (w) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company, or of which the company may have power to dispose; (x) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (y) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "British America Nickel Corporation, Limited," with a capital stock of twenty million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 11th day of July, 1913.

THOMAS MULVEY,
2-2 Under-Secretary of State.

Dated at Toronto, 14th July, 1913.

members and particularly the shares, bonds and other securities of any other company owned by this company; (dd) To cause or to allow the legal title, estate and interest of any of the property, real and personal, owned by the company, or in which it has any interest, to remain in or be vested in or registered in the name of any individual or individuals or corporation either in trust for or as agents or nominees of the company in accordance with the terms of any instrument creating such trust or agency; (ee) To procure the company to be registered, licensed or otherwise recognized in any foreign country and to designate and appoint any person or corporation therein as attorneys or representatives of the company, with full power to represent this company in all matters according to the laws of such foreign country, and to accept service for and on behalf of this company in any process or suit; (ff) To do all or any of the above things as principals, agents, contractors, trustees or otherwise and by and through trustees, agents or otherwise and either alone or in conjunction with others; (gg) To amalgamate with any other company or companies having objects altogether or in part similar to those of this company; (hh) The word "company" in clauses (i) to (ii), both inclusive, shall be deemed to include any person, partnership or other body of persons, whether incorporated or unincorporated, and whether domiciled in Canada or elsewhere, and the objects specified in each of said clauses shall be in no wise limited by reference to or inference from the terms of any other clauses or the name of the company; (ii) The business or purpose of the company is to do from time to time one or more of the acts and things herein set forth. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "International Steel Corporation, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada this 15th day of July, 1913.

THOMAS MULVEY,
3-3 Under-Secretary of State.

BICKNELL, BAIN, MACDONELL & STRATHY,
Solicitors for International Steel Corporation, Limited.

MOVEMENT OF UNITED STATES CROPS

New Plan to Facilitate It—Government Will Deposit Fifty Millions in Banks

A Washington dispatch states that twenty-five to fifty million dollars of United States Government funds will be deposited in the national banks of the south and west at once by Secretary McAdoo to facilitate the movements of crops. Federal, State and municipal bonds and collateral paper will be accepted as security for the money, upon which the banks will pay two per cent. interest.

The motive of Secretary McAdoo in establishing this new policy is to anticipate the money stringency in the late summer and fall which invariably accompanies the marketing and movement of crops, especially when the crops are unusually large as the harvest now beginning forecasts. He intends to take time by the forelock to prevent or minimize the usual tightness of money.

Government Bonds at Par.

In a statement the Secretary made the announcement that Government bonds would be accepted at par as security for the new deposits, and that the additional money would be placed only with banks which have taken out at least 40 per cent. of their authorized circulation. The United States 2 per cent. bonds, serving as security for most of the national bank circulation, have been depressed recently to new low market records, dropping to 95¾ during the past few days. The Secretary's willingness to accept these bonds at par as security for the 25 to 50 millions of promised deposits, and the inducement to the national banks to increase their circulation up to the forty per cent. limit is expected to help in restoring the parity of the depressed 2's by creating a new market for them.

Commercial Paper Accepted.

For the first time in history, the United States Government will accept prime commercial paper as security for deposits. This privilege will be granted, as announced by the Secretary, in order to make these special deposits available to the banks on securities readily within their reach.

Approved commercial paper will be accepted as security for the deposits at 65 per cent. of its face value, and high-class state, municipal and other bonds, exclusive of Government bonds, at 75 per cent. of their market value.

Demand for Money.

The additional deposits will be placed with the national banks in the two or three principal cities in each of the states where harvesting is now in progress, and where the demand for money for moving the crops most conveniently can be met. The Secretary said it would not be practicable to scatter the deposits among the smaller cities, especially in view of the character of securities necessary.

The banks will be required to return the money to the Public Treasury when the crops have been moved.

The present suggestion is, Mr. McAdoo said, that fifteen per cent. be repaid in December, thirty per cent in January, thirty per cent. in February and twenty-five per cent. in March next.

◆

RAILROAD EARNINGS.

Canadian Pacific earnings for the week ended July 31, were $3,643,000, being a decrease of $133,000.

The gross earnings of the Canadian Northern Railway for the week ended July 31st, 1913, were $593,800 and for the corresponding period last year $575,000, being an increase of $18,800. From July 1st to date, the gross were $1,928,800, as compared with $1,829,700 in 1912, an increase of $99,100.

With the statement of earnings and expenses for June, practically final figures for the Canadian Pacific's financial year 1912-1913, completed June 30th, are available. Gross earnings for the twelve months foot up the large total of $139,395,699.98, an increase of $16,076,158 over gross earnings for the previous year. Net earnings for the same period total $46,245,874.15, an increase of $2,947,631.32. While the increases for the year, both in gross and net are considerable, they are still smaller than those shown from 1910-11 to 1911-12, the increases for that year being $19,151,576 and $6,598,412 gross and net respectively. This is largely accounted for by the great increase in operating expenses, which for the year just closed totalled $93,149,825.83, as compared with $80,021,298.40 for the previous year, an increase of $13,128,527.43 for 1912-13.

The Canadian Northern Railway has had a successful year, ending on June 30. The statement of earnings, issued to-day, shows that net earnings were almost a million dollars ahead of the previous year, as follows:—

	1913.	1912.
Gross	$22,979,800	$19,538,600
Expenses	16,930,800	14,422,500
Net	$6,049,000	$5,116,100

Grand Trunk Railway traffic earnings from July 22 to 31, show the following increase:—

1913	$1,658,446
1912	1,544,003
Increase	$114,443

Messrs. Pace, Harrison and Millar, Limited, insurance brokers of Winnipeg and Calgary, are publishing an interesting little insurance monthly.

BURGLARY INSURANCE TRANSACTED IN CANADA

Only seven companies write burglary insurance in Canada, under the jurisdiction of the Dominion department of insurance. At the end of 1912, the net amount of such insurance in force was $7,612,514. The premiums received during 1912 totalled $66,042. The number of policies, new and renewed, was 5,320, and their amount $8,701,019. There are 4,203 burglary insurance policies now in force in this country. The losses incurred last year were $15,740, and claims amounting to $10,535 were paid. At the end of the year, $5,635 claims were unsettled but not resisted by the companies concerned. The Dominion Gresham and the Fidelity and Casualty companies accounted for more than two-thirds of the premiums received last year. The accompanying table gives details.

The officers of the burglary section of the International Association of Casualty and Surety Underwriters were elected at their Quebec convention as follows: Vice-president, William B. Joyce, National Surety; Edwin W. DeLeon, Casualty Company of America; C. H. Hall, Employers' Liability; Victor E. H. Hoagland, New Jersey Fidelity and Plate Glass; W. P. Learned, Fidelity and Casualty.

DIVIDENDS AND NOTICES

THE CANADIAN BANK OF COMMERCE

DIVIDEND 106

Notice is hereby given that a quarterly dividend of 2½ per cent., upon the capital stock of this institution has been declared for the three months ending the 31st August next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 2nd September next, to shareholders of record at the close of business on the 16th day of August, 1913.

By order of the Board,
ALEXANDER LAIRD,
General Manager.
Toronto, 21st July, 1913.

No. 332.

UNION BANK OF CANADA.

DIVIDEND No. 106.

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the paid-up capital and stock of this institution, has been declared for the current quarter, and that the same will be payable at its banking house in this city, and also at its branches, on and after Tuesday, the second day of September, next, to shareholders of record on August 19th, 1913.

By order of the Board.
G. H. BALFOUR,
General Manager.
Winnipeg, July 15th, 1913.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.
Toronto, Ontario, May 20th, 1913.

MANUAL OF CANADIAN BANKING.

The fourth edition of The Manual of Canadian Banking, by H. W. P. Eckardt, published by *The Monetary Times*, has been received from the press. Mr. Eckardt is well known as a prolific author on banking and financial subjects, and is a contributor to the leading financial journals of America and Europe. His latest edition of this manual has been printed in order that it may cover fully the features of the new Bank Act. The revision of the manual was made solely with that object in view.

The chapters of the volume are as follow: Introductory; Organization of a New Bank; Selection of the Junior; The Junior's Post; The Cash Book; The Ledger-keeper's Post; The Savings Bank Ledger; The Discounts; Collateral News; The Liability Ledger; The Cash; Teller and Customer; The Bank's Business in Exchange; Receiving and Paying; The Accountant; The Statements; Manager of the Branch; Financing the Crops and the Mines; Relations with other Banks and with Head Office; Inspection of the Branch; The City Branch; Head Office; The General Manager's Department; the Board, and Liquidation of Failed Banks.

◆

Hon. George H. Perley, Acting Minister of Trade and Commerce, has entered into a contract with the United Frith Company, of Nova Scotia, for a direct steamship service between Annapolis Royal, N.S., and either London or Hull. There are to be five voyages, the first to begin before October 30.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

TWENTY-FIVE MILLIONS IN WAGES

Paid to Timber Industry in British Columbia Yearly—Striking Facts Cited by Sir Richard McBride

Do you know that, in an association of thirteen years with the department of mining in the Province of British Columbia, I cannot recall a time when the mining industry of the country was more full of promise, of more assurance of a glorious future, than it is to-day? asked Sir Richard McBride, premier of the province, in an address, replete with interest, at Vancouver. "We look for no mining boom in British Columbia," he continued. "Such a condition of affairs would be unhealthy, and it is not to be, I hope, expected. But we have a right, from reports that come to the department from all sections of British Columbia, to believe, to say to the people of this country, that never before in the history did the mines of the West look so well. Let me illustrate by one reference: The Granby project, which is 700 miles up the coast—it is being carried out by the old Granby Company of Grand Forks—is providing for an extension of upwards of $2,000,000, so that they may be able to turn out products worth millions to the country before many months. The smelter at Grand Forks is one of the largest in the Empire. The smelter to be erected at Granby Bay in the North, while not so large as the one at Grand Forks, I am told by the management will be the last word in smelting.

Production of Mines.

"Last year the mines of British Columbia produced $32,500,000 worth of metal, $6,000,000 more than the highest product previously recorded. I look to see this year's record still beyond that of last. True it is we have this deplorable mining strike on the Island; but, at the same time, it seems to me there is so much activity throughout the district that I am enabled to tell you this story. I have several other statistics dealing with the mines at Brittania, Slocan and other districts; but there is no necessity I should go at any length into these. Just summing up the whole situation, I am able to tell you that conditions were never so promising as they are at the present time. I do not want to see a mining boom in British Columbia. It is not needed, and it would be a mistake for one to come; but the signs of the times, though they do not point to a boom, point to tremendous activity, and very early too.

Growth of Timber Industry.

"With regard to our timber industry, the most striking fact of all is the payment of $25,000,000, which is made here in your midst, in wages every year, in connection with the timber industry alone. So far as the statistics of the past few years will show, I can tell you this, that if in the next ten years there is a continuance of the expansion of the lumber business such as there was in the last five, the payment of $25,000,000 will be very small indeed compared with what the payrolls of 1923 will be. So far as our timber wealth is concerned, it is an open secret we have the greatest warehouse in the world right here in British Columbia. The world has to have timber, and to get the best they have to come to British Columbia for it. Here again I think that the policy of conservatism has been such as to assure to the province such a splendid revenue from the timber that we will be able to care for all the business in the province.

Fish from Pacific Waters.

"Take the fishery industry. The fishing industry alone is still only in its infancy. Last year we produced $15,000,000 as against $5,000,000 in 1903, and still the fishing business has only commenced. Our deep sea fishery, which in the end will be our great fishery, has scarcely been started. With proper development and encouragement, what will it be in ten years hence? But we are not dealing with what it will be ten years hence, but to-day, and is it not a gratifying circumstance to find that the fishery of 1913 is $15.000,000 as against $5,000,000 in 1903?

"Take the agricultural products. British Columbia to-day is an agricultural producer to the extent of $22,000,000, as against $7,000,000 ten years ago. Some people will tell you there is no land settlement going on, and that there is no expansion in the back country. Those who give you that story generally put in a very extravagant statement. There is always the movement back to the land, but just so long as British Columbia is a civilized territory, just so long will that war-cry be heard. People talk about accomplishment in the way of land clearing and land settlement, but I find as I go up and down the Fraser Valley that there is a section of the country well settled within a few years to the mouth of the river in agricultural development. If you go over that district and see the land cultivation. I venture the statement that there is no place in the known world where similar conditions obtain, and where there has been fifty per cent. of the development there has been in the Fraser Valley. But this is not only to the Fraser Valley. In the back country as well there is a tremendous movement.

Back to the Land.

"Where a few years ago there were only a few pre-emptions, last year there were more than three thousand. If you want to get land to pre-empt, you have got to go to the back country to get it, and there are to-day millions of acres open for settlers. The cry goes round that there is no land. I say there are millions of acres, and when the settler comes there we shall always be able to give him all the benefits of civilization, so that he can make his headquarters and provide for his family. We have never attempted to bring people here in wholesale quantities, because I have always held it would be a crime to attract thousands here in large expeditions and plant them on the hinterland before you have trunk roads and markets. Let us build our roads, and then let us bring our settlers."

◆

DEVELOPMENTS ON ATLANTIC COAST

Proposed Dry Dock at Quebec—Dominion Government Responsible for the Enterprise

For some time the Canadian government has had under consideration plans for a big drydock at Quebec, capable of accommodating the largest ships, states a Liverpool despatch, notwithstanding the fact that a floating structure with a lifting capacity of 25,000 tons, built and owned by Messrs. Vickers, Limited, is available at Montreal.

Tenders were, in fact, invited in May of last year, but the only offer received was from Sir John Jackson, Limited, who were not, however, prepared to build the dock as a private undertaking in return for an annual payment under the subsidy act at the rate of 3½ per cent. on the estimated outlay for thirty-five years.

Government Responsible for Enterprise.

In consequence a delay occurred, but it is now announced that the government has decided to become responsible for the enterprise, which is to be carried out by Mr. H. P. Davis, of Montreal, the contract price being £550,000 ($2,750,000). The dock, which will be 1,150 feet long by 137 feet wide and 40 feet deep, is to be located at St. Joseph de Levis, opposite Quebec, and will for many years be the largest in the world. Drydocks of somewhat similar dimensions are, however, to be built at Sydney, Cape Breton, St. John, N.B., and Esquimalt, B.C., while the one at Halifax, N.S., is to be brought up-to-date by increasing its capacity and equipment.

Cost is Deterrent Factor.

As far as can be ascertained, there will be nothing to equal them on this side of the Atlantic or elsewhere for a long time to come, the nearest in size being the new Gladstone Dock at Liverpool and the one in course of construction on the Clyde, with the enlarged Trafalgar at Southampton and the graving dock at Belfast, slightly less in length and width, though in view of the increasing size of liners more adequate provision of the kind is an urgent necessity.

The enormous cost of these structures is, however, a deterrent factor, and only those port authorities, which can reasonably expect an adequate return for the expenditure are likely to embark upon the enterprise, unless, of course, the shipping companies concerned or the state, should, under certain conceivable circumstances, bear a share of the heavy expense involved.

◆

BRITISH AMERICAN TRUST COMPANY

The British American Trust Company which has its headquarters in Vancouver, has published a statement showing its financial condition on June 30th last. The largest item in the assets is loans which total $325,904. Investments in stocks, etc., total $66,041. The statement says nothing of the character of these. The company has heavy cash assets, the amount on hand being $5,410 and deposited in the bank, $70,315. Office premises are valued at $62,372. Sundry shareholders' subscribed stock amounts to $99,669. Other assets, not specified in the statement, total $13,000.

The company has a surplus of $150,000 and reserve of $44,450. Its capital is $338,900. The liabilities to the public aggregate $107,539, of which savings account accounts for $54,571, deposit (time) receipts $18,759 and current accounts, $34,208. There is a reserve of $8,013 for dividend and undivided profits amount to $20,284.

Messrs. Kendall, Sewell and Company, auditors, have examined the books and accounts of the company and inspected their securities and they certify to their correctness. The company seems to be making good progress.

UNITED STATES STEEL CORPORATION'S BIG EARNINGS.

The United States Steel Corporation, which will build a $20,000,000 branch plant at Ojibway, Ontario, broke all records, except that of 1907 earning $41,219,813 for the quarter ended on June 30 last.

The net earnings of $41,219,813, after deduction of operating expenses and interest on subsidiary company bonds, compare with $25,102,265 for this quarter last year. The record for this quarter was $45,503,705 in 1907. In only two other years of the Steel Corporation's history have the earnings crossed the $40,000,000 at this quarter. The earnings for the quarter are $6,793,012 greater than those of the first quarter of this year.

The surplus for the quarter of $13,619,365 is the largest in the history of the corporation at this season of the year. It compares with a surplus for the first quarter of last year of $56,483. The highest previous surplus for this quarter was $6,410,093 in 1910.

A feature of the showing of the Steel Corporation is that a surplus of $20,988,965 has been built up during the first half of the year, which compares with a deficit of $6,235,651 at the end of the half year in 1912. With this surplus, the corporation has earned its dividend requirements for the remainder of the year of $4,328,435.

◆

The Metropolitan Bank has opened a branch in Stratford, Ontario, under the management of Mr. J. C. Massie.

The money stringency that has been felt in this country for some time has been of a searching character and has been corrective and useful. Speculation is not likely again to get out of hand in Canada.—Toronto Mail and Empire.

JULY MUNICIPAL BOND SALES

Totalled One Million and Half—United States Houses Acquire Two Issues

The municipal bond sales in Canada for July, as compiled by *The Monetary Times*, amounted to $1,591,924, compared with $2,435,726 for June, and $1,967,476 for the corresponding period last year, and making a total for the year of $13,013,935.

Six provinces were in the market. The largest issues were made by McLeod, Brandon and Halifax.

The amount of Canadian municipal bonds sold in the United States during June was as follows:—

Watrous, Sask.	$ 70,000	...	....
Halifax, Nova Scotia	299,000	4½	1945

The following are the particulars by provinces:—

Alberta	$ 672,030
Manitoba	281,926
Ontario	283,968
Nova Scotia	258,000
Saskatchewan	82,800
British Columbia	13,200
	$1,591,924

The following are the monthly totals during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 881,838	$ 420,337	$ 2,133,531	$ 1,337,500
February	1,272,977	1,037,287	2,596,378	1,038,806
March	1,169,730	6,271,025	1,926,716	1,035,492
April	6,805,078	3,910,288	927,160	3,693,857
May	5,964,896	3,946,047	1,928,748	1,880,630
June	2,187,588	3,983,670	1,690,344	2,435,726
July	1,536,424	1,594,566	1,967,476	1,591,924

GRAND TRUNK EQUIPMENT NOTES

Issue in London Causes Further Comment—They Were Oversubscribed

Criticism is still heard regarding the Grand Trunk Railway's issue in London of £1,500,000 5 per cent. 5-year equipment notes at 98, the underwriting commission being 1¼ per cent. This issue was, however, over-subscribed. Mr. Chamberlin, president of the road, informed *The Monetary Times* that the funds were needed to pay for equipment now on order.

Money Urgently Needed.

A London cable message says:—"It may be taken for granted that the money is urgently needed, as the Grand Trunk has for a long time past been spending considerable sums, amounting last year to over £250,000, on hired equipment in spite of the fact that the line has had the use of rolling stock which has to be passed on to the Grand Trunk Pacific line in due course.

"Moreover, the Grand Trunk Pacific prairie section will shortly be linked up with the main Grand Trunk system via Cochrane, and it is expected that a large increase in traffic will accrue therefrom. As it is the Grand Trunk's traffic has been increasing in a remarkable fashion for the last few years, and it is surprising that some special equipment financing has not already been undertaken.

Objections of London Market.

"The market here objects to the company embarking on a new form of financing (for the Grand Trunk) by the issue of short term notes, but it is being pointed out that many of the first-class roads in the United States, such as the Lake Shore and the New York Central, have been recently doing the same thing and on no better terms than the Grand Trunk is able to obtain; in fact, in most cases your lines have had to pay considerably higher rates than the Grand Trunk for temporary loans of this nature."

An explanation of the sale of these notes in London, instead of in the United States as heretofore, may possibly be in the association of Sir Felix Schuster with the Grand Trunk Pacific Railway, of which he is a director. He is also president of the Union of London and Smith's Bank, of London, which acted as trustee for this issue.

Commenting on the issue of Grand Trunk and Canadian Northern short term notes, the London correspondent of the New York Annalist, says:—"It might be thought from the success of the city of Winnipeg's issue here, which was oversubscribed, and the ease with which one or two exceptionally attractive industrial issues have been floated, that the new loan market was entering on better days. But the Grand Trunk and Canadian Northern Railway Companies have obviously found it otherwise. Needing money, they and their financial godfathers have not ventured to issue long-term stock. They have eaten of the fruit of the tree of knowledge shown to them by the American railroads, and have been borrowing on short-term notes, one at least, at ruinous rates. The Canadian Northern has had to allow 6½ per cent. to buyers of $3,500,000 one-year notes. The Grand Trunk has got off with 5½ per cent. in selling $1,500,000 five-year notes. In each case the notes are secured by collateral, the Grand Trunk on $2,000,000 4 per cent. debenture stock, and the Canadian Northern on $5,000,000 3½ per cent. guaranteed bonds.

Advice for Our Railroads.

"The idea is that when the notes mature the loan market will be more favorable, and the collateral will be issued to repay the notes. That is the happy-go-lucky idea which underlies all finance of the sort. And then when the time comes there is another Balkan war, perhaps, and the borrower has to renew the short-term loan again at an exorbitant rate. The shorter the term for which you borrow, the more opportunities you give to lenders to squeeze you. And in nine cases of the sort out of ten of which you have experience, the event has shown that it would have been better policy for the borrower to have made a fixed loan at once, even on the terms that seemed very bad at the moment, and to have had done with it."

WESTERN LOANS AND COLLECTIONS.

The Monetary Times, discussing the question of loans and collections with the manager of a loan company in Winnipeg, was told that payments are coming in satisfactorily, but that so far as loans are concerned, there is little money to be had. Notwithstanding this, a number of the leading firms are doing a considerable amount of loaning, on both farm lands and city property.

Wholesale houses report that collections are poor, but they look for an improvement this month and next.

Some Matters Canada's Life Underwriters are Discussing

CANADA'S INSURANCE DEPARTMENTS

There are five provincial insurance departments in Canada, one each in Ontario, Manitoba, Saskatchewan, Alberta and British Columbia. These departments are administrated by a superintendent, inspector or commissioner, who has under his care all insurance matters arising in the province, while every insurance company doing business there must report to him regarding their movements and business in the province. Alberta, which has just passed an insurance act very similar to that of Manitoba, was the latest to inaugurate such a department and has yet to appoint its commissioner.

There are a large number of important problems in provincial insurance legislation and other insurance matters which require expert consideration. Differences in provincial insurance laws need adjustment, in order to simplify the work both of the insurance companies and of the insurance departments. The best way to achieve these ends is obviously to form an association of the provincial insurance commissioners, who could meet annually to discuss their problems. Such an association exists in the United States and its yearly gathering is an important one. At the most recent, they decided to admit Canada's insurance commissioners to membership. While this gracious act is appreciated, it makes a Canadian organization none the less necessary. We need badly uniform provincial insurance laws, and should like to see the commissioners get together for their own good, and that of insurance, the companies and the public.

LIFE INSURANCE BREAKDOWNS

The collapse of the Union Life Assurance Company and the reassurance of the Home Life Association by the Sun Life are unhappy events of the current year in Canadian life insurance spheres. Such occurrences do not help the cause of life insurances in Canada or of investments in life companies' stocks. The shareholders of both unfortunate institutions will suffer heavily. In the former, a large block of stock was held by English investors, many of whom could ill afford to lose their holdings.

The chief consolation is that the exeunt of these two companies clears the life insurance atmosphere. It was known there were weeds in the garden. The hoe has been doing its work. The incidents should prove a warning to any existing companies inclined to tread cautiously on the border line of danger. If the house is not in order, reform should come immediately, rather than that other insurance breakdowns should occur.

Recent history will make more difficult, too, the starting of new life companies. Several, including the Colonial Life and the Commonwealth Life, are in the promotion stage. The Saskatchewan Life, we believe, has been there for several years. With new companies, as with old, the investing and insuring public want to know that the men promoting or operating them are experienced in the intricate art of underwriting and have a sterling reputation behind them. Random Toms, Dicks or Harrys cannot manage a life insurance company. It needs picked men of the right type and calibre. Investors should recall that fact when canvassed to purchase shares of a new company.

There is every necessity to maintain Canadian life insurance at a high standard. It has grown into a business of large proportions. The amount of life insurance in force in the Dominion, according to the government returns recently published, increased last year by over $120,000,000. The total for 1912 was $1,070,265,556, and for the previous year $950,220,771. There was an increase of 162,196 policies in force. The number of new policies taken up last year was 39,352 greater than in 1911. The premiums during 1912 exceeded by $4,091,998 those of the previous year. Claims paid during 1912 totalled $12,750,310, a gain of $1,698,631 over the figures of 1911. This business of life insurance is big enough, good enough, to be kept unsullied by even the breath of public suspicion.

GOOD LIFE RISKS

About forty life insurance companies in Canada and the United States some time since contributed their data to a joint committee of the Actuarial Society of America and the Association of Life Insurance Medical Directors for the purpose of an investigation to determine the influence of occupation, family history, build, etc., upon the mortality of insured lives. Volume one of the report published a few months ago dealt with the methods and scope of the investigation, new tables of height and weight for men and also for women, and rates of mortality to be used as a standard in obtaining the expected deaths in the several groups studied. Volume two will cover the influence of build upon mortality among men, cause of death, mortality among women, influence of build on mortality among women, and several other interesting facts. The reports, compiled as they have been from such broad experiences, will furnish a valuable contribution to the question of mortality and an excellent guide to the determining of good risks. The circle of "good risks," too, may possibly be widened as a result of the report, which fact will be of especial interest to those companies writing sub-normal business.

IS THERE LACK OF INTEREST?

Are all the latest recruits in the life insurance agency business helping the Life Underwriters' Association of Canada to progress?

Are the younger men in the business assisting, or is the work being left to those who have from the beginning put time, energy, labor and money into the Association, and are continuing to do so?

Are some of the branch associations lacking interest in the work and principles of those associations, with the result that some of them are in a parlous condition and reorganization is an almost immediate necessity?

REBATING IN LIFE INSURANCE

The Life Underwriters' Association has done good work in eradicating evils in the business of life insurance. Rebating has been considered one of the most vicious. The Insurance Act of 1910 contains a clause forbidding rebates and discrimination. Although the practice was somewhat common, united effort on the part of the Association has checked it considerably. Clause 87 of the Insurance Act is plain in its language. Despite that fact, and in face of the work of life underwriters desiring a clean insurance field, rebating is continued in various disguises.

The law says that "no life insurance company shall make or permit any distinction or discrimination in favor of individuals between the insured of the same class and equal expectation of life in the amount of premiums charged, or in the dividends payable on the policy, nor shall any agent of any such company assume to make any contract of insurance, or agreement as to such contract, whether in respect of the premium to be paid or otherwise, other than as plainly expressed in the policy issued; nor shall any company or any officer, agent, solicitor or representative thereof pay, allow or give, or offer to pay, allow or give, directly or indirectly an inducement to insure, any rebate of premium payable on the policy, or any special favor or advantage in the dividends or other benefits to accrue thereon, or any advantage by way of local or advisory directorship where actual service is not bona fide performed, or any paid employment or contract for services of any kind, or any inducement whatever intended to be in the nature of a rebate of premium; nor shall any person knowingly receive as such inducement any such rebate of premium or other such special favor, advantage, benefit, consideration or inducement; nor shall any such company or any officer, agent, solicitor or representative thereof give, sell or purchase as such inducement or in connection with such insurance any stocks, bonds, or other securities of any such insurance company or other corporation, association or partnership."

The Monetary Times understands that one of the most ingenious ways to circumvent this law is for underwriters to give prospective policyholders an agent's contract. Suppose, for instance, the agents of two companies are soliciting business from Mr. Smith. The contest for that business becomes keen and one of the agents offers Mr. Smith an agent's contract. It is accepted and the first business handed by Mr. Smith, the new agent, to the company is insurance on his own life. As a budding agent he takes his commission on the business. This is rebating in a roundabout way, but it is rebating just the same. We are told, too, that it is not an uncommon occurrence. Mr. Smith, the agent-policyholder, usually does no further business for his company, as the little conspiracy arranged by the regular agent and Mr. Smith has been hatched and dispatched. The Life Underwriters' Association may well consider further steps to stop such practices. Perhaps new machinery can be devised for that purpose.

PENSIONS FOR LIFE INSURANCE AGENTS

A discussion on the question of pensions for life insurance agents is on the programme for Thursday morning at the Ottawa convention. The subject was raised at the previous gathering and possibly has had the serious consideration of the managers since then. The argument advanced is that when an agent makes life insurance his life's labor, and builds up an excellent business for the company in his district, an adequate pension is due from the employers when old age comes and his period of usefulness to the company is at an end. With that, *The Monetary Times* is in agreement. There is an actual and moral obligation on the part of employers who squeeze the best years out of a man's life. The law of the survival of the fittest may be a natural one, by which the once useful and strenuous worker is compelled to make way for the younger man. But it is a law which year by year is being brought into line with modern civilization. The elderly man of past years is an old man in these times, because he is bound to do three days' work where his grandfather did one. The pace of the twentieth century has reduced the number of working years, but has increased productivity in those years.

Employers are recognizing that they can obtain the best men and the best services by giving their employees not only the current wage, but also provision for old age. The pension for life insurance agents will come, although it may take some years to achieve common action. Some companies already have adopted the principle; some have done so to a limited extent. The managers may balk at the extra expense for a while, but the cause is far more just than is that of some life insurance legislation we know. Pensions, however, should be only for real agents who do real work.

PREMIUM NOTES

Vote for Calgary for the 1914 Life Underwriters' convention.

* * * *

"I'll make assurance doubly sure." Macbeth's legacy to the life insurance men.

* * * *

With so many ex-presidents, the Ottawa convention will look like Mexico on a fine day.

* * * *

Most difficult risk I ever secured, is a convention topic. Being born should come first.

* * * *

Sir Wilfrid Laurier will probably note the great spirit of reciprocity among the life insurance agents.

* * * *

As the office boy says, the retiring president of the Dominion Life Underwriters' Association is a Tory with grit.

* * * *

The Ottawa convention will again prove Premier Asquith's shortsightedness in picking his poet laureate in England.

* * * *

Value of the club idea in large agencies is to be discussed by Mr. J. C. Stanton. What sort of a club does he mean?

* * * *

It is a safe guess that Mr. T. J. Parkes, of Quebec, will spring a full size poem upon the life underwriters' convention at Ottawa.

* * * *

A discussion on how to close business is slated for Tuesday's convention session. How to open it would be more interesting during tight money times.

* * * *

President Tory will sum up the topics on Thursday morning and has not forgotten lunch time and sightseeing will tread on the heels of his oratory.

* * * *

Silent wishes have gone broadcast that all the speakers at the Ottawa insurance convention will refrain from quoting Shakespeare and all other poets extinct or extant.

* * * *

Ex-President Roosevelt should be called to Ottawa on Tuesday afternoon to give his views on one of the topics for discussion then, "How to Stimulate Steady Production."

* * * *

Mr. William McBride, of Winnipeg, will give an address at the life insurance convention on "How far to press a man," with due allowance for Wednesday evening's banquet.

* * * *

Frozen eggs seized by New Jersey inspectors three years ago as unfit for food, the subject of much litigation, have now been released for sale by the state board of health. Members of the board ate foodstuffs made from the eggs—pretty poor life insurance risks.

THE NEED FOR FIRE MARSHALS

Fire has caused serious havoc in every part of the country during the first two weeks of August. Incendiary fires have been frequent. One incendiary has confessed to his guilt. Others have escaped because it is everybody's, and therefore nobody's business to investigate the causes of fires.

Every day the need of a government fire marshal for each province becomes more emphasized. Manitoba and Saskatchewan have such officials, and the other western provinces will shortly follow, because the west has a keen appreciation of speedy enterprise, but Ontario lags behind.

Many alarming fires have occurred in Ontario already this month, and as suspicion is excited as to the causes of several, a government fire marshal should be on the spot to investigate. The necessity of the appointment of such an official is so obvious that it is difficult to see why the Ontario government does not make a quick move in the matter instead of giving the proposal the usual lengthy, official cooling process, before taking any action.

The monthly record of Canada's fire waste, compiled by *The Monetary Times*, shows that since January, the losses have aggregated nearly $17,000,000, as compared with $22,900,000 for the whole of 1912. The July fire waste was $2,614,198. The reduction of fire losses is an important work and the appointment of government fire marshals will be valuable assistance in that work.

A TRICK IN FIRE INSURANCE

A man decides to place $5,000 fire insurance on his property. He consults his broker, who recommends the A. B. C. Fire Insurance Company. Later, he telephones his broker telling him to place another $4,000 on the property with another company. The broker puts the second amount with the D. E. F. Fire Underwriters. A fire occurs, and the insurer discovers that he has $9,000, not with two companies as he imagined, but in reality with one. He might have known, had he read his policy, is the chief excuse. Few men read the conditions and wording of their policies. Fire insurance brokers and companies know that. Some of them trade upon the fact. It is a trick in fire insurance and *The Monetary Times* hopes to see the government insurance departments of Canada stop the trick.

WESTERN CANADA'S CROP

When one, John Ingles, of Chicago, estimated the Canadian wheat crop at 170,000,000 bushels, he was needlessly putting his foot, rather than his head, into the crop. A Winnipeg correspondent says that report "is the most ridiculous thing he ever heard," and *The Monetary Times* agrees. The provinces of Manitoba, Saskatchewan and Alberta, he adds, will produce this year over 200,000,000 bushels of wheat, to say nothing of the oats, barley and flax.

This correspondent has but slight regard for these so-called United States crop experts, for he says: "They have their instructions before leaving the Chicago office as to what they are to report regarding the crop. If their principals are long on the wheat or corn market they send in a bullish report. If they are short they send in a bearish report." And here is his suggested remedy:

"It would be a good thing for this country if those gentlemen could be prohibited from entering the Dominion and I believe that our government should take some steps to prevent them from doing so. They have caused the farmers, millers and grain dealers of this country many million dollars in the last few years by the absurd reports which they have sent out from time to time."

There we disagree somewhat, on the principle that it is impossible to have a good thing and for the other man to hide it. Western Canada will have a satisfactory harvest. No matter what Chicago and other United States experts say, Canada knows that fact, so do its supporters, so do its detractors. Besides, there are people in Winnipeg who send out curious crop reports sometimes. So we can afford only to wink at Chicago and other United States experts, meantime keeping our other eye on the coming crop, which will be a good one.

SMALL CHANGE.

A French aviator owes $8,000,000—a case of real high finance.

* * * *

A Montreal paper talks of "filthy money." No wonder it is tight.

* * * *

That bonus cut at Montreal was a slap at the shareholders' crown and the mine's reserve.

* * * *

Since the Balkan war closed, President Huerta is giving much-needed fuel to explainers of the tight money situation.

* * * *

A Toronto daily says that the city has missed the stringency. Probably the reporter was at the ball game in the sunshine.

* * * *

The directors of the Canadian Light and Power Company should remember that it takes a lot of power to hide the financial light.

* * * *

This financial stringency is like the popular song—everyone knows the tight money chorus, but few the natural resources verse.

* * * *

A Wall Street contemporary discusses obligations in regard to the mails. Some brokers we know on vacation are not worrying about that.

* * * *

"Opening our Sunday paper we were presented with the spectacle of four new Canadian issues," says a London weekly. More work for the Alliance!

* * * *

Those oversubscriptions of Canadian issues in London made a good reply to critics, even if the oversubscriptions were achieved as a result of hard pumping.

* * * *

The shareholders of the Canadian Light and Power Company do not seem perturbed at the paucity of information given by the directors at the annual meeting. One day, a new breed of shareholders will hold up its head.

* * * *

A cable message from Belgrade says that a clerk has been dismissed from the Servian Foreign Office for indiscretion in revealing news. The more acute the angle at which a Servian wears his hat, the greater is supposed to be his exhilaration, and this young man, though silent, could not, on hearing of every fresh victory even before it was publicly known, resist putting his hat on jauntily awry. Reporters, when they could get no news from headquarters, watched for him at the luncheon hour and wrote fiery articles in proportion to the angle of his hat What fearful things are in store for Canadian merger promoters!

ADDITIONAL RECENT FIRES

Athabasca, Alta.—August 5.—The Athabasca Hotel, thirty stores, two banks, two newspaper plants, warehouses, railway cars,, and several dwellings. Total loss of $750,000. The heaviest loser is Isaac Gagnon, owner of several of the buildings, his loss being $250,000. The Athabasca Forwarding Warehouse, filled with goods consigned to Peace River, was burned to the ground with contents valued at $50,000. The losses include: Athabasca Forwarding Company, Athabasca Hotel, Gibbings' restaurant, Hackett, cigar store, Strikers' dry goods store, Royal Bank, Grand Union Hotel, Culls' drug store, Telephone Exchange, Bank of Commerce, Friedman's tailoring shop, R. Evillion's warehouse, Durbor's grocery, Generoux barber shop, Greek restaurant and pool room, Hyndman's clothing store, Lolette's bowling alley, Gaskell confectionery, R.N.W.M.P. Barracks, Hudson's Bay warehouse, and two cars on the Canadian Northern tracks.

◆

ADDITIONAL JULY FIRES

West Korah, Ont.—July 30th.—Scott's mill. Loss, $2,500. Partly insured.

Amherst, N.S.—July 24th.—Strang's livery stable. Loss, $5,000. Cause unknown.

Hampton, N.B.—August 2nd.—Wm. Purdy's house at Lakeside, occupied by E. Powers. Cause, lightning.

Montreal, Que.—July 31st.—D. Lalonde's saw mill. Loss, $17,000. Cause unknown.

Brockville, Ont.—July 28th.—Wood's brickyard. Partially insured. Cause, heat from kiln.

Edmonton, Alta.—July 30th.—New restaurant in Jasper Avenue, occupied by George Harbor.

South Vancouver, B.C.—July 24th.—McGibbon and Hodgson's shingle mill. Loss, $5,000.

Vancouver, B.C.—July 31st.—Svea Cafe. Loss, $3,500. Lodging house above and G. D. Weatherby's residence adjoining.

Armstrong, B.C.—July 27th.—T. K. Smith's saw mill at Woollen's in Salmon Valley. Loss, $6,000. No insurance. Cause unknown.

Perth, Ont.—July 29th.—W. Brook's residence and the Baptist Church. Loss, residence, $4,000, church, $1,500. House partly insured.

Orangeville, Ont.—July 31st.—Fleming's barber shop. Loss, $30,000. Adams Hardware Company and Ritchie Brothers, stores on either side each suffer from $10,000 to $15,000 loss. Partially insured. Cause unknown.

Saskatoon, Sask.—July 21st.—F. C. Harrison's dwelling. Estimated damage on building, $100. Insured. Cause, lightning. A. Schwartz dwelling. Estimated damage to stock and building, $1,900. Insured. Cause, lamp explosion. Carter Hall and Company's lumber pile. Loss, $50. Spontaneous combustion.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Trenton, Ont.—July 22nd.—Canada Creosoting Company, Limited. Loss on stock, $10,000. Cause unknown.

Vancouver, B.C.—June 26th.—John Morrison's dwelling. Loss $892.50 on building. Insurance $1,000 Royal, Cause, electric wiring.

Brandon, Man.—July 24th.—Local telephone office. Loss, $100,000. Cause, supposed spark carried through open door at rear of premises.

Vancouver, B.C.—June 17, 1913.—A. Roy's hardware store. Loss, $475 on building. Insurance, $2,160 Connecticut. Cause, range in restaurant.

Victoria, B.C.—July 22nd, 1913.—A. J. Payne's dwelling. Loss on building $400 on contents $235. Insurance on contents $800 Scottish Union.

Vancouver, B.C.—July 17th.—Alexandra Hotel. Owner, Miss I. M. Hamersley. Loss on building, $300. Insurance $15,000 Caledonian and $14,000 Rochester German. Cause, guest supposed to throw down lighted match.

Nanaimo, B.C.—July 17th, 1913.—Mrs. M. Beltner's store and dwelling. Loss on building, $1,375, on contents, $500. Insurance $2,000 on building, Pheonix Assurance Company. Cause, cigarette stub.

Earl Grey, Sask.—July 12th.—Stock and building owned by S. W. Dawson. Loss on building, $15, on stock, $12,000. Insurance on stock $10,000 London and Lancashire and $5,000 Pheonix of England.

New Westminster, B.C.—July 18th, 1913.—J. A. Gibson's shingle mill. Loss, $780 on buildings, $2,700 on contents. Insurance $1,000 Stuyvesant Insurance Company, $2,000 Intercolonial on buildings. Cause, hot box.

Hensall, Ont.—July 12th.—Geo. Joynt's frame evaporator. Loss on building, $3,000, on stock, $6,000. Insurance on building, $950, Anglo-American, $950 Rimouski, on Stock, $2,000 Merchants, $2,000 Dominion. Cause unknown.

South Vancouver, B.C.—July 24th.—Reliance Lumber and Shingle Company's shingle mill. Loss on building, $450; on contents, $3,500. Insurance, $2,000, under schedule covering building and machinery. Occidental Fire Insurance Company. Cause unknown.

Queen Charlotte City, B.C.—May 17th, 1913.—M. Lauder's rooming house. Loss, $2,200 on building, $500 on contents. Insurance, $2,500 Ontario Fire Insurance Company on building. Contents not insured. Cause, defective pipe.

Toronto, Ont.—August 9.—Hatherley Road, No. 1, owned by R. A. Blackmore. Loss $578 on building and contents. Insurance, $2,500, $2,000 in the Hartford, $500 in the Ontario. Adjusted by Ross and Wright, Toronto, for the assured. No. 5, owned by Brown. Value, $2,000. Total loss, $1,500, insured in Phoenix of London. Adjusted by Ross and Wright. Contents owned by Armes. Value, $1,200, insured for $600 in the Quebec. Adjusted by Ross and Wright.

Toronto, Ont.—August 2nd.—Robert Crean Hat Factory 12 to 18 Balmuto Street, near Bloor and Yonge Streets. T. A. Crow, wagon makers, lumber yard, adjacent; Mrs. William Brunt's house, 20 Balmuto, absolutely destroyed; R. A. Leckie, owner, 22 Balmuto, occupied by Mrs. Harris, destroyed; Mrs. S. H. Marriott's house, 13 Balmuto, badly damaged; Mrs. Moore's house, 15 Balmuto, badly damaged; Miss Wray, dressmaker, 17 Balmuto, house badly damaged; Nos. 19, 21, 23 and 25 Balmuto, damaged to a less degree; Nos. 38, 40 and 42 Charles Street, damaged in rear by water; garages in the rear of North Street, damaged by fire. The insurance is all held by Reid, Shaw and McNaught. The buildings are said to be well covered by insurance, although the houses on Balmuto Street are not all insured.

Athabasca, Alta.—August 5th.—Fire at Athabasca Landing, among other losers are the following:—Gagnon's brick block, $30,000; Brault and Viens, $10,000; Gaskell's, $2,000; A. MacLeod, $10,000; Dueckh, hardware, $12,000; R.N.W.M.P., $4,000; Grand Union Hotel, $50,000; bowling alley, $3,000; Athabasca Trading Store, $16,000; Athabasca cafe, $3,000; pool room, $2,000; Papa's fruit store, $1,000; F. Dubord, $5,000; N. Ganeraux, pool room, $10,000; municipal office and Henry's law office, $500; I. Gagnon's office, $500; Athabasca club, $2,000; Oliver's barn, $4,000; Northern Trading Store, $2,000; Revillon's warehouse, $6,000; Friedmann's, tailor, $1,500; H. F. Cull, drug store, $7,000; Royal Bank, $2,000; Hughes, butcher shop, $1,000; Bank of Commerce, $1,000; Stocker's Bon Marche, $1,000; Hackett's cigar stand, $3,000; E. Gibbings, $500; Ney's ice cream parlor, $1,000; shooting gallery, $2,000; Athabasca Hotel, $20,000; I. Gagnon's barn, $6,000; Athabasca Forwarding Company warehouse, goods, $50,000.

TORONTO HARBOR BONDS SOLD.

A block of Toronto Harbor Commission bonds are being sold in the United States at about 90.

◆

J. N. GUNN RESIGNS IMPORTANT POST.

Mr. James Newton Gunn, of the well-known firm of Gunn, Richards and Company, Production Engineers, New York and Montreal, has resigned the general managership of the Studebaker Corporation of South Bend, Ind. Mr. Gunn's chief interest has always been the work of his production engineering firm, and it was the splendid record which he made in that business which prompted the executive committee of the Studebaker Corporation in inducing him to take up the general managership of their corporation—at a salary of $15,000 a year it was rumored—in addition to his own interests.

The business of the firm of Gunn, Richards and Company during the past couple of years has grown to such an extent, however, that Mr. Gunn desires to devote practically all his time to its affairs. He remains on the board of directors of the Studebaker Corporation, and his resignation will cause no change to be made in its administrative policy, as Clarence Booth, of Detroit, who was assistant general manager under Mr. Gunn, will now be the active head of the Corporation.

Mr. Gunn and his partner, Mr. Richards, either personally or through their staff of fifty or more engineers and accountants, are retained as managers of or engineers for a large number of industrial concerns in varied lines. Several of these concerns are located in Canada, Gunn, Richards and Company, having an office in the Eastern Townships Building, Montreal, under the management of H. Victor Brayley.

HAS A CRISIS BEEN REACHED IN LIABILITY INSURANCE BUSINESS?

New York Official Circular Stirs Companies—One Corporation Has Already Cut Commissions—Canadian Concerns Are Interested

The superintendent of the New York insurance department did not mince words in his recent circular issued to the liability insurance companies. The superintendent said as follows:—The condition in the liability business has become so serious that this department intends to hereafter call the various companies to strict account in their conduct of this class of business. The companies generally have been and now are writing liability business at a premium insufficient to take care of the losses and expenses. This method of doing business means a loss to the companies, and its continuance will mean insolvency. The liability policy protects the assured, not only against claims maturing during its life, but also against claims maturing years after the policy expires, on account of accidents occurring during the policy year.

Solvent Now and Later.

It is of particular importance to the assured that the company which issued the policy shall continue solvent, not only during the life of the policy, but for a number of years thereafter. A study of the loss reserves of the various companies shows that practically every one of them has set aside an insufficient amount to take care of future losses on its liability business, although the reserve is computed in accordance with the present loss reserve law. The expenses chargeable against this class of business are excessive, and, in view of this situation, it would seem that the aim of the various companies should be to remedy this condition by securing adequate premiums and by reducing expenses to a minimum. But the contrary is the fact. Competition is the basis for the underwriting, and the same influence is responsible for the high commissions now being paid on this class of business. There can be no justification for a commission in excess of 15 per cent. to brokers, and perhaps a slight increase over that rate to agents, but in no event should the total commissions exceed 20 per cent. This department will insist upon the companies conducting their liability business upon a sound basis and in particular as follows:—

What the Superintendent Requires.

First—Basing their underwriting upon statistical experience and the physical and moral hazard of each individual risk and free from the influence of competition.

Second—Commissions not to exceed the percentages stated above.

Third—Administration expenses to be minimized.

If it is found, through examination or otherwise, that any of the authorized companies of other states are transacting their business contrary to the above recommendations, and in such a manner as to jeopardize the interests of the assured, I will not hesitate to use the power vested by law in the superintendent of insurance to revoke the certificate of authority of any such company whenever, in my judgment, such revocation will best promote the interests of the people of this state.

If it is found, through examination or otherwise, that any of the domestic companies are continuing such practices this department will, through publicity and other means, call the attention of the insuring public to the character of the protection such company is affording.

If it becomes necessary this department will seek through legislation further means for the protection of the insuring public.

Conditions in Canada.

Such a strongly-worded circular naturally has created a stir among the liability insurance companies. Those doing business in Canada are also interested in New York's action and it is thought by authorities in the business that there is likewise room for improvement in the conduct of the business in the Dominion. The heaviest losses by the companies have been in employers' liability risks. This business has reached fairly large proportions in Canada where, as the table at the head of this page shows, twenty companies are transacting the business.

No Money Made at Present.

A report recently made by the New York insurance department on the examination of the United States branch of the London Guarantee and Accident has shown conclusively that even a company which has a well-established business and writes conservatively, can be a sufferer from the present conditions prevailing in the liability insurance business. In the case of American companies which do not have a foreign home office to fall back upon for more funds when occasion demands, the situation is particularly puzzling. While some of the larger companies, undoubtedly, have been able to make up their underwriting loss on liability business from profits in other lines or by reason of profitable investments, the fact remains that even with the existing high rates, which the general public complains of, there is no money to be made in the liability insurance business as it is now conducted. When a company like the London shows an underwriting loss of more than $200,000 on an underwriting income of about $3,500,000, it is generally acknowledged, as the New York insurance press says, that the handwriting on the wall is unusually plain.

This Company Will Cut Commissions.

While the discussion on this subject is in full swing, Mr. John T. Stone, president of the Maryland Casualty Company has announced that the commission rates paid to his company's agents, on all forms of liability business, will be reduced, commencing on September 1st. Mr. Stone continues:—"Such a measure as this is, we are fully aware, possible of great damage to our agency organization. It offers a tempting opening to our competitors to entice our field men with attractive offers to which the agent's natural resentment against a cut in commissions may dispose him at first to respond. Hence, we have been most reluctant to take this action and have done so only because we are convinced that it is inevitable.

"We are confident, however, that very few, if any, of our agents will leave us. We believe they will, upon full consideration, recognize the wisdom and fairness of our action, and will approve it, and will adjust themselves and their affairs to this change in the rate of their compensation for liability business."

Rates Should be Increased.

Mr. Stone also notes the necessity of an increase in rates. Discussing the entire situation, he says:—"Repeatedly, and in various ways during the past six months, the portentous condition of the liability insurance business has been plainly set forth. The great increase in losses and loss ratios, and the permanent nature of the causes thereof, indicating clearly the permanence of these heavy ratios, have been stated unreservedly, though in general terms. Now, having the record of the first six months of 1913 before us, we earnestly ask every agent of the company to read the following figures and to regard seriously their significance.

Made a Net Cash Loss.

"Our earned premiums for this period on all forms of liability policies were $1,639,373.37. The losses and loss expenses were $1,184,739.73 and the expenses were $657,991,-23, making a total outgo of $1,842,730.96, thus producing a net cash loss of $203,357.59 in six months on the liability department of the company's business. It has been an axiom in liability insurance statistics that 'cash in and cash out' results are misleading. But, as to these figures, that statement fails to have much force because practically all of our heavily increased loss payments result from 1912 business.

"It must be born in mind that this result is in the face of the fact that the rates of premium have been distinctly higher during the period named than formerly. It is therefore evident that still further advances in rates are necessary."

Canadian Manager Fears Government Action.

Mr. J. W. Mackenzie, manager for Canada of the Maryland Casualty Company, discussing the matter with *The Monetary Times* said:—"We have been waiting for some time past for united action on the part of our competitors in this affair, but have decided that in view of the possibility in the near future of the Government stepping in and taking a hand in the business, we could not afford to wait any longer in taking action ourselves, hoping this will have some effect at least in inducing our competitors to follow suit without delay."

SEVERAL COMPANIES HAVE CHANGED NAMES.

The name of Frith, Townshend and Company, Limited, has been changed to Frith, Pardee and Townshend, Limited.

The Central Electric and School Supply Company has changed its name to Central Electric Supply Company, Limited.

The name of the American Multigraph Sales Company, Limited has been changed to the Multigraph Sales Company, Limited.

The Parisian Diamond Company of Canada has changed its name to Pearce, Limited.

COMMERCIAL MISSION FROM RUSSIA.

Professor J. M. Goldstein, of the Moscow High School of Commerce, is in Canada on behalf of the Russian Government, and will investigate commercial, agricultural and natural conditions in Canada, so that the relations between the Dominion and his own country may be strengthened.

Professor Goldstein says he sees no reason why Canada, with her magnificent agricultural machinery, should not get a strong footing in Russia, where there was an extensive and profitable market, and steel goods, boots and shoes and other manufactures should also be acceptable if Canada, like Germany, employed capable travelers and commercial agents to sell her wares. In return it was not unreasonable to suppose that Russia would find an outlet for her poultry, eggs, butter, wool, skins and some agricultural products, the more especially as he noticed that large quantities of some of our supplies were at present brought from Australia. Professor Goldstein will visit Ottawa, Toronto and the west.

AUTOMOBILES OR LIFE INSURANCE

Evidences as to Farmer's Finances Should be Pointers for Agents

The following facts relative to farmers and agriculturists and life insurance business should not escape the notice of those Canadian agents who are working in the agricultural areas of the Dominion, and who sometimes complain of amount of business which they secure, perhaps they may give some a new view point as to the value of the farmer as an insurance prospect.

The residents of the country districts, in other words, the farmers, their wives and families—are, as a class, thrifty and economical. There will be none, we imagine, who will attempt to controvert that statement, none who will contend that, as a class, the dwellers upon our farms are less provident than those of a similar station in life who inhabit the cities. Why, then, should it be difficult to insure the farmer, if it is difficult? asks The Spectator.

Educational and Other Work.

Apparently it must be for one of two reasons, or possibly both: either they are not convinced of the desirability—nay, the necessity—of insurance, or they are not financially able to increase their line if they are already insured.

If the former reason obtains then it is clear that there is educational work to be done in the farming sections by intelligent and persuasive insurance salesmen. If the farmer has money to invest and it goes into automobiles rather than into life insurance policies, what excuse can be offered by the insurance men who visit the farming sections? Let us now consider for a moment the second point: Is the farmer equipped financially for further investment in life insurance? An answer in the affirmative would seem to be amply justified for several reasons.

Agents Should Be Reapers.

The year 1912 was marked by bumper crops all over the country. Who is there who reads the papers and is not familiar with the fact that during the harvest time of 1912 the cry from the farming sections was ever for men, and more men, in order that the tremendous crops might be promptly harvested?

The foregoing is history and cannot be disproved, and it helps to establish as a fact that the farmers of the United States and Canada had a good year in 1912, and are financially able to talk business with the insurance man.

But some readers will demand figures; its characteristic of insurance men. Let us therefore quote briefly.

A paper of large circulation in the west secured information from some of its subscribers as to their net incomes, amount of life insurance carried, etc.

Of those who gave this information 57 per cent. owned their homes free of mortgage; 59 per cent. carried life insurance, of which 47 per cent. were in fraternal organizations. The information further shows that the average yearly income was over $1,300.

AGRICULTURAL CREDIT.

Mr. C. F. Bailey, assistant deputy Minister of Agriculture for Ontario, has returned from a trip through Europe with the American Commission that left in April to study the rural credit and co-operation systems of the Old Country. The principal study made by the representative of the Ontario Government was the rural credit and the rural co-operation systems. Both these systems have been in operation in the European countries for some time, and have proved a benefit to the farmer and producer.

The commission found that the rural credit system for the advancement of money to the farmer was a success, as the man in rural districts was encouraged by getting it at a low rate of interest. With the capital he received in this way he was able to make the improvements which otherwise would have been impossible.

The co-operative system of buying and also selling was popular in all the countries visited. A trial showed that the rural producers gained by combining in the purchase of their seed, plant or tree, saving in the cost of the article as well as in the price of transportation. The co-operative selling showed saving in the way of freight, as well as eliminating commissions which seemed unnecessary.

Messrs. Shirley and Innes, Old Country shareholders of the Alberta Land Company, Limited, Port Arthur, are visiting Canada, and have increased their investments in mortgages and real estate in Port Arthur properties.

TWO MILLION LIFE INSURANCE PROSPECTS

Since March, 1900, about 2,000,000 "prospects" of the Canadian life insurance agent have come from other lands to make Canada their home. Of these, 701,053 were English; 11,011, Welsh; 202,632, Scotch, and 59,000 Irish. The total number of British immigrants to Canada, therefore, was 973,730. Citizens of the United States coming to Canada in the thirteen years, numbered 892,529. It is safe to say that a large percentage of these arrivals are, or were not insured. The constant stream of immigration makes the Dominion one of the best fields in the world for the life insurance canvasser. This table shows that 2,521,144 men, women and children have come since 1900, to dwell in our land:—

	Total Immigrants, Fiscal Years 1900 to 1913.
English	701,053
Welsh	11,011
Scotch	202,632
Irish	59,034
Total British	973,730
African, South	603
Australian	1,939
Austro-Hungarian	164,527
Belgian	12,010
Bulgarian	12,395
Brazilian	28
Chinese	25,016
Dutch	7,496
French	21,085
German	30,762
West Indian	2,422

Hindoo	5,208
United States citizens, via ocean ports	1,400
Mexican	12
Montenegrin	36
Total Continental, etc.	656,285
From the United States	891,129
Total immigration	2,521,144

A London contemporary says that the figures of the emigration and immigration from and into the United Kingdom should be of interest to managers of life companies, particularly those who transact business in Canada, for it is to this country that the greatest number of British subjects make their way.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Mexican Northern Power Company.—Mr. D. E. Thompson, K.C., president of the Mexican Northern Power Company, says that the directors have not adopted any plan respecting the further payment of interest on the bonds presently outstanding.

Brazilian Traction, Light and Power Company.—Brazilian Traction's gross earnings for week ended August 2nd are reported at $464,499, the increase being $78,222. The gross earnings are not larger than for several weeks immediately preceding, but the gain over last year is the largest yet reported.

Duluth-Superior Traction Company.—The earnings for the first week in August amounted to $26,195.48, as compared with $23,887.70 in the similar week a year ago, an increase of $2,307.78, or 9.7 per cent. For the year to date the earnings have been $731,578.41, in contrast with $668,809.40 in the like period a year ago, a gain of $62,769.01, or 9.4 per cent.

McIntyre Porcupine Mines, Limited.—The July statement shows that for the month the total operating expense, including improvements, new purchases, as well as the cost of maintenance, mining, milling and development, was $24,533.75. Two thousand seven hundred and forty tons of ore were milled, showing a recovery of $75,003.88, or a profit of $50,470.13 for the month.

La Rose Mining Company.—The July production was 226,626.93 ounces for a value of $134,972, which, with sundry income for the month, brought the total revenue to $136,815. Marketing expenses, concentration, and other charges were $55,402, leaving the profit for July $81,413. The cash surplus on July 31st was $1,418,404 and outstanding shipments and ore ready for shipment, $299,411.

Montreal Light, Heat and Power Company.—In connection with the increase in the company's capital to $22,000,000 from $17,000,000, the directors have notified the shareholders that they will offer $1,700,000 at par on the basis of one new for each ten old shares of record September 15th. New shares are payable $25 for each share on November 17th, 1913, and February 16th, May 15th and August 17th, 1914.

Crown Reserve Mining Company.—Col. John Carson, president, says that, owing to the Carson vein, the biggest producer in the mine, being practically pinched out, the directors have decided to cut the three per cent. monthly bonus. The two per cent. dividend per month remains.

The directors have decided to drain Kerr Lake, the proximity of which to their property has made a part of it dangerous and unworkable. The lake is 48 acres in extent, and the directors think they should have pumps ready by August 25th. The lake will take three months to drain.

Canadian Coal and Coke Company, Limited.—At special general meetings of the shareholders of St. Albert Collieries, Limited, and of Pacific Pass Coal Fields, Limited, resolutions were adopted, approving and ratifying the scheme for the consolidation of these companies with Canadian Coal and Coke Company, Limited, as previously approved by the bondholders of these companies.

The application of the Lethbridge Collieries for an injunction to prevent absorption of that company by the Canadian Coal and Coke Company has been refused at the Practice Court, Montreal.

Dominion Bond Company.—A special general meeting of Dominion Bond Company's shareholders has been called at Toronto for Monday to consider a proposal to increase the capital from $1,000,000 to $1,250,000 by issuing 2,500 shares at par.

Mr. Garnet P. Grant, the president, in a letter to the shareholders, says:—

"The company having financed and having been identified with a considerable number of industrial companies, adopted a policy of financing any additional capital they might require. Even during the present financial stringency, the company has been able to satisfactorily supply all such requirements, and during the past three months has placed nearly $3,000,000 of securities of various companies. It has been deemed wise at the same time to increase the capital of the company in order that it may be in a good position to take care of any unexpected conditions that might arise.

"The company, being a private company, has no fixed dividend policy, but it has been the custom of the directors to declare dividends for the quarter as conditions warrant. In view of the present financial conditions, it has been deemed advisable to conserve the company's resources, and, consequently, no action has been taken on the dividend question this quarter. If conditions improve, as it nows appears altogether likely, a dividend will be considered in October."

HAMILTON, ONTARIO, HAS HUNDREDS OF FACTORIES

City Celebrating its Centennial This Week, Makes Everything From a Paper Bag to a Railroad Bridge

This week, Hamilton, Ontario, known throughout the world as one of Canada's great industrial cities, has been celebrating its centennial. One by one, the city has magnetized new industries, until to-day, it has 354 factories and shops, representing capital invested of $58,000,000 and turning out products every year worth over $55,000,000.

A large number of United States companies have their Canadian branch plants at Hamilton, and several others have their commercial eyes turned that way. Toronto has been receiving comparatively few new industries, as compared with Hamilton, where the citizens and the civic industrial officers have the knack of steering prospective manufacturers to the so-called Ambitious City, one which deserves a new nickname, having realized so many of its high ambitions.

Working in the Factories.

The accompanying table gives statistics of the industries of Hamilton as compiled during the latest census. The figures show that over 18,000 people are employed in the factories of Hamilton, where they earn $9,274,375. The cost of the raw material used by the 354 industrial establishments in 1910 was $28,000,000. Hamilton makes everything from a paper bag to a threshing machine, from a biscuit to a boiler, from a bottle of "pop" to a railroad bridge. It is a city of diversified industries, as the census facts show.

There is no retardment in its progress, and it is well earning its commercial nom-de-plume, the Birmingham of Canada.

All other industries noted in the table comprise: Two abrasive goods, two agricultural implements, one asbestos, one awnings, two boots and shoes, one bridges (steel and iron), one carriage and wagon materials, two clothing (women's factory), two coffins and caskets, two cement blocks and tiles, one cooperage, two dyeing and cleaning, one car wheels, one charcoal, one cream separator, two electrical apparatus, two elevators, one belting and hose leather, one fancy goods, two files, one fireworks, two furniture and upholstered goods, two printing and publishing, two patterns, one mats and rugs, one pipe and boiler covering, one liquors (distilled), two liquors (malt), two roofing and roofing materials, two harness and saddlery, one glass, one gas lighting and heating, one gas machines, one gloves and mittens, one incubators, one inks, one interior decorations, one ladders, one lamps, two lanterns, two mirrors and plate glass, one musical instruments, one mustard, two optical goods, two photography, one plaster and stucco, one pumps and windmills, one saws, one scales, two soap, one silversmithing, two stamps and stencils, one stationery goods, one stone (cut), one targets, one thread, one tobacco (chewing and smoking) and snuff, one vacuum cleaners, one vinegar and pickles, one washing machines and wringers, one woodenware, one woodworking and turning, two whips, one cotton yarns, one flypaper.

	Establishments	Capital	Employees on salaries		Employees on wages		Cost of raw Material	Value of Products

HOW HAMILTON BUILT A HOUSE IN A DAY.

If any city in the United States can build a house, value five thousand dollars, in little over twenty-four hours, Hamilton, Ontario, thinks the darker hairs on its hundred-year old head have been achieved for little. On one day this week, Hamilton built such a house, just as an index to what can be done in a typical Canadian city with Canadian enterprise.

The first sod was turned at a quarter to five, and the building five hours later was up to within a few feet of the second story. The house is equal to the average eight or nine-roomed residence. It is of two stories, and the completion of the house included every detail of steamfitting, plumbing, finishing and furnishing.

As the workmen were at work all night, arc lights were strung on poles around the building. There were at midnight between 300 and 400 men at work. The carpentering went on simultaneously with the bricklaying, and, as concrete mortar is being used, a concrete mixer was kept at work.

The building is approximately 35 by 33½ feet, and has nine rooms. Its foundations are of concrete blocks, and the brickwork is exceptionally heavy, the walls being 13 inches thick up to the second story, an outside tier of buff-colored bricks being laid over the regular walls. The interior walls are covered in the regular way with laths and plaster, the heating is by hot water, and the finishings, including the floors, are of hardwood.

The house is to be given to the winner of a guessing contest open to everyone entering the grounds. The building is being erected in Britannia Park and will probably be moved later.

◆

When the gates were thrown open on Tuesday for the official opening of the Edmonton Exhibition, visitors found every building and every inch of available space in them occupied with perhaps the finest and largest number of exhibits ever seen in western Canada.

SELLING MUNICIPALS LOCALLY NOT A SUCCESS

Canadian Cities and Towns Have Tried It—What an Authority Thinks

A number of Canadian municipalities have endeavoured to sell their debentures over the counter to local investors. *The Monetary Times* has not heard of any startling success in these experiments. The claim has been heard frequently of late that municipal bond sales would be more successful if the authorities adopted a direct method of disposing of securities. For instance, in criticism of the last New York sale, one of the newspapers, editorially, denounced the present method of selling city bonds and claimed that the officials were even derelict in not going direct to the public and offering the bonds in the form that is commonly called "over the counter." It is also claimed that the officials depend too much upon the banking community and too little upon the public.

Educating the Public.

Mr. W. A. Prendergast, controller of the city of New York, discussed the subject in an interesting address to the National Association of Credit Men.

"There is no reason whatever," he said, "why our people should not be educated to an appreciation of the securities of their own cities and states and nation, and possibly we have been remiss in not having undertaken this before. The habits of a people, however, are generally pretty firmly established and the habit of most of our people has been to place their money in savings banks. They prefer to put their money where they can get it in case of need.

"The last bond sale of the city of New York was advertised all over this country. Papers in the smaller cities were used, but there was nothing whatever to indicate by the bids offered that the sale had been popularized to any extent. Philadelphia had a recent so-called popular bond sale. Mayor Blankenburg disposed of the bonds 'over the counter.' The authorized offering was $7,000,000 at 4 per cent.

As to the Popular Sale.

"I do not want to deprive good Mayor Blankenburg of any of the satisfaction and credit he can derive from the success of his 'popular sale,' but an analysis of the figures as they have been presented to me, does not indicate any such widespread interest in this sale as the press agent implies. For instance, of the entire offering of $7,000,000, $4,150,000 was actually subscribed and paid for by 591 subscribers. The population of Philadelphia in 1910 was 1,549,008. There were subscribers for $100 and upward, but the Commissioners of the Sinking Fund of Philadelphia, one of the popular subscribers, bought $1,225,000 worth of the bonds. The bidders also included twenty-five banks and trust companies, whose aggregate bid was $1,015,000. It is reported that after the first day's experience, fearing the sale would not be a success, the good Mayor had to call upon the principal of the leading banking house to stir up interest in the sale, and one of the methods employed was to induce banks which held city deposits to subscribe for a portion of the bonds, a plea, which to their honor be it said, did not fall deafly upon their patriotic ears; so that the total popular subscription of the entire amount of $4,150,000 was only $1,910,000.

"The city of St. Paul has been referred to lately as a municipality that was breaking away from the old traditions of security selling, and appealing directly to its own people, but an analysis of the plan followed there proves that the method employed is hardly one which could be undertaken by any city having a very considerable offering to make. It appears from the description of this sale that Mr. James J. Hill, to whom Minnesota and the nation at large owe a very great debt for the wonderful genius and enterprise with which he has met both private and public responsibility, has undertaken to finance or promote St. Paul's bond sales. This has been accomplished by organizing a board of trustees which becomes responsible for the payment of the bonds which are to be sold 'over the counter' by the Northwestern Trust Company, with the proviso that the Northwestern Trust Company will refund, upon demand, the amount of any purchase.

It is no Solution.

"It is manifest that private capital could not imitate Mr. Hill's example and attempt to promote a considerable sale of bonds such as would have to be met by one of the larger cities of the country from time to time. So that this plan, while admirable in itself, cannot be accepted as a remedy for existing difficulties.

"It will be recalled that during Mr. Cleveland's administration he was bitterly attacked for selling United States securities directly to a banking syndicate, and so strong did the opposition to this action become that on the next occasion that the Government had to borrow money in order to maintain its gold reserve, an attempt was made to have a so-called popular sale. Those who by their agitation brought about this sale have always maintained that it was a great success, but an examination of the results of the sale does not justify any such claim. For instance, the entire sale was for $100,000,000 at 4 per cent. The total subscriptions received amounted to $526,000,000. All the states and territories of this nation furnished 4,635 bids. Only 818 bids were finally accepted. $62,321,150 went to general bidders, the balance of the sale ($37,000,000) was awarded to a syndicate organized by Messrs. J. P. Morgan and Company, who overbid the great mass of the subscribers.

To Make an Intelligent Bid.

"Speaking of the difficulty of inducing the people to subscribe for bonds Mr. Cleveland says, in his 'Presidential Problems': 'That it was difficult for an ordinary person to make the rather confusing computation of premium and other factors necessary to a safe and intelligent bid. In a transaction of this sort, when the smallest fraction of a cent may determine the success of an offer, those accustomed to the niceties of financial calculations are apt to hold the field to the exclusion of many who, unaided, dare not trust themselves in the haze of such intricacies.'

"It is not my purpose to decry attempts to popularize our bond sales, but I consider it necessary to show to what extent we are at the present time prepared for such popular sales, or our people are disposed to support such popular sales in order that if our habits are ever to become the same as those of the French people, we must understand that there is a great educational work to be done."

A USEFUL HINT TO CANADIAN BORROWERS

The fact that several Canadian issues—including three municipal loans—have made their appearance during the past week or two should not, of course, be interpreted in the Dominion as meaning that the situation has become favorable for Canadian emissions, says "Canada." As a matter of fact, the general situation has slightly improved, but the Canadian issues that have made their début have come in spite of unfavorable conditions, and their sponsors have been forced to accept the more onerous terms now demanded by the market and the investor. Another reason why Winnipeg and Vancouver have made their appeals at the present juncture is because the new issue season is practically at an end, and it would seem that these two borrowers preferred to accept the low prices rendered necessary by present abnormal investment conditions rather than wait until the autumn, with all its financial uncertainty. The successes of Winnipeg and Vancouver, whether natural or artificial, will have a good effect on the bond market and the situation as a whole, but the Canadian municipalities are not yet out of the wood, and there are a good many stiles still to be crossed before the situation can become one of comfort to those responsible for the financing of their requirements.

AMERICAN LIFE INSURANCE CONVENTION

The annual meeting of the American Life Convention is being held at St. Paul, Minn., on August 20th, 21st and 22nd. The convention is composed of one hundred life insurance companies of the United States, representing thirty-one States, and the organization is continually growing. The aggregate business of the American Life Convention companies last year was $1,550,000,000, a gain over the preceding year of $250,000,000. The assets of the companies have reached the aggregate of $188,000,000, a gain of $25,000,000, and the aggregate reserves, which are now $140,000,000, gained last year $22,000,000. And the figures are rising every minute.

The preparations for the annual meeting at St. Paul, which will be held at the St. Paul Hotel, have been in the hands of the executive committee, of which Mr. W. A. Lindly, general agent of the Security Mutual Life at Lincoln, Nebraska, and president of the American Life Convention, is at the head. The other members of the committee are: Messrs. Isaac Miller Hamilton, president of the Federal Life, Chicago, Ill.; T. W. Vardell, president of the Southwestern Life, Dallas, Texas; Thos. L. Miller, president of the West Coast Life, San Francisco, Cal.; C. A. Grimsley, president of the Jefferson Standard Life, Greensboro, N.C.; M. D. Johnson, president of the Florida Life, Jacksonville, Fla.; E. W. Randall, president of the Minnesota Mutual, St. Paul, Minn.; and T. W. Blackburn, secretary and counsel, Omaha, Neb.

Chatham's tax rate is 24 mills, a reduction of 3⅝ mills. Walkerville's rate is 13 mills, a decrease of 2 mills.

VALUE OF LIFE INSURANCE

XXV.

More Points on Partnership Assurance

BY C. A. HASTINGS

The definition of the term "goodwill" in business is "sentiment." The greater the goodwill of a man the greater the opinion other people entertain of him. Therefore, though we may not recognize it, sentiment is the very origin of business. What is the connection between sentiment in business and a life assurance policy?

Everyone will agree that new and increased responsibilities are thrown on the shoulders of a surviving partner or partners should death dissolve a partnership, and that, therefore, every precaution should be taken to minimize this eternal risk. This catastrophe not only means loss of a certain amount of capital, but also the deceased partner's goodwill. Hence it is that the goodwill of any house of business is divided up among the senior members, although, of course, it is well known that an old-established house has created a certain amount of goodwill of its own. Nevertheless, one cannot get away from the fact that death or retirement of a partner does, and always will, deprive the house of a certain amount of goodwill.

Deceased Partner's Successor.

Sometimes it is possible for the firm to carry on business without taking in another partner, but if not, they must find a man fully qualified to take the place of the deceased partner, which means, not only risk, but also expense. But these are not the only consequences. It very often happens that the partners are different types of men, they each hold a different key through their own personality. One may be the buyer, another the man of detail, and another the man who knows and understands the customers, and has become known by them, and it is through him that the business comes in, assisted by the staff. It is obvious how difficult it would be for any of them to replace each other, isn't it?

Now then, suppose one of these three died; I will take, for example, the third man that I have described. What is the result? Does it not mean that customers will realize that the firm has undergone a change? Do not they discuss the future prospects of the business? Do not creditors watch their accounts more closely? We all know that this does happen; that the credit of the house is disturbed, though it may be only for a short period.

Cash and Credit When Needed.

So it is pretty clear now how extremely useful a substantial partnership policy may be, for it does provide spot cash when it is most needed, and every proof, in consequence, can be given that the firm is progressing as usual, in spite of the loss of a useful and industrious partner.

The customers and creditors know that an adequate policy is carried, and, therefore, they know they can place the same confidence in the firm as heretofore.

They realize that the business has been conducted wisely, it has been proved to them by a concrete example, and therefore, they can confidently expect that the firm will continue to look beyond to-day and to-morrow in their business relations.

ANOTHER VISITOR TELLS OF MARKET CONDITIONS

Gold Accumulating in England—Canadian Issues Overseas

More views on the current situation come to hand, this time from Mr. F. Faithful Begg, member of the London Stock Exchange committee, and chairman of the London chamber of commerce. "The Bank of England," he said in a Montreal interview, "is fairly strong for this time of the year. There is one thing of great importance, and that is that the great joint stock banks have their reserves well in hand and there is a point of interest which is not generally known that they have been accumulating private reserves of gold. There is money enough for everybody for legitimate enterprises, only it has got to be paid for at different rates and probably that is the situation that has come to stay, owing to the world-wide demands for money.

Excellent Railroad Financing.

"There is one thing most important about Canadian finances and that is, as far as can be seen, the railway companies are either with or going to be provided with funds sufficient to prevent the cessation of construction. One cannot but admire the exceedingly prudent finance of the Canadian Pacific Railway, which has arranged to finance its heavy operations well ahead and avoid the difficulties which other large corporations have encountered. I think Sir Thomas Shaughnessy is entitled to great credit for his foresight. The work of these three great railway systems in Canada is distributing money at all points, and it would be nothing short of disastrous if from any cause these works came to a stop since commerce, wages, everything would be affected.

Bankers Are Blamed.

"I think the bankers have been to blame in recent years by encouraging or facilitating operations in advance of the placing of the securities which would ultimately be required; but as the result of the pressure they have put upon Canada, borrowers generally are beginning to find a point at which ~~they can get their money.~~ They are paying a half to one per cent. more for their money when they get it.

"Canadian borrowers have had their fair share of funds advanced through London channels during the last six or nine months. Just now certain things are required. The first thing you require to do is to lock up the wild cats at home. We do not want them in England; they do harm."

◆

TORONTO'S FIRE SITUATION UNSATISFACTORY.

Fire Chief Thompson, Toronto, has reported to the civic board of control, that at least 50 per cent. of the recent fires have been caused by incendiaries. He asserts that all the fires were properly fought by the officers and men of the department, but admits the water pressure at the Balmuto Street and Jersey Avenue fires was insufficient. The water pressure at the Exhibition fire, considering the number of streams and long lines of hose used, was reasonable. He asks for more equipment, including motor vehicles.

Dealing with the causes of the fires in detail, he says that at the Exhibition grounds the fire was caused either by an incendiary or sparks from a locomotive; that it was burning so fiercely when the men of the department arrived on the scene that it was impossible for them to ascertain how or where it originated in the sheep pens.

Regarding the Balmuto Street fire, it originated in the two and a half story frame building and spread to the brick factory. It was useless to attempt to save the frame structure. The department had no means of ascertaining how the fire started, and the owners of the factory, R. C. Crean and Company, could give no reason or assign a cause for the outbreak. They had therefore to record the cause as unknown.

The Jersey Avenue fire was caused by the exploding of a coal oil lamp in one of the buildings.

The reason there were no keys in, or glass fronts to, the alarm boxes at the Exhibition Grounds, was that it was deemed advisable not to equip the boxes with keys on account of the danger of false alarms. The superintendent of the grounds and all the officials were supplied with keys to the boxes.

MARKETING CANADA'S GRAIN

III.

ELEVATORS AND TRANSPORTATION

Success of Experiment in Co-operation—Eastern Inspection Suggested

There were operating last year 2,225 public country elevators with a capacity of 67,000,000 bushels. The licensed eastern elevators that handle western grain have a total capacity of 23,020,900 bushels; of these the state operates four, with a capacity of 5,620,900 bushels; railway companies operate four, with capacity of 7,400,000 bushels; private companies operate twelve, with capacity of 10,000,000 bushels.

The storing of grain at interior points has given rise to much heartburning in western Canada. To remedy the grievances complained of much legislation has been enacted, many administrative officials appointed, loading platforms were erected, and bold schemes have been proposed and some have been tried.

In the State of Minnesota growers of grain built elevators for themselves. In the year 1911 out of a total of 1,114 local elevators, there were 249 owned by farmers. In Canada a few farmers' elevators have been built, but their career was a troubled one. Within the past two years, however, the Canadian grain growers have taken up the matter in a very different way. The earlier farmers' elevators were independent and isolated, and poor management, keen competition and inadequate support made failure in many cases inevitable.

Points to Success.

There are still in existence 46 farmers' elevators, each independent of the other—but the new factor lies outside them. The Saskatchewan Co-operative Elevator Company is now operating a line of 139 elevators in Saskatchewan, and the Grain Growers' Grain Company is operating a line of 146 in Manitoba. Should these co-operative companies succeed, and at the present moment there appears to be no reason to anticipate their failure, the storing of grain at initial points has entered upon a new and probably final phase. The grain commissioners are following with keen interest and sympathy the progress of the greatest experiment in co-operation ever attempted in Canada, and probably in North America.

The following is a comparative statement of shipments ex. elevators at Fort William and Port Arthur, September, October and November, 1911 and 1912:

1911.	Wheat.	Oats.	Barley.	Flax.	Total.
September	3,402,216	870,157	107,219	....	4,379,592
October	13,369,059	1,217,730	249,373	41,302	14,877,464
November	16,437,502	4,014,097	676,940	181,159	21,309,698
Total	33,208,777	6,101,984	1,033,532	222,461	40,566,754
Shipped to Buffalo					22,620,174
Shipped to Canadian ports					17,946,580

1912.	Wheat.	Oats.	Barley.	Flax.	Total.
September	2,884,483	1,561,403	407,214	333,840	5,186,840
October	17,959,850	1,844,819	936,127	601,702	21,342,398

Shipped 3 months, 1911					40,566,754
" " 1912					64,205,082
Increase for 1912					23,638,328

After Leaving Terminal Elevators.

In both cases the grain after it leaves the terminal elevator passes through:—

1. Lake steamers, marine legs, pipes, barges, floating elevators and cars.
2. Eastern elevators, either Canadian or American, the majority of which are operated neither by the state nor by railway companies but by companies or parties interested in grain.

There is no state supervision over either of these sets of channels through which western Canadian grain must pass on its way to Europe, and connected with these channels are possible causes of damage to the grain.

The dust and dirt in holds, bins and cars, loading or unloading during rain or snow, shipping water during the voyage because of storms or accidents—these are only a few of the major possible causes of damage to grain in transit, out of which arise claims for short weights and for grain going out of condition. If the damaged grain is not removed it may work serious mischief. In the elevators again in which the grain is stored for shorter or longer periods there is at least the possibility of accidental or intentional mixing. The elevators, Canadian and American, are not, except in a few cases, operated by either the state or by men who have no interest in grain, and they are in no case supervised by Canadian officials.

The grain goes through the elevators to the orders of dealers. There is no inspection and no supervision. There is no machinery for safeguarding either its grade or its condition, and it carries with it the original western certificate.

To Sample Cargoes in the East.

It is hardly enough to say that marine insurance protects against storm and sea, or that the bonding privilege maintains intact through United States channels the grain as it was inspected, or that Canadian transfer houses have no interest in the grain. It is difficult to see why suspicion should be a proper attitude towards terminal elevators where there are both inspection and supervision and confidence a proper attitude towards transfer elevators also operated by grain men, when there is neither inspection nor supervision, and towards American elevators where there can be neither inspection nor supervision by Canadian officials.

Various suggestions have been made on this matter. The most important are as follows:—

1. To sample all cargoes from the terminal elevators when they are being unloaded at Canadian lake ports and again when being loaded into the Atlantic steamers at Montreal and St. John. Some add that samples should also be taken of all cargoes of Canadian grain when they are being unloaded at the British ports.
2. To inspect all boats, barges and cars in which the grain is carried, and to insist that they shall be clean and fit to carry grain; to supervise the loading and unloading, protecting the grain against rain and snow; to remove all damaged grain; and in general to guard the grain while in the hands of the carriers.
3. To supervise the binning in all the eastern transfer houses by a method similar to that now in operation in the lake terminals.
4. To establish in Montreal and St. John some way of supervising the grain as to condition only, not as to grade.
5. To establish in Montreal an inspection of western grain, but allowing no change of grade except in cases of deterioration only.
6. To establish in Montreal a full inspection of western grain, permitting cleaning, drying and improving the grain, and also change of grade according to the judgment of the inspector, but in keeping with the grades of western grain.
7. To take all transfer elevators now operated by parties interested in grain out of their hands and to have them operated either by the railway companies or by the state.

In Opposition to Canada Grain Act.

Some of these suggestions are in direct opposition to the Canada Grain Act, and any one of them would add a large amount to the annual expenditure already too large for the revenue. All of them presuppose that so long as the western certificate follows the grain, the state should see that both certificate and grain are kept in conformity.

The New York Produce Exchange has lately made certain rules regulating transactions in bonded wheat for future delivery. This wheat is to be of the "Dominion of Canada official inspection as to grades." One rule is as follows: "It shall be the duty of the inspector-in-chief or his deputies' to inspect as to condition and supervise the weight of all bonded wheat going into store or afloat in the port of New York. They shall inspect as to condition and supervise the weights of all bonded wheat delivered from shore, elevator or a float, and furnish a certificate as to condition of such grain." (As per form prescribed).

This is a new factor and will be considered by the board of grain commissioners who were not prepared at the time of reporting to make recommendations on the question.

◆

KINGSTON HAD NO HEAVY FIRE LOSS

Last week, Kingston, Ont., was reported to have had a $30,000 fire loss in a business block. Mr. James Armstrong, fire chief at Kingston, informs *The Monetary Times* that no such loss occurred there, and that the total loss in 85 alarms received by his department since January 1st, 1913, does not exceed $20,000. That is an excellent record.

CANADA'S COAL FROM UNITED STATES

Neighboring Republic Contributes Forty Per Cent. of the World's Supply

Production of coal in the United States last year, from which country Canada draws its largest supply, was 534,466,580 short tons, valued at the mines at $695,606,071, according to the United States Geological Survey.

In 1882, the coal production of the United States had reached 103,551,189 short tons. In 1912 the production of bituminous coal alone in Pennsylvania exceeded that figure by nearly 60 per cent., and the combined production of bituminous coal and anthracite in Pennsylvania in 1912 was 2¼ times the total production of the United States in 1882.

The United States at present is contributing 40 per cent. of the world's supply of coal and is consuming over 99 per cent. of its own production.

Canada's Large Imports.

In 1912, Canada imported coal, coke and coal dust valued at $41,338,065. Last year, the imports were $42,952,589, of which the United States supplied $42,794,909 and the United Kingdom $157,251.

In 1912 production of coal in the United States not only surpassed all previous tonnage records, but the average value per ton exceeded that of any normal year in the thirty-three years for which statistics are available. There has been only one year when prices generally were higher than in 1912, and that was 1903, the year of the fuel famine.

Gain in United States Output.

Gain in output in 1912 over 1911 was 38,095,454 short tons, and increase in value was $69,040,860. Production of bituminous coal increased from 405,907,059 short tons to 450,104,982 tons, a gain of 44,197,923 tons with an increase of $66,607,626 in value.

The decreased production of anthracite, amounting to 6,102,469 short tons, was due entirely to the suspension of mining in April and May, when practically the entire region was idle. Factors which contributed to the increased output of bituminous coal were:—

Industry and Bituminous Coal.

(1) Revival in the iron and steel industry, which stimulated production in the eastern states, the coal made into coke showing, alone, an increase of nearly 6,000,000 tons.

(2) Large crops of grain and other agricultural products, which gave prosperity to the farming communities of the middle West.

(3) Decreasing supplies of natural gas and fuel oil in the mid-continent field and consequent lessened competition with coal from the southwestern states.

(4) Increased consumption by railroads and in nearly all lines of manufacturing.

(5) Activity in the mining and smelting of the precious and semi-precious metals in the Rocky Mountain and Pacific states. These factors combined made the year 1912 one of the rather rare prosperous years in the mining of bituminous coal.

On a Commercial Basis.

Of the twenty-seven states in which coal mining may be considered to be conducted on a commercial basis, there were twenty-one in which the output of 1912 showed an increase over 1911, and in all but two of the important states the increase in value was greater than the increase in tonnage.

In the production of bituminous coal Pennsylvania in 1912 showed an increase of 17,304,231 short tons. West Virginia's increase in 1912 was 6,955,107 tons. Illinois increased its production by 6,206,108 tons, Ohio by 3,768,741 tons, Kentucky by 2,440,818 tons, Indiana by 1,084,363 tons, Alabama by 1,079,179 tons, Virginia by 981,971 tons, Colorado by 820,441 tons and Kansas by 807,454 tons.

◆

OPPORTUNITY FOR CANADIAN PEARS

In view of the poor prospects held out for the pear crop in England and France, it is considered that an excellent opportunity will occur this season for the export of Canadian pears to the English market, says Canadian trade commissioner J. M. Mussen, at Leeds. Some idea as to the demand for this fruit may be gathered from the fact that last year 605,551 hundredweights of raw pears were imported into England. Canadian grown pears, such as Bartletts and Flemish Beauties, are already sent to the Leeds district, and in view of the opportunity offering this season, it is to be hoped the trade will be increased. Each pear should be wrapped separately in tissue paper, uniformly graded, and packed in cases holding about 20 pounds. Keiffer pears will also be in more demand this season, and although not usually sold for dessert they obtain a ready sale for stewing, for which purpose they are favorably regarded.

HOW THE LONDON MARKET LOOKS

Congestion Seems to Be Clearing—Burnaby Sold Short-Term Notes

The new South Wales loan in London has proved a failure, nearly 70 per cent. of the total amount having been taken by the underwriters.

The recent strike against new capital instituted by the underwriters and issuing houses in London, says the financial critic of The Scotsman, who is usually well informed, seems to have been effective in removing the congestion in the gilt-edged market.

The floating stock on their hands, he goes on to say, has been fairly well cleared away, and there has been a good inquiry for 4 per cent. trustee investments. He instances the case of the recent New South Wales issue. Underwriters in this case were informed long beforehand that they would have to take 70 per cent. of the issue. The poor result seems to have been due largely to the abstention of would-be investors from subscribing on the chance that they might be able to purchase stock cheaper when the lists had been closed. Instead of that, however, biddings have been at a premium for the past day or two, the scrip rising from ⅛ to ⅜ premium for cash, and ¼ to ½ for special settlement.

Sold Short Term Notes.

Burnaby municipality, which adjoins Vancouver, has sold, in London, $1,500,000 6 per cent. treasury notes at 6 per cent., repayable in ten years.

Arrangements have been completed for the renewal of Montreal's temporary loan of $3,000,000, which fell due this week. As announced last week in cablegrams from London, the loan will be renewed for six months, at 5½ per cent. interest, instead of 4½ per cent. as before.

"While this is a high rate of interest," the city treasurer says, "it is not an unusual one, in view of the present state of the money market."

The $336,000 4½ per cent. bonds of Halifax, purchased by Messrs. N. W. Harris and Company, met with a prompt sale by that firm, various amounts having been placed in Great Britain, the United States and Canada.

◆

COMPANIES LICENSED IN ONTARIO

The following companies have been licensed to do business in Ontario:—The United Electric Company, Ohio, U.S.A., capital, $40,000; Kipawa Power Company, Limited (Dominion charter), capital, $1,000,000; Armstrong Cork Company, Limited (Dominion charter), capital, $100,000; the Hobart Manufacturing Company, Ohio, U.S.A., capital $40,000; Dominion Steel Foundry Company, Limited (Dominion charter), capital, $2,000,000; Anglins Limited (Dominion charter), capital, $100,000; British America Nickel Corporation, Limited (Dominion charter), capital, $20,000,000. Canadian I. P. Morris Company, Limited (Dominion charter), $40,000; Curtis Publishing Company, Pennsylvania, U.S.A., $40,000.

◆

GOOD ENGLISH DEMAND FOR APPLES

Manchester is the fourth English port of import for American and Canadian apples. The shipments to Manchester for the season just terminated amounted to 101,645 barrels, as compared with 92,883 barrels in the previous season. The total shipments to Great Britain amounted to 2,976,431 barrels, as compared with 2,730,408 barrels the previous season.

From.	Barrels.
New York	988,397
Boston	552,013
Portland	281,147
Montreal	344,565
Halifax and St. John	787,117

From Montreal to Liverpool there was an increase of 17,000 barrels over the previous season.

The efforts to increase the box trade to Manchester have met with good results, says Mr. F. A. C. Bickerdike, Canadian trade commissioner at Manchester. In 1911 the shipments of box apples to that port amounted to 1,319 boxes, and in 1912 this had increased to 4,200, showing an increase during the past season of 2,881 boxes. The box trade in choice Canadian fruit should be encouraged because more money will be made than for apples in barrels, and also to meet the demand which exists in the Manchester district for choice California and Washington varieties.

THREE BIG MINING COMPANIES FORMED

Sixty-Seven New Concerns Receive Charters—Aggregate Capital is Eleven Million Dollars

Sixty-seven new companies have been incorporated with aggregate capital of $11,802,000. The largest this week are mining concerns as follows:—

Burnside Gold Mines, Haileybury	$3,000,000
Hunton Gold Mines, Toronto	2,500,000
Wasabika Mines, Toronto	1,000,000

The distribution of this week's companies is as follows:

Province.	No. of companies.	Capitalization.
Quebec	10	$ 467,000
Ontario	32	9,300,000
Manitoba	2	175,000
Ontario	32	9,300,000
Alberta	22	1,855,000
British Columbia	1	5,000
Total	67	$11,802,000

Edson, Alta.—Edson Hotel Company, $50,000.

Medicine Hat, Alta.—Birnie Brothers, $150,000. Power Cities Investments, $30,000.

Sarnia, Ont.—Harrow Canners, $40,000. A. T. Gahan, M. E. Oxenham, N. L. LeSoeur.

Berlin, Ont.—Berlin Industrial Centre, $40,000. A. Millar, H. J. Sims, W. H. Gregory.

Orangeville, Ont.—Dods Knitting Company, 100,000. A. Dods, M. MacDonald, F. H. Snider.

Newburgh, Ont.—Selby Telephone Company, $5,000. J. W. Demille, T. I. Winter, H. M. Ryan.

Sault Ste. Marie, Ont.—Northern Laundry, $25,000. W. J. Harris, J. G. Duncan, E. C. Miller.

Vancouver, B.C.—Ship Simla Company, $5,000. C. G. Johnston, H. Boultbee, W. H. Walton.

Napanee, Ont.—Wallace's Drug Store, $40,000. T. B. Wallace, W. K. Huston, C. M. Warner.

Lachine, Que.—La Compagnie Fournier, $99,000. A. Fournier, J. E. Morency, J. I. Fournier.

Windsor, Ont.—Bartlet, Macdonald and Gow, $350,000. C. Macdonald, A. Gow, G. F. Macdonald.

Haileybury, Ont.—Burnside Gold Mines, $3,000,000. T. H. Connor, E. W. Kearney, J. McN. Hall.

Kingston, Ont.—John McKay, $150,000 (fur dealers). G. M. Mulholland, A. Todd, A. B. Sheppard.

Listowel, Ont.—Perfect-Knit Mills, $50,000. M. K. Becker, Toronto, W. Climie, J. H. Bender.

St. Agathe des Monts, Que.—Lafleur Industrielle, $49,000. J. E. A. Decalles, I. Demers, G. Wilson.

South Vancouver, B.C.—South Vancouver Citizens Reform League. C. Roscoe, H. S. Schofield, C. Rayner.

Ottawa, Ont.—R. McGiffin, $200,000 (dealers in shirts, etc.), Robt. McGiffin, Richd. McGiffin, B. D. McGiffin.

Lethbridge, Alta.—Lethbridge Wholesalers, $50,000. United Grain Producers, $100,000. Dalaney's, $250,000.

Port Arthur, Ont.—Armstead Wolvin Company, $50,000 (laundry). J. W. Wolvin, J. T. Armstead, M. E. Armstead.

Walkerville, Ont.—Walkerville General Hospital (no share capital). R. H. Revell, H. H. Walker, W. E. Seagrave.

Tillsonburg, Ont.—Universal Paint and Varnish Remover Company, $50,000. J. H. Teall, G. W. Tillson, W. H. Bennett.

Bridgeburg, Ont.—International Specialty Manufacturing Company, $20,000. W. G. Edwards, F. E. Jackson, W. R. Krafft.

Grand Mere, Que.—La Compagnie de Raffinerie Canadianne, $49,000, A. Brunelle, A. Audet, O. Bernard, all of Three Rivers.

Victoria, B.C.—Commercial Investment Company, $250,000. Inter-British Securities, $100,000. Shelter Bay Land Company, $150,000.

Saint-Felicien, Que.—La Compagnie Industrielle de Saint-Felicien, $20,000. P. Dechene, Herbertville, Adjutor Rousseau, J. Guilmette.

Elora, Ont.—John C. Mundell and Company, $300,000 (furniture dealers). J. C. Mundell, J. A. Mundell, both of Elora, J. S. Allan, Guelph.

Ottawa, Ont.—Theatre Francais, $40,000. M. H. Mark, S. Ginsburg, E. L. Falk. Brantwood, $100,000 (real estate). W. Y. Dennison, E. F. Holcombe, J. H. Barker.

Winnipeg, Man.—Austin Paper Manufacturing Company, $150,000. L. N. Austin, Mrs. A. M. Austin, R. D. Waugh. Maple Leaf Wine Company, $25,000. W. G. Lock, H. Green, D. M. Gunn.

St. Catharines, Ont.—Chatfield Heating and Plumbing Company, $40,000. A. Chatfield T. J. Prior, F. J. Lowe. Lincoln Clay Products, $50,000. J. Widdicombe, H. E. Henry, A. G. Bradley.

Quebec, Que.—Tunnel Land Company, $70,000. Lockwell and Leclerc, P. A. Choquette, E. P. Berbube. Mount Murray Woodlands Corporation, $25,000. A. Galipeault, L. L. St. Laurent, H. Laferte.

Windsor, Ont.—Swedish Crucible Steel Company of Canada, $100,000. N. L. Olson, C. E. Blandfield, both of Detroit, A. J. W. Nixon, Felafield. Cadwell's Limited, $800,000. C. W. Cadwell, O. E. Fleming, H. C. French.

Three Rivers, Que.—Saint Maurice Realty Company, $49,000. F. Lapointe, E. Berthiaume, J. A. Bourbeau, Quebec. Girard and Godin, $10,000 (coach, etc., manufacturing). H. J. Elliot, C. J. E. Charbonneau, L. J. M. Dugas.

Edmonton, Alta.—Slave Lake Lumber Company, $100,000. Lush-Hartman Cartage Company, $25,000. Rex Motors of Canada, $100,000. Edmonton Ice Company, $10,000. Armstrong Riddell and Company, $200,000. Elrick Concrete Construction Company, $10,000.

Hamilton, Ont.—Hamilton Estates, $40,000. W. Kerr, E. S. Kerr, L. M. Kerr. Lakebourne Country Club, $75,000. A. E. McKinstry, Chicago, A. M. Boyington, Wilmette, R. Scarfe, Brantford. Invergordon, $40,000 (building company). A. M. Mackay, J. M. Gow, J. G. Gauld.

Hamilton, Ont.—Saskatchewan Farm Land and Development Company, $250,000. C. W. Linnenbank, L. Bercowitz, C. S. Walters. Goodwin Park, $40.000. G. W. Tinlin, F. H. Jory, G. A. Tinlin. Hamilton Tailors, $40,000. M. Silverman, S. C. Harris, L. Silverman. Strathearn Park, $40,000. J. B. Weir, A. B. Crearer, Mrs. E. M. Weir.

Toronto, Ont.—Law Securities, $100,000. R. J. Law, J. R. Law, F. E. Dalton. Magann-Wells Construction Company, $400,000. S. S. Mills, W. W. Boyd, C. L. Magee. Lord and Burnham Company, $100,000 (greenhouse builders). I. Cassidy, B. N. Davis, W. D. Earngey. Provincial Brokerage Company, $250,000. C. Ludford, C. Young, A. H. Read.

Montreal, Que.—Montreal Advertising Club Company, $10,000. E. M. McDougall, J. J. Creelman, G. S. Stairs. Como Lake Shore, Incorporee, $20,000. J. N. Legault, Vaudreil, H. L. O'Donnoghue, J. Brousseau. Mallinckrodt Chemical Works, $100,000. J. W. Blair, C. A. Hale, R. W. Gibb. Arcade Film Theatre, $25,000. R. Chenevert, F. Callaghan, M. J. McLaughlin.

Calgary, Alta.—Evangelical Lutheran Immanuel Church, U.A.C., St. Mark's Church of the First Born. Ross Brothers, Limited, $25,000. Alberta Packing Company, $150,000. A. McKillop and Company, $250,000. Standard Wagon Company, $250,000. Dominion Oil Company, $10,000. Erz Automatic Lock Company, $60,000. Rjay, Segar Stores, $10,000. Alberta Hotel of Okotoks, $25,000.

Toronto, Ont.—Hunton Gold Mines, $2,500,000. G. H. Sedgwick, A. G. Ross, E. V. McMillan. Zebrun and Barben Construction Company, $50,000. L. Macaulay, G. E. Anderson, M. L. McKinnon. Eglinton Park, $150,000. H. R. Moses, C. W. O. Goshorn, G. D. Waters. Newcastles, $200,000 (brokers). G. D. Waters, C. W. O. Goshorn, J. L. Flint. Standard Wrapping Machines, $220,000. J. P. Northey, T. H. Plummer, A. P. Holden. City Towel, Apron Supply and Laundry, $150,000. O. H. King, E. McL. Rowand, W. C. Johnston. Italian Courier Publishing Company, $40,000. G. Danovaro, L. Zaccaria, G. Colombo. Turbine Equipment Company, $40,000. J. L. Ross, D. J. MacLean, C. J. F. Collier. Buckham, $40,000 (fur dealers, etc.). J. P. White, C. B. Scott, W. A. Dillon. WAYAGAMACK PULP AND PAPER COMPANY

The report of the Wayagamack Pulp and Paper Company appears on another page. The directors of the company are:—Messrs. J. N. Greenshields, K.C., president; C. R. Whitehead, vice-president and managing director; Hon. Robert Mackay, James Reid Wilson, James W. Pyke. The technical manager is Mr. Henning Helin, and the secretary, Mr. A. F. Cayford. The company's head office and works are at Three Rivers, Que.

CANADIAN LIFE COMPANIES HAVE NEARLY TWO HUNDRED MILLIONS FOREIGN BUSINESS.

Ten of the Dominion's Corporations Are Writing Policies Abroad—Two Protested Against Hasty Action in Japanese Legislation.

Company	Premiums in Canada, 1911.	Premiums in other countries, 1911.	Premiums in Canada, 1912.	Premiums in other countries, 1912.
Canada Life	$2,759,993	$1,793,392	$2,929,045	$2,224,950
Confederation Life	1,621,593	412,360	1,732,656	646,640
Federal	783,495	36,557	852,529	48,433
Great West	2,101,741	28,814	2,767,964	50,091
Imperial	1,079,668	113,729	1,208,408	147,171
Manufacturers	1,556,112	1,012,304	1,689,574	1,079,542
Mutual (of Canada)	2,431,297	22,765	2,668,214	23,985
National	440,676	2,993	505,968	2,597
North American	1,479,357	174,505	1,550,689	179,990
Sun	2,883,390	5,391,261	3,283,639	6,468,707

Ten Canadian life insurance companies continue to do business in other countries as well as in Canada. These companies had a net amount in force on December 31st, 1912, in other countries than the Dominion of $175,136,236. The details, compared with the figures of 1911, are as follows:—

Company	Net amount in force outside Canada. 1911.	1912.
Canada	$28,635,786	$40,832,314
Confederation	7,775,581	10,950,057
Federal	700,881	697,119
Great West	1,366,566	1,804,275
Imperial	2,113,451	2,783,571
Manufacturers	18,125,272	20,568,941
Mutual (of Canada) ...	513,890	596,890
National	76,750	60,250
North American	4,531,963	4,912,439
Sun	83,274,757	91,930,380
Total	$147,114,897	$175,136,236

These figures show a considerable increase of business in force in 1912 over those of the previous year. Only one company had a smaller amount of life insurance in force abroad last year than in 1911.

Canadian and Foreign Business Compared.

The amount of business transacted abroad by these ten companies varies considerably. The Sun Life, for instance, has in force abroad over $1,000,000 more than in Canada. The exact figures are as follows:—In Canada, $90,802,040; in other countries, $91,930,380. A little more than one-third of the Canada Life's net amount in force is abroad; about one-tenth of the Confederation Life's; and slightly less than one-fourth of the Manufacturers Life's. Comparatively small amounts of the business in force of the Federal, Great West, Imperial, Mutual of Canada, National and North American are in foreign countries.

The premiums of the ten companies for 1912, in Canada and abroad respectively, were as above, compared with the figures of 1911, as tabulated by *The Monetary Times*:—

Many Policies Abroad.

The number of policies in force in foreign countries at the end of last year was 97,587 divided as follows:—

Company	No. of policies in force abroad.
Canada	18,761
Confederation	4,298
Federal	332
Great West	1,037
Imperial	1,657
Manufacturers	13,294
Mutual (of Canada)	298
National	59
North American	3,105
Sun	54,746
Total	97,587

The fact that our life insurance companies are doing considerable business abroad makes it imperative that the head offices in Canada are kept well posted on life insurance legislation in the leading countries. An interesting illustration of this fact occurred recently in connection with the new Japanese insurance law, affecting particularly the foreign life insurance companies. The most important change in the law was the provision compelling the foreign companies to deposit Japanese securities or cash, to the extent of 60 per cent. of the legal reserves, on all business in force in Japan, as at December 31, 1912. As this ordinance was made retroactive, the initial deposit required from the foreign companies electing to continue business in Japan constitutes a considerable sum.

Two Canadian Companies in Japan.

There were at the close of the year 1911 four principal foreign life companies, including two Canadian companies, their reserves totalling 11,960,000 yen. In addition to the above, a Chinese life insurance company, organized under Hong Kong charter, have also been doing business in Japan for about a year, and their reserves amount to 1,186,000 yen.

In arriving at the 60 per cent. basis of reserves required to be deposited, the Japanese Government made allowance for 40 per cent. of these reserves as constituting loans against policies. Credit for the 150,000 yen, the amount of the deposit made under the old law, will be allowed in computing the amount of the reserves required by each life company.

Canadians Had to Cable Decision.

The managers of the two Canadian companies, it is said, were compelled to submit to their head offices the principal features of the Act by cable, as their decision had to be given in a comparatively short time, and upon such information as they could impart to their companies in this way, they at the last moment agreed to comply with the Act, but under protest. Of the five foreign life companies doing business in Japan only one has withdrawn.

There are 36 foreign fire and marine insurance companies doing business in Japan. These companies are required to keep deposited in cash or Japanese securities, three-fifths of the amount of their annual premium income on their Japanese business, but in no case shall the amount so deposited be less than 150,000 yen.

In lieu of a cash deposit, the government will accept all Japanese National Government bonds at their face value, provincial and municipal bonds at 90 per cent. of their face value, debentures and shares in banks, and other approved industrial securities at 80 per cent. of their market value.

◆

GRAND TRUNK EARNINGS CRITICIZED

The Grand Trunk dividend statement is being severely criticized in London.

The Daily Mail says, in referring to the fact that the surplus available for dividends is a mere £9,000 more than a year ago, and goes on:—

"Despite all the protests made, the Grand Trunk directors persist in the policy of issuing monthly statements that are utterly useless as an indication of the profits available for distribution among the shareholders."

The Times in a similar statement, says it is scarcely surprising that the half-yearly profit statement was followed by a sharp decline in the prices of the ordinary and third preference stocks.

The Financial Times says: "On the surface it appears that the June net earnings declined by as much as £67,700, but this is not likely to be the case. The explanation will probably be found in the all-embracing term 'adjustment,' which may have taken the form of larger appropriations for betterments or additions to internal reserves, but the exact nature of which is not disclosed."

The Financial Times adds this is only right, if the directors are following a policy of conserving the resources of the company against possible strain later on.

MEN WHO ARE SUCCESSFUL UNDERWRITERS

Some Definitions of Life Insurance—Three Classes of Agents

Life insurance, in the first place, is considered by some as a luxury, by others as a necessity. Let us look through the miscroscope and see just what life insurance is:—The widow's friend, the orphan's shield, a small portion of the mother's reward for her tender care, the creditor's assurance, the home saver and the one necessity.

We might also state that it is a means of saving, for it is too often that we save or bank what we have left, and more often it is true that we don't have anything left. Therefore, a policy of life insurance plays a very important part in our life. When we review the statements of some of our greatest financiers, who tell us that they did not begin to make money until they had obligated themselves and went in debt, so that they had something to pay on all the time, we learn that the constant paying accumulated until they became wealthy. So it is with a life insurance policy. We have something to pay on all of the time, which is that much of a saving as well as a protection for those who are nearest and dearest to us. Therefore a life insurance policy makes an indelible impression in our life, as it is so often comes in when everything else fails us, suggests Mr. J. W. Holsinger, manager Federal Life Company, of Chicago.

In Times of Stringency.

We have gone through panics when you could not get cash from the banks, but we are unable to recall one instance where a legal reserve life insurance company failed to make a cash loan on a policy or failed to mature an endowment policy when money was the tightest. And as for their death claims, they have always paid them promptly, and paid them in cash, regardless of the money market.

We are occasionally confronted with the argument that people did not carry life insurance years ago. This is true, but years ago, if there was a death in the family, a neighbor made a coffin from pine boards, another dug a grave. So you see that by the time all the neighbors got through helping out there was no expense left to be borne by the survivors.

Some men who have just completed a college course have entered the business, because some friend has advised them to do so. This is wise advice if they are conscientious and able to appreciate the good they can do for their fellow men, and go into the business as the only business on earth for them.

There is another class of men—the fellows who have entered the business for all that they can get out of it. This class of men are fast leaving the business. They might be called parrots, because they are not in earnest, will do only what the other fellow teaches them, and will never be any more of a success as insurance salesmen than the parrot is an orator.

Profession Must be Chosen.

There is still another kind of man who enters the business—the fellow who tries to sell insurance and does not carry any on his own life. He will never be a real success as a life insurance salesman, as the purchasing public can see at a glance that he is not sincere, and their suspicion is aroused. They will halt long enough to ask themselves, "Is the man honest?" They mistrust him because they feel that he is not honest with himself and will not be honest with them.

If life insurance is a good thing for your neigbor or prospect, it is just as good for you. If the prospect needs insurance, you certainly need it worse than he does, for you understand the benefits there are to be derived from it.

To be a successful insurance man one must choose the profession the same as the attorney, the doctor, the minister or farmer. It must be a part of his life. He must feel that the great God created him for an insurance man, and that his life would be a failure if he entered any other business. He must feel that his life is useful, so that when he lays life's burden down he will feel that the world has been benefitted by reason of his having lived in it.

GUARANTEE LIFE INSURANCE COMPANY ORGANIZING

The promoters of the Guarantee Life Insurance Company, of which Alderman J. O. McCarthy, Toronto, is one, have practically enough stock subscribed to hold their organization meeting which they had hoped to hold in July. Owing to the money pinch it has not been possible to collect money as fast as anticipated, and the meeting will not likely be held before September.

NEW LIFE POLICIES LAST YEAR

Nearly Half a Million Were Issued—Outlook for Current Year

During 1912, as the accompanying table shows, 464,331 new life insurance policies of various types, with a value of $243,765,443 were issued in Canada. While the United States companies transacting business in the Dominion wrote the greatest number, namely, 246,046, valued at $73,471,855, the value of the Canadian companies' 215,505 policies was larger, being $162,028,320. The British companies wrote only 2,780 policies, with a value of $8,265,268. There are 26 Canadian companies doing business to-day under the jurisdiction of the Dominion Department of Insurance. The British companies number 8, and the United States companies 11.

Life and Endowment Policies.

Life policies accounted for 269,673 of the total new policies last year of 464,331. The value of the life policies was $162,620,095. The United States companies were again responsible for the greatest number, and the Canadian companies for the largest value.

Endowment policies issued during 1912 numbered 114,190, with a value of $42,253,027. The Canadian companies wrote 47,750 of these with a value of $26,664,837. Bonus additions totalled to 799,150 amounting to $464,331.

Outlook for Rest of the Year.

The new business written by the companies during 1913 is generally in excess of any previous year, and the prospects are that the present rate of progress will be continued for the remainder of the twelve months. While the money stringency has expressed itself to some extent in an increased call for policy loans the effect has not been at all marked nor has there been a noticeable difficulty in making collections.

On the other hand, the tight money condition has made it possible to invest all available funds to yield very attractive returns. In this respect the current year will probably be unique. Not for years has it been possible to keep funds so closely invested in the highest class of securities yielding such high rates of interest.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt station for the week ended August 7th:—Cobalt Townsite, 61,500; Peterson Lake Mine, 62,500; Cobalt Lake Mine, 64,200; Dominion Reduction, 79,000; Casey Cobalt, 45,000; Coniagas, 357,120; Trethewey, 92,083; McKinley-Darragh, 129,500; Temiskaming, 61,330; Casey Cobalt, 45,000; total, 997,233. The total shipments since January 1st are now 24,185,142 pounds, or 12,092 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

JULY COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore during July:—

Beaver	86,050
Cobalt Comet	215,660
Cobalt Lake	189,930
Cobalt Townsite	420,680
Coniagas	156,450
Crown Reserve	86,600
Day and Gordon	56,100
Dominion Reduction	89,200
Hudson Bay	66,700
Kerr Lake	59,320
La Rose	367,930
McKinley-Darragh	505,837
Miller Lake	48,100
Nipissing	251,630
O'Brien	128,870
Pennsylvania-Canadian	80,525
Peterson Lake	59,650
Trethewey	99,400
Total	1,667,742
New Liskeard—Silver Ore.	
Casey Cobalt	45,000
Iroquois Falls.	
Alexo Mines (Mond Nickel Co.)	1,588,500

NORTH VANCOUVER BONDS IN LONDON

For £96,900 5 per cent. bonds of the corporation of the district of North Vancouver subscriptions have been invited in London by the Scottish National Securities Corporation. Of these bonds £11,000 mature in 1933, and the remaining £85,900 mature in 1962. Both principal and interest are payable in London, or at the holders' option in Canada at the exchange of the day. The district of North Vancouver has an area of 75 square miles, and a population of 5,000, and an assessed valuation of $11,206,905.

INSURANCE COMPANIES DISTRIBUTED NEARLY SIX HUNDRED AND THIRTY MILLION DOLLARS

This Was in Canada and the United States—Analysis of Returns—Some Big Payments

The amount of life insurance in force in Canada, according to recent government returns, increased last year by over $120,000,000. The total for 1912 was $1,070,265,556, and for the previous year $950,220,771. The total sum distributed by life insurance organizations in the Dominion and the United States was $626,350,000. The payments in the two countries for death claims, matured endowments and other benefits under the policies of level-premium companies and the certificates of various life insurance organizations—assessment and the like—amounted to $413,350,000. The estimated total of the amounts paid by regular companies as savings for policyholders, cash values on surrender, annuities and on claims in foreign countries was $213,000,000.

Here is the summation of the Insurance Press, of New York, of life insurance payments of all kinds in 1912:—

Claims paid in the United States and Canada..	$413,350,000
Payments for premium savings and surrender values, and to annuitants and foreign policyholders (partly estimated)	213,000,000
Grand total	$626,350,000

Benefits Increased.

All benefits under policies—death claims, endowments, savings—in the transactions of the regular companies increased in 1912. The life insurance written and revived in the United States, by the regular companies alone, was nearly $3,233,000,000, or about $355,500,000 more than in 1911. The statistics of fraternal insurance associations continued to indicate the effects of the disruptions of organizations and decreases of memberships.

The transactions of the Canadian and American insurance companies in Canada in 1912 increased in volume to a notable extent. The increase of the new insurance was about $40,600,000. The payments for death claims and other benefits were larger than in the previous year. The distributions of premium savings were liberal. Although the general business conditions of the United States were sound and prosperous, some features of the life insurance business indicated embarrassments for individuals, due in part to the high cost of living, sacrifice of securities and reduction of earning power, continues that journal, the disbursements for lapsed, surrendered and purchased policies by companies that had 90 per cent. of the insurance in force at the close of 1912 amounted to $84,000,000, an increase of about $8,300,000 over 1911. This is to be compared with an increase of $2,853,000 in 1911, a decrease of $187,000 in 1910, an increase of $3,059,000 in 1909, and an increase of $14,543,000 in 1908.

Endowments Held to Maturity.

The net gain of increase of payments by the companies referred to for death claims and endowments in 1912 was was about $1,400,000. For death claims the increase was about $9,200,000, compared with an increase of about $12,743,000 in 1911, showing a loss of increase to the amount of about $3,600,000. For endowments the increase was about $5,700,000, compared with an increase of about $736,000 in 1911 showing a gain of increase to the amount of nearly $5,000,000.

The holding of endowment policies to periods of maturity continued to be a notable feature of the insurance business, as participated in by policyholders showing an appreciation of the efforts among the people to promote habits of thrift and provisions for income in periods of advanced age.

The gain (about $5,400,000) of increase of the amount of payments for policies that were lapsed, purchased or surrendered in 1912, compared with the loss (about $3,600,000) of increase of the amount of payments for death claims, is indicative to some extent of misfortunes or other influences adverse to policyholders, in their own affairs, on account of which many families are to be deprived of benefits. Millions of dollars have been paid each year to the beneficiaries of policyholders who died after paying first premiums for insurance; millions upon millions of dollars have not been paid to the dependents of policyholders who lapsed or surrendered their insurance investments.

At Termination of Tontine Periods.

Policies of millions of dollars worth of insurance were surrendered at the termination of tontine periods last year. The returns to the policyholders were in the nature of the results of investments of surplus earnings, but the accompanying withdrawals of insurance protection were unfortunate proceedings in the light of experience.

The surrender of a life insurance policy is termed a selection against the company. More so is it adverse to dependents.

A policyholder is not subject to taxation on the amount of the surrender value of his policy until he elects to abandon his insurance. Then the claim for the value is taxable as personal property. An official opinion on that subject was filed recently.

Policyholders continued to receive large amounts in the form of savings, derived from interest, favorable mortality experience and economical management. The companies mentioned distributed the savings to the amount of $88,354,000 last year, in comparison with $80,095,000 in 1911, or an increase of $8,259,000. As in previous years, millions of dollars of savings were applied for the purchase of annuities and paid-up additions to insurance carried.

Borrowings Increased in Volume.

The amount of the payments of savings exceeded, by more than $4,350,000, the amount of the disbursements for lapsed, surrendered and purchased policies. "You must hold on, to win" now takes the place of the old-time saying, "You must die, to win."

In addition to $88,354,000 of savings paid in 1912, more than $94,682,000 was set aside to cover savings declared or apportioned for payment in 1913. Other savings in 1912 to the credit of policyholders, but not paid, including those left on deposit, amounted to $12,321,000. The sum to the credit of the holders of policies that had deferred accumulations of savings at the close of the year was $289,404,000, an increase of nearly $69,330,000.

Larger Volume of Policy Loans.

Borrowings on life insurance increased in volume in 1912. The amount of the increase of outstanding loans was $43,243,000, against an increase of $40,949,000 in 1911. The policy liens at the close of the year amounted to $525,589,000. In other words, that vast sum had been withdrawn in the course of years in anticipation of settlements under the contracts.

Conservation of Health.

The loans obtained by the borrowers must be paid at the convenience of the policyholders or deducted from the proceeds of endowment policies at the periods of maturity or from other policies at periods of death. If deducted from death claims, so much the worse for beneficiaries.

In several instances of large payments business interests were protected by life insurance disbursements last year. Such protection was sought to a large extent in the course of the year, as in 1910 and 1911, when the development of that branch of the life insurance business arose from active efforts. The tendency at present is to be conservative in issuing policies of large amounts.

The wide-spreading movement for the conservation of health and the prolongation of human life and the discussion on eugenics continued to be interesting. To a sentimental reason for the presentation of a life insurance policy to a bride has been added the practical reason for the exhibition of it to the clergyman previous to the wedding. Medical examinations for life insurance are thorough.

Heights and Weights of Policyholders.

The first results of the medico-actuarial mortality investigation, that was begun in 1910, were published in book form in 1912. The main feature of the book is a series of tables of the heights and weights of men and women. The investigation covers the experience of forty-three life companies in the United States and Canada during a period of twenty-four years, 1885-1908.

The average height of men in the United States and Canada is 5 feet 8½ inches; women 5 feet 4¾ inches. Between the ages of 35 and 39 a man, 5 feet 8 inches tall, weights 157 pounds; a woman, 5 feet 4 inches tall, weighs 136 pounds.

According to the compilations, the human race, on the North American continent, is not increasing in weight nor changing in stature, materially.

The second volume will cover the influence of build on mortality among men, the causes of death among men, mortality among women, influence on mortality among women and causes of death among women.

Large Payments in Canada.

The following are some of the payments made in Canada during 1912:—

Beauceville—P. F. Renault, $20,943.

Belleville—Frederick R. Lingham, $46,678.

British Columbia—G. A. Keefer, $10,000.

Collingwood—William G. W. Begg, $14,881.

Dawson—Joseph F. Burke, $10,000.

Glace Bay—Robert A. H. MacKeen $23,000.

Halifax—Benjamin F. Pearson, $143,750.

London—C. W. Leonard, $17,500.

Montreal—Hudson J. C. Allison, $30,000; H. J. Beemer, $50,000; Richard Boronow, $17,250; James C. Cameron, $15,200; George W. Cooke, $40,000; T. Davidson, $20,000; Magloire E. Duchesneau, $13,000; E. L. Garmaise, $10,000; Charles M. Hays, $80,212; F. J. Jacob, $10,000; Allan R. Macdonell $30,951; Adolphe Martin, $13.630; Henry E. McIntosh, $10,000; Frederick W. Thompson, $136,352; Alexander Woods, $15,000; name not given, $14,345; name not given, $14,345; name not given, $13,770.

North Hatley—F. C. McNeil, $450,000

Oak Bay—J. C. Davie, $23,126.

Ottawa—John P. Dickson, $30,000; Robert D. Edey, $25,000; William Finley, $10,107; George W. Seguin, $21,000.

Quebec—Roger S. LaRue, $45,000; W. D. McLaren, $14,000.

Riviere Du Loup—N. G. Pelletier, $14,218.

St. Catharines—I. Usher, $10,055.

St. John—William A. Allen, $13,000; James Black, $26,750; James R. Ferguson, $10,000; James P. McInerney, $14,000.

Sherbrooke—J. A. Gauthier, $13,000.

Summerside—A. W. P. Gourlie, $13,003.

Toronto—Charles J. Catto, $14,500; Harvey P. Dwight, $15,000; Wilbur C. Matthews, $19,340; James F. W. Ross, $45,000; William H. Salter, $10,000; Hugh Scott, $17,957; J. Wilson, $11,766; name not given, $66,288; name not given, $17,828.

Vancouver—Frederick H. Hale, $41,000; William H. Quann, $15.000; William H. Welsh, $14,428.

Victoria—James R. Stewart, $27,586; Richard R. Taylor, $10,000.

Westmount—William Tees, $12,776.

Windsor—G. Bartlett, $23,700; John Curry, $72,000.

Winnipeg—Mark Fortune, $55,000; J. H. Ross, $48,500.

Wolfville—Stephen P. Benjamin, $28,500.

Woodstock—James Hay, Jr., $18,036.

COPIES OF THE MONETARY TIMES WANTED

The Monetary Times desires copies of its issue of August 2nd. Will readers who do not file their papers kindly send that issue to the head office, 62 Church Street, Toronto, and their subscription will be extended gratis two months.

◆

BRANDON TO-DAY.

An attractive illustrated booklet on Brandon has been issued by Mr. Watson Griffin, the city's industrial commissioner. Brandon is anxious to secure manufacturing industries and is ready to grant free sites, tax exemption and other concessions to manufacturers of Eastern Canada who establish branch factories there. Mr. Griffin expects to visit Eastern Canada early this month and if manufacturers there have any thought of establishing either a manufacturing branch or a distributing house in Western Canada, he will be pleased to call on them and explain the advantages which Brandon offers.

BORROWING ON THE LIFE INSURANCE POLICY

Loans on life insurance policies are becoming too numerous. The policy loans of Canadian companies at the end of 1912, totalled $24,554,991. New loans of $3,649,810 were made last year. Here are the details:—

The life insurance policy should be the last source of a loan. A Toronto man died this summer, carrying $29,000 life insurance but—he had a loan of $25,000 on it.

IS THE POLICY LOAN A NEED?

Application of Tact and Good Salesmanship Will Reduce Number of Borrowers

A recent study of policy loans and the circumstances under which they are made, disclosed the following factors relative to the borrowings:—

1. That a great many borrowing policyholders would not borrow if the thought were not suggested to them.
2. That the full value often is borrowed when a less amount would suffice.
3. That inability to meet a current premium is very often the primary reason for seeking a loan.
4. That agents, cashiers and head office attaches have it within their power materially to reduce the number and amount of new loans by the intelligent application of tact and good salesmanship.

In thirty-six recent cases under observation in one office, where a loan was requested, tactful handling satisfied twenty-nine of the intending borrowers that it would be unwise to mortgage their insurance protection—inquiry developed the fact that they were borrowing to meet a current premium—that the company would gladly bridge them over the emergency by accepting a note settlement. To many of them it was quite a surprise that the company showed so much interest. They knew that their policy contract did not grant them this privilege, and therefore sought what appeared to be their only way out—a loan against the policy.

Tactful Investigation is Needed.

There is not the slightest doubt that there are many loans on books that got there from no better reason than this. The right kind of handling when the loan was contemplated, and there would have been a temporary extension of time for premium payment instead of a permanent incumbrance; the policyholder would have a higher appreciation of the company's service, and would be better satisfied with his contract.

Even in legitimate cases, where there is a real emergency to be met, and the policyholder feels he must fall back on his life insurance, it does not follow that he needs or wants his entire borrowing value. Often the full value is taken simply because the company representative handling the case helps the policyholder to reach that conclusion. Where a policyholder must borrow, and makes inquiry as to how much he can get, the thing to do is, tactfully inquire how much he actually needs to see him through. If $100 will take care of his needs there is no reason in the world to suggest that the company could loan him $250, and there are one hundred and fifty reasons why we should not make such a suggestion.

Policyholder Will Think Better of Company.

In the long run the policyholder will think more of the company if in his own interest we make an effort to conserve the value back of his policy, suggests the Fidelity Monthly Bulletin, rather than show an indifferent willingness to grant him all there is to be had.

Unless it be a very exceptional case, never suggest a policy loan.

If a loan be sought for the evident purpose of paying a current premium show the policyholder the better way—arrange an easy-payment note settlement, obtaining some cash if possible.

If you feel that a policyholder is seeking a loan without sufficient reason, or without a full realization of what it means, make a tactful attempt to dissuade him. Frankly admit his right to borrow, but show him that his own best interests argue against mortgaging his life insurance except in dire emergency.

If the emergency actually exist, centre on the borrower's needs, keeping out of your conversation if possible the total loan value under the policy.

BRITISH PARLIAMENT MEMBERS ENJOYED VISIT.

After a journey across Canada a party of 14 members of the British Parliament, have sailed from Victoria for Australia, where they will be the guests of the Empire Parliamentary Association of the Commonwealth of Australia. Lord Emmott, Under-Secretary of State for the Colonies, who is at the head of the party, said, in a parting message:—"We have all been greatly impressed by the wonderful natural resources of Canada, the magnificent waterways, the immense areas of fertile land, developed and undeveloped, and by the marvellous scenery of the Rocky Mountains. Even more have we been struck by the capability, energy and buoyancy of her people and by their faith, in our opinion completely justified, in the great future in store for their country."

SOME LESSONS IN THE LIFE INSURANCE WORLD

Story of Recent Failures—Unfortunate Experience of the Assessment Companies—The Question of Proof of Age.

(Written for *The Monetary Times by* WILLIAM H. ORR).

My article discusses, not lessons in the art of canvassing for life insurance or how best to approach people with the view of getting them to make application for a policy, but lessons for the insuring public and for those who contemplate taking an interest in life insurance, either as stockholders, or as policyholders, or as members of assessment societies—especially those societies designed, originally, to let the certificate-holders keep the funds in their own pockets, until called for by death claims. As the preliminary report of the Superintendent of Insurance at Ottawa, relative to life, fire, accident, guarantee, sickness and miscellaneous insurance has come to hand, let us first take a brief look at what it reveals.

This report is a pamphlet of nearly two hundred pages of figures in tabular form. The pages numbered 163 last year and 183 this year. They show that in every branch of the business there has been correspondingly very good progress made during the year ending December 31st, 1912. Briefly, it is noted that 1912 was a somewhat prosperous year, in general business and that the life insurance business also prospered. (Figures appear in several other parts of this issue.—Ed., *The Monetary Times.*)

Some Blots on the Escutcheon.

Notwithstanding the rosy color of the life insurance results in Canada as a whole, during the past year, some companies did not fare so well. There have been dark blots in 1912 and 1913, as there have been in almost every other year of late, in the matter of young companies "going to the wall." There are those who would persuade blind people that life insurance companies do not fail, and that a policy in one company is as good as in another. The happenings of the past few years along that line must be opening many eyes. The worst of it is that every new failure appears to be a bigger and more disastrous one than its predecessors. The Stadacona, of Quebec, the Citizens and the Victoria Mutual, of Montreal, the Mutual or Life Association, of Hamilton, and the Toronto, and the York Loan and the People's Life of Toronto, were all of small import compared with the more recent performances in connection with the late lamented Canadian Guardian, the Union Life and Home Life. These last three are still on the gridiron. With them in that respect, might be classed several of the prominent assessment societies, which see ruin staring them in the face, unless some drastic effort is made, and that speedily, to keep them afloat.

British Investors Lost.

The way the British investors in the capital stock of the Union Life have lost money by the mismanagement on the part of the president and directors of that unfortunate concerncern, is outrageous. They appear to have good cause to blame the insurance department at Ottawa, for neglect in seeing whether the Union had well-invested assets equal to its liabilities. If a strenuous effort is not now made by both Ottawa and Toronto authorities to bring the guilty perpetrators to well-merited punishment, it will stand against Canada, in the British share market, as a lasting disgrace. More than half a million dollars were obtained from Great Britain for shares of capital stock, at a premium, that proved, in a few months, to be worth less than nothing. Where did that good money go?

Then again, the Home Life Association, has fallen under the blighting hand of the same president. Apparently, with the assets rightfully belonging to the Union, he acquired a controlling amount of stock in the Home, and in September, 1911, got himself elected as its president, while at the same time continuing to act as president of the Union Life. The natural supposition was that the two companies were to be amalgamated into one, saving the double expense, with the hope of regaining the public confidence. Evidently, if that were the intention, it failed to operate, and both companies are now in process of being taken over by two strong companies, so that the policyholders, who choose to continue, may not suffer much loss. The Metropolitan of New York, is to care for those who remain in the Union, and the Sun, of Montreal, is likely to do a similar service for those of the Home Life. The $1,000,000 of subscribed capital of the Home, with its $219,300 paid in cash, is probably all lost, but there is no double liability, as in the case of bank stock. It may be that no effort will be made to collect the unpaid balance, provided sufficient good assets are found in the vaults, to accomplish the re-insurance of the policies.

These happenings during the past few months should be a warning to the public against putting any more cash into new life insurance enterprises than they are quite willing to see "go up salt river." Life insurance is a risky business. It is only by conducting the business on a tolerably large scale that the greatest economy can be obtained, and the best results secured, in profits to the insured and the insurer.

While such have been the events of the past year, good and bad, among what are known as the regular companies, decidedly startling lessons have been taught to a large number of people connected with fraternal insurance. The officers of these societies have long been convinced that something would have to be done soon. What they have been calling their "surplus" has been found disastrously insufficient to maintain itself against the increasing demands of "old mortality," and the decreasing income from influx of new members.

Recognizing that the increase of membership has been their strong support in the past, they have all been pulling harder on that string than formerly. The public have been getting wise, and are not open to such wholesale blandishments as during Dr. Oronhyatekha's time. Lieutenant-governors and prime ministers and even insurance superintendents were then frequently found among the big fish on the string. Such could not now be induced to lend their influence in favor of the assessment system of "pocket reserves." Lieut-Governor Gibson, having arrived at seventy years of age, and thus entitled to take $700 and go out, or continue insured for $1,000, promptly accepted the cash, while scores of others, in view of the impaired state of their health, have held on a few months and enabled their families to collect the whole certificate.

Lesson Has Been Learned.

The lesson of this occurrence is that it was a mistake on the part of the Independent Order of Foresters, to undertake to pay members $700 in cash, or to give them surcease from assessments, at so early an age as seventy. Equally foolish was it for the Ancient Order of United Workmen to have offered all septuagenarians one half of all their past contributions, cash down, to surrender their certificates, and cease to contribute. Life insurance companies have never so much as thought of doing any such foolish thing with their life-rate members. They expect every man of them to be contributors until they have at least attained the age of ninety-six, or else accept only the equivalent of their contracts in cash or paid-up insurance, based upon final termination at that age or beyond it.

The officers of the Workmen have seen the error, and have put a stop to that leak. They cannot put a stop to death's demands, which are eating into their all too small accumulated fund every month. Sometimes it is $50,000, or a little less, but quite steadily, month by month, the assessments are proving more and more insufficient to meet the claims. Consequently, their boasted surplus of $1,595,110 of January 1st, 1911, has dwindled during the past eighteen months to not much more than half that amount. And this in the face of the heavy increase in the rates recently called for from the older members. Something more must soon be done to save the ship.

Cleaning the House.

As for the Independent Foresters, they have an accumulated fund of nearly $21,000,000, which is about twice as much per member as the Workmen ever had. But they are taking warning from the smaller society's sad experience, and from their own inability to add to the funds any more millions per annum, as in former years. Fortunately, they have recently had a man at their head as Supreme Chief Ranger who has been unable to shut his eyes to the fact that the older members have not been contributing their share of the assessments and that by their increased age, an undue share of the losses are coming from that section of the membership. Long years after it should have been done, the advice so often urged by *The Monetary Times*, has at length been taken. Actuaries have been employed to ascertained what amount should be in the treasury, in well invested funds, to make sure work of meeting the liabilities which have been, and will surely be incurred. The result is, as stated in the June issue of The Forester, that "the members between ages 59 and 69 years, carrying $21,957,021 of insurance will pay in premiums (on present rates), $3,268,618. It would result that $4,391,404 would, in the next ten years, be paid as death benefits, and $12,295,931 as old-age benefits, or a total of $16,687,336." From this it is easy to see that an additional sum of $13,418,718 should come in, from some source, and that therefore the 16,159 members who joined before 1899 and must be settled with inside of ten years, cannot be paid what they expected to receive, unless their present assessments are quadrupled each month, or a heavy extra contribution is laid upon the pre '99 members, who have not yet reached the age of 59 or 60.

Division of Funds.

In accordance with the new Act of Parliament promoted by the officers of the Independent Order of Foresters, the question of dividing the funds into two parts, so that it will be seen how much belongs to the members joining since 1898, is to be submitted to the next session of the Supreme Court. This is to be held in the Temple Building in Toronto, on Tuesday, the 26th inst., when the actuarial tables will be considered, and the provisions of the new statute approved or turned down. A two-third majority will be needed for its adoption. It will be an anxious time.

The total insurance in force that was issued upon the inadequate pre '99 rates is stated to be $108,536,722, out of the total on the books of some $240,000,000. The pre '99 members number about 69,000 in all, and appear to have about $6,000,000 to their credit, out of the $21,000,000 on hand. But more than twice that amount of shortage will be called for "not later than 1921, by the 16,159 members now between 60 and 70 years of age." How the other 52,841, carrying $86,579,701 of gross certificates, are to be provided for, is another difficult problem. The Parliament of Canada has put it in the power of the Supreme Court to decide, by a two-third vote, whether each of the 69,000 old members shall pay enough extra assessments to provide the proper re-insurance fund, or whether the liabilities shall be cut down sufficiently to enable the present inadequate rates to be continued to the end.

Decision in Indiana.

In this connection it is important to mention that the United States district court of Indiana has recently handed down its decision on appeal, to the effect that the Knights of Pythias supreme lodge has a legal right to increase its rates, as proposed, upon its $100,000,000 of insurance, sufficiently to provide and maintain a regular old line reserve fund. This order is also doing a large business in Canada. Like the rest of them, its membership has been disappearing of late, though its funds have been growing larger annually.

A surprise was thrown into the dove-cotes of both regular and irregular insurance companies—both premium-paying and assessment-paying societies—by Ontario's one-chamber legislature, just before its adjournment. A member on the government side of the house persisted in pushing through a most drastic measure designed to compel every Ontario person desiring to have a policy or a certificate, in any company or society operating in Ontario, to furnish proof of his age, and have it admitted by the company or society, or else go without insurance. The Managers' Association got busy and with a strong deputation to the committee to whom the subject was referred, made a vigorous protest. The immediate result was that the member from Orangeville saw it was impossible to succeed in convincing any one that any great evil had resulted from the practice of granting insurance upon the statement of the applicant as to his date of birth, and allowing him thereafter, to either furnish evidence from the family Bible, or the registry office, during the currency of the policy or certificate or, on the other hand, to leave that matter to be attended to by his heirs and the company or society, when making claim for the money.

Never Failed to Collect.

Mr. J. K. Macdonald, for the Managers, showed conclusively, that in no case had there ever been a failure to collect, by reason of inability to prove the correct date of birth. Also, that delay in obtaining proof of age after death had occurred in only a very few cases. The obtaining of letters of administration by the heirs of people who had neglected to make a will, was a much greater source of delay. It was also shown to the committee that in not more than one in eight or ten cases was any proof of age really needed, because of the prevalence of endowment insurance and lapses.

The result was that the bill was hastily re-drawn, and now provides only that the companies shall print on every notice and receipt sent to old members, and must notify all new members, that proof of age and admission thereof is a necessary preliminary to the settlement of the policy. The author of the bill made a final protest, upon the third reading, that it was not his bill at all, and intimated that he would come back with a further amendment at next session. Even as it now stands, it is a most drastic measure, and it remains to be seen, from a year's experience, whether or not it will give the agents a serious handicap in inducing people to apply for insurance, who have no family records, or elderly relatives to assist them in complying with the law. To many people versed in the business it appears to be the most foolish piece of life insurance legislation ever heard of in any civilized country.

EARL BELIEVED IN LIFE INSURANCE

The will of the late Earl of Leven and Melville, who was succeeded in the title by his brother, the Hon. Archibald Alexander Leslie-Melville, was offered for probate in London recently. The estate is valued at $3,365,310. The father of the late Earl died in 1906, leaving $6,500,065, on which the death duties were $1,250,000. The death duties now payable amount to more than $600,000, which would be a heavy drain but for the fact that the late Earl effected life insurance policies to cover the possible charges. He also expressed a wish in his will that his successors should insure their lives in a similar manner to cover the increasing death duties.

NEW LIFE COMPANY ORGANIZING

A new life insurance company is being organized, and Mr. H. R. S. McCabe, of Winnipeg, is interested in it. The promoters are now ready to apply for a charter, and this will probably be done some time during August or September. The company, it is said, will be organized and conducted carefully along the lines that experience and the legal regulations make necessary, and it is the intention so to arrange the placing of the stock that business may be commenced with the capital unimpaired.

A report has been published to the effect that the headquarters of the company will be at the head of the Lakes. This is a possibility but not a certainty, and the report was therefore premature.

DATING BACK OF LIFE POLICIES PROHIBITED

One of the acts passed recently by the general assembly of the state of Connecticut is as follows:—

"No policy of life insurance shall be issued or delivered in this state if it shall purport to be issued or to take effect before the application for the insurance was made if thereby the applicant would rate at an age younger than at the date when the application was made according to his age at nearest birthday."

This act was passed, says the Insurance Commissioner, so as to prevent discrimination in favor of the insured by reason of what in effect was misstatement of age. A practice, more or less general, has grown up whereby persons seeking insurance are allowed in connection with their policies to take advantage of an age younger than that given in their application.

THEORY OF LIFE INSURANCE

In a lecture on the history and theory of life insurance before the Western Reserve University by William F. Dix, secretary of the Mutual Life, he said:—

"Just what is the real theory of life insurance, its meaning in its modern guise, stripped of all technicalities? A mutual life insurance company is a company of people banded together to minimize the financial loss suffered by the family of each member on the occasion of his death. By it, the family of each member in the company is provided with a sum of money bearing a scientific relation to the yearly sum the member has paid. Theoretically, the sum of the amounts paid by the company to all the families at the deaths of the several members exactly equals the amount they have been annually paying in small sums, less, of course, the amount necessary to conduct the affairs of the company, and plus the amount which the common fund has earned in compound interest. A life insurance company does not know which individuals out of every one thousand policyholders at the same age insuring at the same time, will die this year, next year, and so on, but it knows that out of that one thousand so many will die this year, so many will die next year, so many the year following, and so on, and mortality statistics in this country are now based on so much experience that they have become an exact science. Thus, the individual knows that as soon as he deposits his first premium, the wealth and the strength of the many are back of him individually.

*These companies also do fire business.

The assets in Canada of the life insurance companies transacting business here, under the jurisdiction of the Dominion insurance department, total $306,174,526, divided as follows:—

Companies in Canada.	Total assets.
Canadian	$212,485,939
British	32,599,591
United States	61,088,996
	$306,174,526

The 27 Canadian companies had assets at the end of 1912 of over two hundred millions. The assets of the British concerns are divided among 15 companies. Sixteen United States companies have $61,000,000 of Canadian assets.

Greatest Part of Assets.

The greater part of these assets are, as the accompanying tables show, in mortgage loans, bonds, debentures and stocks. The following figures, compiled by *The Monetary Times*, show the holdings of such securities in 1911 and 1912:—

Loans on real estate.	1911.	1912.
Canadian companies	$63,565,830	$75,322,298
British companies	10,127,507	12,410,673
United States companies	3,142,679	5,778,312
Bonds and debentures.	**1911.**	**1912.**
Canadian companies	$68,475,565	$70,132,366
British companies	16,166,671	16,117,578
United States companies	43,045,386	46,084,670
Stocks.	**1911.**	**1912.**
Canadian companies	$14,328,471	$16,307,053
British companies	151,984	151,984
United States companies	18,000	17,000

Loans on Real Estate.

The Canadian companies considerably increased their loans on real estate in 1912, the gain over 1911 being about $12,000,000. They also increased their holdings of bonds and debentures by $2,000,000 and of stocks by $2,000,000.

The British companies had about $2,000,000 more out on Canadian real estate last year than in 1912. Their holdings of bonds, debentures and stocks remained practically stationary. Only one British company, the Star, carries any Canadian stocks.

The United States companies are shy on real estate loans and have barely $6,000,000, compared with the $75,000,000 of the Canadian concerns. The United States companies, however, hold a heavy lot of bonds and debentures, last year amounting to $46,000,000, a gain of $3,000,000 over 1911. Only one United States company, the Union Mutual, holds stocks. Its amount in 1912 was $17,000, a reduction of $1,000 from the holding of the previous year.

LIFE UNDERWRITERS' ASSOCIATION MEETING

Big Convention Planned at Ottawa—Important Subjects to be Discussed

Life insurance men, managers, agents, actuaries and others, are wending their way from all parts of Canada for the annual convention of the Life Underwriters' Association of Canada at Ottawa on August 19th, 20th, and 21st. All the companies doing business in the Dominion will probably be represented, not only by their agents, but also by head office officials specially appointed. They will face the problems of their business and grapple with its evils, some of which admittedly remain.

The programme, which is printed below, does not, *The Monetary Times* is told, fully disclose the real features of the work, nor the inward attractiveness of the convention arrangements. For instance, President Tory has promised something unusual in his address, calculated to stir his audience and impress them with the importance of taking a decided stand on several matters of great consequence to the Association. The address of Mr. Neil D. Sills, president of the National Association, also promises to be unusually interesting. Mr. Sills has won great reputation in the United States as a forceful and entertaining speaker, and his wide experience in the life insurance business is well known. Mr. D. E. Kilgour, actuary of the North American Life, and honorary secretary of the Life Officers' Association, is preparing a special address for the underwriters. The humorous address by past president Wm. McBride, M.A., will be worth listening to, as he has already disclosed some of its features in correspondence.

How to Close Business.

The luncheon to be given to presidents and secretaries of all local associations is a special feature which has never been tried before, and it will be an enthusiastic affair, given over to association discussion and the furtherance of the movement. The "new business" feature at every meeting gives opportunity for free speech, and should bring out much valuable discussion. The associations which won in the membership competition will be requested to come to the platform in a body and receive the prizes. A question box will be opened, into which questions may be placed, to be dealt with by the convention. On the first day, that vital topic for the field man, "How to Close Business," will be dealt with by the many personal producers at the convention. There will be an address in French by a prominent French-Canadian. Immediately upon registering each man will be presented with an underwriters' insurance policy, together with some other surprises which are being prepared by the entertainment committee at Ottawa.

Monday evening, 8 p.m.—Meeting of executive committee, at Chateau Laurier.

Tuesday morning, 9 a.m.—Assembling of members and signing of register. Prayer—Rev. Walter Loucks, Ottawa. Addresses of welcome—The Mayor of Ottawa, Mr. J. A. Ellis, Mr. W. Lyle Reid, president Ottawa Association. Replies—Mr. Angus Elliott, western vice-president; Mr. J. T. Wilson, eastern vice-president. Address—Mr. D. E. Kilgour, honorary secretary Life Officers' Association, actuary North American Life Insurance Company. Roll call. Address—Mr. T. B. Parkinson, chairman transportation committee. Report of executive committee—Mr. Geo. E. Williams, chairman. President's address—Mr. J. A. Tory. A discussion—"How to Close Business." (To be taken part in by many soliciting agents). "New Business"—(Opportunity will be given at every session for the introduction of any subject of interest to the field force). 12.30 p.m.—Luncheon at Chateau Laurier, to which all presidents and secretaries of local associations are cordially invited.

Discussion of Three Topics.

Tuesday afternoon, 2.30 p.m.—Appointment of nominating committee. (Each local association may appoint its representative on this committee). Address—Mr. James V. Barry, assistant secretary, Metropolitan Life Insurance Company. Discussion of three topics: How I Secure My Prospects, Best Method of Preventing Lapses, How to Stimulate Steady Production. Presentation of association cup, prize essay contest: Subject: "Life Insurance as a Factor in Social Economics." Presentation address by Mr. A. N. Mitchell, general manager, Federal Life Insurance Company. Address—Mr. J. F. Weston, general manager, Imperial Life Assurance Company, honorary president Life Underwriters' Association of Canada. "The Association in its Relation to Head Office and Field Work." Secretary's report. Discussion of president's address. Award re membership competition—Winners: group 1, Winnipeg; group 2, Quebec; group 3, Peterborough; group 4, Kingston. Presentation address by Mr. Geo. B. Woods, president, Continental Life Insurance Company. Humorous address—"How Far to Press a Man," Mr. Wm. McBride, past president L.U.A.C. Discussion of three topics: Should Doctors Assist Agents in Closing Business? Practical Method of Using Part Time Men, Agents Who Are a Menace to the Business. The question box—Suggestions of topics for discussion next day. New business.

Life Insurance Agent and His Work.

Wednesday morning, 9.30 a.m.—Discussion of report of executive committee. Discussion of topics suggested previous afternoon. Address—Mr. Neil D. Sills, president National Association of Underwriters. "The Life Insurance Agent and His Work." Award of prize for association which held the best six meetings since last convention. Presented by Mr. A. Homer Vipond, the donor, ex-president L.U.A.C. Award of second prize in same competition. Presented by President J. A. Tory. (Donor). Discussion—"How to Make Association Meetings Attractive and Successful." Award of prize to local association showing largest percentage of increase in membership. Presented by Mr. John R. Reid, past president L.U.A.C. (Donor). Address—"Health Conservation," Mr. W. J. Bell. Report of nominating committee. Election of officers. Selection of next place of meeting.

Some Notable Speakers.

Wednesday evening, 7.30 p.m.—The banquet—Speakers: Right Hon. Sir Wilfrid Laurier, P.C., G.C.M.G., Hon. Justice D. B. MacTavish, Mr. James V. Barry, Mr. T. B. Macaulay, the new President. Toastmaster—President J. A. Tory.

Thursday morning, 9.30 a.m.—Discussion of topics: Value of the Club Idea in Large Agencies. Led by Mr. J. C. Stanton. Pensions for Life Insurance Agents. Address. Discussions of Topics: Most Difficult Risk I Ever Secured, Creative Soliciting. Award of prize in essay competition: "What Method of Training Develops the Highest Efficiency Amongst Soliciting Agents." Presented by Mr. Geo. H. Allen, donor, general manager Travelers' Life Insurance Company of Canada. Summing up of topics discussed, by President John A. Tory.

The following soliciting agents will take part:—Messrs. O. B. Shortly, H. B. Andrews, Oscar Morin, J. B. Hall, Thomas Mills, J. E. Hughes, M. Monahan, J. G. Taylor, N. T. Truell, J. Scott Gilbert, A. S. Wickware, Geo. I. Alexander, R. S. Rowland, A. J. Meiklejohn, Vivian Reeve, W. A. Peace, D. J. Scott, U. Levesque, J. A. Johnston, S. Burrows, J. O. Hyndman, Thomas Hendry, J. F. Belleau, J. T. La Chance, and many others.

◆

NEW INSURANCE COMPANIES QUIET

No insurance companies were licensed by the Dominion department of insurance during July.

◆

POLICY SHOULD SUIT APPLICANT'S NEEDS

In supplying a client with life insurance the agent should avoid very carefully supplying either too little or too much insurance; of these two evils the graver one is that of supplying too little insurance, as the applicant who is investing in insurance frequently fails to consider that the amount of insurance which he leaves to his widow or dependents in the event of his death will take the place of his earning power, and when the earning power of the amount of the insurance, computed at a reasonable rate of interest, such as will admit of the principal being invested in securities that are safe and the taxes are deducted from the interest, and the net income afforded by the insurance is developed, the applicant readily can see upon what amount his beneficiary must depend in case of his death in lieu of his earnings, is the opinion of President Isaac Miller Hamilton, of the Federal Life Company, of Chicago. Measured by this standard, a great majority of those carrying life insurance are carrying a sum far less than their needs, and when this fact is forced home by the agent it frequently results in the insured supplying himself with at least some part of the additional insurance he and his beneficiaries need. The danger of over-insurance largely is the result of the vanity of applicants, who frequently permit a strong agent to write them a larger policy than they can afford to maintain permanently rather than admit their inability to continue the payment of the premiums; this is as much the fault of the agent as of the applicant, if my conception of an agent's duties be correct, because I believe it to be the duty of the agent to secure the confidence and friendship of his clients and make them realize that in anything which pertains to their life insurance they may be as free to impart their thoughts to him as they would be to unfold any of their secrets to their priest or to the lawyer they had retained.

Some of the Officers and Members of the Life Underwriters' Association of Canada who meet at Ottawa this week

This Convention represents $1,070,265,556 of Life Insurance in force in the Dominion

JOHN A. TORY, president; United States association representative; member of several committees.

J. T. WILSON, eastern vice-president.

ANGUS ELLIOT, western vice-president.

NEIL D. SILLS, president of the United States association, and vice-president of the Canadian association.

E. R. MACHUM, past president, and member of legislation committee.

J. R. REID, past president, and member, grievance committee, legislation committee.

W. LYLE REID, of the Ottawa Association, member, finance committee.

WM. McBRIDE, past president, United States association representative; member, essay committee.

A. HOMER VIPOND, past president; United States association representative; member, grievance and legislation committees.

F. T. STANFORD, secretary-treasurer; member of many committees.

GEORGE E. WILLIAMS, chairman, executive committee, and United States association representative.

J. F. WESTON, hon. president; member, grievance and legislation committees.

JOHN A. TORY.

E. R. MACHUM.

A. HOMER VIPOND.

J. T. WILSON.

ANGUS ELLIOT.

NEIL D. SILLS.

J. R. REID.

W. LYLE REID.

F. T. STANFORD.

GEORGE E. WILLIAMS.

J. F. WESTON.

HOW A BIG BUILDING WAS FINANCED

Minneapolis Man Tells at Winnipeg Convention—Real Estate Bonds

Some excellent papers were read at the National Real Estate Convention at Winnipeg. Mr. A. S. Taylor, of Cleveland, stated that one of the many criticisms against real estate ownership is that it is not a liquid asset. "I consider," he said, "this an element of stability, an asset rather than a fault. Real estate cannot be considered a quick asset in the sense that it can be sold immediately without sacrifice. It is unlike stocks, bonds or securities, which can be disposed of at market quotations. It is something more staple, and the fact that it is not immediately saleable oftentimes has prevented owners from selling and investing the proceeds in unreliable stock promotions. Many have been obliged to keep real estate when they were prompted to make an investment under conditions where their minds had not been allowed to make a thorough investigation of the investment presented. Had the tremendous sums lost in the present decade, by investors in stocks, been placed in real estate, what a contented and prosperous people we would be, and how large and wonderfully developed would be our cities. I contend that the ownership of real estate gives us a distinct standing amongst our fellowmen, makes us better citizens, and a more valuable asset to the civic life of the community."

Ninety-nine Year Leases.

Discussing the proper basis of valuation for ninety-nine year leases, Mr. Taylor said that between the lessor and lessee the basic value of the property determined must be rather a matter of mind meeting mind, and on the part of the lessee the rent to be paid should be governed largely by his ability to carry out the conditions of the lease and meet the obligation of the agreement.

"The governing factor after determining the value of the land," he continued, "is the interest rate charged as rent. Where land values are enhancing and not drifting, the rent is based on an interest charge varying from 4 to 6 per cent. on a value somewhat higher than its present staple value. In other sections where land values are inactive it is based on a like per cent. of the actual saleable value of the land.

"In the east the investor is usually satisfied with 4 per cent. In the western portions of our country their rates of interest are usually higher on all classes of investments. A higher percentage is applied.

Essentially a Sale of Land.

"A ninety-nine year lease is essentially a sale of the land. The owner permanently parts with possession of his property, also with all opportunity of increasing his income or deriving any profit of consequence from increased land values. It has the same practical effect as though the owner had sold his land at a fixed price and reinvested the proceeds in some security which would yield an income equal to the proposed rental. It is essentially a capitalization of his investment."

Real Estate Bonds.

Mr. S. S. Thorpe, of Minneapolis, read a paper on how to finance real estate deals. He thought that the different States should secure laws that would allow savings banks, trust companies, trust funds and estates to invest in real estate bonds secured on improved properties for a large per cent. of the actual value. "It might be easily argued," said Mr. Thorpe, "that real estate bonds of this kind would be safer and more profitable for small investors than other channels that are open for small means. Another thing, it would be safer in financing large properties to be able to issue bonds extending over a period of from one to twenty years than to be at the mercy of the insurance companies, who do not commonly loan for a period longer than five years, making it necessary to renew at short intervals at some expense. Short-time loans can be called during a tight money market and do harm to a really good property and its owners.

How a Large Building Was Financed.

Mr. Thorpe knew of a very large office building being constructed and financed as follows: A first mortgage of 50 per cent. to an insurance company and of a second mortgage bond issue of 50 per cent. This second mortgage bond issue is guaranteed by a railroad and bank, and matures over a period of twenty years. This building fully expects to pay all of the carrying charges and second mortgage bonds from the earnings of the property, and it no doubt will do so. It is an interesting fact to note that a business property rented for a term of twenty years to pay 6 per cent. on the actual value of the land and 8 per cent. on actual cost of the building, net of all taxes and insurances, will pay itself out, giving the building free and fully paid for, besides paying 5 per cent. annually on its cost; that is, receiving 8 per cent. on the cost of a building and paying 5 per cent. on its cost allows 3 per cent. per annum for a twenty year lease, or 60 per cent. of its cost, and this 60 per cent. as it is paid in put out at 5 per cent. during the twenty years will give 40 per cent. more, or the full 100 per cent. of the original cost of the building.

"If," concluded Mr. Thorpe, "a real estate agent can show the opportunity and has the ability to manage and direct the policy of a property, securing a tenant or tenants to occupy the property, it should be possible to finance a building on such a showing by an issue of first mortgage bonds and stock or by a mortgage and a preferred and a common stock, with a lease as additional security."

CHICOUTIMI COMPANY MAY ISSUE SECURITIES IN LONDON

The Chicoutimi Pulp Company may make an issue of securities in London shortly. The company which carries on the business of pulp paper manufacturers, has authorized capital stock of $1,000,000, and funded debt of $723,500. It owns 338,000 acres of timber rights, townsites, etc., etc., its mills at Chicoutimi, Que., have a capacity of 250 tons of mechanical pulp per day.

PUBLICATIONS RECEIVED

"Canada To-Day, 1913," is an illustrated annual to which Canadians and the thousands of others interested in Canada, look forward with keen anticipation. The latest volume, just to hand, is even better than its predecessors, which is saying a great deal. It is larger than last year's volume, and contains many new features, over 400 photographs, in addition to a specially designed colored map of the Dominion, which in itself contains several useful innovations and a large amount of statistical matter. The index at the end of the volume permits easy access to information on any subject. The publishers fairly claim that this annual has taken its place as the most popular illustrated reference book on Canada at present published in Great Britain.

CANADIAN RAILROADS BUSY ISSUING SHORT-TERM NOTES

Three issues by Canadian roailroads of short-term notes aggregating approximately $18,500,000, have been made in the past few weeks. These are:—

Railroad.	Amount.	Term.
Grand Trunk Railway	£1,500,000	5 years.
Canadian Northern Railway	£1,500,000	5 years.
Canadian Northern Railway	$3,500,000	1 year.

The first two issues noted were sold in London, and the third in the United States. Many financial authorities think it would have been wiser for these roads to have made a fixed loan at once, even on terms which seem bad at the moment, and have been done with it rather than to have issued short-term securities.

FURNESS WITHY AND THEIR CANADIAN BUSINESS

At the annual meeting of Furness Withy and Company in England, the company which has become interested in Richelieu and Ontario affairs, Sir Stephen W. Furness, Bart., M.P., spoke of the corporation's Canadian business. "We have," he said, "added a new passenger and cargo steamer, the SS. 'Digby,' to our Halifax Line, and it is the intention of the company to build two further and similar vessels for the same service. We have added to our business at Montreal by the establishment of a weekly service of steamers to Hull, which is yielding very satisfactory results, and the opening of our own office in Newfoundland will largely contribute to the efficiency of our general organization. We have, as you know, our own freehold wharf and offices at Halifax, and we have now under contemplation the erection of a wharf at St. John's, Newfoundland, to provide for the larger class of steamers which we now employ in that service. The interest which your company has in the Dutch company—Furness Scheepvaart en Agentuur Maatschappij—has proved very satisfactory. As you will have seen from the report, your company has taken a favorable opportunity to dispose of some of its older vessels. The fleet of steamers controlled by us, including those owned by our subsidiary companies, has been maintained in a high state of efficiency, and, having regard to the additions which we have made to our reserve fund, your board has decided to take a large measure of its own insurance."

LIFE INSURANCE IN NEW YORK STATE

Canadian Companies Are Interested—Increases in Industrial and Ordinary Business

An aggressive campaign to secure a share of life insurance in other countries is participated in by no less than ten Canadian companies. Several of these companies write business in the New York State. Statistics as compiled by the insurance department of this state show that the assets of the New York and other states companies at the end of 1912 were $4,173,953,579, an increase over the previous year of $231,809,222, of this increase $110,880,453 being in New York State companies. The liabilities of the various companies, excluding gross surplus and special funds, were $3,942,178,181, of which $2,284,351,856 was in New York companies. The gross surplus and special funds amounted to $231,775,398, of which $86,675,348 was in New York companies.

The total income was $795,282,061, of which $413,114,618 was in New York companies, an increase over 1911 of $17,377,945, the total gross increase for all companies being $40,748,843. The disbursements for the year are shown to have been $567,517,704, of which $423,019,771 was paid to policyholders, while the cost of management, including dividends to stockholders, was $144,497,933.

Increase in Policies Issued.

New York companies issued 456,233 "ordinary" policies in 1912, insuring $773,642,437 as against 389,628 policies issued in 1911, insuring $686,677,019. Companies of other states in 1912 issued 441,794 policies, insuring $942,628,673, while in 1911 they issued 421,834 policies, insuring $891,169,230. Compared with 1911, it appears that there were 86,565 more policies issued last year and the amount of insurance written increased $138,425,661. There were 45,502 more policies terminated in 1912 than in 1911, and $85,707,511 more insurance.

The total number of "ordinary" policies in force on December 31, 1912, was 7,001,913, insuring $13,527,321,222, a net increase in policies over 1911 of 380,408 and in insurance $724,003,678. The amount of "industrial" insurance in force was $3,432,767,469, an increase over the previous year of $233,669,466, making a total increase in insurance in force for both classes of business of $957,673,144.

The business in force in the state of New York and transacted therein during the past year by all life insurance companies of this and other states including "industrial" business was as follows: Policies in force 6,469,773, insuring $2,903,474,508; policies issued 1,009,816, insuring $423,365,404; an increase in insurance in force of $180,181,139 over 1911 and an increase in insurance written and paid for of $31,022,754.

What Aggregate Figures Show.

The comparative figures appended are aggregates showing the sources and amount of the increases and decreases in surplus (unassigned funds) of the companies for 1911 and 1912:—

	1911.	1912.
Gain from loading	$20,519,845	$21,786,996
Gain from mortality	35,046,786	38,043,095
Gain from surrenders and lapses ..	13,020,493	13,684,565
Gain from interest and rents, less amount required to maintain reserve	55,456,657	62,444,927
Loss from annuities	300,557	503,864
Loss from investments	971,557	5,897,800
Loss from dividends to policyholders including net increase or decrease in dividend funds apportioned and unapportioned ...	106,036,617	102,596,996
Loss from miscellaneous sources...	21,649,022	22,888,392
Total gain	*— 4,913,972	4,072,531

---

*Loss.

The total receipts of the department for the fiscal year ended September 30th, 1912, were $689,268.86; the total expenditures were $331,201.07; an excess of receipts over expenditures covered into the state treasury of $358,067.79.

Satisfactory From Every Point.

The par value of the securities, held on deposit by the department on December 31, 1912, belonging to the various insurance companies required by law to make such deposits, was $35,702,210.

The general results of the operations of the life companies for 1912 may be fairly stated as having been satisfactory from every standpoint; the above figures speak most plainly in confirmation of that statement and 1912 may well be marked with a white stone so far as the life insurance business is concerned.

The showing reflects in full measure a continuance of the steady improvement in life insurance conditions that has obtained in the last few years and which from the present outlook bids fair to continue in the future.

Tax on Policyholders' Dividends.

The only cloud discoverable on the life insurance horizon is the proposed government tax to be levied on the so-called dividends to policyholders of life insurance companies. The word "dividend" in the general acceptation of the term, used in connection with these payments is a misnomer; they are in no truer sense dividends but are almost entirely made up of a return of surplus or unused moneys that have been paid into the company as premims and returned to the assured. A tax on these refunds to the policyholder in addition to taxing the earnings on which the so-called dividend payments are based would seem inequitable and unjust and especially so in the case of companies that are absolutely on the mutual plan and which were not organized as business ventures for profit. It is to be hoped and it now seems probable that the income tax feature of the tariff bill, now before Congress, will be substantially modified so far as it applies to the taxation of life insurance companies.

◆

NO USE FOR THE PART-TIME AGENT

Mr. John I. D. Bristol, manager in New York for the North-western Mutual Life Insurance Company, delivered before the Life Underwriters' Association of Indiana, Indianapolis, a characteristic address in which he criticized the part-time agent. He wants life insurance commissions for life insurance men only, and said that the part-time man is usually an excuse for rebating and disorganizes an agency.

◆

OBJECT TO GROUP LIFE INSURANCE

Several insurance departments of the United States are taking steps to require a personal medical examination of each individual to be included in the group insured, and if this should be insisted upon it would practically put a stop to the whole plan. The companies figure that by taking a group of any considerable number without medical examination they obtain a fair average risk and no harm is done anyone. The objection raised to it is that to issue a policy to an individual, although included in a group, without a medical examination is to discriminate in his favor. In stating his objections, Insurance Commissioner Done, of Utah, says that the matter presents itself to him in three phases: "First, the question whether group insurance, under even the most favorable circumstances, is entirely fair to other policyholders. Second, whether it may be considered fair in the case of non-participating companies and unfair in the case of participating companies. Third, what the limit shall be as to the basis on which groups are formed."

◆

CANADIAN MUNICIPAL BORROWING

The London Times is publishing a series of articles on Canadian borrowing. The writer's conclusions appear to be reassuring, and he declares, in regard to railways, for instance, that the expenditure has generally been economical and well directed. He does not think that Canada is unduly burdened with railway enterprises.

Touching on municipalities, the writer says the question often heard recently is: "Have not Canadian municipalities been extravagant?" And a qualified answer must be given. They have been extravagant, he states, particularly in the west, to this extent: that they have provided themselves and their inhabitants, by borrowing, with many conveniences and improvements which in other places had to be provided gradually out of revenue. "But, after all," says the writer, "if a municipality can borrow money to pave its streets at once at, say, 4½ per cent., it may be better business to borrow to pave and to pay the interest, plus a sinking fund, over a term of years, rather than to spread the expenditure over the same term of years by meeting it out of revenue and doing with partially paved streets. It is largely a question of cost of money, and Canadian municipalities have been able until recently to get money very cheaply. No doubt the easy money made easy spending, and the tendency has been both to undertake improvements too hastily and charge too much against capital account. That tendency," he states, "will be corrected by the present difficulty in raising fresh loans."

Meanwhile, Canadian towns have had their money cheap, and interest and sinking funds which they will have to pay as charges on their past improvements, are proportionately low.

WOMEN AS INSURANCE PROSPECTS

Interesting Data Relative to Mortality—Forty-three Companies Contribute to Investigation

Forty-three companies contribute to the Medico-Actuarial Mortality investigation, data relative to mortality among women. Their data is divided into four classes:—

1. Spinsters. 2. Married women, beneficiary husband. 3. Married women, beneficiary other than husband. 4. Widows and divorced.

While the records of the companies were given under policies issued from 1885 to 1908 inclusive, the great majority of the policies had been issued in recent years, less than one-half of the policies having been more than five years in force.

The expected deaths were calculated by the M. A. Mortality Table, which represents the average experience of the forty-three companies. The ratio of actual to expected deaths among the married women, husband beneficiary, was 126 per cent of the M.A. Table; and as it was only eighty-one per cent. among the spinsters, it follows that the mortality in the former class was about one-half that in the latter.

Comparisons as to Age and Duration of Policies.

The mortality among the class of widows and divorced women was about midway between that of spinster and married women. These comparisons take account of the difference in age and of the duration of the policies. Tables are given in the report which show that the mortality among women in the four classes combined is higher than among men at the young ages at entry, and lower at ages at entry sixty and above. It is shown that the mortality in the early years at ages of entry fifteen to twenty-nine is distinctly heavier among women than among men.

As it is well known that the mortality among policyholders insured on the ordinary life plan is not so good as among those taking endowment insurance, the question naturally arose whether the low mortality among the spinster, as compared with married women, coincided with the more frequent selection of endowment insurance by spinsters. The policies were accordingly divided by plan of insurance, from which it appeared that on the ordinary life plan the spinsters had a ratio of actual to expected mortality of 107 per cent., while the married women, with husband beneficiary, had a mortality of 140 per cent., and the married women, with beneficiary other than husband, showed a mortality of 126 per cent.

Under Endowment Insurance.

Under endowment insurances the relative mortality for these three classes of risks was 76 per cent., 114 per cent., and 90 per cent. It is clear from the tables submitted by the committee that the mortality among married women is much higher than among spinsters insured on the same plan. Combining the four classes of women, the following gives the relative mortality by plan of insurance.

Four Classes of Women, all Ages at Entry and all Policy Years Combined.

Plan of Insurance.	Ratio of Actual to Expected Deaths by M.A. Table.
Ordinary life	121 per cent.
Limited payment life	100 per cent.
Endowment insurance	89 per cent.

It is shown that the proportion of endowment insurance taken by spinsters is 54 per cent., and by married women about 26 per cent., while the proportions on the ordinary life plan are 13 per cent. and 36 per cent., respectively.

Two Significant Statements.

There are two significant statements at the close of this report on this investigation:—

1. That the high mortality among married women should not be considered as a barrier to the insuring of them. It is pointed out that with great care and with the greater knowledge as favorable mortality as among men may be anticipated in the future. One company, for example, found that the married women who paid their premiums out of their own incomes and whose children were the beneficiaries under the policies had a ten per cent. better mortality than among men of corresponding age.

2. That the better mortality among spinsters than among married women should not be considered as applicable to the general population. The statistics of the committee do not prove that spinsters, as a class, are better risks than married women, but that those of the former class who were insured by the companies were better than those of the latter class who were so insured. The spinsters insured by the companies were of a very good class—generally teachers, stenographers, librarians, doctors and other similar favorable types—and were not drawn from those who had long hours, heavy work, or unsanitary surroundings.

FIRE ADJUSTERS ARRESTED.

Messrs. Myron Stern and C. Trowbridge, known as the Reliable Fire Adjusters, with offices on Scott Street, Toronto, have been arrested on a charge of theft, and are being held with bail fixed at $5,000 each. The complainant is Mr. M. Herzlich, and the amount of which he claims to have been defrauded is $900. It appears that the men adjusted a fire claim for him some time ago. The sum of $1,300 was paid to them by the insurance company. Herzlich says he received only $400, the adjusters claiming that it was all he was entitled to out of the amount paid over by the insurance company. He thought there had been misrepresentation on the part of the two accused, and after making enquiries from the insurance company had the warrants issued.

ONTARIO FIRE CHIEFS MEET.

The annual meeting of the Provincial Association of Fire Chiefs of Ontario, will be held in Kingston, on August 28-29-30. Accommodation will be provided free for exhibits of fire apparatus and fire department equipment. As the question of the formation of a Dominion Association will be discussed at these meetings, it is expected that a large number of chiefs from all parts of Canada will be present as well as others from the United States, who will be attending the International meeting at New York the following week.

The chairman of the fire and light committee of the city of Kingston, Alderman Shaw, inspector of customs, will facilitate the entry and return of exhibits from the United States. So that the necessary space may be provided, applications should be made as early as possible to Chief James Armstrong, Kingston, who will give all necessary instructions and information.

There are a great number of exhibits already registered, to attend, and this convention promises to be the best and greatest of any yet held by the Association. People seem to have awakened to the great necessity of this movement and are encouraging the chiefs in their endeavors. The manufacturers and inventors of fire fighting facilities, are using the association conventions for the purposes of showing their goods, and no village, town or city in the province can afford to miss the opportunity provided hereby, in getting in touch with modern methods.

The following are the officers of the Association:—Chief F. N. Wetmore, Sault Ste. Marie, Ont., president; Chief A. S. Kappelle, Cobalt, vice-president; Chief J. E. Keyes, Galt, treasurer. Board of directors.—H. B. Graham, Lake Superior Corporation, Soo; A. D. Cameron, Fort William; J. Fowler, Sudbury. Auditors.—G. M. Thomson, Owen Sound; E. D. Fletcher, Petrolia; J. Fowler, Sudbury; and Chief L. G. Finch, Guelph, secretary.

HOW THE NATIONS SHARE CANADA'S LIFE INSURANCE

Canadian life insurance companies obtained the greatest share of premiums last year. Of the total, $35.711,624, they got $23,542,189. The United States companies' share was $10,401,389 and the British companies'. $1,768,046. In the matter of new and taken-up policies, the United States companies led in 1912, their number being 243,583. Canadian companies were responsible for 205,316, and British companies for 2,522. Examining the amount of policies, new and taken up, Canadian companies were again first with $141.267.596 compared with $70,617,555 for the United States companies and $7,319,952 for the British companies.

The United States companies at the end of last year had 808,605 policies in force, as against 663,870 of the Canadian companies and 24,912 of the British companies. Of the net amount in force, our own companies have $706,661,117, the British companies $54,489,612, and the United States companies $309,114,827.

Eight Canadian and four American companies took total premiums exceeding $1,000,000 during 1912. The highest figure of a British company under this heading was $818,494.

FROM PORT ARTHUR AND FORT WILLIAM

Port Arthur, August 13th.

Port Arthur and Fort William are occupying a unique position and seem to be in a better position to carry real estate than in any other places in Canada. In spite of their strategic position at head of navigation, their natural land locked harbor, on which the government is spending considerable in improvement work, in spite of the fact that industrial corporations from eastern Canada and the United States are erecting large works there, one can buy acreage, and good land, too, within comparatively short distance of Port Arthur's city hall. That fact alone seems to make the position of these two cities unique.

Much British money is being spent in real development work in this district. Last year, alone the Alberta Land Company, of which Mr. D'Arcy Hutton is manager, invested £104,404 sterling and the amount will be increased this year.

One thing which is militating much against the rapid growth of both cities is the spirit of petty jealousy that exists between them. It is foolish how municipal officials of both cities speak derisively of each other's municipality. It is unfortunate and should cease.

Port Arthur seems to be happy, so far as finances are concerned, having got in early in the year and profited by so doing.

A railroad man who covers Manitoba, Alberta and Saskatchewan, travelling over every portion of them, and naturally in a position to judge carefully as to the crop, says there is no necessity for worry. Another man who has covered the ground confirmed this.

There seems to be a slight restoration of confidence about here.

A number of life insurance men from Winnipeg are going to Ottawa next week.—J.

◆

CANADIAN PACIFIC HAS GOOD YEAR

Increases of $2,737,351 in net revenue available for dividends and $249,739 in net surplus to be carried forward, were features of the financial statement of the Canadian Pacific Railway issued by the directorate after their meeting this week. The net surplus for the company's year ended June 30th, 1913, exceeded $18,000,000.

The special income on land sales and from other assets not included in the general statement of revenue was $6,598,151. This is evidently an increase of $1,439,566 over 1911-12, when, exclusive of the balance carried forward from the previous year, special income amounted to $5,158,585.

Steamship earnings in excess of the amount included in the monthly reports show an increase of $141,115 as compared with the previous year. Against an increase of $3,000,000 in total net earnings there was an increase of only $351,415 in fixed charges, and, after deduction of $1,000,000 for steamship replacement account and $125,000 for pension fund, amounts similar to those deducted the previous year, the net revenue available for dividends was $35,490,085, an increase of $2,737,331 for the year. Dividends paid to shareholders within the year were $1,987,592 higher than in the previous year.

The following table compares the figures of the company's two latest years. No decreases are recorded.

	1911-12.	1912-13.	Increase.
Gross earnings	$123,319,541	$139,395,699	$16,076,159
Working expenses	80,021,298	93,149,825	13,128,527
Net earnings	$43,298,242	$46,245,874	$2,947,632

A large deposit of nickel is reported by McGougan & Johnson, prospectors at Duck Lake, near Port Arthur. They claim that free gold, copper and zinc are near their find.

VALUABLE MANUFACTURING
SITE FOR SALE

The land and buildings formerly occupied by Canadian Gas Power and Launches, Limited, Dufferin Street, Toronto, for sale.

SITE: 259 feet frontage on Dufferin Street by 300 feet in depth.
BUILDINGS: Concrete, 242 feet by 80 feet and 156 feet by 40 feet.
SHIPPING FACILITIES: On two sides of block over C.P.R. and G.T.R. Lines.

The above are situated in the heart of the manufacturing district of the city.

PLANS AND PARTICULARS FROM

JOHN MACKAY & COMPANY
TORONTO GENERAL TRUSTS BUILDING

Partner Wanted

who will be security to the extent of $25,000 in conducting excellent machinery agency business holding valuable agency contract.

Principals with whom agreement is held have done large volume of business in Canada during past few years and at excellent profit.

Address Box 227, MONETARY TIMES,
62 Church St., Toronto.

BRITISH COLUMBIA AND PANAMA CANAL

Pacific Coast Lumber and Grain via the Isthmus—Vast New Source of Supply for Both Grain and Lumber —Wonderful Development of Province

A report just issued by United States Consul General David F. Wilber, of Vancouver and filed at Washington, summarizes in a striking manner the growth of British Columbia and its effect upon American interests. British Columbia is likely to benefit largely by the Panama Canal.

"There is a good market," says Consul Wilber, "in British Columbia for American manufactures of all kinds. While the preferential tariff favoring Great Britain limits the sale in some lines, the nearness of the market and, in many cases, the better appearance of American products enables American manufacturers to hold their own. A large number of agencies for American goods have been established in Vancouver during the past few years.

"There is a good market for commercial automobiles and trucks, as this branch of the trade is in its infancy. They are now beginning to be used for delivery by department stores, grocery stores and similar firms.

"A large percentage of the furniture sold here is of American manufacture; a large percentage of the hardware and tools sold are of American make. They are preferred on account of the better finish and style. A large amount of the railway construction equipment is manufactured in the United States. On account of the large amount of railway construction under way in the province there is, and will continue to be for some time, a good demand for railway equipment. There is an increasing sale for eastern Canadian clothing.

"Of the total tonnage of vessels entering Vancouver during 1912, amounting to 5,237,010 for 10,657 ships, the American shipping contributed a tonnage of 463,796 and 1,041 vessels. Of these 53 were fishing vessels with a tonnage of 9,480. The value of the aggregate cargo during the year amounted to $13,941,526, as follows: Inward, $10,201,174; outward, $3,740,352.

Total Mineral Production.

"The estimated mineral production for British Columbia for 1912 is $32,606,000, as against an output of $23,499,072 for the previous year. The production for 1912 was the largest in the history of the province.

"The following table shows the value of the several minerals produced in the province in 1911, and the estimated production in 1912:—

Minerals—	1911.	1912.
Gold—		
Placer	$426,000	$500,000
Lode	4,725,513	4,960,800
Silver	958,293	1,676,200
Lead	1,069,521	1,520,000
Copper	4,571,644	8,338,500
Zinc	129,092	501,500
Coal	7,675,717	9,275,000
Coke	396,030	1,584,000
Building materials, etc.	3,547,262	4,250,000
Total	$23,499,072	$32,606,000

"In the production of copper British Columbia stands first among the provinces, the output amounting to more than a third of that of all Canada. As in other years the Boundary district produced more copper than any other in the province, the total being 33,000,000 pounds.

"It has been estimated that British Columbia has an area of about 253,000,000 acres, of which about 1,600,000 acres is composed of lakes in the interior. There are over 100,000,000 acres of timber land of no value for farming other than for stock purposes, and while it is estimated that 3,000,000 acres is either under cultivation or partly so, statistics show that the actual yielding acreage, other than for grazing purposes, is not more than 250,000 acres.

Conditions in the Timber Industry.

"It is stated that with the exception of Siberia, Brazil and the Northwestern United States British Columbia's timber wealth is unparalleled in any other country. The investigations of the forestry branch show that there are not less than 100,000,000 acres of forest land in British Columbia and that the total stand of commercial timber amounts to about 300,000,000,000. Taking the present lumber output of the province as a basis of figuring, which is about 1,250,000,000 feet per annum, and making no allowance for annual growth, it would take nearly 250 years to use up merely the mature timber now standing.

"The export of manufactured timber for 1912 amounted to 35,225,740 feet board measure, upon which a tax of $1 per thousand was charged, and 17,054,635 feet board measure without this payment, making a total of 53,280,375 feet, as against an exportation in 1911 of 47,000,000 feet. The different classes of lumber exported in 1912 included: Cedar, 33,608,990 feet; spruce, 1,249,489 feet; pine, 367,261 feet; unspecified, 17,054,635 feet.

Prospects of New Market.

"The lumber cut for 1912 was the largest on record, although the actual profit of the year's operations was not so great as for the previous year. The total cut, including railway and crown lands, was 1,262,000,000 feet, valued conservatively at $19,000,000. The cut for 1911 was 1,189,000,000 feet and for 1910 1,028,000,000 feet.

"The mountain mills have been much more seriously affected than the coast mills by competition with American mills that has to be met in the Middle West and to a considerable extent in British Columbia. In 1911 that competition amounted to 263,00,000 feet, and in 1912 to 300,000,000 feet.

"The British Columbia lumber exporters are looking forward with interest to the completion of the arrangements with New Zealand and Australia as regards the preferential trade agreement. It is also expected that the opening of the Panama Canal will largely increase the lumber exports of the province, as the shippers of British Columbia lumber will be enabled to land their product at Atlantic Coast ports for about one-half the present rate overland by railroad, and also cheaper than the Pacific Coast States on account of transportation on other than American vessels.

"Fishing is one of British Columbia's leading industries. The production for the province for 1912 was over one-third of the total production of the Dominion, for the first time leading its rival, Nova Scotia. Of a total of $34,667,872 worth of fish caught in the waters of the Dominion, British Columbia furnished $13,677,125, an increase for the Dominion over 1911 of $4,702,439 and for the province of $4,513,890.

"The increase for the province is attributed almost entirely to the increased demand and value of the cheaper varieties of salmon.

Panama Canal Shipments.

"It is claimed that Vancouver will be an important grain shipping port after the opening of the Panama Canal and the reduced water rates are available. Canadian grain shipments at the present time via the Great Lakes are hampered by the short season.

"While heretofore it has been necessary to ship over the eastern route, with the completion of the new roads to the west and the opening of the Panama Canal it will be necessary that exceptionally low rates be offered the shippers of the Western provinces, such as Alberta and Saskatchewan, in order to induce them to ship via the Eastern route. It is claimed by some that grain shipments through the Panama Canal from this point are impracticable on account of the liability of the grain to sweat owing to the heat to be encountered on this route.

"The advantage of the Western route becomes more apparent when it is taken into consideration that the Panama route from Vancouver to Liverpool will be cut to 8,800 miles, as against 14,000 miles by way of the Straits of Magellan and more than 16,000 miles by way of the Suez route. In fact, the time will be practically cut in half.

"It has been estimated that the entire crop of grain of British Columbia and Alberta, and one-third of the crop of Saskatchewan will be exported by way of Vancouver, eithe in the shape of grain or in manufactured form. The production of this area for 1912 amounted to approximately 179,330,836 bushels. This production will be increased upon the opening of new parts of these provinces by the completion of the transcontinental railroads now under construction.

"During 1912 there were over 2,000 miles of railway under construction in the province. The government is directly responsible for 1,500 miles of these lines. These railway operations involved an actual expenditure during 1912 of $25,000,000."

WANT FLAX FIBRE

As a considerable quantity of flax will be harvested in Canada this year, the attention of firms interested may be drawn to the market in Leeds, England for flax fibre. Spinners there have followed with close attention the development of the growth of the flax plant in Western Canada, and are desirous of receiving shipments of the fibre if it can be obtained on competitive terms with supplies from other sources. Some three years ago a few small trial shipments of unretted flax fibre were sent here from Canada.

Mr. J. M. Mussen, Canadian trade commissioner at Leeds says consumers express their readiness to give their consideration to offers that may be received at any time from Canadian firms interested in seeking export markets for this fibre.

SALMON STRIKE HELPED SPAWNING

Real Estate in British Columbia—Britannia Mining Company's Work

(Staff Correspondence.)

Vancouver, August 9th.

That the Britannia Mining Company expects to operate on a large scale is shown by the way it is taking up further locations in the vicinity of its original property at the head of Howe Sound. They have a force of surveyors in the field and much ground is being covered with stakes. The staking is done under the name of the Britannia Development Company, a subsidiary concern, and it is claimed that more is being taken up than should be if the provisions of the mining act were strictly adhered to. At present, however, it does not make much difference, but the time may come when this blanket staking will be objected to. There are several private owners of mining properties in the vicinity of Britannia, and one is said to have been offered $75,000 cash for his holdings. He is waiting for a larger offer, believing that what he has is worth $200,000. Such activity on the part of a large company indicates what faith in the country is possessed by men who are familiar with the resources. The Britannia Company is duplicating the action of the Granby in extending its holdings, although in this instance they are located all together. The British Columbia Copper Company is also getting further afield, since it will take over the Voight claims near Princeton.

Selling Real Estate.

Since the Fernie board of trade has undertaken a campaign against those who sell real estate, regardless of what they say, they have received so many letters, some of them truly pathetic, that it is little wonder men have made fortunes. The evils were not confined to British Columbia by any means, but were particularly apparent in the North-West, where lots were sold miles from the centres of towns of about 2,000 population. These were sold to people who did not know the place, and who relied on the maps and literature furnished. British Columbia real estate men sold on the prairies and prairie real estate men sold in British Columbia. Just now more than one large concern that disposed of lots to people remote from the townsite are kept busy answering questions. The buyers, though, have either to put up the rest of their payments or lose what has been already paid if they default. They are caught either way. After they are through paying, they will ponder and pay taxes.

An instance of how sales are made to the faraway possessor of a little cash, who is eager to speculate in the hope of making money like others did in the days of the boom, is shown by the free circulation of a map of Port Moody townsite, which has just been issued. People in Vancouver are familiar with this little spot on the map at the head of Burrard Inlet, but they would look twice before they recognized the official townsite, which extends all round the head of the inlet, even into the mountains on the north side. To be sure, on paper it looks as level as a prairie townsite, and a man or woman with $500 might think they were making a good investment by buying a lot so close to a place like Vancouver, and in a town where sawmills, etc. are already established. Hills do not show on paper. The government should make it compulsory on the part of circulators of townsite maps to outline also the topography of the townsite.

Strike in Salmon Fisheries.

It looked for a time as if another strike was going to tie up things a little tighter, the fishermen on the Fraser having stopped work. The run of salmon has been so good, that the canners concluded to cut the price from 25 cents, as promised at the beginning of the season, to 15 cents per fish. They argued that even at the lower figure the men would make as much in the aggregate. Everybody went out, the Japanese as well, but they later compromised at 20 cents. The canners did not say that, no matter how big the run, they would receive the same price for the pack in the end, and that really they are making that much more profit when they are able to get fish at a lower rate. If the strike had continued, it would have been a rare instance of good resulting, for a greater number of fish would have reached the spawning grounds.

Mr. L. Scheff, a London newspaper man, who is on a trip to the coast, makes the assertion that the financial stringency has affected only real estate speculation, and that legitimate enterprises have had no trouble in getting all the capital they required. That may have been the case in London, but not so in this part of Canada. Banks here absolutely refused in many instances to loan money, even when security was offered, and insisted upon the payment in of loans wherever possible. Mr. Scheff says that Canadian credit is all right in London, and it does look now as if sufficient money will be forthcoming to municipalities to enable them to carry on proposed works. The year has so far advanced that little work will be done now, and before spring arrives the effect of the stringency will be more felt than even now.

Life

Underwriters'

Convention

OTTAWA

August 19-21, 1913

As usual, the Monetary Times is planning to feature the convention, and will publish the papers read before convention, discussions, and also a detailed report of the convention happenings; a clear concise and intelligent digest of the doings of the convention.

The current issue presents a large number of articles dealing with the different phases of Life Insurance. These two issues will be of permanent value to all life insurance men.

The Monetary Times will be sent to any life insurance man weekly to January 1st, 1915, for three dollars, provided that the subscription is received on or before August 30th, 1913. The subscription will begin with the date of the post mark of the letter enclosing your three dollars and will include our Convention number.

Orders for extra copies of next week's number are being received now

DIVIDENDS AND NOTICES

DIVIDEND NOTICE

Notice is hereby given that Quarterly Dividends of 1¾ per cent. on the Preferred Stock and of 2 per cent. on the Common Stock of Lake of the Woods Milling Company, Limited, have been declared payable on **Monday, the first day of September, 1913,** to shareholders of record at the close of business on Saturday, August 23rd, 1913.

By order of the Board,

R. NEILSON,
Assistant Secretary.

No. 332.

UNION BANK OF CANADA.

DIVIDEND No. 106.

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the paid-up capital and stock of this institution, has been declared for the current quarter, and that the same will be payable at its banking house in this ity, and also at its branches, on and after Tuesday, the second day of September next, to shareholders of record on August 19th, 1913.

By order of the Board.

G. H. BALFOUR,
General Manager.

Winnipeg, July 15th, 1913.

THE HOME BANK OF CANADA

NOTICE OF QUARTERLY DIVIDEND

Notice is hereby given that a Dividend at the rate of Seven per cent. (7%) per annum upon the paid up Capital Stock of this Bank has been declared for the three months ending the 31st August, 1913, and that the same will be payable at its Head Office and Branches on and after Tuesday, September 2nd, 1913. The Transfer Books will be closed from the 17th to the 31st August, 1913, both days inclusive.

By order of the Board,

JAMES MASON,
General Manager.

Toronto, July 16th, 1913.

CANADIAN PACIFIC RAILWAY COMPANY.

DIVIDEND NOTICE

At a meeting of the Board of Directors, held to-day, the following dividends were declared:—

On the Preference Stock, two per cent. for the half-year ended 30th June last.

On the Common Stock, two and one-half per cent. for the quarter ended 30th June last, being at the rate of seven per cent. per annum from revenue and three per cent. per annum from interest on the proceeds of land sales and from other extraneous assets.

Both dividends will be paid on 1st October next to Shareholders of record at the closing of the books in Montreal, New York and London at 1 p.m. on Saturday, 30th August next.

All books will be re-opened on Thursday, 2nd October next.

By order of the Board,

W. R. BAKER,
Secretary.

Montreal, 11th August, 1913.

THE BANK OF TORONTO

Dividend No. 128

Notice is hereby given that a Dividend of Two and Three-quarters Per Cent. for the current quarter, being at the rate of Eleven Per Cent. per annum, upon the Paid-up Capital Stock of the Bank, has this day been declared, and that the same will be payable at the Bank and its Branches, on and after the 2nd day of September next, to Shareholders of record at the close of business on the 14th day of August next.

The Transfer Books will be closed from the Fifteenth to the Twenty-third days of August next, both days inclusive.

By order of the Board,

THOS. F. HOW,
General Manager.

The Bank of Toronto, Toronto,
July 23rd, 1913.

THE ROYAL BANK OF CANADA.

DIVIDEND No. 104.

Notice is hereby given that a dividend of Three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the 2nd day of September next, to shareholders of record of 15th August.

By order of the Board.

E. L. PEASE.
General Manager.

Montreal, P.Q., July 17, 1913.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-half Per Cent. upon the paid up Capital Stock of this Institution has been declared for the three months ending 31st July, 1913, and that the same will be Payable at its Banking House in this City, and at its Branches, on and after Tuesday, The Second Day of September next, to Shareholders of record of 31st July, 1913.

By order of the Board,

H. V. MEREDITH,
General Manager.

Montreal, 22nd July, 1913.

THE CANADIAN BANK OF COMMERCE

DIVIDEND 106

Notice is hereby given that a quarterly dividend of 2½ per cent., upon the capital stock of this institution has been declared for the three months ending the 31st August next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 2nd September next, to shareholders of record at the close of business on the 16th day of August, 1913.

By order of the Board,

ALEXANDER LAIRD,
General Manager.

Toronto, 21st July, 1913.

The bulk of the insurance business in Japan is in native hands. There are 30 Japanese life companies at work. Five foreign life companies are operating in the Empire of the Mikado. Two are Canadian and two United States, and the other is registered in Hong Kong. These companies issued 3,679 new policies last year.

That the new 3,250,000 bushel government elevator at Port Arthur will be ready to receive the 1913 crop is assured by the progress made on this building. The tanks are nearly completed, and work has commenced on the plant's power houses and smoke stack. With elevators dotted here and there, Port Arthur is rapidly becoming a grain centre second to none on the continent, and the water front from Current River to West Fort William will soon be occupied with docks and grain storage houses.

Bankers' Burglar and Fireproof Safe for Sale at ½ Regular Price

A splendid bargain. In perfect condition. For full particulars and price, address The R. S. Williams & Sons Co., Limited, 145 Yonge Street, Toronto. Attention, Mr. Shelton.

Melfort, in the Carrot River Valley of Northern Saskatchewan, will hold a pageant in August, 1914, to commemorate the 160th anniversary of the initial attempt at agriculture made near Melfort at Fort La Corne by the French explorer, Chevalier de la Corne.

Wayagamack Pulp & Paper Co. Limited

FIRST ANNUAL REPORT, 1913

Report of the Directors to the Shareholders.

As this is the first meeting of the Shareholders of the Company, we will briefly review the progress of construction and organization since the Company's inception.

In January, 1911, the well-known Baptist properties were secured, consisting of eleven hundred and twenty-one (1,121) square miles of timber limits on the St. Maurice River and its main tributaries, together with depôts, logging, booming and other river equipment, and extensive properties in the city of Three Rivers.

Your Directors secured the advice and services of a Canadian engineering firm, together with the advice of English and Swedish consulting engineers of the highest standing, for the planning and construction of the various portions of the plant; contracts being let and work begun in the spring of 1911. The construction of buildings and installation of machinery and plant, so far as completed, occupied about sixteen months, which, in view of the size and extent of the work, was a remarkably short time.

The plant is located on what was previously known as "Baptist Island," which is situated on the deep-water ship channel at the confluence of the St. Lawrence and St. Maurice Rivers. This island, previous to 1911, was the site of two old saw-mills, a lumber yard and a number of old dwellings. Before the beginning of actual construction, it was necessary first that these be cleared away; a railroad swing-bridge constructed across the channel, and sidings built on the island; a steel horse-bridge erected, roads laid out, operatives' houses built, extensive drainage system—in places twenty-three feet deep—put down; pumping and filtration plant, for manufacturing purposes, installed, with a daily capacity of three million five hundred thousand (3,500,000) gallons, and a network of fire protection laid down for the entire island.

Plant construction consisted in building and installing machine and carpenter shops, slasher house and log conveyors, chipping and storage systems, complete pulp mill and recovery furnaces; paper mill, consisting of beater, machine and finishing rooms; steam plant, electrical sub-station to handle power from Shawinigan, as well as a saw-mill of the latest design, equipped with double-acting band-saws, operated by an independent steam power plant, using sawdust fuel.

The plans comprised the construction of the plant with an initial capacity of fifty tons of pulp and fifty tons of finished paper, but so designed as to permit of its gradual extension to reach ultimately a capacity of two hundred tons of paper.

This policy necessitated the installation of considerable portions of the plant on a scale much larger than would have been required to deal with the present output. By having incurred these additional expenditures at the present stage, your Company will be enabled to effect the extension without disturbing the continued operation of the first units.

The pulp-wood plant was completed in sufficient time to operate during the summer of 1912, thereby furnishing the necessary supply of raw material for the operation of the paper plant when completed and started during the following winter. During the next four months the various parts of the pulp and paper mills were gradually put into operation, machinery tested, and samples of the product delivered to the trade for the purpose of securing the market.

The entire period of construction, installation and testing thus covered two years from the date of the purchase of the property, and your Directors can confidently state that your Company possesses the most up-to-date and efficient plant for the manufacture of sulphate pulp and "Kraft" paper now in operation.

Permanent running of the pulp and paper plant on the standard product was begun on the first day of January, 1913.

A paper master, from Sweden, of wide reputation, was secured as technical manager, and the quality of the paper produced has caused it to be most favorably received, not only in the domestic market, but in the markets of New Zealand, Australia, South Africa and the United States.

The profit and loss statement submitted covers one year's lumbering and the operation of the pulp and paper mills for six months. The net earnings, as appears from the statement, were $256,773.99.

We believe that the Shareholders will be gratified to learn that the Company has established its earnings at such a level for this initial period, particularly as every operating factor is such as to indicate that the ultimate earning power will be far in excess of these figures.

A third paper machine is being erected and should be running by the beginning of September. The output of this machine will be readily sold in conjunction with the present product and will complete the line of "Kraft" papers.

The Company derives great benefit from the operation of its saw-mill in conjunction with its pulp and paper mills. All timber cut is used either in the manufacture of pulp and paper or in the manufacture of lumber. In addition, all the waste material from the saw-mill is used either for the manufacture of paper, or in the production of steam to operate the plant.

Under the Company's policy of conserving their timber limits by the most modern and scientific methods, the supply of wood is practically inexhaustible. The value of these limits in standing timber, as well as in pulp-wood, is very great and is destined, of course, to grow more so each year.

We have to thank the staff for their very efficient service.

Submitted on behalf of the Directors.

J. N. GREENSHIELDS,
President.

J. N. Greenshields, K.C., Esq.,
President, Wayagamack Pulp and Paper
Company, Limited, Montreal.

Dear Sir,—I have at regular periods examined and audited the books and vouchers of the Wayagamack Pulp and Paper Company, Limited, at the Company's office, Three Rivers, Que., from the date of its organization to July 1st, 1913, and beg to report that I found the books to be correct and the vouchers complete and properly classified.

I have verified the Cash Balance as on June 30th, 1913, at the close of business.

I have also verified the Statements of Assets and Liabilities and Profit and Loss Account, dated June 30th, 1913.

Yours truly,
A. CINQ-MARS,
Chartered Accountant,
C.A., F.C.A., (Can.), Auditor.

LEGAL NOTICE

INTERNATIONAL STEEL CORPORATION, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 9th day of July, 1913, incorporating Donald Alexander MacRae, Thomas Wallace Lawson and Harold Ernest McKitrick, barristers; John Fraser MacGregor, accountant, and Harry Riley, law clerk, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, produce and deal in iron, steel and all other metals, and in manganese, copper, lead, zinc, coke, stone and all mineral and metallic substances from the ore to the finished products thereof, and also to manufacture and deal in all goods, wares and merchandise in which iron and steel or any other metal is or may be used, and generally in property of every class and description to carry on the trades or business of iron founders, steel manufacturers, colliery proprietors, coke manufacturers, paint and color grinders, oil and color men, manufacturers and dealers in cements, oils, paints, pigments and varnishes and other chemical and industrial preparations of every description in all of their respective branches; (b) To purchase, lease or otherwise acquire natural gas lands, oil lands, mines, mining rights, metalliferous lands and timber lands, timber limits and water powers, movable and immovable property, rights, easements and privileges and any interest therein, and to explore, work, exercise, develop, turn to account, deal in, sell or otherwise turn to account the same; (c) To search for, get, work, raise, make merchantable and deal in natural gas, oil, timber, iron, coal, ores, brick earth, bricks, cement and other metals minerals and substances and their products; (d) To crush, win, get, quarry, smelt, calcine, refine, dress, amalgamate, manipulate and prepare for market, buy and sell natural gas, timber, ore, metal and mineral substances of all kinds and to carry on any other metallurgical operations which may seem conducive to any of the company's objects; (e) To buy, sell, manufacture and deal in minerals, plants, machinery, implements, conveniences, provisions and things capable of being used in connection with metallurgical and other operations which the company may carry on or be interested in or required by workmen and others employed by the company; (f) To construct, carry out, maintain, improve, manage, work, control and superintend any roads, ways, pipe lines, tramways and railway sidings on lands owned or controlled by the company, bridges, reservoirs, water courses, aqueducts, wharves, furnaces, sawmills, crushing works, hydraulic works, electrical works, factories, warehouses, shops, dwelling houses and other works and conveniences which may seem directly or indirectly conducive to or convenient for any of the purposes and objects of the company, and to contribute to, subsidize or otherwise aid or take part in any such operation; (g) To manufacture, buy, sell and supply light, heat and power of every kind and description and to carry on the works of a gas company in all its branches; provided, however, that any sale, distribution or transmission of electric, pneumatic or other power or force or gas for the purpose of light, heat or power beyond the lands of the company shall be subject to local and municipal regulations in that behalf, and to deal with, manufacture and render saleable coke, coal, tar, pitch, asphaltum, ammoniacal liquor and other residual products obtained in the manufacture of any article which the company is authorized to manufacture or deal in; (h) To apply for, purchase and otherwise acquire any trade marks, patents, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired; (i) To develop and turn to account any land acquired by the company, or in which it is interested, and in particular by laying out and preparing the same for building purposes, constructing, altering, pulling down, decorating, maintaining, fitting up and improving buildings and conveniences and by planting, paving, farming, cultivating, letting on building lease or building agreement and by advancing money to and entering into contracts and arrangements of all kinds with builders, tenants and others; (j) To buy, sell and manufacture, refine, manipulate, export and import and deal in all substances, apparatus and things capable of being used in any such business as the company is authorized to carry on or required by any customers of or persons having dealings with the company; (k) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (l) To acquire or undertake the whole or any part of the business, property and liabilities of any company carrying on any business which the company is authorized to carry on, or possessed of any property suitable for the purposes of this company, and to pay therefor in fully paid-up or partly paid-up preference or ordinary shares of the company or in the bonds, debentures or other securities of the company; (m) To enter into partnership or any arrangement for sharing profits, union of interests, co-partnership, joint adventure, reciprocal concession or otherwise with any company carrying on or engaged in or about to carry on or engage in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such company, and to take or otherwise acquire shares and securities of any such company and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (n) To take or otherwise acquire, hold, own or otherwise dispose of shares in the capital stock, or the bonds, obligations or other securities of any company having objects altogether or in part similar to those of this company, or carrying on any business capable of being conducted so as to directly or indirectly benefit this company, or possessed of any property, rights or franchises capable of being used so as to directly or indirectly benefit this company or enhance the value of its undertakings, notwithstanding the provisions of section 44 of the Companies Act, and to guarantee the payment of dividends on any such stock and the payment of the principal of and interest on any such bonds, obligations or other securities and to aid in any manner any such company; (o) To enter into any arrangement with any authorities, supreme, municipal, local or otherwise, whether domestic or foreign, that may seem conducive to the company's objects or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out or exercise and comply with any such arrangements, rights, privileges and concessions; (p) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependants or connections of such persons, and to grant pensions and allowances and to make payments towards insurance and to subscribe or guarantee money for charitable or benevolent objects or for any exhibition or for any public, general or useful object; (q) To promote any company or companies for the purpose of acquiring all or any part of the property and liabilities of this company or for any other purpose which may seem directly or indirectly calculated to benefit the company; (r) Generally to purchase, take on lease or in exchange, hire or otherwise acquire any real and personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business; (s) To construct, acquire and operate vessels, steamboats and barges and to carry on the business of lumbermen, vessel agents, cartage system, cartage agents, wharfingers, warehousemen and forwarders, for the purposes of the company; (t) To invest and deal with the money of the company not immediately required, in such manner as may from time to time be determined; (u) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (v) To remunerate any company for services rendered or to be rendered to the company in placing or assisting to place or guaranteeing the placing of any of the shares of the company's capital or any bonds, debentures or other securities of the company, or in or about the formation or promotion of the company or the conduct of its business; (w) To issue fully paid-up shares, bonds or other securities for the payment, either in whole or in part, of any property, real or personal, rights, claims, privileges, concessions, choses in action, services rendered or other advantages which the company may lawfully acquire, and to issue such fully paid-up shares, bonds or other securities in payment, part payment or exchange for shares, bonds or other securities of any other company; (x) To sell or dispose of the whole or any part of the assets and undertakings of the company as a going concern or otherwise, for such consideration as the company may think fit, and in particular for shares, bonds, debentures or securities of any other company having power to acquire the same; (y) To obtain any provisional order or Act of Parliament for enabling the company to carry any of its objects into effect or for effecting any modification of the company's constitution, or for any other purpose which may seem expedient, and to oppose any proceeding or application which may seem calculated directly or indirectly to prejudice the company's interests; (z) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (aa) To do all such other things as are incidental or conducive to the attainment of the above objects; (bb) To draw, make, endorse, accept, execute and issue promissory notes, bills of exchange and other negotiable and transferable instruments; (cc) To distribute in specie or otherwise, as may be determined, any assets of the company among its members and particularly the shares, bonds and other securities of any other company owned by this company; (dd) To cause or to allow the legal title, estate and interest of any of the property, real and personal, owned by the company, or in which it has any interest, to remain in or be vested in or registered in the name of any individual or individuals or corporation either in trust for or as agents or nominees of the company in accordance with the terms of any instrument creating such trust or agency; (ee) To procure the company to be registered, licensed or otherwise recognized in any foreign country and to designate and appoint any person or corporation therein as attorneys or representatives of the company, with full power to represent this company in all matters according to the laws of such foreign country, and to accept service for and on behalf of this company in any process or suit: (ff) To do all or any of the above things as principals, agents, contractors, trustees or otherwise and by and through trustees, agents or otherwise and either alone or in conjunction with others; (gg) To amalgamate with any other company or companies having objects altogether or in part similar to those of this company; (hh) The word "company" in clauses (l) to (ii), both inclusive, shall be deemed to include any person, partnership or other body of persons, whether incorporated or unincorporated, and whether domiciled in Canada or elsewhere, and the objects specified in each of said clauses shall be in no wise limited by reference to or inference from the terms of any other clauses or the name of the company; (ii) The business or purpose of the company is to do from time to time one or more of the acts and things herein set forth. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "International Steel Corporation, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada this 15th day of July, 1913.

THOMAS MULVEY,
Under-Secretary of State.

Solicitors for International Steel Corporation, Limited.

TAKE OUT INSURANCE WHILE YOUNG.

The New York Life in a recent leaflet points out the advantages of taking out insurance at the youngest age possible. A case in point tells how a man insured his life at age 24 in 1872. He is now 65 years of age. On the basis of a $10.000 ordinary life policy on the annual dividend plan, the premiums paid in 42 years, less dividends, amounted to $5,866.40. The 1913 premium less dividends would be $95.50 By waiting ten years and insuring at age 34 in 1882 the assured would pay premiums for 32 years, less dividends, for $6.219. The 1913 premium, less dividend, would be $148.20. The man who insured at age 24, thus saved $352.60 more than if he had insured at age 34. The insured who took out his policy at the younger age, saved money on the sum total of premiums paid, with ten years additional protection and would also save money on future annual premiums.

LEGAL NOTICE

THE LAW SECURITIES, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 25th day of July, 1913, incorporating Robert John Law, broker, John Richard Law, accountant, Frank Everett Dalton, inspector, Ina Maud Johnston, stenographer, and John Rigby, law clerk, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To acquire by purchase or in any other manner lands and any estate or interest therein, and to sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with the same; (b) To erect, repair, manage, lease and improve buildings on any lands which the company may own or in which it may have any interest, and generally to carry on the business of real estate dealers and agents; (c) To subdivide any lands owned or leased by the company or any lands in which the company has any interest into small lots and to lay out such lands into streets, lanes, parks, squares or otherwise and to dedicate the same if so required to public use; (d) To underwrite, subscribe for, purchase or otherwise acquire and hold either as principal or agent and absolutely as owner or by way of collateral security or otherwise, and to sell, exchange, transfer, assign or otherwise dispose of or deal in bonds or debentures, stocks, shares or other securities in any government, municipal or school corporation or of any chartered bank or incorporated company, and while owner of any such stocks, bonds or obligations to exercise all the rights, powers and privileges of ownership thereof and to exercise any and all voting power thereon; (e) To assist in the promotion, organization, development or management of any corporation or company, and to raise and assist in raising money for and aid by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise, any other company or corporation, and to offer for public subscription any shares, stocks, bonds, debentures or other securities of any other company or corporation; (f) To aid in any manner any corporation or association of which any bonds, or other securities or evidences of indebtedness or stock are held by the company, and to do any acts or things designed to protect, preserve, improve or enhance the value of any such bonds or other securities or evidences of indebtedness or stock; (g) To apply for, secure, acquire by assignment, transfer, purchase, or otherwise and to exercise, carry out and enjoy any charter, license, power, authority, franchise, concession, right or privilege which any government or authority or any corporation or other public body may be empowered to grant and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's shares, bonds and assets to defray the necessary costs, charges and expenses thereof; (h) To apply for, purchase or otherwise acquire any patents, brevets d'invention, grants, licenses, leases, concessions and the like conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to invention which may seem capable of being used for any of the purposes of the company or the acquisition of which may seem calculated to benefit this company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property, rights, interests or information so acquired; (i) To purchase, lease or otherwise acquire, for such consideration as the company may think proper, any business similar in character and object to any of the businesses of this company; (j) To issue and allot, as fully paid up, shares of the company hereby incorporated in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same or any part thereof in bonds or debentures of this company; (k) To sell, lease or otherwise dispose of the property and undertaking of the company or any part thereof for such consideration as the company may think proper, and in particular for shares, debentures, bonds or securities of any other company; (l) To manufacture, buy, sell and deal in goods, wares and merchandise; (m) To enter into partnership or into any arrangement for sharing of profits or union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which this company is authorized to engage in or carry on, and to lend money to and act as employee, agent or manager of any such person or company, and to carry on the business of and to guarantee the contracts of or to otherwise assist any such person or company or any customers, and to guarantee the securities issued or to be issued either conditionally or upon any condition, the bonds, debentures or other securities, of any such company and to take, hold or otherwise acquire shares and securities of any such company, notwithstanding the provisions of section 44 of the said Act, and to sell, hold, or reissue with or without guarantee or otherwise deal with the same; (n) To amalgamate with any other company or companies having objects altogether or in part similar to those of this company, and to take shares therein, to guarantee the performance of contracts by any person or company with which the company may have business relations; (o) To draw, make, accept, endorse and execute promissory notes, bills of exchange, warrants and other negotiable or transferable instruments; (p) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company or which the company may have power to dispose of; (q) To pay all or any costs, charges or expenses preliminary or incidental to or incurred in connection with the promotion, organization, registration and incorporation of the company; (r) To do all or any of the above things as principals, agents, contractors, trustees or otherwise and either alone or in conjunction with others; (s) The business or purpose of the company is from time to time to do any one or more of the acts and things herein set forth, and the powers in each paragraph to be in no wise limited or restricted by reference to or inference from the terms of any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Law Securities, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada this 30th day of July, 1913.

◆

BRITISH FOREIGN AND COLONIAL CORPORATION.

A satisfactory report was presented at the annual meeting of the British Foreign and Colonial Corporation, Limited, held in London. This company is interested in Canada. The chairman, Mr. John R. Tennant, said in part:—"The past year has witnessed a complete rearrangement of the yield on investments towards a very much higher level, and, with trustee stocks yielding over 4 per cent., sound railway and other debentures between 5 per cent. and 6 per cent., and well-secured industrial bonds and preference shares between 5½ and 8 per cent., it is increasingly difficult to make a sound selection.

"The new issues of capital made by us during the past 17 months have been comparatively few, as times were not propitious for making such issues. As fiscal agents for the city of New Westminster, B.C., we negotiated some of their loans, and also one issue for the city of North Vancouver. We have also issued the city of Las Palmas Water and Power Company's bonds, which has the guarantee of the municipality of Las Palmas, as well as the bonds of the Dominion Canners, which, judging from recent statistics published in Canada, rank third best as to margin of earnings standing behind its debenture interest amongst Canadian 6 per cent. bonds."

◆

Contracts have been awarded for the construction of a forty-mille stretch of the Kettle River Valley line through the Hope Mountains. This line will be used jointly by the Great Northern and the Kettle Valley line, and will take two years to complete. There will be some very heavy rock work. These two lines run fairly close together for quite a distance east of the Hope Mountains, thus giving one territory double service, while other parts in the same section are left unprovided for.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Sealed tenders will be received by the Clerk of the Town of Rosetown, Sask., until the 20th of August, 1913, on an issue of $13,500 of 7 per cent. debentures, payable at the end of the period, 20 years, interest payable semi-annually. The purchaser to pay printing and banking expenses.

ANDREW WILSON,
Clerk.

Rosetown, Sask.

TENDERS FOR DEBENTURES

Sealed tenders marked "Tenders for Debentures" will be received by the undersigned up to 5 p.m. September 1st, 1913, for the purchase of $15,000 debentures, repayable in forty equal annual instalments, with interest at six per cent. per annum.

This issue is for the purpose of completing and furnishing St. Agnes Roman Catholic Separate School of Moose Jaw.

The highest or any tender not necessarily accepted.

EDW. J. BAKER,
Secretary-Treasurer.

The St. Agnes Roman Catholic Separate School District No. 22.

Moose Jaw, July 23rd, 1913.

TOCO, SASK.

SCHOOL DEBENTURES FOR SALE.

Tenders will be received up to noon, Saturday, August 23rd, 1913, for $10,000 20-year 6 per cent. debentures, repayable annually on August 1st, at Union Bank, Roblin, Man.

C. A. HULSE,
Secretary-treasurer.

Consolidated S.D. of Makaroff.

TOWN OF MAPLE CREEK, SASK.

DEBENTURES FOR SALE

SEALED TENDERS, marked "Tender for Debentures," will be received by the undersigned up to 12 o'clock noon of **Monday, the 25th of August,** for the purchase of the following issues of Debentures of the Municipality of the Town of Maple Creek:—

Grain Exchange Building, Calgary - J. F. Porter, „

The feature of the July shipment from Northern Ontario's mining camps is the heavy output of the Alexo Mine at Iroquois Falls for the month. Twenty-two cars of nickel ore, containing 1,588,500 pounds were sent from Iroquois Falls station by this company to the Mond Nickel Company. This is the heaviest monthly output made from the operations conducted by this new nickel company.

Viscount Selby, chairman of the Eastern Canada Company, has hopes of the oil-producing possibilities in Gaspe Bay district. Shipping facilities there, he says, are admirable in view of the increasing attention being given to the adoption of oil in the Royal navy and the decision of the Government to secure supplies as far as possible within the Empire.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

VANCOUVER'S JULY FIRE DEPARTMENT RECORD.
